**WITH THE EDITOR.**

There are probably several hundred public school teachers among our readers, but it is for the benefit of school patron readers, who number many thousands, that a certain little book has been chosen for discussion here With The Editor.

One reason why parents, the average parents that is, are so indifferent about the schools is that they know so little about them. One reason why they think anyone can teach school is because they have practically no conception of the gifts and the training necessary to adequately equip one for the work of teaching. A story which gives a picture of school life governed by twentieth century ideals of a school, and taught by a competent teacher, is a sort of home missionary. It should be given wide circulation. Its truths should be announced from pulpit and editorial sanctum by all who see the necessity of the time for better educational methods and better teachers. This need is especially great in rural schools where methods are usually behind the times and teachers so ill paid that low-grade service obtains. If I were rich enough I would place a copy of "Jean Mitchell's School" in every traveling library in the country. I feel confident that it would stimulate teachers and directors and patrons to improve their school.

The first chapter in the story—a story written with the distinct purpose of showing "the vital relation of the work of the school to the life of the child"—is entitled "The New Teacher." Its opening paragraph describes a not uncommon state of affairs:

A new teacher had been engaged for the Morrisville school. There was nothing at all surprising in the fact itself, for teachers came to the place and went away again in a monotonous procession. Now and then some spirit, bolder or less sensitive than its predecessors, remained for a ten months' term, a feat which was chronicled with mingled respect and admiration by the loungers at the village store; but such victories were achieved only by constant warfare, and the conquerors usually declared with emphasis that a worse school could not be found anywhere.

The boys and girls themselves beheld their instructor depart with few feelings of regret, while they looked forward to the next arrival with eager anticipations of triumph.

The main qualification upon which the trustees strenuously insisted was strength. Every applicant for the position was carefully viewed, and if he or she seemed strong and muscular the officials nodded their wise heads and agreed to "try it once more."

Jean Mitchell did not meet the requirement of physical strength. How, lacking this requisite, she succeeded in securing the position, puzzled the village gossips. The director's apologetic explanation was: "I really believe I engaged her 'cause I kinder wished I'd had jest sich a teacher when I was a boy. She can't do no wuss than the last six or eight we've had, an' goodness knows they was strong enough." Scotch Sandy, the village oracle, on hearing these words shook his head, saying: "I wonder at ye engagin' her because she had pleasant ways! The pur young lassie! Ye should ha' had peety on her. I gie her a week to stay."

But the close of the term saw Jean Mitchell considering the urgent entreaty of the directors that she should return after the holidays. Her "pleasant way" was the outward and visible sign of an inward grace, a sanity, wisdom, strength and sweetness which enabled her to bring a hard school into kindly co-operation and one by one to win the most lawless and churlish to a spirit of loving obedience and good fellowship.

Everything depends upon the beginning. The story of Jean Mitchell's first day makes interesting reading. We commend it to our readers. One of the first plans she executed was that of transforming the schoolroom from dreary barrenness to cheerful beauty. In this transformation the children had a large part. Everyone, even the tiniest, did something. Walls and windows were cleaned, woodwork scoured, curtains made and hung, pictures cut and mounted; they gathered boughs and berries, acorn clusters and deserted birds' nests, and hung specimens of their work in number, language and drawing. And the best of all was it was not mere decoration. Everything had a direct

bearing upon the children's school work, a distinct influence upon their lives.

It is necessarily impossible in this little talk to sketch the story in anything like detail. A touch here and there to suggest the underlying spirit at work, the methods and the results achieved, is all that can be given.

Miss Mitchell was full of devices to interest the pupils. Every month was made to teach new lessons and increase the attractiveness of the school. In October the autumn vines and the departing birds told their stories. In November there was Thanksgiving to learn about and prepare for. The story of the coming of the Pilgrim Fathers was all worked out on a sand table. England, Holland the Puritans, the ocean, the ship, the landing at Plymouth Rock—to the delight of the children who had no idea they were being taught history and geography. December brought Christmas and the school treat with its gifts made by their own hands. February, with the birthdays of Washington and Lincoln, furnished opportunity for talks and essays cultivating love of country and the desire to live noble lives. Each month had its calendar, its song, its special blackboard decoration, and its events, conditions and lessons were made to correlate with the work of the school.

New fangled ways may be trusted to provoke suspicion if not opposition. The patrons did not all approve of the teacher's methods and occasionally a disgruntled parent paid the school a visit. Usually his conversion dated from that day and he went away saying, "The hull thing is agin my idee o' what should be done, but I guess you're right. You fix the studies to suit yourself and we'll stand by you."

As I talk about "Jean Mitchell's School" the conviction grows upon me that it is a book that should be read rather than talked about. If this desultory chat incites to the perusal of the book, my purpose will be served, otherwise little will have been accomplished.

**HOME AND HOMEMAKING.**

**LITTLE HELPS BY THE WAY.**

Prayer is the stairway to heaven,  
And whoever will may climb—  
The child in his morning beauty,  
The sage who is bowed by time,  
The king in his royal raiment,  
And the outcast clothed with crime;  
Prayer is the stairway to heaven,  
And whoever will may climb.

These are prayers of that sweet and simple soul, Robert Louis Stevenson, and the other is the prayer of Bishop Huntington. These were the first two prayers. In the morning: "Give us to go blithely on our business all this day. Help us to perform our duties with laughter and kindly faces; let cheerfulness abound." In the evening: "Give us health, food, bright weather and light hearts; give us to awake with smiles, give us to labor smilingly." These two prayers were found among Mr. Stevenson's papers after his death. The prayer of Bishop Huntington was: "Grant, I beseech thee, merciful Lord, to thy servant pardon and peace,

that I may be cleansed from all my sins and serve thee with a quiet mind."

**THE BEST LIFE PARTNERS.**

Men seldom ask the girls with whom they laugh and bandy jokes to share their homes. They enjoy being amused for an hour by the girl who is witty and clever, who is sparkling and gay, and they will heap admiration to the full measure upon the girl who is beautiful. Yet how seldom do they think seriously about making such women their wives! Men are, as a rule, far cuter than folks imagine when it comes to the point of marriage. True, so many sacrifice everything for the sake of a pretty face, but the majority are wiser in their generation. They see the mistakes of others and take warning. Beauty fades, wit and clever-

erness pall if they are backed up with no more solid virtues, and the happiness and comfort of a home cannot depend upon the power of being amusing. When a man marries he wants a helpmeet, not a beauty upon whom he must be forever dancing attendance, not a brilliantly clever woman, at whose feet he must forever be sitting in admiration, but a woman full of love and sympathy, a partner who can bring into the partnership what he himself lacks, one who will help him, and for whom he will never tire of working and serving devotedly.

## CONUNDRUMS.

What bird can lift more than an elephant?  
A crane.  
What bone is hollow and is used as a horn? The trombone.

## NO END.

"Every time it snows the papers say that it assures the wheat crop. When will they let up on the wheat?"  
"No let up to it. It's a cereal story."

## THE COOK.

To Bake Ham—First soak the ham (a whole one) in water over night. Then rinse, scrape and place it in water over the fire. Having allowed it to boil gently two hours, remove it from the water and take off the skin. This done, place the ham in a large dripping pan and bake it in a very moderate oven for three hours, basting it frequently. Use for the basting a cupful (generous measure) of vinegar, in which a tablespoonful of brown sugar has been dissolved. Pour this over the ham in quantities of a few teaspoonfuls at a time, and when it is all consumed, baste with the drippings from the pan. Hams cooked in this way are always tender and of most excellent flavor.

Pressed Chicken—The chicken should be liberally seasoned with celery salt and paprika, and boiled until very tender. Remove the bones and skin and cut the meat in small pieces. Boil the liquor down to a half pint, moisten the meat with this, and pack in a buttered mold, alternating with chopped or sliced hard-boiled eggs. Cover with a plate, place a weight on it, and set in a cold place over night.

Peanut Brittle—Shell and remove skins from two quarts of freshly roasted peanuts; pound, or roll until slightly broken; sift the peanuts lightly, allowing the finer portions to fall on an ordinary bread board sufficiently thick to cover the board; set the rest aside. Put one pound of sugar into an iron saucepan; stir over the fire until it melts and is slightly brown (not scorched); stir in just as many peanuts as the melted sugar will hold, and turn out quickly on the board covered with fine broken kernels; roll out thin, cut in squares and let cool. Walnuts or hickory nuts may be used instead of peanuts.

## IMPORTANT LITTLE THINGS.

For, verily, after much meditation and experience, I have divined that it takes as much sense and refinement and talent to cook dinner, wash and wipe a dish, make a bed as it should be made and dust a room as it should be dusted, as goes to the writing of a novel or shining in high society.—From Rose Terry Cooke's "Somebody's Neighbors."

## ECONOMICAL SUGGESTIONS.

I never throw away a bit of fat of any kind, no matter how badly it is burned, but pour it all into a crock. When I have a gallon or more I put it into a large kettle with twice the quantity of water. When the fat is all dissolved, I let it boil for about twenty minutes, then cool it. When it is hard I take it all off and "render" it down and pour back into the crock. The result is a nice lot of pure, clean fat, much better than lard for pies, and for cakes, also, by adding one-third butter.

I always keep a clothespin near the sink

## The one water-proofing which resists and lasts is natural asphalt.

Resists all atmospheric conditions, also steam, gases, alkalis, acids, and everything that commonly attacks a roof.

The day of the coal-tar roof is past. Genasco Ready Roofing, with its tough, pliable, enduring asphalt-life, is just as far ahead of it as the electric light is ahead of the tallow dip. The Trinidad Lake Asphalt which we put into Genasco, is the standard by which all other asphalts are compared, just as Genasco is the standard roofing of all roofings.

Easy to lay—smooth and mineral surfaces, several weights.

Ask your dealer.

Write for Book N and samples.

PHILADELPHIA

New York San Francisco Chicago

## This is the Harness I Make and Sell You Direct By Mail for \$24. Your Dealer Would Ask You \$35 for It.

### All Shipments On Approval

WHEN you were a boy you went 'cross lots when you wanted to get there in a hurry. You didn't care for fences—you went right over them.

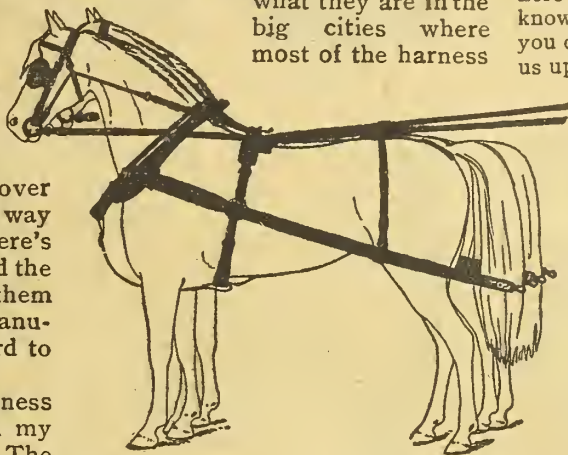

Now when you buy harness why don't you buy by the 'cross-lots method? In the old way there are a lot of fences and if you don't climb over them it's a long, round-about way from harness maker to you. There's the fence of the wholesaler and the fence of the retailer—jump them both and go straight to the manufacturer. You will save a third to a half.

I make 50 styles of good harness and I make them right here in my own factory in Waterloo. The whole business is under my own supervision. I know the men and I know what they can do. They are all skilled harness makers and I pay them enough so they feel right and do good work.

I use only the best oak-tanned leather—I buy every bit of it myself so I know what's going into my harness as well as how it is made.

There's cheaper harness sold than mine but as far as I've been able to find out there's no harness anywhere near as good as mine

that is sold for as little money. Our expenses here in Waterloo are low—very low compared with what they are in the big cities where most of the harness

sold by dealers and mail-order houses, is made.

And then, when you buy from us you are paying only one profit and that's not a very large one. We believe big sales at small profits are better than big profits and small sales.

I've told you about the harness—how good it is and how we save you money. Now I want to tell you about our firm. There's not a more reliable and honest concern in the country than the Western Harness & Supply Co. The men that

are associated with me are men who stand high in this community. You can ask any Bank or Express Company right here in Waterloo, where we are best known, what sort of fellows we are, or you can go to your own bank and look us up in Dunn or Bradstreet.

All our shipments are made on approval. If you are not satisfied with the harness when you get it and have examined it, you are to send it back and your money will be refunded together with transportation charges both ways.

As I said before we make 50 styles of harness—all are good and all are sold at a mighty low price but the set illustrated here we call our "leader." The cut gives you a fair idea of it. It's a genuine bargain—a splendidly made 1½-inch team harness, strong and stylish in appearance and made of the very best grade oak-tanned leather. It is actual-

ly worth more today than it was when we made it up, because leather is advancing in price, as you may know.

So, if you want this special harness value, please order promptly. Just send me the money, \$24, and the harness will go to you at once with the distinct understanding that I will refund the price and pay charges both ways, if you are not perfectly satisfied.

My big, free Harness book is full of money-saving offers. Send for it and compare our prices, styles and qualities with what your dealer offers. Write me today. Address R. M. Knox, Pres.

Western Harness & Supply Co.,  
613 Main Street, Waterloo, Ia.

for scraping pots and kettles that have been burned or are otherwise hard to clean.

For mixing flour with milk or water for thickening I always use a fork. It never lumps, and it takes less time.

For an old-fashioned Yorkshire pudding, cooked under a roast of beef: Take four fresh eggs, beaten very light; one pint of milk, one pint of flour, sifted twice, and one-half teaspoonful of salt. Beat the whole for ten minutes. Raise the roast on a rack, turn out most of the gravy, pour the mixture into the hot pan and bake for twenty minutes. Be careful not to shake it for the first ten minutes.

When frying down sausage for summer, one can make better headway by making the cakes the evening before. Then use a large bread pan and fry them in the oven. Also have the largest kettle you possess filled half full of very hot grease and put in as many cakes as you can conveniently handle. A few slices of raw potato added occasionally will clarify the grease.

Spare-ribs fried down and put away as you do sausage makes an agreeable variety of meat through the summer.

### AMONG OURSELVES.

A delightful proof of the truths of the "circle" thought given to our readers in the January 3d With the Editor has just come to me. Some years ago among the Band of Mercy members was a bright girl who learned to love "all harmless living creatures" dearly and frequently wrote rhyming verses in their behalf. The girl is a grown-up young lady now and the sweetness and the helpfulness gendered in the Band of Mercy days is fruiting in the sunshiny desire to work anywhere she can "help the least bit." She hopes we have room Among Ourselves for her and by way of entrance for dues sends us some verses. "Somebody Smiled" should make music in our hearts. It surely will if we open them to its message.

#### SOMEBODY SMILED.

I was weary and tired, and life was gray;  
My heart was cold and so was the day;  
But somebody smiled, and then, and then,  
My heart was cheery and warm again.  
Somebody smiled; 'twas a little thing,  
And yet, what comfort smiles can bring!

A sorrow came to be my guest;  
The sun went down in the somber west;  
And the night was black as Pluto's realm.  
I drifted—a ship without a helm—  
Till somebody smiled, and then a star  
Of hope arose and shone afar.

Somebody smiled; what matter who?  
But, oh! resolve that it might be you.  
For sometimes one smile will save a soul,  
Wrecked where life's fiercest billows roll.  
Only a smile; 'tis a little thing,  
But, oh! the good a smile can bring.

—L. A. J.

"Somebody Smiled" could be written by one kind of young woman only. We like the kind. Miss Lillie Johnson is herewith made a member of our circle

and cordially invited to scatter sunshine among us as frequently as other duties permit.

Book talks are not coming in as they should; perhaps this little offering of "Skipet" will stimulate lagging contributors:

For ten years I have been a silent reader of this good paper. Perhaps mention of some of the late books may help the friends: "Hester of the Grants," a story of the battle of Bennington, is excellent; "Col. Carter's Christmas" is a pretty story of a southern gentleman being kind and loyal to others, showing the right Christian spirit; "The First of the Hoosiers," by George E. Eggleston, is a biography of the life of Edward Eggleston well told. A good book to put into a boy's hand, except, perhaps, for his later religious convictions; but boys have to thrash out the wheat from the chaff on all subjects. Among the historical books for boys there are none better than the Heuty books. Though a boy don't want to feast entirely on such strong food. The quotations in the Home Department "Little Helps by the Way" I save mostly, and then pass them on to my friends by letter as a message of cheer and encouragement.

I wonder if many of the friends memorize those "Little Helps"? I wish they would. From experience I can testify to their value as nerve calmers, heart strengtheners, and sleep-producers. I have a rosary of choice gems from among them which I tell over as I ride in the street cars, lie resting in the gloaming or waken in the night watches.

There are friends who speak to us only once in awhile, but who are constant and appreciative members of this gathering. Of such is Mrs. Ruth English, of North English, Iowa, who has a few words for us this week:

I have been much interested in the discussion of the subjects treated lately in the Home Department. Our industrial system is to be blamed for much of the divorce evil, forced marriages, women being compelled to work beyond their strength and little children working in mills and factories. One of the friends blamed the men for allowing the women to work outside. They are to blame in one way, for they have the ballot and by using it intelligently they could have the full product of their labor instead of being content with a small part and letting the rest go to men who are already drunk with too much wealth. In one of the editorials recently Mrs. Walker talked of contentment. No one can be perfectly happy as long as any of our sisters or brothers are starving and are poverty-stricken in this land that God has given such wonderful resources. The editorial containing an excerpt from Mrs. Gilman was fine. There should be more homes, fewer tramps, less employment of girls in department stores and other places where they are almost compelled to be immoral or where the temptation to do wrong is very strong.

If laws could do all Mrs. Miller thinks they would and we could have the laws

## Wouldn't You Like

to have us show you the wonderful opportunities existing in the South, and how you could improve your present condition?

### THE "Seaboard Magazine"

Devoted to the agricultural and industrial development of the South, will point out the many advantages of a location in our mild climate, where life would be a greater pleasure as well as profit by reason of being able to carry on work throughout the entire year. Why battle against the elements? If you want a stock or grain farm, a fruit farm, truck farm, where lands are fertile and productive, in fact, anything, and want it in Virginia, the Carolinas, Georgia, Alabama or Florida, the magazine will assist you. Sent FREE on request, together with other handsomely illustrated literature descriptive of the South and its wonderful resources and progress.

Special low round-trip rates for homeseekers, prospectors and investors.

J. W. WHITE, General Industrial Agent,  
Portsmouth, Va.

Seaboard Air Line Railway, Dept. "S."

she believes in, I wonder, I honestly do, if the world would really be revolutionized and if it were, how long it would remain a serpentless Eden? And at the same time I do firmly believe that the laws are great molders of public sentiment and potent forces in the life of the nation.

A Foster Mother brings for our consideration a problem which I shall be very glad to have thoroughly discussed here Among Ourselves:

I would like to ask the opinion of the readers of the Home Department as to the advisability of taking orphan children to raise. There are so many of these motherless, homeless little ones in the orphanages of our large cities and it seems to me in this great farming country of ours there is so much room for them in our many good country homes. Not to make drudges of them (God forbid), but to give them wholesome homes. They surely are entitled to not a little consideration. It takes so little to make a child happy, and friends, isn't it worth while? We have two children in our own home, brother and sister, who are orphans, both parents being dead. By the way, I would take no other than ag-

tirely orphaned children. My parents raised three orphans, so I have had quite a little experience in this work. However, I love children, and let me say to those who do not, under no consideration take orphan children into your home. Love for children must be in your hearts or you will be lacking in patience, for children are trying many times. I fail many times, but I try to profit by my failures and keep persevering, hoping that the end will not be a complete failure at least. We surely can do more for them than was being done where they were. There are many sides to this question and I will write more of my own experience if anyone is interested in it; however, my object in writing is to receive help from the opinions and experiences of others.

There are probably numbers among us who have adopted children in their homes. Will not these friends come and give us their experiences, frankly and fully? If they will we shall be greatly their debtor.

Like so many of the new members Mrs. Mary slips softly into the circle and rises to her feet with some heart trembling. Don't be nervous, friends; you are certainly welcome:

Being a newcomer in this department, although I have been a reader of the paper for several years, I am a little afraid as to how I will be received. But as I have a few little helps to offer, and a request to make I will venture in. Do all the sisters know that in preparing their apple butter for the stove, if instead of cooking on top of the stove they would place it in the oven on wash day they would have a great deal less work, as it only requires stirring once in a while, and we like the flavor a great deal better? Here is also a little saving when the shoulders, collar and sleeves of men's shirts are worn: The good parts make good underclothing for little tots. I am always interested in the mother's talks, as I have six little ones, the eldest but nine years.

#### Dressmaking and Millinery. No. 553.

Sylvia Silverthorne, Muscatine, Iowa.

[All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

The embroidered collar and cuff sets are in especially high favor, and as their vogue is promised to continue throughout the coming summer it will be wise for us to provide ourselves with several of these, or at least with the collars, if we do not care for the cuffs. They may be made at home, being simple in design, either in openwork or blind embroidery. The edge is worked in scallops in buttonhole stitch, and the chosen design is arranged in the corners. The turnover part of the collar is straight and is joined to a band that is shaped like the shirt waist stock, so no special pattern is needed.

Negligees of the kind shown in No. 5481 have become general favorites, so that few wardrobes are without one or more of these made up in simple or more elaborate modes,

## STEVENS

### Firearms

Girls enjoy shooting and profit by it no less than do boys. Decisiveness, self-reliance and sound health result from hours spent in the open. Give your daughter a "Little Krag" rifle, \$5.00

#### Write for Our 140-page Free Catalog

Any man or boy or girl interested in firearms will find it full of helpful information on hunting, proper care of weapons, notes on sights, ammunition, etc. Why not write to us to-day? Send four cents in stamps to cover postage.

Ask your dealer—insist on Stevens. If you cannot obtain them, we ship direct, express prepaid.

H. C. GUMBEL

scale you like best. I will ship it to you all ready to do business as soon as it is set up on your place. If it doesn't suit you for ANY reason, I will take it back, pay freight BOTH ways and send you a check to cover the expense of setting up and taking down the scale.

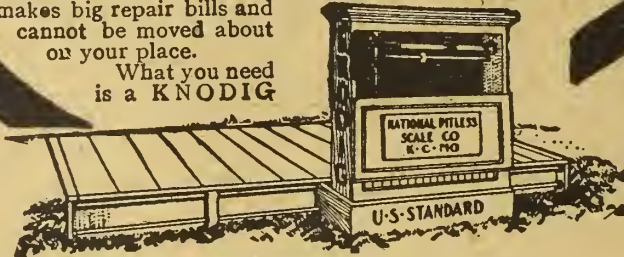

How's THAT for a liberal offer? I couldn't afford to make it unless I was absolutely SURE that my scale was right, could I? Well, I DO know it. You see, I make the "KNODIG," and can afford to stand back of it. My 10-year guarantee shows how much faith I have in it. No other scale is backed up by the manufacturer as mine is.

\* \* \*

Now, you can't afford to buy one of those inaccurate, cheaply constructed Pitless Scales, which will do poor work and last only a year or two, nor a high-priced, old style Pit Scale which makes big repair bills and cannot be moved about on your place.

What you need is a KNODIG

My Scale is Used by the U. S. Government in the Post Office at Kansas City

according to the purpose for which they are intended. These garments are loose and are always made without lining, and are made up plain or with simple banding, as pictured. There are many materials especially suited to these, found usually among the large flowered or striped designs, but one's taste must govern her choice after all, and often preference is given to small, neat, figured patterns, or to a plain material. In all cases where any attempt is made to follow out the "original" idea of the kimono the banding used about all the edges is of plain cloth and it may contrast with or harmonize with the color of the design in the body of the garment. This banding may be applied as a facing or it may be cut of sufficient width to allow of it being used

[5481—Tucked Kimono, small, medium, large.]

double, in which case it is applied on the edge. In using pattern No. 5481 the sleeves may be cut full length and be then left free or gathered to a band as liked. It is not necessary to alter the shape of the sleeve for this. If preferred the lapels may be cut off where they fold back, and the usual "kimono" finish be used instead. For cold weather wear the fleece-lined flannels in either cotton or woolen material is often selected, but when warmth is not a consideration, challies, the soft woolens or half-woolen materials and other light weights are

selected for these. As these garments are not required to "fit" snugly, the patterns are cut only in three sizes, small, medium and large. (The small should be ordered for bust size 32 or 34. Medium 36 or 38, and large for 40 or 42. The latter may also be used for 44 if desired.)

No. 5269 is an old favorite in a night gown and one that is varied but slightly from season to season. As pictured it is made either with high neck and roll-over collar or the yoke is cut out to give the half-low neck that many have come to prefer for such garments. This low, round yoke is cut from all-over embroidery, and finished with narrow beading. Even when the high-neck style is adopted the yoke may be made as fancy as one likes, and all-over embroidery may be used or alternate rows of embroidered banding and tucked or plain cloth. For such garments cambric or long cloth is preferable to the heavy muslins, and the latter especially is so easy to iron.

[5269—Round Yoke Night-Gown, 32 to 44 bust.]

No. 5269 is cut in size for a 32, 34, 36, 38, 40, 42 and 44-inch bust measure. Give size when ordering pattern. Can furnish the square yoke gown if preferred, and is so etated in the order.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

#### A GOOD INTRODUCTION.

Some years ago, Macbeth, the lamp chimney maker of Pittsburgh, sent 200 boxes of chimneys to Australia, to be sold by the box for what they would fetch at auction. They brought thirty cents a box more than freight and handling and auctioneer's

PITLESS, which costs you a little more at the start than the "cheap" scales sold by the Mail Order Houses, but is the best investment in the long run because it lasts a lifetime.

The "KNODIG" costs from \$30 to \$50 less than a Pit Scale, and is as good as ANY scale made at any price. Ready for instant use when you want it. No snow or ice to cut away from the bearings in winter—no dirt or dust to clean out in milder weather.

The KNODIG PITLESS SCALE can be moved anywhere on your land, wherever the work happens to be. It is personal property. My plan saves you all the middlemen's profits. Deal direct with me. No Agents, Salesmen, Jobbers or Dealers stand between you and my factory.

Why should you pay from \$30 to \$50 more for the empty privilege of buying through an agent or dealer? Does it make the scale you buy any better? Does it add one single penny to its value? Then why not save the middleman's profits and keep them in your own pocket?

Remember, I am willing to PROVE that the "KNODIG" Pitless is the scale you need. I will send a set to you or to any responsible Farmer, Stockman, Elevator Man or Grain Dealer on a month's free trial. Write me personally for the new Knodig Pitless Scale Catalog. It contains over 40 fine half-tone pictures that will interest you.

The book is free. You will want to see it. Write for it today to

fees. But, falling into the hands of wholesale dealers, introduced themselves; and now Macbeth enjoys the leading position in the Australian trade.

#### THE TELEPHONE ON THE FARM.

We have lately received from the Stromberg Carlson Telephone Manufacturing Company, of Rochester, N. Y., a booklet which they have just issued especially for their friends in the rural district. This book has been prepared with a view of placing before the farmer in as brief a manner as possible the various uses of the telephone on the farm. We quote from it: "The value of this instrument in rural life cannot be overestimated. It saves time and eliminates space. It saves many a trip to town and to the neighbors, both of which may be located many miles away. By thus saving many a long trip, the day has been materially lengthened and opportunity given for other important work at home, otherwise, it would have to wait until the next day and possibly much longer. Much time is thus saved which in the busy season is of great value and means many dollars to the farmer. This booklet will be of value to those of The Homestead readers who are interested in the telephone. It can be had by addressing the company as above.

There seems to be a general complaint of poor galvanizing on fence wire. The complaint has become so general as to attract the attention of the United States Department of Agriculture and they have taken the matter up with the view of investigating conditions and giving practical information from time to time to fence users. The time was when galvanized fence wire could be relied on to last several years, but now, in many cases, it begins to rust soon after put up. Messrs. Kitzelman Bros., of Muncie, Ind., fence manufacturers, claim to have an improved process of galvanizing wire that adds much to its lasting qualities. They have just issued a ninety-six-page catalog fully describing the above process. Upon request it will be mailed free to all readers of The Homestead. We trust all of our friends will write for it. If there are any improvements made we want our readers to know of them. See advertisement on page 18.

## LIVE STOCK SALES

## The Bloomington Horse Sale.

The breeders' combination horse sale held at Bloomington, Ill., on January 9th, 10th and 11th was a pronounced success. Breeders were present from many states and the prices received were very good, considering the large number of horses disposed of. The registered stock was sold on January 9th and 10th and a full report follows. Buyers from the following states were present: Ohio, Illinois, Iowa, Indiana, Missouri, Kansas, Nebraska and Oklahoma. This sale was ably conducted under the management of Mr. C. W. Hurt, of Arrowsmith, Ill. The highest price realized was \$1,400, at which figure the six-year-old percheron stallion, Absalom, consigned by Mr. D. Augustin, of Carlock, Ill., went to Mr. L. Potter, of Deer Creek, Ill. Colonels Harriman, Snyder and Brown conducted the selling. A full list of sales is given below:

Absalom, six years, sire Kellermann, L. Potter, Deer Creek, Ill.	\$1,400
Grant, three years, sire Dewey Ditt, M. W. Miller, Gallon, Ohio.	915

Paramount Lass, one year, sire Boer, same.	510

## TRY THIS MILL

10 Days Free.

I will send any responsible farmer one of

DITTO'S

Latest Double Cut, Triple-Geared Ball-Bearing

Feed Grinders

On Ten Days Trial—No Money In Advance.

If it does not grind at least 20% more ear-corn or other grain than any other two horse sweep mill made, send it back at my expense. Don't miss this offer. Ball-bearing throughout. Only 10¢ sweep. Light draft. Grinding rings never touch each other—they last for years. Both grinders revolve, self-cleaning. Ask for new Catalogue.

G. M. Ditto, Box 12 Joliet, Ill.

## THIS MILL ON TRIAL FREE 20 DAYS

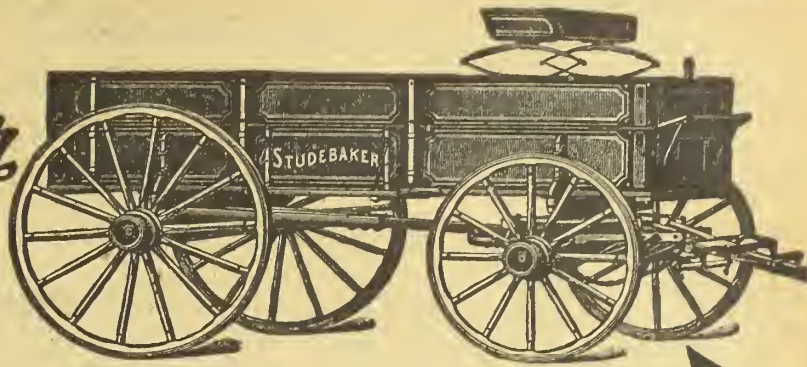

We'd like to tell you how we send our "Corn Belt" Feed Mills on 20 days trial free, and why it's the mill for you to buy. This is the one mill you'll like better the longer you use it. 20 days gives you time to see how it works—how it's made. "Corn Belt" Mills grind all kinds of grains evenly and rapidly. Write today for free catalog describing full line of sweep and power mills.

Spartan Mfg. Co. 202 Chambers St., Galveston, Ill.

## How a

Studebaker

## Saves You Money

THE way to figure the cost to you of a wagon, a carriage, a buggy or a set of harness—

Is to figure the cost per year as long as you use it.

If a farm wagon, for example, that costs you \$60 lasts 20 years and requires only \$2 repairs, the cost to you of that wagon is \$3.10 a year.

If another wagon costs only \$50, and lasts 10 years, and requires \$10 worth of repairs, the cost to you is \$6 a year, at least.

Which is the cheaper?

There is no doubt about the lasting qualities of Studebaker wagons, carriages and harness.

It's the material that goes into them—plus the way they are made.

Studebaker farm wagons have axles  $\frac{1}{4}$  inch deeper than others, made from selected butt-cut Black Hickory—air-dried from 3 to 5 years.

The axles are also re-inforced with a special bar of steel running from the heel of one skein to the other.

The Studebaker Patent Truss Skeins are made from cast iron having a transverse strength of over 3,000 pounds to the

square inch—25% greater than the requirements of the United States Government—and probably 50% greater than the ordinary wagon.

The Studebaker hubs are large in diameter—furnishing a proper foundation for the spokes. They are treated with a secret solution, which greatly adds to their weather resisting qualities.

The Studebaker slope-shoulder spokes—one of the greatest improvements ever made in wagon building—carrying the largest amount of wood into the hub. They are strongest where other spokes are weakest.

The Studebaker patented round-edge tires are oil-welded and cold-set. That's why they never loosen.

And so on—point by point—feature by feature—nothing that will add to the durability and long life of the

Studebaker is overlooked.

Do you wonder that it lasts?

Do you wonder that it is the wagon with a reputation behind it?

You cannot afford to buy a "cheap" wagon, when you can get the best for so little.

It is poor economy to be constantly paying out money for repair bills.

Get a Studebaker and save money.

## See the Studebaker Agent

## Go to the Studebaker Agent

and examine the Studebaker for yourself. Ask him for a FREE COPY of the Studebaker Almanac for 1907. If you don't know the agent, write us. Enclose a 2c stamp and we'll send you the book free. Please address Desk 39.

## Dawson's Sale a Great Success.

The great sale of Poland China bred sows made by Messrs. Dawson & Sons at Fairbury, Neb., January 12th was one of the most successful ever held in the state of Nebraska. The offering was in fine condition and up to the expectation of every breeder and farmer present. Those from a distance were royally entertained at the best hotels in the city and we are sure that every man that made a purchase at this sale felt that he had his money's worth. No. 1 May Queen, topped the sale at \$200, going to the well known herd of Chas. Lewis, of Beatrice, Neb. She is a daughter of old Expansion and surely one of the good sows of the breed. There were breeders from several different states present and the good things of the sale were stubbornly fought for. Below is a complete list of the sales.

Lot	Name	Price
1	Chas Lewis, Beatrice, Neb.	\$200.00
2	J. H. Hamilton & Son, Guide Rock, Neb.	120.00
3	McKeever & Sons, Hubbell, Neb.	145.00
4	John McFarlane, Fairbury, Neb.	92.00
5	Albert Smith, Superior, Neb.	115.00
6	J. A. Monroe, Fairbury, Neb.	95.00
7	Geo. Morehead, Beloit, Kan.	103.00
8	John McFarlane	110.00
9	E. Holey, Narka, Kan.	72.50
10	J. A. Monroe	70.00
11	John Hidelk, Fairbury, Neb.	60.00
12	J. H. Simkins, DeWitt, Neb.	107.50
13	Lee & Clawson, Grand River, Ia.	170.00
14	F. R. Barrett, Cadams, Neb.	112.00
15	J. B. Simkins	110.00
16	W. R. Jones, Fairbury, Neb.	34.00
17	Andrew Johns, Rosendale, Mo.	62.50
18	Clay Dawson, Lincoln, Neb.	35.00

## SUMMARY.

40 head sold for	\$3,100.00
Total average	77.60

## ADVERTISING NOTES.

The W. Smith Grubber Co., of LaCrosse, Wis., whose advertisement appears on page 4 of this issue, request Homestead readers to write for prices on their cement post machine.

Mr. J. M. Cowan, of Emporia, Kan., requests Homestead readers, in his advertisement on page 24 of this issue, to write him for his special bargain list of farms and ranches for sale.

Messrs. Buchanan & Patterson, of North Platte, Neb., have good farming and grazing lands located in Lincoln county, Nebraska, which they are offering for sale in an advertisement which appears on page 24 of this issue.

Agents can make an average of \$7 per day selling the pump equalizers made by the Equalizer Manufacturing Company, of Waseca, Minn. See advertisement on page 8 and write them for particulars, mentioning The Homestead.

The Homestead readers are invited by the Patrick Investment Company, of Denver, Colo., to come to sunny Colorado. Their advertisement appears on page 24 of this issue. They have dry or irrigated lands, farms and garden tracts for sale. Write them for list.

Messrs. Bingaman, Bolin & Johnston, of Maryville, Mo., have bargains in Nodaway county farms at prices named in the advertisement, which will be found on page 24. They also have the best of coal and mineral lands in other sections of Missouri for sale. Write them for list and prices.

Messrs. Nolterieke Bros., of Greene, Iowa, or William Nolterieke, of Charles City, Iowa, have a 120-acre farm located five miles from Charles City which they are offering for sale on page 24 of this issue of The Homestead. For particulars, call on write to either of the parties named in the advertisement.

Good farm lands in Old Virginia, in mild climate, are offered for sale by Messrs. Casselman & Co., of Richmond, Va., on page 24 of this issue of The Homestead. Write them for their free illustrated catalog and large list of farms they have for sale in that state. They desire to hear from every northern farmer who desires to better his condition.

Messrs. Wm. Ernst & Son, of Tecumseh, Johnson county, Neb., announce in an advertisement which they have on page 26 of

# Let Me Quote You A Price ON (We Pay the Freight) THE AMERICAN Manure Spreader

We will send you the famous American Manure Spreader direct from our factory, because we've stopped selling this celebrated machine through jobbers and dealers. You save their profits now. You get the wholesale factory price on the best Spreader made—not a "cheap" Spreader, but the best one in the market.

## I Don't ASK You to Send Cash

As we send you the American and you pay us on easy, liberal terms—letting the Spreader really pay for itself if you use it—after you've tried it free. You now get the American, recognized as by far the best Spreader, for no more than you must pay for an ordinary Spreader. It is the

## Lightest Draft Spreader Made

That saves your horses. The machinery works only when you start it in your fields—is at rest as you drive out. That saves wear and tear on the Spreader. And you ought to use a Manure Spreader. An American Manure Spreader will make your manure cover more ground, your ground grow more crops, your crops bring more money, and it will make your land worth more dollars per acre. The American has 40 per cent more exclusive features than any other Spreader. I want to tell you about it.

American Harrow Co., 145 Hastings St., Detroit, Mich.

these practical exclusive features which make the American the only Spreader for you to buy at any price. The American is the Standard of the world. We allow

## 30 Days' FREE Trial

on every American Spreader made. We want every customer to see and try an American Spreader. We want every customer satisfied and to prove that our spreader is just as represented, therefore we say

## Test It in Your Own Fields

If it is not just as represented you can return it. We pay all freight—BOTH ways—trial being FREE.

My low price is for the American Manure Spreader delivered at your station—freight paid—including free trial—giving you the dealer's and jobber's profits, and—

## If Satisfied—Take Your Time Paying

for your American Manure Spreader. Now, I want you to know my new low price and I want you to know all about the American Spreader.

## Write Today for My Price

and I'll send it promptly. Also my free catalogue and booklet, which tell you all about the American Spreader, and Fertilizing. You'll be interested in both. You'll be glad you wrote. A postal will do. Don't buy until you investigate this. Take your time investigating, but—WRITE TODAY.

**W. W. Collier, Gen. Manager**  
American Harrow Co., 145 Hastings St., Detroit, Mich.

this issue, that they have a limited amount of new home-grown alfalfa seed which they are offering for sale at \$10 per bushel of sixty pounds. They also have meadow fescue of their own 1906 raising on which they are quoting a price in the advertisement referred to.

"It is a fact," said a wholesale grocer of Kansas City, in a recent talk with the writer, "that fully one-half of the sugar wholesaled from Kansas City is beet sugar and a great deal of this, too, is manufactured in our neighbor state—Kansas. It is in every way successfully taking the place of cane sugar." The Kansas factory is at Garden City in the Arkansas valley district. It was only a few years ago that sugar beet growing was looked up by many as political jingoism—a clap trap to catch votes. Today there are over thirty factories in the United States, which last year produced over 300,000 tons of sugar. The government's demonstration made it possible for hundreds of farmers who formerly were working on rented patches or as hired hands, to be clearing over \$1,000 a year on small tracts of land. These facts and figures were brought out in a conversation a few days ago between a Homestead representative and a gentleman who had visited Garden City viewing the beet sugar and alfalfa lands of the Great Western Land Company. The founders of this company, through shrewd foresight, procured 30,000 acres of land adjacent to the Garden City beet sugar factory. The Garden City farmer has almost eliminated the element of chance. In the first place, it was a fertile spot with an average rainfall of over twenty inches annually. But to this has been added a great irrigation system. Five big ditches traverse the country from which the orchards, alfalfa and beet sugar fields get just the right amount of water at just the right time for their crops. The water is pumped from a copious underflow which has been proven by government test to be inexhaustible. In addition to the big plant already operating, the national government is building a \$250,000 plant to amplify the existing service. In fact, there is scarcely a walk of life in which the toiler can get more expert advice and assistance than at Garden City. In the first place, the government fostered the beet sugar industry, and has in every way made a success with it possible. Then, too, the factory will give the newcomer explicit instructions in beet culture. It does not pay the factory as well to use beets with a low percentage of sugar as those containing a high percentage, hence it is on a keen hunt for the best seeds and improved methods. For the man who needs labor in his beet fields, the factory furnishes workers at a fixed price. An acre of beets will average twenty tons, which will bring \$5 a ton. The labor, if hired, will not exceed \$35 an acre and will average \$25, so the profits per acre will average \$75. The women and children of a household frequently work in a factory. When the sugar beet grower near Garden City is not working in his beet field, he is cutting his alfalfa crops, for the working seasons of sugar beets and alfalfa alternate. Three crops of alfalfa will be cut a season and occasionally four. The average yield is eight tons per acre, though twelve have been grown, and the grower says he can repeat this when furnished water by irrigation. Alfalfa sells for \$7 and \$8 per ton. The second crop of alfalfa is usually thrashed and the yield averages from five to six bushels of seed per acre, which will sell at from \$6 to \$10 per bushel. The straw is a good feed and is worth \$5 per ton. The Arkansas valley is a great fruit country also. Almost all of the tree fruits do well here, and the cantaloupes and melons are unrivaled. The soil, in fact, is a rich, warm, sandy loam which is easily worked and will grow anything. It has been washed down from the mountains and deposited by the Arkansas river. For the man in search of a good working farm, sure in its returns, the lands offered by the Great Western Land Company, of Kansas City, Mo., certainly seem to offer an attractive proposition. Their half-page advertisement will be found on page 24 of this issue and should be read by all interested in lands or in sugar beet and alfalfa growing. The company is made up of reliable people and are selling land at exceedingly low prices, having obtained control of a large tract before the prices advanced so materially.

## FINE TEXAS RANCH CHEAP.

Rich, black, sandy loam land at \$20 an acre is surely cheap. In this issue the Fairfarms Immigration Company of Kansas City, Mo., are offering 2,712 acres of fine land in Texas, with two miles of river front

## TENTS TO RENT

FOR STOCK SALES, ETC.

MANUFACTURERS of all canvas goods, also Silckering, a waterproof dressing for all canvas goods.

**Peoria Tent & Awning Co.,**  
Peoria, Illinois.

along one side, at the above price. This will make a fine ranch or it is suitable for general farming, as 90 per cent of it is tillable. This place is improved. It is in the healthiest climate in the world. Don't fail to read the advertisement on page 25 and write for further particulars.

## THE ASPINWALL POTATO MACHINERY.

Almost every potato grower in the corn belt has heard of the Aspinwall potato machinery. This machinery is almost as standard in the esteem of the people as gold dollars. A booklet has recently been written on the subject of potato culture by Mr. L. A. Aspinwall, the man who has devoted his life to the study of potato culture and to manufacturing machinery for handling the crop. This booklet will be furnished free upon application to the Aspinwall Manufacturing Company, of Jackson, Mich., and please mention The Homestead when you write.

## NO MORE THUMPS AND SCOURS IN PIGS.

Scours and thumps destroy hundreds of thousands of pigs in the corn belt every spring. It does more than that, as it "runs" a considerable percentage of the pigs that go through. These runts are rarely if ever fed at a profit. There is a remedy for these trouble, and it is called Anti-Scour. This has been extensively tried by experiment stations and by a large number of successful swine breeders. Four hundred doses cost but \$1. It is made by the Agricultural Remedy Company, of Topeka, Kan. Send to the above address for booklet entitled "Bigger Pig Money," and please mention The Homestead when you write.

## TEXAS LANDS.

Those who want land in the Panhandle of Texas should not overlook the advertisement of Messrs. Boyer, Peterson & Co., of Kansas City, Mo., on page 24 of this issue. They offer 18,000 acres near Canadian, the owner of which lives in Kansas City and will verify their statements. They have other tracts in Swisher county, in all about 15,000 acres, which they will sell in any sized tract from 160 acres up. In fact, they will subdivide any of the land they have. The Swisher county land is good, especially on account of water. This is a shallow water district and good water can be had at from twenty-five to fifty feet. This firm are reliable and sell Panhandle lands at bottom prices.

## A SPLENDID SHAVING SOAP.

Those who have never used Williams' Shaving Soap have a positive treat in store for them. This soap has been "standard" so long that one is apt to gain the idea that it is used by every man who shaves. This is not true, however, because substitutes for good soap are constantly being pushed forward, and there are those who by the use of these substitutes have been prevented from using the real thing. It would take a small book to enumerate the advantages of Williams' soap over the common kind, but only takes one shave with it to prove the matter better than any book. For four cents you can obtain a trial shaving stick of Williams' soap, enough for fifty shaves. Address the J. B. Williams Company, Dept. A., Glastonbury, Conn., and please mention The Homestead when you write.

## TELEPHONE WIRES ATTRACT LIGHTNING.

Any house with telephone wires is liable to be struck by lightning in the mildest storm, because live telephone wires are the greatest conductors of lightning known. Many of the country's most disastrous and property-destroying storms are laid to this very cause. To keep lightning out of telephones during a storm has been a difficult problem and has at last been solved by the W. E. Ashby Telephone Cut Out Company, 101 Square St., Chariton, Iowa, in their own invention known as the Pedigo Lightning Arrester. This invention is a simple device, easily installed and by simply pulling a knob

you disconnect your telephone, leaving the line wire dead, and free from any current. Wherever the arrester has been used it has always worked properly and successfully, and is known to be a life protector as well as a property saver. For any further information you can write direct to the manufacturer and inventors.

## A GOOD HOME COMPANY.

The Anchor Fire Insurance Company, of Des Moines, Iowa, report a fine year's business for 1906 and good prospects for a larger and better business for 1907. The Homestead is always pleased to record progress and growth of our home industries. We believe Iowa is good enough for Iowa people and in all lines of business, as well as our marvelous products from the soil, unmatched anywhere in the world, Iowa is taking a front place. No state of its age and population, nor at any time in the history of our country, has equaled Iowa in the industry of fire insurance. Protected and safeguarded by excellent laws, the Iowa companies have grown in business and strength beyond anything hitherto known. They are pointed to with pride and are entitled to the confidence and patronage of our people. The Anchor Fire is one of the best and strongest. It holds the respect and good will of the Des Moines business houses and of the Iowa people where best known. We patronize the Anchor and are pleased to commend this company to our readers. See advertisement on page 4 of this issue.

## WINTER HOG TROUBLES.

Now that winter is on in full force, its effects are seen in the unhealthy hogs. The fall pigs that are wormy, or out of condition, are not growing. The older hogs are not getting ready for market as they would if they were clear of worms. In many places cholera is raging, because the unhealthy, wormy hogs very readily contract any disease near them. It is a loss of feed and time to keep unhealthy hogs. And why do it? It is easy to clear the hogs of worms, and make them healthy and thrifty, so they will grow and fatten as they should. For this purpose the Snoddy treatment is very highly recommended. It is used by such men as Messrs. O. S. West, Paulina, Iowa; P. W. Peterson, Vermillion, S. D.; Geo. Seckman, Ripley, Ill.; Dave Rankin, Tarkio, Mo.; W. M. Putman, Tecumseh, Neb., and thousands of other well-known reliable breeders and feeders, who recommend it very highly. People who have had several years' experience with the treatment say that it will actually cure and prevent hog cholera and swine plague every time. Write to Snoddy Remedy Company, Box 852, Des Moines, Iowa, and they will send you, free, a little booklet of much valuable and interesting information on the care and treatment of hogs and also several circulars containing the pictures and endorsement of hundreds of the leading hog men of the country. Write for this information at once, and learn how to grow hogs without worms or cholera.

## SEARS, ROEBUCK & CO.'S WONDERFUL NEW CATALOG JUST OUT.

Sears, Roebuck & Co., the great mail order house of Chicago, have just issued their new spring and summer catalog, the largest and most interesting general merchandise catalog ever printed, and they are willing to send it free to anyone who will write for it. This great concern now advise us that they are handling all orders with wonderful speed since they are entirely located in their mammoth forty-acre plant and are filling and dispatching the thousands of orders they receive daily in about half the time they formerly required, and are setting a new standard for good service in the mail order world. With this firm's wonderful facilities in their new plant, with the marvelous values as shown by the low prices and high quality of the merchandise in their latest free catalog, with the liberal profit-sharing plan which they maintain, whereby they give their customers a large share of the profits of the business, giving away an endless variety of

valuable merchandise absolutely free to their customers, and with the accuracy and speed with which they are now handling every order that comes to them, we look forward to see them break all records for volume of business this season. The honest and straightforward as well as liberal manner in which this institution treats its customers is certainly a model of business policy, one that all other tradesmen could well afford to pattern after. See advertisement on page 7.

#### MUST SELL THESE FARMS.

Any reader of The Homestead who would like to buy a good south Missouri farm at two-thirds its actual value should look up the advertisement of Mr. Geo. H. Gallup, of Kansas City, Mo., in the Lands and Homes department of this issue. Mr. Gallup is offering farms at \$20 an acre and others are asking \$30 to \$35 for the same kind of land all around these places. Mr. Gallup is engaged in other business and must sell these farms. If you want a bargain write him.

#### SOUTH DAKOTA LAND AT A BARGAIN.

The Big Sioux Valley Land Company, of Sioux Falls, S. D., give three reasons, in their advertisement on page 24 of this issue, why they are in a position to sell South Dakota farms at a bargain, that cannot be obtained through any other agency. That company are offering land in the time-tried and crop-tested areas, land that will produce oats, corn, red clover, alfalfa, blue grass and timothy. The land is offered by this company is ideal not only for crop production, but for the raising and feeding of beef cattle for market. Write at once for a list of the lands for sale, and address the Big Sioux Valley Land Company, Ramsey Building, Sioux Falls, S. D., and please mention The Homestead when you write.

#### RELIABLE PATENT ATTORNEYS.

Those of our readers who are interested in securing patents are referred to the advertisement of Messrs. Orwig & Lane, registered patent attorneys, of Des Moines, Iowa. Messrs. Orwig & Lane are gentlemen whose business experience and preparation enables them to do all the work incident to the securing of a patent. Both are graduates of Yale College, thoroughly posted in all legal matters, and with a continued experience in the examination and securing of patents that places them high in profession. Their offices in Des Moines are complete, their facilities and equipment being greater than any other of the kind in the West. They have also offices in Washington, D. C. They make a specialty of patent examinations, trade marks and copyrights, and are prepared to give expert legal opinions on each of these subjects. They are employed by many of the best manufacturing concerns of Iowa and the West and have in hand patent suits involving the interests of some of the greatest manufacturers of the United States. They are highly recommended and responsible in every particular. The Homestead, having known this firm for years and of their responsibility, does not hesitate to say that its readers may deal with them with perfect confidence. The value of a patent depends greatly upon the ability of the attorney who secures it and it is, therefore, to the interest of the inventor to have his work done by a firm whose experience in such matters places it in a position to give the applicant the fullest protection. For any information concerning patents, address Messrs. Orwig & Lane, Des Moines, Iowa. See advertisement on page 4.

#### HIGH-CLASS FUR ROBES AND CLOTHING.

"My husband has two more hides (Galloway) at your tannery. I want a long coat just like his, only a little smaller, with more shape in the back, and hurry up about it, too, as they are simply immense for comfort. Oh, yes, I want a high collar just as high as his, only fine fur, something soft, plain cuffs, wristlets in sleeves to keep the snow out, and two outside pockets. Hurry up!" This is a letter which Mr. W. W. Weaver, of Reading, Mich., one of the finest custom fur tanners in the country, received lately from one of his lady patrons. At present they have thousands of satisfied customers scattered over the United States. For fifteen years Mr. Weaver has been making some of the finest fur robes, coats and clothing that are to be obtained in the country. The Galloway coats, made from the hides of Galloway cattle, which are admired wherever seen, are made at this tannery. There is nothing warmer or more wind proof than one of these coats made from a whole hide. They wear a good deal longer than those which are made from smaller skins that need to be pieced many times to make a large coat. Besides the Galloway hides, there are hides of all colors received, which include horse hides, Jersey hides, Holstein, Angus, mule and calf skins. These hides are tanned to suit the taste of the purchaser and are given a gloss which is permanent.

It is surprising what beautiful clothing and robes can be made from this kind of skins. If you have any doubt about this assertion just try this company with some animal hide and have it made into a robe or some article of clothing. The quick time in which the work is done gives you still time to have this work done this winter. A full line of coat and robe linings are carried and samples will be mailed for the asking. Nothing but first-

class work is done by this tannery, still prices are moderate. Write to Mr. Weaver for circular describing the work which they put out. They also prepare and mount heads of deers, elks and other animals. On page 18 will be found their advertisement. When writing them kindly mention The Homestead.

#### BIG GUNS IN THE NAVY.

Some remarkable figures have been compiled on the armament of the great fleet of warships that President Roosevelt reviewed in the early fall at Oyster Bay. In this greatest American fleet ever assembled were 1,178 so-called "big guns."

In one minute they could hurt almost 400,000 pounds of death-dealing metal upon an enemy's ships. At a single broad-side, using the twelve and thirteen-inch guns alone, 55,000 pounds of metal could be poured into an opposing fleet were the conditions favorable.

Some 16,000 officers and men were "behind the guns" at this great naval review.

In marked contrast to this display are the hundreds of thousands of small rifles now in the hands of the younger American generation. Though the size of these firearms seems insignificant by comparison, yet these little rifles have their place in a boy's training just as do the big guns in the fitting of our men in the navy. Alertness, quickness of decision, keenness of eye and self-reliance all come from a boy's experience with a firearm.

The J. Stevens Arms & Tool Co., of Chicago, Falls, Mass., are doing much to encourage boys and girls in the use of firearms, both for returns in character and health building, for days spent in the open with a rifle or shotgun do make for stronger, better and healthier men and women.

The 140-page free catalog issued by this company contains much of interest to all lovers of firearms who are continuously seeking useful information on ammunition, sights, the proper care of firearms, etc. This interesting catalog is sent free to anyone sending four cents in stamps to cover postage. See advertisement on page 20.

#### McNeil Bros.' Sale.

Another successful Duroc Jersey sale has been held by Messrs. McNeil Bros., of Bowen,

# Where Can I Go TO BE CURED?

THAT QUESTION IS OF THE GREAT-EST IMPORTANCE TO ALL MEN AFFLICTED WITH BLOOD POISON, SKIN DISEASES, WEAKENED VITALITY, PROSTATE, URETHRAL DISORDERS, PELVIC DISEASES, PILES, KIDNEY AND BLADDER TROUBLES, VARICOCELE, HYDROCELE, ETC.

Careful thought and investigation is necessary. The result means much to the afflicted one. Either a life long misery, prolonged suffering, mentally and physically, if the proper treatment is not applied, or a positive, permanent cure from the right kind of treatment.

Every man who is afflicted seeks the latter goal, only a few attain it. The others fail principally because the physician treating them lacks experience with each case and fails to prescribe the right kind of treatment.

Perhaps you have had the experience or in doubt as to the best source of obtaining a cure. Let us help you decide.

We have had 20 years' experience in the treatment of these diseases. During that time, men everywhere placed themselves under our care and were cured quickly and permanently. Some after other

physicians and specialists had failed.

We want you to try our treatment no matter where you live, or how serious your afflictions are. If you can come to the office for a personal examination we will make it free of charge. If you cannot come to the office, write us a description of your case and we will give you our honest and frank opinion by mail, free of charge. We will tell you whether your case is curable or otherwise.

If in our opinion, your case is curable, we will prove it to you free of charge. We will give you at the office or send you by mail, a full month's treatment which you can use for fifteen days. This will prove that our treatment is right, that it is what you need to get well. We have demonstrated this to many men. Let us demonstrate it to you. It will cost you nothing if the fifteen days' trial proves unsatisfactory. Come and see us or write us today and get our

FREE BOOK!

telling all about men's diseases, their cause and cure and explain many other conditions that you should know.

THE ONLY MFG. CO., Hawarden, Iowa

Ill. These well-known breeders are deserving of good sales and the liberal patronage of Duroc breeders. They have invested their money liberally and have used excellent judgment in selecting their breeding stock. Until the fall of 1906 little was known of Messrs. McNeil Bros. as breeders of thoroughbred Durocs. They had for a number of years been engaged in breeding thoroughbred stock and had been breeding Durocs in a small way, constantly on the outlook for better individuality than in previous years. At the J. D. Nidlinger Duroc sale in 1905 these gentlemen secured the noted show and breeding boar, Hanley, at the long price in those days of \$315. Since that time, however, they have seen fit to pay \$1,000, the highest price yet paid for a Duroc boar at auction. In adding Hanley to their herd and two of his full sisters they secured one of the best boars of the breed. He has proven a breeder of unusual excellence and his produce have found ready sale. As high as \$2,000 has been tendered Messrs. McNeil for Hanley, but he could not be purchased for that money at the time the offer was made. On Thursday, January 17, 1907, Messrs. McNeil made an average of \$48.01, the highest average ever made in Illinois up to that time. On Thursday of last week they disposed of fifty head at an average of \$86.80. Messrs. Deal & Schweizer, of Elwood, Ill., represented by Mr. Fred Schweizer, topped the sale, paying \$700 for Minnie Advance, a daughter of the noted boar, Proud Advance. This sow is a litter mate to the sow which sold in the Fagan, Browning & McCabe sale last fall at the record price of \$500 for an open gilt, at which figure Mr. Ed A. Baxter, of Pawnee, Ill., was the purchaser. Minnie Advance was bred to Hanley and the cross which should result from this cross will no doubt be a profitable one. The contesting bidder was Mr. Melvin A. Krachel, representing the firm of Messrs. Krachel & Son, of Macon, Ill. There were several bidders up to the \$500 mark. Messrs. Manlove Bros. & Norris, of Bowen, Ill., secured a bargain in Lady Cross, a yearling sow bred to Buddy K. IV., at \$252.50. Mr. N. B. Cutler, of Carthage, Ill., secured the good brood sow, Sadie Mc., bred to Hanley, at \$200. What Messrs. McNeil have done others can do if they put forth the same effort to place the Duroc breed where it belongs. Colonel Reppert opened the sale and was assisted by Colonel C. C. Keil. List of sales given below:

# LIFELONG CURES BY A TRUE SPECIALIST

Dr. Boyd's Pelvic methods are your greatest hope for a complete cure, if you are afflicted with either BLOOD POISON, SKIN DISEASES, SORES, ULCERS, STRICTURE, VARICOCELE, HYDROCELE, NERVOUS DECLINE, PILES, FISTULA or any affection of the Kidneys, Bladder and Prostate. You are wasting money and endangering your health in treating with ordinary specialists. My systems of treatment have established their reliability by permanently curing cases that had been unsuccessfully treated by dozens of other physicians.

A SAFE CURE is what I will give you beyond doubt if your case is curable; if not, I will not accept your money and promise to do anything for you. The best reference I could give as to professional reliability is the many cured, satisfied patients I dismiss, and prove that my Pelvic Methods cure when others fail to even benefit.

Guarantee to Refund Money—No Chance to Lose if You Do Not Get Value Received.—My patients receive a written agreement that I

shall return what they pay me for services if they do not receive a complete, permanent and satisfactory cure, and my guarantees are secured by a deposit of \$500 in the Century Savings Bank of Des Moines, Iowa. Consultation Free, Confidential and Invited, both at my office and by correspondence. My charges are reasonable, and I make terms that enable my patients to conveniently pay me. Do not treat elsewhere until you have investigated my methods and terms. Office hours during week, 9 a. m. to 8 p. m. Sundays, 10 to 1. Address or call on

**J. BOYD, M. D.,** 505 Locust Street, Marquand Block, Corner Fifth and Locust Streets, - - - DES MOINES, IOWA

## IN AND AROUND WISCONSIN.

In order to help the congested freight car conditions in different sections of Wisconsin the North-Western road ordered seventy bunk cars, used for construction work, prepared for service as coal cars and placed on trains going into the Illinois coal fields. Several condemned cars are also being fitted up for temporary use.

Some very large beds of kaolin exist along the banks of the Ontonagon river, Michigan. Kaolin is the true China clay used for the making of finest porcelain and pottery. Ohio and Illinois pottery makers have recently made a contract for 1,500 tons of this material from the Michigan beds.

Followers of the Norwegian Ski game have planned a tournament to take place on Hessler Hill, near Cameron, Wis., January 29th. Excursion rates will be secured and plans are being made to award prizes for the long-standing jump and the twin jump.

Passes have recently been issued by two roads in North Dakota to members of the legislature, as well as to others in the state. In order to evade effectually the federal law the following provision is printed on each annual: "This is only good for a trip wholly within this state. It cannot be used for any portion of an interstate trip, nor can baggage be checked or sleeping car reservation be made for an interstate trip."

Four saw mills have started up business at Marinette and Menomonie. The Sawyer-Goodman Co. is shipping its logs by rail, while the Langam-Ryan Co. is also securing its logs in the same way. Last week a shingle mill was again started in Menomonie after being shut down for a month on account of lack of timber.

Extensive preparations are being made in Gates county by stockmen for the purpose of carrying on a large ranching business. Seven concerns are interested and the smallest one holds 4,000 acres, while the largest holds 10,000. Some of the firms are from Chicago, and ranching with sheep has proven so successful in the past that many sheds are now being erected for winter use. This gives the business a permanent aspect.

One of the largest land deals in the northern part of the state has recently been made a part of the public record. Deeds conveying nearly 50,000 acres of Bayfield county land have been received in the office of the register of deeds. All deeds run to the American Immigration Company, which is a sort of holding company, and the consideration named is a low one. Enormous tracts of land will be placed upon the market for settlement and roads and other public improvements will be made where needed to assist the settlers in building their homes.

At Jefferson, this state, Mr. and Mrs. J. A. Purner recently celebrated the sixty-first anniversary of their wedding. They were married in Germany on New Year's day, 1846, and have lived in Jefferson since 1853. The couple have four sons, five daughters and forty grandchildren. Mr. Purner is a noted musician.

At a mass meeting of 300 farmers addressed by Professor Humphrey of the University department of animal husbandry, the Barron County Holstein Breeders' Association was formed and the Holstein adopted as a uniform breed of cattle for the county.

A rich man who is born of poor but honest parents often receives a better heritage than he leaves.

## Bonewell &amp; Duffus Short-horn Sale.

The sale of Short-horns held at Grinnell, Iowa, January 16th, under the management of Messrs. James Duffus & George Bonewell, was well attended. The crowd was with one or two exceptions local. Mr. W. C. McLemore, of Kearney, Neb., was one of the best bidders and buyers. The seating capacity of the tent was not adequate by at least 150. It was hard for Col. George P. Bellows to maintain order. It was a difficult task to control such a large and uncomfortable crowd. Bulls were in active demand and sold readily, including young bull calves that were cataloged with, but sold separate from, their dams. J. B. Birbel, John Nichols and D. C. Sleggel were the other consignors. Many of the cattle were entirely too thin for the sale rings. Mr. F. A. Edwards, of Webster City, Iowa, purchased the top female of the sale in Merrimont 2d at \$210. Nyce Bros., of Marshalltown, Iowa, secured Victor Royal, Mr.

FOUR SALE—Improved quarter section, one of the best in South Dakota. Close to market. Write owner, R. B. Scholley, Bemis, S. D.

WHITE J. H. McCOWN, Emporia, Kan., for special bargain list, farms and ranches.

3 REASONS WHY YOU SHOULD BUY SOUTH DAKOTA LANDS OF THE BIG SIOUX VALLEY LAND CO. SIOUX FALLS, S. D.

1st. S. E. part of our state is in the great fertile Mississippi Valley. Formation of soil is the same as that of Iowa and Illinois, black vegetable mould to a depth of 24 to 36 in., with a porous clay sub-soil. We sell good land cheap, \$25 to \$50 per acre according to location and improvements.

2d. We have the same climatic conditions and rain fall, as Northern Iowa and Illinois, where land that does not produce any more corn per acre, sells at \$75 to \$125. per acre. South Dakota's acreage to corn in 1906, was 1,978,466 acres; production was 77,414,351 bushels; average production of the state, 36.7 bu. per acre.

3d. Our Agency covers the 16 S. E. counties of the State, which produce over 80 per cent. of the State's corn crop. We are prepared to show you actual production values, as our lands are time-tried and crop-tested, proving its ability to produce abundantly: *Corn, Oats, Red Clover, Alfalfa, Blue Grass and Timothy*. The crops essential to mature the great American Steer.

Write to-day for list and descriptive literature, BIG SIOUX VALLEY LAND CO. (Inc.) Ramsey Bldg., Sioux Falls, So. Dak.

## TEXAS LANDS.

LARGE and small tracts in all parts of Texas for sale; write to us for what you want. We have a large tract of land in a solid body in Knox county, Texas, of 150,000 acres; an excellent proposition for a colony; cheap. Two large tracts in La Salle county, Texas, close to railroad; about 180,000 acres in the two tracts. Price \$5.50 per acre; terms to suit. Panhandle district, 19 sections near Amarillo, Texas; \$8 per acre; all smooth plains land; 95 per cent can be plowed with steam plow. 18,000 acres near Canadian; takes in part of the town; 2,000 in cultivation; the cheapest land in Texas. 26,000 at Glazier, Texas, on railroad. 21 sections at Panhandle City, 1,000 acres in cultivation; produced 36 bushels wheat to the acre last year; 300 acres in wheat this year; this is the finest body of land in Texas for sale. We can sell land in any quantities you want and near railroad. Write us before buying.

BOYER, PETERSON & CO.,  
100-10 Gumbel Bldg., Kansas City, Mo.

# LANDS AND HOMES FOR SALE

## Raise Crops That Pay From \$35 to \$125 Per Acre on Land That Costs \$40 to \$75

This is what the farmers in the Great Arkansas Valley in Western Kansas are doing today in that wonderful Alfalfa and Sugar Beet Country, and you can do the same. But remember, this land will not sell at this price always. It's only a matter of a short time till it will be \$300 to \$500 per acre.

### Profitable Crops in the Arkansas Valley.

The rich alluvial soil of the Arkansas valley will raise many crops in abundance. Alfalfa which is the best feed for stock that has ever been known. Farmers harvest four crops a year here to say nothing of seed. The usual yield is about 2½ tons per acre each cutting, and sells for \$4.50 to \$5.00 per ton. In addition to the hay the seed yields about seven bushels per acre and sells for \$8.00 to \$10 per bushel. This certainly beats raising corn or oats. Sugar beets are a very easy crop to handle and pay from \$40 to \$75 per acre on this irrigated land. Then there is no question about a market, as the million dollar Beet Sugar factory at Garden City, contracts to take all the beets farmers raise at \$5.00 per ton. You just know just what you will get for your crop. And you know you will have a crop on this irrigated land. There is no guess work about it. A crop of Cantaloupes will bring from \$100 to \$125 per acre. Other crops which do well in the Arkansas valley are wheat, corn, barley, wild hay, sorghum, flax, oats, potatoes, watermelons, prunes and small fruits of all kinds.

### Buy Now--Prices Low--Terms Easy.

If you want to buy land while the price is low come now. We make very easy terms. Some cash, balance in three to five years. This land is a bargain at the prices we offer it--\$40 to \$75 per acre--and will make money either for the farmer or investor. The value alone will make you more than the crops on land in other sections.

Private Dining and Sleeping Cars operated by the Great Western Land Company, from Chicago, Kansas City and intermediate points to Garden City, Kansas.

### Facts About the Arkansas Valley.

**Water:**—The average rainfall in the Arkansas Valley for the past twenty years has been twenty inches and there is plenty of water for irrigating. Good, pure drinking water can be had at from 15 to 50 feet. **Climate:**—The climate of the Arkansas Valley is very healthful. The air is dry and pure. The days are sometimes warm in summer but the nights are always cool. The winter seasons are mild and usually there is very little snow, and owing to the even temperature there is very little sickness, such as pneumonia, etc.

**Garden City:**—This is one of the coming towns of the great Southwest. You will find here, as well as in the country adjacent, excellent school and splendid churches. In fact, Garden City, has all the advantages that any Eastern town has, and in fact better population considered.

**A Stock Country:**—We have one of the best stock countries in the West. The mild winters, abundance of cheap feeds, such as Alfalfa and best pulp makes this an ideal locality for the man who raises horses, mules, cattle or hogs.

**Land Advancing:**—We cannot lay too much stress on the fact that land in the Arkansas Valley is very cheap and is advancing in price. The Great Western Land Company controls all the land we are offering and as we bought months ago we are selling at bottom prices. This land will advance 50 per cent in six months.

Alfalfa pays from \$40 to \$75 per acre, and sugar beets from \$50 to \$90, cantaloupes about \$125. The Great Western Land Company has 30,000 acres of this RICH ARKANSAS VALLEY ALFALFA AND SUGAR BEET LAND to sell, and it's going fast. Go with us in our own private dining and sleeping cars on the next excursion date, February 5th, from Iowa, Illinois and eastern points, and February 6th from Kansas City, and view this land from our automobiles. See the Million Dollar Beet Sugar Factory at Garden City. Our land is near there.

## The Same Land We Are Selling For \$40 to \$75 Sells From \$300 Up In Colorado.

Get some land for the boys and girls where prices are low and crops pay big. Then they only need a small farm. GET IT NOW.

We can use Live Agents—Write us. Write today for literature about the Arkansas Valley and Map of Kansas FREE.

## The GREAT WESTERN LAND CO.

1048 Union Ave., Kansas City, Mo.

WESTERN OFFICE: GARDEN CITY, KANSAS.

Don't take our word for these statements. Go see for yourself. That's the way to prove it. But don't wait. These prices won't last always.

The following are the names and addresses of some of our agents who can tell you about the Great Arkansas Valley.

Pfoutz, Lanark. **O. G. Jones, Shenandoah, Iowa, General Agent; J. W. Hope, General Agent, Birmingham, Iowa.**

### FOR SALE.

A "JO DANDY" farm, as good as there is in the state of Iowa; located in Keenebeck Township in Monona County, five miles from Onawa, the county seat, two from Turin, both good railroad towns. Good farm house, about six rooms, brick foundation, cement cellar; large barn, nearly new, with brick foundation; ample cribs, bins, sheds, hay scales, good wells, windmill, etc. All buildings well painted and in good condition; the soil is a very rich and dark loam, no rocks, no sand, lies nearly level, and is easily worked. About 300 acres are under cultivation, and except 15 acres in good timber along the Little Sioux river on west boundary line, the remainder is splendid land; all told there are 587 acres. For stock or grain the farm has no superior. It is well fenced and will sub-divide nicely. Will sell 300 acres, including the improvements, at \$75 per acre. On balance of the tract, 287 acres, partly cultivated and partly raw land, will make fair price. Terms reasonable. Photographs of the buildings sent on request. Address the owner.

Z. T. LINDSEY, Omaha, Neb.

W. F. Smith Realty Co., Kearney, Neb.

Homeowner, be careful. Locate right. Investigate our famous Artesian Valley. Sure crops, matchless climate. Let us write you. Miller & James, Mende, Kansas.

## GET A HOME In The Big Bend Country

The word "Home" means much to us all. The man who rents has not the spirit of freedom or the comfortable "settled" feeling of the man who OWNS. The Big Bend country of Eastern Washington is the place of

### PROSPERITY AND PLENTY.

Wonderfully productive soil insures large crops of fruits, grains and vegetables. No wind or electrical storms. Superior advantages to the man who wants a HOME. Church, school and other associations well developed. Come out and see this unexcelled country. Railroad fare refunded to purchasers. Send for illustrated booklet and other information.

Dept. 1. THE BIG BEND LAND COMPANY, Wilbur, Washington.

## Great Bargain CHOICE TEXAS RANCH

IN THE Famous Gulf Coast Country

## 2712 acres of the richest black sandy loam LEVEL TABLELAND, 10 miles from good town and railroad. This ranch has 2 miles river front on the beautiful Nueces River, (land not subject to over-flow), and consists of the highest grade of Agricultural and grass land, 90% tillable. It is covered with a park-like growth of valuable large mesquite trees; very little underbrush; 50 acres in high state of cultivation; good two-story dwelling, large barns, fine wells, windmills, outhouses, cattle pens, etc. Irrigation is not necessary; sufficient rainfall for all crops. Crops in value from \$50.00 to \$300.00 per acre have been raised for years in this neighborhood. Extensive irrigation plant can be cheaply installed on river. This is an absolutely ideal garden, farm and stock farm proposition in the healthiest climate. PRICE \$20.00 PER ACRE. This will be sold quick.

FALFURRIAS IMMIGRATION CO., No. 3, West 10th Street, Kansas City, Missouri

FARMS FOR RENT: Send for our list of Iowa, Missouri, Kansas, Minnesota and Wisconsin farms. Cash or grain rent. Northern Iowa Land Co., Independence, Iowa.

IOWA FARMS FOR SALE: Write for printed list. Always have a bargain to offer. J. J. Lynch, Laurens, Iowa.

## Gulf Coast Texas

Offers greater opportunities to the farmer, homeseeker and investor in land than any other place in the world today. We own and control 1,000,000 acres in the gulf coast country, which we will sell in tracts to suit everybody, from the fruit or truck farmer, who wants 5 to 10 acres or up, the home seeker, a quarter section or section, to the investor or syndicate, who wants up to 100,000 acres. Prices, \$1.50 to \$35 per acre, according to size of tract and location. This land is all fine, black loam, from 2 to 5 feet deep. Clay subsoil. No brush. Ample rainfall. No irrigation necessary. Fine water in wells, 25 to 250 feet deep. Sufficient elevation to assure a fine atmosphere, cool, refreshing breezes, all within one to ten miles of railroads, and within 30 to 100 miles of ocean transportation. Healthful climate and fine neighbors. Profits of \$50 to \$600 per acre annually can be made, according to crop grown. Corn, oats, alfalfa, rice, cotton, sugar cane, oranges, figs, all kinds of garden truck. Some crop every month in the year. Call or write for our book, "Truth About Texas," and state map, free. Excursions from all points, first and third Tuesdays of each month. Come and see. Buy from owners and save commission. Easy terms.

PICKERT-HAMMOND LAND COMPANY, Opposite Grand Central Station, Houston, Texas.

## LAND BARGAINS

Next excursion Feb. 5. You can buy land in our Locksburg colony, near Locksburg, Sevier county, Arkansas, at \$1 to \$6 per acre that will rent for one-fourth to one-half the cost each year; write us for free pamphlet and map. E. N. Brown, president Kansas City Southern Land and Immigration Co., Room 708, Beals Bldg., Kansas City, Mo.

FARMS FOR RENT AND SALE on crop payments. J. MULHALL, Sioux City, Iowa.

## The CANADIAN West is The Best WEST

THE testimony of tens of thousands during the past year is that the Canadian West is the best West. Year by year the agricultural returns have increased in volume and value and still the Canadian Government offers 160 acres free to every bona fide settler.

**GREAT ADVANTAGES**  
The phenomenal increase in railway mileage—main lines and branches—has put almost every portion of the country within easy reach of churches, schools, markets, cheap fuel and every modern convenience. The ninety million bushel wheat crop of this year means \$1,000,000 to the farmers of Western Canada, apart from the results of other grains as well as from cattle.

For literature and information address Superintendent of Immigration Ottawa, Canada, or the authorized Canadian Government Agent, W. V. Bennett, 801 N. Y. Life Bldg., Omaha, Neb. E. T. Holmes, 815 Jackson St., St. Paul, Minn.

## YOU CAN HANDLE THIS 120-Acre Wood River Valley Farm

Five and One-half Miles N. E. from Gibbon.

GOOD house and barn, double corn crib and granary, chicken house, hog house and other improvements. Buildings surrounded by good grove of ash and elm trees. Price \$55 per acre. Write today for a full description and plat of farm.

L. P. SARGENT, Gibbon, Neb.

## IOWA FARMS

WE have seven farms of all sizes to rent for share rent to right parties. Over 100 farms for sale. Two or three bargains always on hand. We can sell on payments of \$2,000 per quarter cash; terms to suit on balance. Write for catalog and map. It is free.

THE ALLEN LAND & LOAN COMPANY, Laurens, Iowa

## LAND ADVERTISING.

FOR additional advertisements of farms, farm lands, etc., see department of CLASSIFIED ADVERTISING elsewhere in this paper. It will pay you, if looking for bargains, to look over the advertisements to be found there.

# This Woman Makes \$50,000

Started a Few Years Ago with No Capital, and Now Employs Nearly One Hundred Clerks and Stenographers.

One of the most successful women in the United States is Mrs. Cora B. Miller, of Indiana. Several years ago she learned of a simple, harmless medicine for women. Little did Mrs. Miller think then that this wonderful preparation would be the means of making her wealthy. After curing herself and many of her friends, she had numerous calls for treatment, and knowing that eight of every ten women suffer with female diseases and piles, she decided to make the preparation in larger quantities and to furnish all who might call for it.

She started with only a few dollars' capital, and business grew so rapidly that she soon found her small cottage of six rooms did not afford ample room to live in and also conduct her business, so she rented a building down town. Business continued to grow until she was compelled to seek larger quarters several times, and now occupies one of the city's largest office buildings, which she owns. She also owns her home, a large palatial brown-stone residence, which is considered one of the finest in the state. Her profits last year exceeded \$50,000.00.

A few months ago Mrs. Miller decided to give away \$10,000.00 worth of medicine to women who have never used her treatment, and this she has done, but hundreds of letters are still being received daily from women needing treatment, and Mrs. Miller has decided to continue the offer for a while longer, at least.

Every woman suffering with pains in the head, back and bowels, bearing-down feelings, nervousness, creeping sensations up the spine, melancholy, desire to cry, hot flashes, weariness, or piles from any cause, should sit right down and send her name and address to Mrs. Cora B. Miller, Box 3386, Kokomo, Ind., and receive by mail (free of charge in plain wrapper) a 50-cent box of her marvelous remedy; also her valuable book, which every woman should have.

Thousands of suffering women are taking advantage of this generous offer, and it may be that Mrs. Miller will find it necessary in a short time to withdraw it. Therefore, if you suffer with female diseases or piles, you should send your name and address to her today, and receive the book and medicine before the offer is withdrawn.

## ECHOES FROM A KANSAS FARM.

The weather prophets have discovered that Easter comes in March this year. This means, by their way of figuring, that we will have an early spring. Let's wait and see.

It does not look reasonable to us that any date set by man, as is Easter, can have much of an effect on the weather or the seasons. Still, when we set a day to butcher, it most always storms.

Winter moving is getting to be the fashion among the renters. When the weather is good, it is a good scheme, as moving after March first often starts a fellow behind with his work, especially down here in Kansas. We often start the corn planter the first week in April.

We believe in early planting of corn, the earlier the better, as soon as the weather becomes at all seasonable. In the eleven years we have been growing corn in Kansas, not once have we had to replant the earlier planted fields, but several times that planted later on has had to be replanted. We believe in the theory that hot, moist ground rots corn quicker than ground just a little too cool for quick growing.

Don't get fooled into believing that you must have your corn exactly right to plant it successfully with an edge-drop planter. In some way, the tale has got out that an edge-drop planter is no good unless you have carefully graded seed corn. Ours will plant any kind of seed that the old style planter will, and much more accurately.

The seed companies are sending catalogs thick and fast these days. With most of them comes a sample of some of their seed, usually corn. We were sent a sample of corn yesterday, about which a great blow was made. Twelve kernels were sent, five of which we would consider imperfect shape, and we are not "cranky" about seed corn, either. If that is a fair sample of the corn sold, we could get as good by shoveling right from our cribs into a power sheller, then taking it as it came from the wagons.

Where a man is brought up makes a great difference with his preference of country. We recently have had a letter from a gentleman who hails from the Ozark country of Missouri. He recently made a trip into Kansas to buy a thoroughbred horse. He objected to our level country, and sticky, black soil, which, as he expressed it, made bad roads. He praised his native section by describing it as a place of clear, swift running streams and natural macadam roads. A man who has been raised among hills always has a liking for hills, while the prairie born shies from the slope that he characterizes as "taking four horses to haul the kids to school."

There seems to be two types of speltz, one you sow in the fall and one in the spring. Here we have been raising only the spring sown kind. A friend of ours, in Minnesota, writes that the winter speltz is much the better. It is beardless, so we understand, while that which we raise is exactly the opposite of beardless. It is claimed that the winter speltz makes better horse feed than oats, but we doubt it.

This is one of those days when you don't know what to do—whether to go out in the fine mist and frost that's falling and haul in two or three days' ration of feed for the stock, or wait

and trust to better weather. Usually, when a person hauls feed for feeding ahead, he does it at the worst of the storm. We once had a neighbor who seemed to have an antipathy for doing his work during the worst of the storm. By the time he would get his last load in, the clouds would invariably break away, the sun would come out, and there would be no more threatening weather until his supply was nearly gone.

In one respect Kansas has every reason to be ashamed. With every other western state holding a fair each fall, which serves as an educator and advertiser for the whole state, Kansas sits back and looks on, apparently contented with the several shows she has scattered over the state. Bring these together as one, and Kansas would no longer need be ashamed and we hope the legislature we have this winter will do something looking to this end. We must have a little state help at the start, but after that the Kansas spirit of being able to take care of itself, will assert itself.

One of our friends, a man who has been unfortunate in the past few years, while all around him have prospered, has decided to quit farming on the scale he has been, and has rented a small farm, with the expectation of making of it a chicken farm. He will use incubators, and on the farm land of the forty, will raise the kind of feed that is required by the chicken in its various stages of development. Our guess is that this man will make more in the future than in the past, if he manages rightly.

### The Fairchild & Stevenson Duroc Sale.

The sale of Messrs. Fairchild & Stevenson, at Onawa, Iowa, on January 11th proved to be a most successful one. This was the opening sale of the season and a great many breeders were on hand. The top price of the sale was \$100 for Rose Orion and she was purchased by Mr. C. W. Huff, Mondamin, Iowa. This was their first annual public sale and it must be considered a good one. An average of \$33.38 was made on the entire offering. Below is a complete list of the entire sale:

### W. N. Rogers' Combination Sale.

Quite a good crowd of breeders and farmers from Iowa, Nebraska and South Dakota gathered at South Omaha on January 9th to select some good breeding stock from the Rogers' combination sale. The cattle were in fine condition, with a few exceptions, and the better ones sold at a good price. The top price was \$460, paid for the very fine yearling bull, Gay Wilton 5th 223249, a son of Gay Wilton 98084, that was surely a bargain, he going to the firm of Norman Oschner & Co., of Madison, Neb. The total average on the forty head sold was \$111.10, which was very satisfactory to all parties concerned. Below is a list of those selling at \$100 and over:

Lot.	Price.
2. Advancer 22d 250322, A. Kruse, West Side, Iowa .....	130.00
3. Senora 2d 214220, W. A. Kennell, West Point, Neb.....	100.00

# FREE! My Book About Curing DEAFNESS AND EYE DISEASES AT HOME

I have published a new 128 page book which tells of a method by which people who are willing to devote fifteen minutes of their time each day for a month or two, following my instructions, can cure themselves without leaving home or visiting a doctor, of Deafness, Head Noises, Catarrh of the Nose, Throat and Head; Catarracts of the eyes, Granulated lids, Sore eyes, Pterygiums, Films, Wild Hairs, Eye Strains or any weakness or disease of the eye, ear, nose or throat. This book gives the causes and symptoms of each disease. It tells you not only how to cure these diseases, but how to prevent blindness and deafness.

I want to place one of these books in every home in the United States. Write me a letter or a postal card and tell me your disease and you will receive this grand book and my opinion free of charge, and learn how people from every state in the United States are restoring their sight and hearing at home by this new method.

I want no money for this neither does it place you under any obligations to me whatever. I simply desire to show and prove to you how easy it is to get perfect sight and hearing by my method. Write to me today. Address

### -MANURE SPREADERS.

When you buy a manure spreader, see that the main frame is made of oak or hard wood, as all the machinery is carried on the main frame, and if it twists out of shape it causes cramping and binding, hard draft and breakage. The machine should have an oak, ash or hickory pole the same as a farm wagon. The Great Western Spreader is made of the best material; it will pay you to investigate it.

### HOMESEEKERS' EXCURSIONS.

On the first and third Tuesdays of each month, the Iowa Central Railway will sell round trip excursion tickets to points in the North, Northwest, South, Southwest and Southeast. The rate is only one fare plus \$2 and less, with liberal stop-over privileges. Tickets sold to points in the following states: Minnesota, South Dakota, North Dakota, Arizona, Arkansas, Colorado, Idaho, Indian Territory, Iowa, Kansas, Louisiana, Mexico, Missouri, Nebraska, Montana, New Mexico, Oklahoma, Texas, Utah, Wisconsin, northern Michigan, Wyoming, etc. For rates and full particulars call on agents or address A. B. Cutts, G. P. T. A., Minneapolis, Minn.

## This Keeps Lightning Out Of Your Telephones

This is our "No Risk" Lightning Arrestor. Pull the knob, and your telephone is absolutely cut out. Lightning cannot enter your house.

Protects the house, avoids fire, insures safety for the family.

Does your dealer handle the

Perfection Seed Corn Grader?

If not, write us. Best Grader on the market—capacity 10 bu. per hour. Get one and raise 16 bu. more corn per acre. Price \$1.00 f.o.b. Charleston, Ia. Don't Wait—Write Today to the W. E. ASHBY TELEPHONE CUT OUT CO., 101 Square St., Charleston, Iowa

## Are You DEAF?

I was deaf myself for 25 years. I perfected and patented a small, invisible ear drum in order to help my own hearing. It is called "The Way Ear Drum," and by the use of these drums I can NOW HEAR WHISPERS. I want all deaf people to write me. I do not claim to "cure" all cases of deafness, neither can I benefit those who were born deaf. But I CAN HELP 90 per cent of those whose hearing is defective.

Won't you take the trouble to write and find out all about me and my invention? Tell me the cause of your deafness. Geo. P. Way, 113 Majestic Bldg., Detroit, Mich.

## We Have a Limited Amount of HOME-GROWN NEW ALFALFA

At \$10.00 per Bag of 60 lbs.  
ALSO MEADOW FESCUE OF  
Our Own 1906 Raising at \$6.00 per 100 lbs.

WM. ERNST & SON,  
Tecumseh, Johnson Co., Nebraska.

**VITALITY TABLETS** Relieve the ills due to diseases of the liver, bowels, stomach and malarial poisons, headaches, backaches and general debility. An entire month's treatment only \$1.00. Small package, 50 cents. Address, VITALITY TABLET CO., Dept. C, Kansas City, Missouri.

## Black Taffeta Silk

Special to Our Mail Order Customers.

WE WANT TO SEND TO YOU ABSOLUTELY FREE OF COST

"free samples" of a Black Taffeta Silk which we are offering at 90c per yard. We want to convince you that this is the best silk ever offered at the price. It is the kind that usually sells at \$1.25 to \$1.50 per yard. We GUARANTEE it to be genuine Black Taffeta Silk of the "old reliable sort" without a trace of gum or dressing to "load" it. We want you to examine the samples and see for YOURSELF just what it is. The silk is 35 inches wide—the kind that is sold in most cases as 36-inch silk. We purchased a large lot on exceptionally favorable terms and will sell it ONLY to our MAIL ORDER CUSTOMERS. There is not enough of it to allow us to make a general city sale. If, after examining the samples, you decide to order, and are not perfectly satisfied when you get the goods, send the silk back to us—at our expense—and we will give you your MONEY BACK. We could not offer a fairer proposition. Nor can we offer other silk of this quality at this price. We would advise you to give this matter IMMEDIATE attention, as we expect to sell out the entire lot with this one advertisement. Address,

YOUNKER BROTHERS,  
Dept. B. Des Moines, Iowa

## Wernsman's Sale.

One of the most successful sales held so far in Nebraska was that of Mr. Jacob Wernsman, of Cedar Bluffs, Neb. There was a large attendance of breeders and farmers from that portion of Nebraska and a good average was made on the whole consignment. We wish to compliment the farmers in this vicinity on being so up to date and willing to pay the proper prices and advance the pure-bred hog business to where it should be in every section of the state. Below is a list of those selling above \$35:

## Two Grand Duroc Sales at Maxwell, Ia.

The country round about this prosperous little village in Story county has long been noted for its productiveness. Not only can corn of the best kind be grown there, but the accompaniment of corn, which is hogs, is bred and grown there to a high degree of excellence. Two of the breeders of the red hog in the vicinity of Maxwell are Messrs. O. Osborn and W. J. Hartung. The very prosperous and thrifty condition of these two herds tells at once to the visitor the fact that they have proved a very successful part of the operations carried out in the management of the respective farms. Mr. Osborn has had unusual success the past years with his young stock and wants to share some of the good things he has produced with his fellow breeders and farmers. Accordingly he has chosen, Friday, February 8th for this event, and at that time on his farm, one-half mile from Farrar on the Newton and Northwestern railroad and seven miles south of Maxwell, on the C. M. & St. P., he will offer thirty-five head of females, including

I started out to make the best lamp-chimney in the world—I have stuck to it all my life.

My name is on the chimney if it's a MACBETH.

The Index explains how to get a MACBETH chimney to fit every lamp, and how to care for lamps. Sent free to everyone asking for it.

Address, MACBETH, Pittsburgh.

## SEPARATOR FREE

FOR A 1975 TWO MONTHS' TRIAL

WE WILL GLADLY SEND YOU A CREAM SEPARATOR; you can use it sixty days, and if you are not sure you have received the best separator in the world, the trial won't cost you one cent. Write for our new Cream Separator Catalogue and learn of THIS GREAT OFFER. \$19.75 buys our wonderful 1907 model Dandee Cream Separator, the equal of any machine sold by anyone else up to \$40.00. Our Improved Economy Cream Separator, slightly higher in price than our Dandee is guaranteed the best separator made, regardless of name or price, and is sold at a small part of the price others ask for high grade separators; and we guarantee our Economy to have greater capacity, to skim closer, skim cold milk, run easier and not get out of order, wear longer than any other machine in the market. We guarantee it 20 years, take care of it for you from the day you receive it, and will always furnish you any needed repair or part in the years to come, promptly and on a few days' notice. PRICES NOW GREATLY REDUCED. OUR CREAM SEPARATOR OFFERS are more liberal, more wonderful than ever before, greatly improved models, prices lower than last season. If you have more than one cow, write us a letter or a postal and say, "Send me your New Cream Separator Catalogue and all your new offers." and our great 1907 cream separator proposition will go to you by return mail, free and postpaid. We have two big cream separator factories and can sell you a machine on a two months' free trial, on manufacturing cost basis, much less than dealers and agents pay (all these profits you save) at a lower price than you ever thought possible. If you buy from us you get our free Profit Sharing Certificate and can exchange them for your choice of any number of most valuable articles, which we give our customers free. Write for catalogue today. Address, SEARS ROEBUCK & CO., CHICAGO

a number of his best producing sows and probably as fine a bunch of gilts as will be seen at any sales the next few months. An inspection of his herd will at once reveal the fact that Mr. Osborn has a good eye for good red hogs and moreover, he can produce them to suit the most particular. Among the mature sows which are to be sold are some splendid attractions which we will mention more in detail next week. A pair are sired by Carlin 14037, one of the good boars from the herd of Mr. N. P. Clarke. Suffice it to say they are splendid dams in every way and some of their produce in the sale will tell more of their ability to produce good stuff than paper and ink will. There will also be a number of fall yearlings sired by Reed's Cashier 25675, a grandson of Advance, also others sired by Gold Standard 33231. This part of the offering is bred and safe in pig to Perfection King 41711, the sire of many of the gilts which number twenty-six head and are a choice lot to say the least. Among them are some sired by Manley Orion and Long Tom, a grandson of Crimson Wonder. The gilts are bred to two sons of the sweepstakes boar, Crimson Wonder Again. Come to this sale, rain or shine, and prepare yourself on the offering by sending for a catalog. Good hogs and a good time. Remember the date. On the day following, Saturday, February 9th, buyers and visitors who were at the Osborn sale will find it very handy to remain in Maxwell for the sale of Mr. N. J. Hartung, which will be held in Shyrock's sale pavilion and will not be postponed on account of the weather. Col. F. F. Luther will conduct this sale, as well as the former one, and will open the selling after dinner. While the catalogs are now ready for mailing and should be in everyone's hands in the next few days, we will state, nevertheless, that among the offering of mature sows are some that carry the blood of those noted sires, old Orion, Duroc Challenger, Billy K., Advance and Top Notcher. The breeding speaks for itself and as to individual excellence we will say that the sows are large, wide backed, with plump hams, and strong and active on their feet. They are very regular and reliable as producers. The yearlings are a wonder for deep, roomy bodies, with the right kind of Duroc character and are about as large as anyone will be able to find this spring. For the gilts as much can be said without straining the truth. They will be sired by Malcolm's Model 2d and bred to a son of the noted Crimson Wonder Again. A recognized combination for good offspring and with the inheritance of individual excellence of the best kind to start with. Send for a catalog at once and inform yourself about this excellent offering. You will miss it if you don't. Kindly mention The Homestead when so doing. See formal announcement of sale on page 34.

## A. C. Berry's Short-horns.

Few herds of Short-horns in America have at their head a more richly-bred bull or a better producing bull than has the herd owned by Mr. A. C. Berry, of Unionville, Mo. We have referred to this bull, Imp. Mutineer, in former field notes, but since our recent trip to Mr. Berry's herd we feel more than ever that it is a difficult matter to overestimate the value of Imp. Mutineer as a sire. He was got by Bapton Chief, he by the same sire as Bapton Diamond, Mr. Dan Hanna's great breeding bull. Mutineer's dam, Imp. Missie 167th, was the dam of Mr. F. W. Harding's great champion bull, Whitehall Marshall. Following on down the list of sires we find such bulls as Lord of Fame, sire of Missie 167th, William of Orange for great-grand sire, then Ventriquoist, that

## Break Loose from the Creamery Trust

ORGANIZE, CO-OPERATE AND CONTROL YOUR PRODUCT

Ship Us  
Your Next  
Can of Cream  
and  
Get Our Prices

You do the hard work of dairying and you ought to reap the profits. You won't get them so long as you are at the mercy of combinations and trusts. Join with 2000 Iowa Farmers to manufacture and market your own product. Cut out the gamblers and speculators who are standing between you and the consumer.

Our association has already in eight months forced the distribution of at least \$300,000 in extra profits to the farmers of central Iowa. Membership growing rapidly and the trust is on the run. Won't you join us at once for fair treatment now and future protection? Write today for prospectus and full particulars. Ship us a can of cream and get our test and price.

FARMERS' CO-OPERATIVE PRODUCE CO., DES MOINES, IOWA.

We save our members and patrons from 20 per cent to 50 per cent on farm supplies, by buying for them direct from the factory at factory prices, cutting out all dealers and middlemen's profit. For example the

Farmer's Friend Separator Capacity 450 to 600 pounds, made for our members in the best factory in the world, fully guaranteed to excel any \$20 standard separator ever made, for only \$25. In efficiency of skimming, mechanical construction, easy running and durability, it has never been equalled. Send for our co-operative catalog of separators, washing machines, windmills, feed grinders, harrow carts, corn markers, corn shellers, etc. We give the best that money can buy direct to the user at factory prices.

## PIPE at less than 1/2 Price

We offer one million feet of pipe all sizes, also roofing, farm machinery, boilers, etc., at less than half the original cost. We guarantee everything we sell, and refund your money if you are not thoroughly satisfied. References: Merchants-Laclede National Bank, or any commercial agency. Write to-day for complete catalogue and prices.

Tip Top Notcher 20729, the world's champion and one of the most popular sires in the United States, now heads the herd of Messrs. Thomas & Hogsett. In 1903 he won first honors at the Illinois State Fair and first at American Royal. At the World's Fair in St. Louis he won first in class, senior champion and grand champion boar. Besides his own winnings at St. Louis, he sired the second-prize get of boar, second-prize junior yearling boar, second-prize male pig, fourth-prize young herd, sixth-prize litter, seventh-prize senior male pig and champion herd from Illinois. The boar that won championship at the Florida State Fair in 1905 and the first-prize male pig and first-prize gilt at the Kansas State Fair same year were sired by him. At the Illinois State Fair in 1905 he was sire of the first-prize gilt and grandsire of the first-prize male pig, first-prize litter, second-prize young herd in open class and second-prize young herd bred by exhibitor. He also sired the first-prize yearling sow, second and third-prize senior male pig, second-prize get of boar and is the grandsire of the second-prize yearling boar and the grandsire of the first and second-prize gilts, third-prize get of boar and third-prize produce of sow at the Illinois State Fair, 1906. He also sired the first-prize senior male pig and junior champion boar at the Kansas State Fair, 1906, and second-prize gilt at Hamline and third-prize gilt at Sioux City, Iowa, same year. He sired the highest-priced litter in the world, the highest-priced boar ever sold at public auction and the first sow that ever sold at auction for \$1,000. Tip Top Notcher is by Tip Top Notcher, a state fair champion, he by Orion II., a state fair champion, he by Orion, champion at Iowa State Fair twice, he by Ben Hur H., he by Jim Bennett, he by Cuckoo, a state fair winner, he by Conqueror, he by Chickasaw Chief, he by Oswego, and he by Dan Voorhees. Tip Top Notcher is owned by Messrs. Thomas & Hogsett, of Golden, Ill., and Messrs. Fagan, Browning & McCabe, of Hersman, Ill. A number of sows in the sale offering of these firms are bred to this noted boar. See field notes.

## FIELD NOTES.

Mr. John Thornton, of Colo, Iowa, has registered Hereford bulls for sale in his advertisement on page 30 of this issue.

Messrs Wm. Ernst & Son, of Tecumseh, Neb., claim October 31st and November 1st as dates on which to hold a public sale of dual-purpose Short-horns.

Messrs. Nady Bros., of Fairfield, Iowa, have Percheron stallions and mares for sale that are black and gray in color. Their advertisement appears on page 30 of this issue of The Homestead.

Mr. H. G. McMillan, of Cedar Rapids, Iowa, proprietor of the Lakewood Farm, of Rock Rapids, Iowa, claims March 20, 1907, as a date on which to hold a public sale of Percheron horses.

Mr. H. P. Clark, proprietor of the Meadow Lawn Stock Farm, St. Paul, Minn., names March 27th as the date on which he will hold a public sale of Short-horn cattle at South Omaha, Neb.

On February 28th Mr. J. A. Penn, of Alta, Iowa, will offer for sale twenty-eight Poland China bred sows and Short-horn cattle. Write him for catalog. His advertisement appears on page 13.

Mr. John Lefebure, of Fairfax, Iowa, names February 21st as the date on which he will hold a public sale of Chester White brood sows. Watch The Homestead columns for further particulars in regard to this sale.

Mr. Frank L. Stream, of Creston, Iowa, announces in his advertisement on page 30 of this issue that he has thirty imported Percheron stallions for sale. They arrived January 24th. He also has home-bred stallions for sale.

Mr. J. W. Briggs, of Alden, Iowa, has forty Duroc Jersey bred sows and gilts of the best of breeding which he will sell at reasonable prices and guarantee satisfaction. His advertisement appears on page 45 of this issue.

Mr. W. W. Vaughn, of Marion, Iowa, has thirty smooth, well-quartered, strong-boned young Chester White sows that are bred to high-class matured boars, which he is offering for sale in his advertisement which will be found on page 30 of this issue of The Homestead.

Mr. J. C. Bailey, of Marshalltown, Iowa, claims February 26th as the date on which he will hold his brood sow sale, consisting of some thirty head of choice Poland China bred sows. There will be five aged sows and twenty-two of the best Poland China gilts that we have seen this year, particulars of which will appear in future issues. All the most fashionable Poland China blood lines are represented in the breeding and the offering is one that should attract attention and cause every lover of Poland Chinas to write

Mr. Bailey for his catalog. Detailed mention will be made in later issues of The Homestead.

Mr. D. H. Lewis, of Geneseo, Ill., has fifty head of improved Chester White sows that he is going to sell on February 2, 1907. These sows are bred to state fair winners and are of the class that will do their purchasers the most good. Send to Mr. Lewis for catalog.

Fifteen smooth, low-down, blocky Short-horn bulls ranging in age from ten to twenty months, and females of all ages are offered for sale at reasonable prices in the advertisement of Mr. W. W. Vaughn, of Marion, Iowa. His advertisement appears on page 30 of this issue.

On page 30 of this issue of The Homestead will be found the new advertisement of the well-known auctioneer, Mr. R. W. Barclay, of Mason City, Iowa. Those of our readers who contemplate holding public sales should confer with Mr. Barclay before naming their dates.

Two Duroc Jersey sales are claimed, one for February 26th and the other for February 27th, in this issue of The Homestead. Mr. James Williams, of Marcus, Iowa, will hold his sale on February 26th and Mr. W. J. Wendt, of the same place, will hold his sale on February 27th.

The Percheron stallion, Kenmor 23023, coming fourteen years old, a sure, sound and good breeder, is offered for sale in the advertisement on page 30 of this issue, the address of which is Box 748, Station A, Ames, Iowa. This animal will be sold at a bargain, as the owner is preparing to move.

There is offered for sale by Mr. Chas. Boland, of Williamsburg, Iowa, on page 30 of this issue of The Homestead, a registered Percheron stallion coming five years old. He is American bred, coal black, standing seventeen and one-half hands high. Any reader of The Homestead who desires a first-class stallion should write or visit Mr. Boland.

See advertisement of Messrs. P. S. & S. Barr, of Davenport, Iowa, on page 44. They offer choice, growthy Poland China gilts, weighing 200 to 240 pounds, also Short-horn and Polled Durham cattle, all ages, for sale at attractive prices. They report a number of recent sales in several states and they write that customers are well pleased with the stock.

The Western Land Company, of Des Moines, Iowa, having large interests in the Panhandle of Texas, report that large parties took advantage of the last low rate excursion to Texas. The number of actual settlers of these lands is one of the favorable features, as actual settlers are what make a country. For further particulars see the advertisement on page 24 of this issue.

The Roycroft Farms, of Des Moines, Iowa, are advertising Duroc Jersey sows and gilts bred to farrow in February, March and April, for sale in their advertisement that appears on page 45 of this issue. They have issued a catalog that gives the pedigrees and other information in regard to the stock and contains plans for hog houses, etc. They also have a booklet on breeding hogs which will be sent for the asking.

Mr. W. C. Frazier, of Atlantic, Cass county, Iowa, has fifteen Shropshire ewes of individual merit and of the choicest breeding that will be priced well within their value. These ewes are bred to the imported Minton ram, Manchuria A. S. A. 218834. Write him for list giving age, weight of fleece and price. He has also 400 Barred Plymouth Rock and White Wyandotte chickens for sale. See advertisement on page 30.

Mr. Roy E. West, of Churdan, Iowa, announces a public sale of Duroc Jersey bred sows to take place in that city on February 2d, as per advertisement which will be found on page 45 of this issue. Mr. West in furnishing copy writes: "I am putting in a bunch of gilts that few can duplicate. I have six or eight that would be a good addition to most of the old herds and would make a good foundation. They have length, bone and size, with quality. Many of them weigh from 250 to 300 pounds or more. I am feeding them for brood sows and not for the market. One of these gilts farrowed April 7th at 300 pounds or better. She is by a son of Proud Advance and out of a granddaughter of Prince Marti, and is a good show prospect. She has wonderful bone, best of color, a picture head and ear, good feet and back, good hams, and straight, deep sides. She will stand a good mail bid.

Kant Bee, one of the best sons of the noted Kant Be Beat. Many of the females in the forthcoming Duroc Jersey sale of Messrs. Stansell & Matern, at McNabb, Ill., are bred to him. See field notes.

It is too late for a catalog, but if anyone will send me a description of what is wanted as to size, weight, etc., and their best price, I will pick out one and have it bought as cheaply as possible. It will be guaranteed right. Better yet, come in person and buy as good as the breed affords. The sale will be in town."

Mr. C. H. Drake, of Stockport, Iowa, breeder of White and Barred Plymouth Rocks, will be obliged to move to a new farm that he has purchased near Hazelton, Iowa, about March 1st, and in order to dispose of his surplus stock he is offering it at very satisfactory prices in his advertisement which appears on page 14 of this week's issue of The Homestead. He also has Mammoth Bronze turkeys and Toulouse geese for sale.

Mr. J. E. Guernsey, of Keosauqua, Iowa, has ten two-year-old Short-horn heifers bred to an imported Cruickshank bull, also some extra fine young bulls, large boned and growthy, sired by an imported Cruickshank bull, which he is offering for sale in an advertisement to be found on page 30 of this issue. He also has a few tried Duroc Jersey brood sows and a choice lot of gilts on which he is quoting prices in the advertisement.

There is offered for sale on page 30 of this issue, registered Percheron stallions of good color, large size, ranging in age from three to four years, by Mr. W. D. Wolcott, of Gilmore City, Iowa. He announces that they will be priced so that they will pay for themselves the first season. He also has several span of high-grade Percheron and Shire mares in foal to registered horses, ranging in age from five to nine years, that he will sell at very moderate prices.

The Loomis Farm, of Tiffin, Ohio, have Angus cattle for sale of excellent breeding and quality by the car load. The farm is sold and the cattle must go before March. Western cattlemen will find this a chance to buy registered Angus cattle for less than they are worth. The offering will consist of cows, heifers and young bulls. To any of our readers who are in quest of Aberdeen Angus cattle, we would say that here is a most favorable opportunity to secure what is wanted. The advertisement will be found on page 30.

In furnishing copy for their new advertisement found on page 45 of this issue, Messrs. J. W. Troy & Bros., proprietors of the Red Oak herd of Duroc Jersey swine, wish us to call attention to the fact that they have changed the name of their herd from White Oak to Red Oak. They announce in their advertisement that they have a number of well-selected gilts of March and April farrow bred to Red Surprise 48087 for sale, for March and April farrow. By reference to the advertisement the breeding of these gilts can be obtained.

The advertisement of Mr. J. F. Waggoner, breeder of Poland China swine, of Olin, Iowa, will be found on page 30 of this issue of The Homestead. Mr. Waggoner in sending copy for his advertisement, writes: "My offering consists of fifteen selected sows due to farrow in April. They are sired by Waggoner's Giant; they have good smooth coats and color, not fat, but in just good breeding flesh; have heavy bone and stand good on their legs and feet; and are bred to Corrector 3d, a lengthy boar with good bone and an all round good one. They will be priced well worth the money."

Mr. Fred Ebendorff, of Strawberry Point, Iowa, in sending new copy for his advertisement found on page 43 of this issue, writes: "I am all sold out of Poland China males. I will now offer my entire herd of Short-horn cattle which consists of good young Scotch-topped cows with calves at side and bred again to Village Chief 178358, a richly-bred Scotch bull, and a Scotch Nonpareil. They are grand individuals. They are a good business herd and will make the buyer money at my bargain prices. They are not pampered, but in ordinary form, all reds and bred to red herd bulls and could get a car load of bulls for ranges, and very choice ones, too. All these cattle must go before April 1st, as I must make a change to devote more time to other interests. I also offer twenty choice Poland China gilts and yearling sows bred for March and April farrow. They are long, heavy-boned, with broad backs and are bred to Hustle On 105337, a very heavy-boned son of On and On, and others, weighing from 200 to 275 pounds; yearlings from 350 to 500 pounds. Price \$25 to \$50. One herd boar for sale and one

top spring male ready for hard service, and good fall pigs. Rose Comb Brown Leghorn cockerels at \$1 each."

Mr. F. H. Jackson, the auctioneer of Rutland, Ill., writes: "I have been busy all winter and fall and have sale dates as far ahead as October and for some of the best breeders. Stock of all kinds is selling high and there seems to be no limit to the demand. I have several sales for February and March in South Dakota, this being my third winter in that locality. I have sold for some of the best breeders in Illinois, Iowa and South Dakota. I always try to satisfy my customers and am prepared to make sales anywhere on short notice. Have had seven years' experience in selling fancy stock." See advertisement on page 42.

On March 13th there will be a joint breeders' Short-horn sale at Wayne, Neb., the contributors being Messrs. A. B. Clark and Wm. Lessman, both well-known cattlemen at that point. The cattle that go into these two sales are among the best they have, and both these herds are known to be among the very best in the state. There will be a choice lot of cows and heifers, and as good a bunch of bulls as has ever been sold in the state. If any of our readers want a catalog they should get their name on the list at once. Write to Mr. A. B. Clark, Wayne, Neb., and he will be pleased to send you one as soon as issued.

Messrs. Arch Brown & Sons, of Waterloo, Neb., are among the foremost breeders in Nebraska. They have been breeding and showing Durocs for several years. These gentlemen are what we call successful breeders doing a profitable business. Any orders or bids entrusted to them will be filled satisfactorily. The blood lines of this herd are known from east to west. They are the offspring of the champions. Their great herd boars are as follows: Echo King 18415, 8671, by Sensation by Orion R. by old Orion. He won second at the Nebraska State Fair in 1904. He is the sire of a great number of show hogs, a few of which are Glad Boy, Stone's Improver, Decatur King, Choice Goods and Wildie. Also King Nidlinger, the grandsire of the noted Hanley. The boys cannot go wrong in buying a sow sired by him. Sure Winner 14843, 11969, by Gold Standard by Hampton King by Kepler's Choice. This old boar has sixteen firsts to his credit. He is the sire of three gilts that go in the sale bred to Echo King. Royal Top Notcher 23639 is a grandson of Top Notcher, is a show boar and is the sire of a number of gilts that go in their sale bred to Sure Winner. Onward Duroc, a fine fellow, is the grandson of the undefeated show sow, Nebraska Belle. A number of the gilts are bred to him. For an attraction for the boys they include in their sale, on February 10th, Beatrice Queen 71346 by Duroc Challenger by Orion Chief. She is the dam of the two gilts that sold at the R. J. Harding sale for more than \$1,000. She is bred to old Kan't Be Beat for early farrow. Four gilts by Red Knight 25199, first and sweepstakes boar at the Nebraska State Fair in 1905. Two sired by Junior Jim, the \$5,000 boar. Another good one is Eureka Maid by Echo King, one of the plums. We cannot do justice to all, but in their catalog they will give each individual description. Write these gentlemen for catalog. They would be pleased to have you with them on sale day. Send bids to Messrs. T. C. Callahan and J. P. Speerman and they will be honorably treated.

#### BERKSHIRE SOWS AND GILTS.

Any of The Homestead readers who are on the market for some well-bred Berkshire sows and gilts should write Mr. E. H. Dancer, of Lamoni, Iowa. Mr. Dancer has a choice lot of sows for sale, and he has some of the most up-to-date breeding. He is pricing these right if taken soon. Write him at once if you want well-bred Berkshire sows.

#### SHOTWELL AND MENEFFEE'S DUROC OFFERING.

On February 14th, the last day of the circuit in which this sale is included, the above gentlemen will offer forty-five head of females, consisting of fifteen mature sows carrying the blood of Orion, Reed's Banker, Tientsin and others. These sows have made good money for their present owners and should offer a good investment for some breeder. They have been reliable producers of large litters. Fifteen head of fall yearlings sired by Challenger II. and as many

## CLOSING OUT SALE OF HEREFORD CATTLE AND CHESTER WHITE SWINE Auburn, Ia., Saturday, Feb. 9, 1907 37 HEAD 29 Cows and Heifers 8 Bulls.

Including my herd bull, DALE LAD 35TH 158312, a grandson of old Dale and Star Grove 15th, together with a lot of his get. All the young bulls except one will be sired by him, and the most of the young heifers. The blood of old ANCIENT BRITON, ANXIETY 4TH, THE GROVE 3D, COLUMBUS and LORD WILTON predominates in my herd, and I believe I am offering as good a bunch of cows and heifers as has ever been sold of late years. Ella Briton, a daughter of Ancient Briton, out of a Cherry Boy cow, goes in, also a grand lot of Masher and Jumbo cows in my sale. The most of the cows will weigh from 1,300 to 1,800 pounds, and are good breeders. For the size of my herd no man has a better one. There are some particularly choice heifers in my sale.

CHESTER WHITES—I will also close out all my Chester Whites, including my splendid herd boar, Duke of Headlight 15866. Will also sell my horses, fancy poultry and farm machinery. Write at once for catalog. Address,

COL. C. M. JONES **W. H. Leslie, Auburn, Ia.**

## Dorr's Great Poland China Brood Sow Sale

63  
HEAD

The Cream of the Herd Will be  
Sold in my Sale at my Farm Near  
**REMSEN, IOWA,**  
February 5, 1907.

63  
HEAD

Sired by Meddler, the great champion boar at St. Louis; Mischief Maker, an Iowa and Illinois State Fair Winner; Columbia Chief, an Iowa and Nebraska State Fair winner; Tecumseh Keep On, and the great boar, Dorr's Tecumseh. The aged sows and fall gilts are bred to Dorr's Tecumseh, the gilts to Hands Down, my new herd boar. I have bred for bone, size and finish, and I have got what I am advertising. I will show you as growthy a bunch of gilts as you have seen this year, and I don't care where you have been. My offering from beginning to end is high class and I invite all to be with me on sale day. Write for catalog at once. Address,

**HENRY DORR, - REMSEN, IOWA**

COLS. F. M. WOODS, BENSON and LYLE, Auctioneers.

## High Class Poland China Sows

FROM THE HERD OF  
**H. B. MOATS & SON, VILLISCA, IOWA.**  
FEBRUARY 5, 1907.

**45 HEAD** and they are a high-class lot of sows, with plenty of size and they certainly have the finish. Twenty large sows, a year old last spring, fifteen head a year old last fall, and twelve spring gilts. The bulk of the offering is sired by our great boar, SHAMROCK. We are including a very fine Chief Perfection sow now two years old, and bred to Shamrock. Another great yearling we are offering is sired by Perfect Tecumseh, a litter brother to Perfect Perfection. We think we never sold a better bunch of sows than will be offered in this sale. Write for catalog at once. Address,

**H. B. MOATS & SON, VILLISCA, IOWA**  
Col. H. S. Duncan, Auctioneer.

## 45 Growthy Poland China Sows and Gilts 45

—AT PUBLIC SALE—  
**FEBRUARY 8, 1907, ANKENY IOWA.**

FOR a number of years I have been building up a herd of Poland Chinas. From time to time, I have added good individuals to my collection. My work has been well spoken of by breeders and swine men. In this, my first sale, I have taken special pains to select my best and have them be a credit to myself and the breed. Ten yearlings and tried sows sired by Johnson's Chief, Nemo L's Dude and Chief Perfection 2d. Thirty-five March gilts sired by Tecumseh Longfellow. I have the long, deep-bodied, strong-boned type. Send for my catalog. Mention this paper.

**WILLIAM LENTZ, ANKENY, IOWA**  
COL. H. S. DUNCAN, Auctioneer.

gilts sired by Orion's Rival and Model Jim will complete the number offered. Many of the mature sows will have litters in the sale which will indicate their ability to produce, better than ink and paper. This sale is near Polk City and will be held in comfortable quarters. Send for catalog and remember the date.

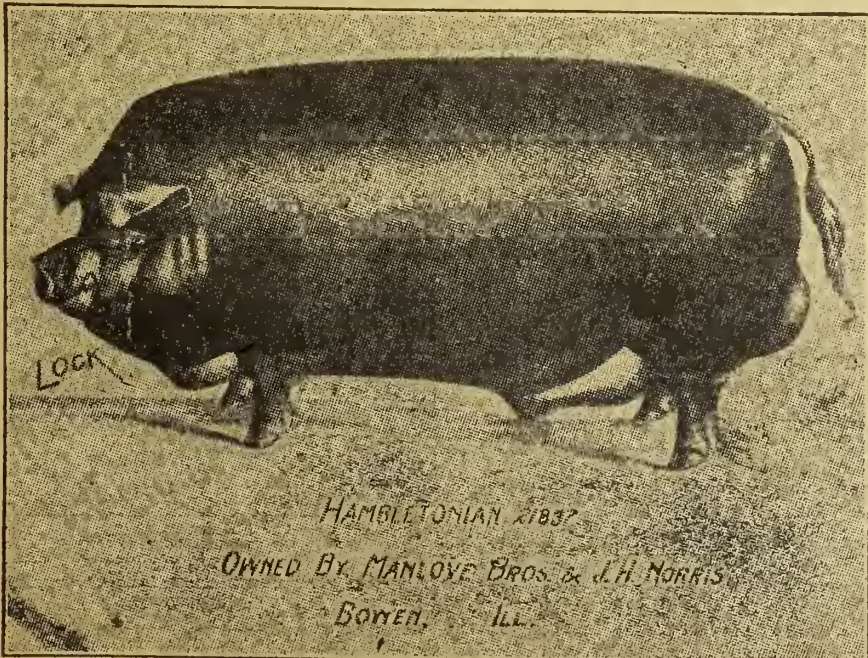

#### RENSHAW'S DUROC JERSEY SALE.

The opening gun of the northeast Nebraska Duroc Jersey sale circuit will be fired at the home of Mr. Austin Renshaw, of Blair, Neb., on February 4th. He is selling eight spring yearlings, two fall yearlings and thirty-one gilts. Four of these yearlings are sired by Alix Advance, a litter brother to the great sow, Alix II.; four by Golden Perfection, one by Cole's Duroc out of an Improver dam; one by Glendale Jim out of Lady Alix, the sow that sold in his last sale for \$425. The sire of this sow was Glendale Jim, second-prize yearling at Des Moines in 1905, and a son of the sweepstakes boar, Gold Dust Jim. She is a splendid sow and is bred to Arion, a winner at Des Moines and Lincoln for three years in succession. These yearlings are all bred to Arion and Long Alix. The gilts are sired by Junior Jim, the \$5,000 boar. There are twenty-five of these and they are a nice bunch, with fine color, heavy bone and good feet. These are bred to Arion, Long Alix and Redwood Chief, a son of Ohio Chief. One of the toppest gilts that he will sell in this sale is a gilt by Long Alix. She was farrowed March 16th and weighs over 350 pounds. She goes into the sale bred to Arion. Mr. Renshaw also sells four good gilts by Glendale Critic and out of a half-sister to Junior Jim. Two of these are very good and will weigh 300 pounds and all are bred to Redwood Chief. There is a good late bred to Redwood Chief. Mr. Renshaw has purchased Messrs. Manley & Co.'s interest in Arion and his sale will be the only place you can get Arion sows. He will offer more

Junior Jim gilts in his sale than will be sold in all the other sales this year. Write for his catalog and get a line on just what he is selling. Please mention The Homestead when writing.

#### QUICK'S DUROC AND SHROPSHIRE SALE.

One of the good Duroc Jersey offerings of the year is that of Messrs. S. R. Quick & Sons, which will be held at Gosport, Ind., on Wednesday, January 30th. Forty head have been selected for this occasion and they are worthy the attention of discriminating breeders. Mr. Joshua Rothrock, of Centerton, Ind., contributes some very choicely-bred gilts. The Messrs. Quick have been ardent supporters of the Duroc for many years. Their efforts have been rewarded in the selection of good foundation stock by the excellence of their herd. In order that the offering would come up to the standard which the Messrs. Quick have always maintained, several sows which had been reserved for use in their herd have been included in the offering. They are sired by such noted boars as Baker's Bred Right, Top Notcher, Perfection and others of equal merit, and are bred to Beat Him If You Can, the boar which recently sold for \$3,000; Quick's Perfection, Sure Winner Jr., and Go Forward. The western breeder who wishes to add new blood to his herd will find this herd noted among Indiana breeders. Sixty-seven head of Shropshires will be sold the same day. Many of the ewes are imported and are bred to a ram whose sire and dam were both imported. All ewes of breeding age are safe in lamb to this ram. Several young rams are included in the offering. The catalogs are now ready and will be sent to all interested who write as per the advertisement on page 37 of this issue. Those who cannot be present sale day can send bids to Mr. D. M. Pierce, represent-

Hambletonian 21837, a noted state fair winner and sire of state fair winners. Females bred to this noted boar are included in the public sale of Messrs. Manlove Bros. & Norris, at Bowen, Ill., on Friday, February 1st. See field notes.

ing this paper, in care of Messrs. S. R. Quick & Sons at Gosport, Ind. Kindly mention The Homestead when writing.

# A. P. ALSIN SELLS FORTY-FIVE DUROCS AT BOONE, IOWA.

Mr. A. P. Alsin, of the Ames-Boone-Polk City Duroc Jersey sale circuit, will hold the second day's sale of the circuit on his farm near town, February 12, 1907. While he presents a larger offering than some of the other members of the group, he has been careful to keep his selections up to standard merit and expects to show buyers on sale day some of the good representatives of the breed. Mr. Alsin has at the head of his herd several very excellent boars as individuals, as well as being richly bred. His offering presents a great variety of blood lines and among the seventeen head of yearlings and tried sows will be found daughters of Old Brilliant, Young Pilot, Albinus, King West, Old Surprise, Belle's Perf. King, Teddy R. and others. Readers can imagine that this bunch will contain some choice numbers and likewise producers of some of the best stock owned on the farm. The gilts will be a well-fitted bunch and are well sired. There will be several by each of the following boars: Ohio Chief, Proud Advance, Advance Dandelion and Orion's Typc. All through the offering is a choice one and will merit close inspection. Get a catalog and post up. The advertisement appears on page 35.

FAGAN, BROWNING & McCABE DUROC SALE.

Breeders of Duroc Jerseys are invited to be present at Hersman, Ill., on Tuesday, February 5th to attend the second annual brood sow sale of Messrs. Fagan, Browning & McCabe. The offering is the best ever made from this noted herd and breeders will find it to their advantage to be present sale day. This firm own one-half interest in Tip Top Notcher and are including a number of very good sows bred to him. Such sows as Foust's Pride by Kan't Be Beat, champion sow Illinois State Fair 1905-06; S. E.'s Model VIII, by Ohio Chief and sister to S. E.'s Model IX, that sold for \$1,060 at auction; Belle of Boone, fifth at Des Moines 1905, and Creamie, that cost them \$400 at auction, go in this sale bred to Tip Top Notcher, and many other choice sows bred to Golden Echo, Oakwood, Pilot Wonder, Royal Orion (by Orion) and Red Express. There will be eight or ten daughters of Tip Top Notcher bred to above hogs. The sale will include sows bred to Proud Advance, Hanley, Buddy K. IV. and other good sires. In our next issue we will give full particulars regarding this offering. Write for catalog at once, kindly mentioning The Homestead. Bids sent to Mr. D. M. Pierce, in care of this firm at Hersman, will be properly handled.

## STONER'S BROOD SOW SALE.

Forty-five head of choicely-bred Durocs from the herds of Messrs. T. W. Stoner & Son, of Henry, Ill., and J. W. Remley, of Lacon, Ill., will be sold at Henry, Ill., on Friday, February 8th. Messrs. Stoner have the following to say regarding their offering: "Yearlings, fall yearlings, gilts and three or four two-year-old sows of fashionable families are included. Our motto has always been, 'Individuals as well as pedi-

## BREEDERS LOUD IN PRAISE OF HOMESTEAD ADVERTISING RESULTS.

The Fairchild & Stevenson Sale of Duroc-Jerseys very successful—Mr. D. M. Norton's flock of Shropshires all sold out and obliged to stop advertising—Heads the list in Wisconsin.

THE HOMESTEAD is in receipt of scores of letters from breeders and importers praising its efficacy as a live stock advertising medium. Here are three samples: Messrs. Fairchild & Stevenson, breeders of Duroc-Jerseys at Onawa, Iowa, write: "We are very well satisfied with the results of our advertising in The Homestead. This was our first sale and we regard it as very successful. Enclosed please find money order in payment for the advertising." Mr. D. M. Norton, breeder and importer of Shropshire sheep at Sanborn, Iowa, writes: "Please discontinue my advertisement for the time being, as I am tired of answering the numerous letters called forth by The Homestead. I am all sold out of ewes, but am expecting a new importation from Canada about February 1st." Mr. James Fleher, breeder and shipper of Improved Chester White swine, of Eastman, Wisconsin, writing under date of Dec. 31st, says: "Please change my advertisement, as I am all sold out and I must give The Homestead again credit for standing at the head of the list of papers used this year; it has made me splendid sales."

gress.' Our hogs when properly fitted have ranked second to none. This will be an opportunity to get bargains. This offering is sired by and bred to such boars as Advancer Col., a litter brother to Proud Lady that sold in Messrs. Manley & Co.'s sale last winter for \$1,275. Also Stoner's Improver, Ohio Boy and Dandy Joe. The breeding of these boars is too well known to need any comment here. You will see their produce in this sale. Mr. J. M. Remley, of Lacon, Ill., will sell ten head of splendid sows, two or three two-year-old sows sired by None Such. The others are sired by Choice Goods and J. I. C. Choice Goods, one of the best sons of Echo King. J. I. C. is sired by Kan't Be Beat 28067, dam Cedar Vale Queen VIII. 70598, first in class and junior champion at the World's Fair St. Louis. We will welcome you all. Come to the sale and bring your friends." Send for catalog as per the advertisement on page 48 of this issue and watch these columns for further particulars next week. Bids sent to Mr. D. M. Pierce in care of Messrs. Stoner will be properly handled.

## OSBORN'S HIGH-CLASS DUROCS.

Never in the history of his breeding operations has Mr. O. E. Osborn been able to offer such a high-class lot of sows as he will drive through his sale ring on January 30th. Mr. Osborn has selected his best for this occasion and is putting in some of the best sows he has in the herd. To begin with, he is putting in the splendid sow, Allen's Maid, bred to Ohio Chief for early farrow, and no man is selling a better one. He is also selling six daughters of the great Ohio Chief and eight head in the sale will be bred to the same boar. The Ohio Chief sows that he is selling will be bred to Baxter's Buddy 3d and Briggs' Prince. Another very attractive sow is Proud Girl by Proud Advance. This sow was the top sow at the John Tryon sale last year. She is one of the best daughters of his Proud Advance and she is bred to the great Ohio Chief. He will also have some daughters of his old boar, Indicator, in the sale, and they are always good. If any man in the business deserves a good sale it is Mr. Osborn. He is offering a splendid lot of sows to be-

gin with, and no man has given more assistance to other breeders than he has. Everybody should write for his catalog. It gives the breeding of everything and shows what they are all bred to. Kindly write for it and mention The Homestead when doing so. If you can't attend the sale yourself, send a bid to Mr. M. T. White, Homestead representative, in care of Mr. Oshorn, and it will be attended to.

## CAREY CAMERON'S SHORT-HORN AND DUROC JERSEY SALE.

One of the good Nebraska sales that we would like to call the attention of Homestead readers to is that of Mr. Carey Cameron, at Herman, Neb., on February 25th. At that time Mr. Cameron will sell thirty head of Duroc Jersey gilts and about sixteen head of Short-horns, and we will take it upon ourselves to say, after inspecting both offerings, that they are as good as will go through any Nebraska sale ring this year. Mr. Cameron will be remembered as the man that sold Short-horns with Mr. John Skinner a few years ago and made an average of \$174. He is selling eight choice heifers sired by his former herd bulls, Red Bud and Scottish Count. All these heifers are safe in calf to Imp. Victoria's Count, his present

herd bull. He will also sell Jenny Lind, a six-year-old cow with bull calf at foot by Imp. Victoria's Count, and rebred to the same bull. She is a Chief Lavender cow out of a Royal Victor dam. He will sell eight good young bulls, all sired by Imp. Victoria's Count, and one is out of a Butterfy cow. He also puts in a good Canadian heifer. Mr. Cameron also sells thirty exceptionally good Duroc Jersey gilts in this sale. For years he has been picking up the best of sows and herd headers, and now he does not need to take a back seat for any man. Always being a stickler for size and bone, and being a good feeder himself, he has produced a bunch of gilts this year that are second to none in size, bone and quality. Just put this sale down as one where some good stock can be bought and bought right. The date is February 25th, at his farm near Herman, Neb.

## ALLEN'S SALE OF CHAMPION DUROC JERSEYS.

Mr. H. S. Allen, the well-known breeder and showman in Duroc Jersey circles, has chosen Thursday, February 7, 1907, for his sale of splendidly-bred sows and gilts. For the superior location and advantages of transportation the selling will be done in Spiker's sale pavilion, Chariton, Iowa. This place may be reached from four directions by rail and as the sale is to be held in a very comfortable building Mr. Allen is looking for a large crowd, regardless of weather conditions, whether they be rain or shine. There will be hotel accommodations for those from a distance and but four blocks from the depot is pavilion. As a breeder and exhibitor Mr. Allen has a very enviable record, and it has always been a specialty with him to select good boars. At the present time there are at the head of his herd two of the strongest boars carrying the richest blood of any, perhaps, in the state, or it might not be going too far to say in the country. Top Notcher Again, the old herd boar, was a champion at the Indiana and Illinois State Fairs in the hands of Mr. J. A. Teter, of Remington, Ind. This boar sired many of the most noted prize winners of recent years. The list includes Top Notcher

Livestock Auctioneer, Mason City, Iowa.

PERCHERON STALLIONS AND MARES FOR SALE. Blacks and grays. Nady Brothers Fairfield, Iowa.

REGISTERED HEREFORD CATTLE—A few choice bulls for sale cheap. John Thornton, Colo. Iowa.

Chief, the junior St. Louis champion, also many others at the same show. The fact that his get were prize winners at this fair shows how he breeds. In good condition Top Notcher Again weighs 1,000 pounds and now at the age of seven years he is as active and vigorous as any of them. In the selection of Crimson Wonder Again Mr. Allen secured a wonderful sire, and not only a prize winner, but a sire that gets a very uniform and typical lot of gilts, as will be seen on sale day. As is generally known, he proved the champion boar any age at the recent Des Moines fair. He is a hog with

## SPECIAL BARGAIN SALE.

10 Two-year-old Short-Horn Heifers

Bred to an imported Cruickshank bull; also some extra fine young bulls, large boned and growthy, sired by an imported Cruickshank bull.

## Chester White Hogs

30 smooth, well quartered, strong boned young sows, bred to high class matured herd boars for late March and April farrow for sale. Write

W. W. VAUGHN,

MARION, IOWA.

20 IMPORTED Percheron stallions arrived Jan. 4, 1907. Your choice, but one, for \$1,000. Also home-bred stallions. Frank L. Stream, Creston, Ia.

lots of good bone and stands right up on his toes; at the same time he is remarkably smooth and free from wrinkles and he is a splendid type of red hog all through, including his color. A large part of the older sows are sired by the Top Notcher Again boar, while the gilts are by Crimson Wonder Again. There are also some of the gilts

sired by Keep On out of an Advance dam; others sired by Proud Advance, Leather Stockings 2d, a prize hog, and Tom Davis, second at Des Moines and first at Nebraska this last fall. He is a \$300 hog. Here is some breeding that is unexcelled. Everybody wants some of it and knows just how good it is without further eulogy. Suffice it to say that the quality of breeding on the other side of the herd is just as good. The working herd contains some choice individuals and there will be some of them in the sale for attractions. This is one of the best sales of the season. Get in line with the boys and send for a catalog. You will find it interesting. The formal announcement appears on page 32 and when writing Mr. Allen kindly refer to The Homestead.

#### HENRY BROS. POLAND CHINA SALE.

The annual brood sow sale of Messrs. Henry Bros., will be held at Le Mars, Iowa, on February 8th, when they will offer fifty head of fall yearlings, matured sows and spring gilts. Their offering this year is an extremely creditable one, and they have selected many of their very best things for this sale. Among these are daughters of their old sweepstakes boar, Matchless Perfection Jr., Matchless Perfection, Corrector 2d (the sire of Louis of Oakwood, that sold for \$2,000 a short time ago), Meddler Boy 2d, On Parade, Dewey Corwin and Correct I Know. Many of the matured sows are the dams of some of their show stuff and there will not be one of these in the sale that will not carry her own guarantee with her. The gilts are the very pick of this year's raising, and carry as much or more of the blood of the leading winners as any other bunch that will be sold this spring. One of the attractions in the sale will be a daughter of Corrector 2d, and she should bring forth the very best breeders. The Henry Bros. herd has always been one of the leading winners at the Interstate Fair, and for the past two years has always carried the sweepstakes boar prize back home with them. The get of old Matchless Perfection have always been in the winning, and he is one of the very uniform breeders. They are selling some sows with plenty of size and bone, and with as much quality as can be found anywhere. They are issuing a very nice catalog and will send it to all those who ask for it. Kindly mention The Homestead when writing.

#### GEORGE REGENNITTER'S POLAND CHINA SALE NEXT WEEK.

This is one of the good eastern Iowa sales to be held next week. The selling will take place at Bennett, Cedar county, Iowa, Tuesday, January 29th. Bennett is located on the C., R. I. & P. forty-five miles east of Cedar Rapids and thirty miles northwest of Davenport. Those coming from the east and south should come the evening before. Mr. Regennitter has taken especial pains to make this, his second annual sale, still better than his last. During the past year he has improved his breeding herd a great deal and feels confident that all those who see his offering on sale day will agree with him on this point. The offering will be found to represent a great deal of the Perfection strain of blood. At the head of the herd stands Iowa Perf. 102717. He carries the characteristic color and the quality of his ancestors and is included in the sale, however, not for any fault of his own. Mr. Regennitter also has at the head of his herd, Young Wonder, a hog of great length and heavy bone and one that will mature into an 800-pound hog. He has been mated to some of the offering which Mr. Regennitter believes will make a good cross. There will also be a strong following of gilts. Some of these are March litters, while a number were yearlings in September, so altogether they should make a very strong attraction for the sale. Come out to this sale whether you expect to buy or not. You will see some of the very best Polands. Catalogs are now ready and a postal will bring one. The formal announcement appears on page 41 and when writing kindly mention The Homestead.

#### EDMONDS, SHADE & CO.'S GREAT SALE OF DUROC JERSEY PRIZE WINNERS.

One of the greatest brood sow sales that will be pulled off this year will be that of Messrs. Edmonds, Shade & Co., at Kingsley, Iowa, on February 7th. The cream of their well-known herd goes into this sale and includes all of their shows sows, together with the great champion sow, Royal Blossom 5th. Altogether it is an offering that is seldom found in one sale, and Duroc Jersey breeders will help themselves materially by making their arrangements to be present on this occasion when this great lot of sows will be sold. They are selling forty head, twenty tried brood sows and twenty top gilts. These will be bred to their herd boars, Masterpiece and American Royal. Masterpiece is a son of Brilliant Jr. 30655. He was purchased by Mr. Shade at the American Royal where he won first in class in one of the hottest competitions ever seen at that great show. He carries the blood of old Kan't Be Beat, Top Notcher, Ohio Chief and traces twice to the World's Fair champion sow, Lucy Wonder. He is a good individual and will be bred to about fifteen or twenty sows in the sale. American Royal, the undefeated sweepstakes boar, has also been used on many of the sows, and he has been holding his own wonderfully well. First and foremost is the great champion sow, Royal Blossom 5th. She won first prize and championship at the Iowa and Minnesota State Fairs and also at the Interstate Fair. At the latter show she also won first in class and sweepstakes bred by exhibitor. Besides being a great show sow she is also a good brood sow and she is bred to the young boar, Masterpiece. Proud Maid is one of her daughters, being sired by the noted boar, Proud Advance. Her litter mate topped the sale last year. She is also bred to Masterpiece. American Lady by American Royal was first in her class at Minnesota and also at the Interstate Fair. She also goes in bred to Masterpiece. Kruger Maid 2d by Orion, out of the great breeding sow, Kruger Maid, that topped the Manley sale two years ago at \$410, one of the attractions and she will be bred to Masterpiece. Belle Johnson by Advance, a full sister to Proud Advance and a litter sister to Reed's Banker, goes in bred to American Royal. Belle Royal by American Royal, first in aged herd at the Minnesota State Fair, will be bred to Masterpiece. There are a grand lot of American Royal's daughters in this sale, also daughters of Junior Jim, Red Chief I Am, Advance, Royal Plummer, John

Orlon and other well-known boars. It would be useless for us to even attempt a description of more of this offering, because they should be seen by the buyers. This well-known firm do not intend to take out a herd next year and are therefore selling all their winners and their prospective winners. Their catalog is an interesting one and should be in the hands of every breeder and every farmer who is thinking of buying a Duroc Jersey brood sow. Mr. E. Z. Russell, ex-president and one of the present directors of the National Duroc Jersey Association, will represent Mr. M. T. White, of The Homestead, at this great sale, and any bids sent to him in care of Messrs. Edmonds, Shade & Co. will be properly attended to. Write for catalog and kindly mention The Homestead.

#### THE HANN-MAYNE HEREFORD SALE.

Breeders and lovers of Herefords should not forget the sale of Messrs. F. W. Hann and J. S. Mayne, at Harlan, Iowa, on February 1st. Mr. Mayne is one of the oldest breeders in Shelby county and he is closing out his herd. He will therefore include his herd bull, Earl of Lakeview 6th, a grandson of old Corrector, all his breeding cows and all the young things on the farm. Many of the cows will have calf at foot or will be safe in calf. He will sell a choice lot of females and as everything goes, there will be some bargains. Mr. Hann is selling twenty-one head of cows and heifers and seven young bulls. Nearly all of these are sired by the great show and breeding bull, Ike 77284, and they are a grand good lot of cattle. Most of his cows and heifers are bred to Spartan Grove 2d, a Nebraska State Fair prize winner, and he will also be sold in the sale. Here is a good herd bull for someone. He is one of those broad-backed fellows, low down and wide out, and he is a good breeding bull. Mr. Hann is retaining a young bull and has therefore decided to part with him. Mr. Hann is selling a nice lot of young bulls, all sons of Ike. There never was a better time to buy Hereford cattle and start a herd. These two breeders are well known and are reliable, and they are offering a class of cattle that should sell. It would be an easy matter to pick up a car load of bulls in this sale, and at prices that anyone could afford to pay. Write to Mr. F. W. Hann, Harlan, Iowa, for catalog, and then arrange to be at Harlan on sale day. Kindly mention The Homestead when writing.

#### RUSSELL'S BROOD SOW SALE.

One of the sales that always attracts Duroc breeders to Nebraska is that of Mr. E. Z. Russell. The name of Russell and Duroc go together out there, and it has always been a great combination. It has been a winning combination, not for any extremely high prices, but for an even, business-like range of prices that any man could pay and make money. His sale this year will be the third in line of the Northeastern Nebraska Duroc Jersey Sale Circuit, and his date is February 6th. At that time he will sell forty head, twenty-six of which are fall yearlings and aged sows and the balance are spring gilts. They will be sired by his noted prize winning boar, Glendale Critic, Malcolm's Model, Gold Dust Jim and Gold Dust Jim 2d. They will be bred to Glendale Critic, Malcolm's Model, Crimson's Choice, and Jumbo Critic. He is selling a fine aged sow called Eleanor R. IV. She is a daughter of Glendale Prince, one of his former herd boars, and her dam is by Am Awake. He also sells a litter sister to Critic's Echo, the young herd boar that won at both the Iowa and Nebraska State Fairs last fall. She is bred to Crimson Choice, a grandson of Crimson Wonder. He will offer a splendid lot of Malcolm's Model yearlings in this sale, and daughters of this noted hog have always made great brood sows. Mr. Russell's offering will be in good condition and he will sell a string of sows that the boys can all go after. The sale will be held at the farm adjoining town, and everyone is cordially invited to attend this sale. It has always been one of the best all-round sales in Nebraska and the reputation will not suffer on account of the class of sows that he is selling this year. If you want to attend a very good sale, just arrange to be with Mr. Russell and his friends on this occasion. Write at once for his catalog and mention The Homestead.

#### KRASCHER'S DUROC SALE.

We take pleasure in calling the attention of our readers to the forthcoming brood sow sale of Messrs. Fred Krascher & Son, of Macon, Ill. They are making an unusual effort to make this sale a success and will sell sows that they would like much to hold in their herd on account of their producing qualities. They have even gone so far as to place sows in this sale that have produced some of their very best litters and are sold for no fault, but as attractions. Among these is Buddy T.'s Belle by Buddy T. Six of this sow's gilts sold in their fall auction for \$708 and she was third-prize gilt at Illinois State fair in 1905. Another good sow, both a show sow and producer, is Perfection Maid by Allison Jr. Perfection, dam Advance Belle. Perfection Maid was second in class and in first-prize litter at Illinois State Fair and has been in second-prize aged herd three times at Illinois State Fair. One of her gilts sold for \$270 and another for \$125 in their fall auction. She is bred again to Mayor Jr. and should produce some good ones. Still another sow that should prove attractive is Jay's Model by Model Chief by Ohio Chief, dam Lady's Fancy by Proprietor F. by Sensation by Orion R. by Orion. She is a big, stout, useful sow and good from end to end, in fact, a show sow. She is a star attractions and is bred to the great High Notcher by Top Notcher. A great sow is Corrector's Belle by Corrector Boy by Corrector. She is also bred to High Notcher. The great brood sow, Violet A., by Prairie Chief by Ohio Chief, bred to Mayor, November 17th. She was the top of Mr. T. W. Stoner's sale last winter and is a good one. A good sow is Hlawatha Red by Buddy K. IV, dam by The Lad For Me, bred to Gold Cloud, champion Illinois State Fair 1904. Prosperity Belle, the dam of Gold Standard, goes in the sale bred to High Notcher. Three extra choice gilts are by Top Notcher Chief Jr., champion boar at World's Fair, St. Louis; two are bred to the champion, Gold Cloud. Two good gilts are by Tip Top Notcher and bred to the great sire of good ones, Mayor Jr., and

## POLLOCK'S CLOSING OUT SALE

OF HIGH CLASS

## DUROC JERSEYS

THAYER, IA., FEBRUARY 1, 1907

I am selling my entire herd, including my two great young boars, FANCY PERFECTION 47967, a winner at the Iowa State Fair, and D. J. O. OHIO CHIEF, a son of the great Ohio Chief. There will be a number of splendid Perfection Chief sows in my sale, also daughters of Alix Pride, old Brilliant, Fancy Perfection and other well-known boars. Write at once for catalog. Address,

**D. J. Pollock, Thayer, Iowa**

## GREAT OFFERING OF POLAND CHINA BROOD SOWS

LeMars, Ia., February 8, 1907

We will sell fifty head—ten head of matured sows, fifteen fall gilts and twenty-five head spring gilts. These are daughters of such noted boars as Corrector 2d (the sire of Louis of Oakwood, that sold for \$2,000 a short time ago), Matchless Perfection by Chief Perfection 2d, and Matchless Perfection Jr. (the sweepstakes boar at the interstate fair, 1905-6, and first-prize boar at Minnesota State Fair, 1906; he also sired more first-prize boars at the interstate fair than all other boars combined), Meddler Boy by the champion On and On, Pilate's Chief, Dewey Corwin and Correct I Know. These sows are bred to Matchless Perfection, Matchless Perfection Jr., Meddler 2d, On Parade and Correct I know. This bunch of sows is as good as we have ever sold. The mature sows are large and useful, and the gilts are large and roomy, and are all safe in pig. Catalog is ready and will be sent on application. Address

MATCHLESS PERFECTION.

BOX 1102. TELEPHONE TO FARM

## 40 Poland China Brood Sows

AT THE EVERGREEN STOCK FARM

Defiance, Ia., February 9, 1907

We have cataloged about twenty head of our very best brood sows, yearlings and spring gilts for this sale. These are sired by Dakota Chief 2d 35977, R.'s Perfection 39012, out of Nemo L's Dude, Tecumseh and Perfection sows. We have selected the best brood sows and the pick of the gilts to go into the sale. Write us for catalog at once. Address,

**Wm. Ray & Son, Defiance, Ia.**

many other good things, including gilts by Gold Cloud, Mayor Jr., Gold Standard and other good ones. Messrs. Krascher will be pleased to furnish information to any interested in good Durocs if they will write them as per advertisement on page 48 of this issue. Full particulars regarding this offering will be found in our next issue. Bids sent to Mr. D. M. Pierce will be properly handled.

#### SMITH BROWN'S SOW SALE.

On Thursday, February 7th, Mr. Smith Brown, of Waterloo, Neb., will make his annual offering of Duroc Jersey brood sows. The name of Smith Brown and Duroc Jerseys is synonymous in Nebraska, and he has owned in his time some of the greatest that the breed affords. This year Mr. Brown is selling forty head, made up of about twenty yearlings and brood sows and twenty gilts. These will be sired by such well-known boars as Crimson Wonder 2d, Glendale Critic, Echo King and Orion. Seven of the gilts that he is selling are granddaughters of Nebraska Belle, and are bred to a son of Gold Dust Jim. One of the best things that Mr. Brown is selling this year is a two-year-old sow called Gold Dust Queen. She is a daughter of the sweepstakes boar, Gold Dust Jim, and she was the very best sow sold in the Russell sale last year. She is bred to Belle's Model, a son of the great Nebraska Belle. This sow could be made a show sow for next year if properly fitted. Mr. Brown says she is one of the best he has ever owned. Two of the best Glendale Critic gilts that he is selling are out of this sow. The sows that go into the sale are bred to Belle's Model, a son of Nebraska Belle; Echo King, the Nebraska State Fair boar, and Red Reuben, a son of old Gold Dust Jim. Mr. Brown is putting up a nice offering, and it certainly is a representative lot which he hopes every breeder will arrange to see on sale day. The sale will be held on the farm and every arrangement will be made for the convenience of those buyers who attend the sale. Mr. Brown's is the fourth sale in this circuit, and no breeder should fail to attend this one. Mr. Brown has been one of the most popular and one of the most reliable breed-

ers, and always has some good things to sell when sale day arrives. Send him your name and ask him to send you a catalog at once. Please mention The Homestead when writing.

#### BRIDGFORD & NESBITT'S POLAND CHINAS AT AUCTION.

One of the good, useful lots of Poland Chinas to be offered to the public this year is that of Messrs. Bridgford & Nesbitt, of Aledo, Ill. These gentlemen are well known to Homestead readers as progressive stockmen. They have used good boars at the head of their herd for several years and have selected females from the prolific families and fashionable strains for use in their herd. For two years they used Faultless Perfection 2d 70889 as their principal herd boar. He was sired by Faultless Perfection by Ramsey's Perfection, and his dam was Reigning Belle 183810 by Grand Hadley. This boar was used with much success and many of the offspring are sired by him. His get have the smoothness and quality combined with heavy bone which successful breeders are in search of. A few of the offspring are sired by Rising Sun 2d 92463. This was one of the low-down, heavy-boned, broad-backed kind. The yearling sows in this sale are sired by this hog and are of good length with plenty of finish. The sire of most of the gilts in the offering and the boar to which many of the sows are bred is Young Delight 104551. He was sired by Chief Perfection H., he by Chief Perfection 2d. His dam was Lady Delight 2d 261148 by Lad Mark 71309. These gentlemen are to be congratulated in securing such a good boar to take the place of Faultless Perfection 2d. Young Delight is the sire of many of the best spring gilts and those present sale day will have an opportunity to see for themselves the kind of pigs this boar is producing. A number of the gilts that go into this sale are bred to the good spring boar, Young On and On 2d. He is a son of On and On 2d by the noted breeding and show boar, On and On 94953. Crossed on such gilts as this firm have been producing will certainly prove advantageous to the breeder who wishes to improve his

herd. A spring boar which has been used to some extent is Young America 117429, a grandson of Keep On, his sire being Keep On Jr. The stock which this firm are offering to the public is one of those good, useful lots which are money makers. The sows are in good breeding condition and we recommend this offering to our readers, knowing that they will be pleased with the breeding and individuality. Look up the announcement on page 34 of this issue and write for catalogs at once. Further particulars will be found in our next issue. Mention The Homestead when writing.

#### BAXTER'S CLOSING OUT SALE.

When Mr. Ed. A. Baxter, of Pawnee, Ill., says anything you can depend upon it. He has determined to close out his herd of Duroc Jerseys and we wish to call attention to this week to a few remarks which Mr. Baxter has often made in the presence of the writer. We quote the following from his catalog: "Breeder and Friends: In presenting this catalog to you I do it under protest of my own wish, having been a breeder of Durocs for fourteen years and I hope an honest and reliable one. I now come before you with this catalog for my closing out sale. When I say 'closing out' I mean just what I say. I am going to offer every Duroc on my place, including my herd boars, Buddy K. IV., Kruger Again and Major A. 44561, and will sell them if you make a bid on them. I positively will not be in the breeding business again for a few years, if ever. Besides these herd boars I will offer twenty sows, the best lot ever offered, ranging in age from two to three years, and you will see by looking over the catalog that I have a fine lot of stuff. I wish to say to the Duroc breeders of the state, I have the best of feeling and respect for them and should I ever take up the business of hogs again I promise you it would be Durocs. I thank you one and all for your patronage and kind treatment in the past and wish you one and all the best of success in your honorable undertakings. Come to my sale and I assure you you will be made welcome and receive the best of treatment." We have from time to time called attention to the noted herd boar, Buddy K. IV. He goes with the balance of the herd to the highest bidder. The wide-awake breeder in search of a herd boar that is a good breeder, as well as an individual of show-yard merit should not overlook Buddy K. IV. In our next issue we will give further particulars in regard to this offering, but wish to urge our readers to be present at this noted sale if in need of good stock. Catalogs will be sent to all as per advertisement on page 48. Mention The Homestead when writing. Those who cannot be present sale day should send bids to Mr. D. M. Pierce, representing The Homestead, in Mr. Baxter's care.

#### STANSELL & MATERN'S DUROC SALE.

Forty head of choicely-bred Durocs are included in the sale offering of Messrs. Stansell & Matern, of McNabb, Ill. One seldom finds three as good breeding boars as these gentlemen have used in their herds. They were selected because of their individual merit and breeding, more importance being given to their individuality. The breeding was not overlooked, as will be seen by an examination of their pedigrees. Chief Of All is a member of the noted Ohio Chief family. He is a wonderfully even breeder of big-boned, good-length progeny and is a hog of great size and lots of finish, stamping his characteristics on his offspring with wonderful regularity. The breeder who secures one of his get or a sow or gilt bred to him will have a valuable addition to his herd and something on which he can depend. Kan't Bee is the best son of Kan't Be Beat the writer has ever seen. His dam was by Top Notcher and he has made a very good cross on Chief Of All gilts. Many of the gilts in the sale are bred to him. Red Gift is a son of Hanley and is a young boar of great length, heavy bone and stands well on his toes. A number of gilts in the sale are bred to this boar. Peacemaker is by Perfection Chief, the boar which now heads the herd of Messrs. E. M. Castle & Son, of Joy, Ill. This boar was third at Iowa State Fair, 1905, sixty-eight in class, and headed third-prize herd; second at Minnesota State Fair, 1905-1906, pronounced by some of our best breeders to be entitled to first; first at Wisconsin State Fair 1905-1906, and headed first-prize herd; first and sweepstakes over all breeds at Beloit and Elkhorn Interstate Fairs, 1905; first at LaCrosse Interstate Fair, 1905-1906, and others that we might mention. He traces to the great Ohio Chief through Treble, both being by the same sire and to the noted Duroc King that did such great good in the herd of Mr. O. S. West. A number of gilts are bred to Peacemaker. The females in the offering are from large, prolific dams and will prove profitable to breeders who wish to add new blood to their herds. Messrs. Stansell & Matern invite the readers of The Homestead to be present on sale day, knowing that the offering will please the most discriminating buyers. Catalogs are now ready and will be sent to all who write as per the announcement on page 37 of this issue. Bids sent to Mr. Dante M. Pierce, in care of these gentlemen, will be properly handled. Plan to be present sale day.

#### MANLOVE BROS. & NORRIS' DUROC SALE.

Messrs. Manlove Bros. & Norris, of Bowen, Ill., have selected fifty head of Duroc Jersey females that will be hard to duplicate this season in any sale ring. All classes will be accommodated in this sale. The man who is looking for tried sows will have his pick of sixteen head, all good ones. The breeder who wants yearlings can select from thirteen head and the party who wants spring gilts will be given an opportunity to take his choice from twenty-one head. This offering is one of the best the writer has seen in recent years and is the best lot of stock which these breeders have offered for sale either private or public, and are deserving of the patronage of the best breeders. Most of the sows are bred to Hambletonian, one of the best breeding boars the writer has seen. Hambletonian is also a show boar. In 1904 he won first in the twelve and under eighteen months class at the Nebraska State Fair, and sired the second prize herd at the same show the next year. He is also the sire of the sow, Rose Loudon, which topped Mr. H. B. Loudon's winter sale at \$300. One of his boars sold in Mr.

Warner's sale the past fall for \$290. He is a hog of great length, with nicely arched back and a good spring of rib. He stands on the best of feet and legs, and is an unusually uniform and sure breeder. Crossed with the females that are included in the sale, bred to him, he cannot fail to produce something extra good. We recommend this offering to our readers with a feeling that in this herd is to be found much blood which has made the breed famous and which has to do with the rapid improvement of the Duroc breed. These gentlemen have been ardent supporters of the Duroc and have not been afraid to put up their money when it was necessary to secure the best. In Illinois Chief, one of the recent additions to their herd, they have an exceedingly good boar, both as an individual and in point of breeding. This boar was second in the under twelve months' class at the Illinois State Fair this past year, and had many admirers for first place. His sire was Tip Top Notcher and his dam was Daisy Improver, one of the best producing sows the writer has ever known. Those present sale day will agree with the writer that if this boar is carried along in as nice condition as at present he will be a fit candidate at the fairs the coming season for something more than second place. Females bred to this boar will prove good additions to any herd and the combination of breeding which Messrs. Manlove Bros. & Norris have collected and put into this sale together with the unexcelled individuality will please the discriminating buyer. We wish to call the attention of our readers to a few of the individuals which go into this sale. Remington's Queen is a March, 1905, sow by Golden Chief, the boar in use at the good herd of Mr. J. A. Teter, of Remington, Ind. The dam of this gilt is Pride of the West, by the Trans-Mississippi Exposition winner, Olympus. Remington's Queen won first in class, was in young herd that won first, first in young herd bred by exhibitor, first in herd get of boar, first on same bred by exhibitor at the Indiana State Fair in 1905, which gives five premiums to her credit. Her full sisters and brothers won first on under year boar, second and thirds as yearling sows, two firsts on young herd at Indiana State Fair, 1906. This sow has raised two good litters and is bred to Hambletonian for March litter. Three very good daughters of Hanley are found in Hanley I, II, III, and all three of them are bred to the good young hog, Illinois Chief. Lady Big I Am and Sister I Am are two Big I Am gilts of February, 1906, farrow. These two gilts will attract the attention of every breeder present sale day. One of them is bred to Hambletonian and the other to Illinois Chief. Three daughters of Tip Top Notcher, Faith, Hope and Charity, are worthy daughters of their noted sire. They are all bred to Hambletonian and should attract the attention of breeders in search of something good. Three yearling sows by Sec's Kan't Be Beat, one of the best sons of Kan't Be Beat and out of Lady Tip Top, a daughter of the old champion, Tip Top Notcher, are bred to Hambletonian and are worthy of special attention at the hands of all present sale day. Another of the good kind all want to see is the spring gilt, Annabelle. She is sired by Tip Top Notcher and is out of Fairview Maid, the sow which topped the Seckman sale at \$305 last fall. This gilt is bred to Hanley and will find ready bids at the hands of the breeders and farmers present sale day. There are a number of other good females in this sale; in fact, this offering is one of the best of the year, and readers of this paper should make it a point to be present sale day and inspect it for themselves. Those who cannot come to the sale will find it to their advantage to secure catalogs at once and if they wish to send bids, same will be properly handled by Mr. D. M. Pierce, representing this paper, if sent in care of Messrs. Manlove Bros. & Norris. Look up the announcement on page 48 and plan to attend this sale.

#### THOMAS & HOGSETT'S DUROC SALE.

The breeder or farmer who is in search of good Duroc Jerseys will find it to his advantage to be present at the annual Duroc Jersey brood sow sale of Messrs. Thomas & Hogsett, at Golden, Ill., on Saturday, February 2d. These gentlemen are among the best breeders to be found in the West. They have been liberal purchasers of the best breeders, and had the nerve to pay \$2,500 for a half interest in the World's Fair champion boar, Tip Top Notcher. In addition to this boar they are using Ambition, one of the sensational yearlings of the past season. The gilts in this sale sired by Ambition are certainly worthy the inspection and careful attention of all breeders in search of something which will improve their herds. Forty-nine head of excellent brood sows have been listed. We wish this week to call attention to a few of the females which go into this sale. U Kan't Best Her 128026 by Ambition was the first prize gilt under six months at the Illinois State Fair, 1906. She is bred to Tip Top Notcher for March farrow. A litter mate, U Need Her 128204, is also included in the offering and is bred to Golden Orion, a son of the noted breeding and show boar, Orion. This cross should result in something fit for the fair circuit of 1906. A yearling sow of exceptional merit is Topple 127534. Her sire was Tip Top Notcher and her dam Perfection Wonder is by The Lad For Me, both World's Fair winners. She is bred to Golden Orion. Gold Drop 142730 is a daughter of Big I Am, and her dam, Golden A., was a prize winner at Wisconsin State Fair. This sow is bred to Ambition. A very good gilt is found in Sweet Marie 142732, another daughter of Big I Am. She is also bred to Ambition. Helen Blazes I, litter sister to Helen Blazes III, goes into this sale bred to Ambition. She should be looked after by discriminating buyers, as she has proven a good breeder. Red Light and Fairview Wonder are two March gilts by Tip Top Notcher and out of Fairview Maid, the highest-priced sow in Mr. George W. Seckman's sale. This breeding has produced some very fine stock and the same can be expected of these two gilts. One is bred to Ambition, the other to Golden Orion. A fine brood sow is found in Perfection Wonder 80204. She was sired by The Lad For Me and her dam was Lady Perfection by Woodburn's Perfection 2123. This sow has been a very good producer and is safe in pig to Tip Top Notcher. Four extra good Ambition gilts are found in Nos. 23, 24, 25,

## HARD TO BEAT THEM

### PERFECTION KEEP ON, CORRECTOR

50 Selected Brood Sows and Gilts to be Sold at Plainfield, Iowa

Saturday, February 2, 1907

Herd boar, Gay Meddler, by Meddler; dam, Thistledown, by Corrector. He is an outstanding individual and breeder, full brother in blood to the world's record breaker, Meddler 2d 111111. Assistants, Midwood Perfection, Keep On Chief, Big Keep On.

Twenty-five fall yearlings and tried brood sows, twenty-five gilts, tops of 100 head. They represent the blood of Chief Perfection 2d, Keep On, Champion Perfection, Brockshine, Ideal Black U S, and the Darkness families. Several years' breeding Poland Chinas has left the tops of the last few years retained in the herd.

We are putting up our first public sow sale and we want to make you glad you came out. We give you the best in stock and it is hard to beat them.

The spring gilts are by Reliance, a son of Keep On. We have the quality, size and prolificness combined with the rich pedigree. You are cordially invited to come to the sale or send bids to the auctioneer or J. A. Benson, in my care, and careful treatment is assured. The catalog goes more into detail and you should write for it.

Kingsley, Iowa

E. Z. Russell, Ex-President of the National Duroc Jersey Breeders Association, will represent The Homestead at this sale and will attend to any bids sent in his care.

## Second Annual

### Brood Sow Sale

#### From Mulberry Grove Head of Durocs

#### AT SPIKER'S SALE PAVILION,

### Chariton, Ia., Thursday, Feb. 7, '07

Daughters of champions, bred to champions. Forty head of sows and gilts—eighteen daughters of the champion, Top Notcher Again, four daughters of the great Proud Advance. All safe in pig to the sensational champion of 1906, Crimson Wonder Again. Three daughters of Crimson Wonder Again safe to one of the best sons of Proud Advance; two daughters of Nebraska's first-prize boar, Tom Davis. This sale will contain more champion blood than any offering inside the state this year. The individuals will back the breeding. Chariton is on main line of C. & Q. Free entertainment at Depot Hotel in Chariton. For catalog address

H. S. ALLEN, Russell, Iowa.

Cols. H. S. Duncan, Chas. Morehead, D. A. McMains, Auctioneers.

Send bids to auctioneers or L. E. Troger, representing The Homestead. care H. S. Allen.

and 26 of the catalog. They go into this sale bred to Golden Orion and will please all in attendance sale day. Some man who wants to make the right kind of a start in Duroc Jerseys should purchase some of these Ambition gilts. They are uniformly good, and are of the heavy-boned, growthy sort. Dew Drop Girl II is a fall yearling of much quality. Her sire, C. E.'s Col. 12549, has been the producer of much good stock and her dam, Dew Drop Girl, is the daughter of one of the best brood sows the writer has ever seen, Dew Drop Maid 23770. This sow is bred to Tip Top Notcher for March litter. The first prize gilt at the Minnesota State Fair, 1906, was Diana 123402. She goes into this sale bred to Ambition, and the breeder who wants something good should not overlook this sow. Her litter sister is also included bred to same boar and it is doubtful whether the spectator could tell one from another, did

he not see the ear tag. Jennie Red is a fine two-year-old sow. She was first in her class at Illinois State Fair in 1904 and has been a good producer. This offering is far above the average, both in breeding and the individual merit of the stock consigned. Messrs. Thomas & Hogsett will be pleased to mail a catalog to all interested in good Durocs and invite all to be present sale day. As the sale comes on Saturday, arrangements have been made to properly care for all from a distance without any expense whatever, until the sale of Messrs. Fagan, Brownling & McCabe, at Hersman, Ill., on Tuesday, February 5th. Plan to be present at this sale. If those who cannot be present wish to send bids, same will be properly handled by Mr. Dante M. Pierce, representing this paper. Look up the announcement on page 48 of this issue and write for catalogs at once, kindly mentioning The Homestead.

# Northeast Nebraska Duroc Jersey Sale Circuit

**Head**

Just look at our list: Twelve head by Echo King, twenty head by Royal Top Notcher, three by Sure Winner, four by Red Knight, two by the \$5,000 boar, Junior Jim, two by Red Chief I Am, one by Alex Advance, a full brother to the great sow Alix, and we are going to sell our great brood sow, Beatrice Queen, a daughter of Duroc Challenger, and she will be bred to Kan't Be Beat. Others will be bred to Echo King, Sure Winner and Onward Duroc, our three herd boars. Write us for catalog.

Colonel T. C. Callahan, Auct.

Everyone interested in Durocs should send for a catalog of these great sales, and mention Iowa Homestead when writing. Bids sent to M. T. White, Homestead representative, in care of any of the above will be properly attended to.

### Slick's Bred Sows.

Messrs. J. L. Slick & Sons, of Lanark, Ill., breeders of Poland China swine, in sending in copy for the advertisement found on page 30 of this issue, write: "The sows we are offering at private sale are a useful lot and are in useful condition, not loaded down with fat, and will doubtless prove profitable. They are individually a great lot, with extra backs, quarters, feet and legs, good size and quality. Their breeding is like the rest of those which sell in hundreds. Our sows have not been shipped all over the hog belt for speculation. We have not spent thousands of dollars advertising, sketching, cataloging and returning compliments in helping the other fellow to make a 'big average,' but we raise and sell them at live and let live prices, so that our customers may realize profit instead of bankruptcy. We have been in the business for twenty-two years and have witnessed the rise and fall of a multitude of breeders. 'A word to the wise is sufficient.' The sows we are offering are bred to Prince Charming, a large, smooth, heavy-boned, strong, deep-quartered, showy two-year-old son of Prince Alert, the Iowa State Fair winner in 1904; also to Chief Perfection I., a full brother in blood to Chief Perfection II., a great breeder, of growthy, smooth, mellow, daisy fellows that sell at sight. Also a few to Challenger 81225, a full brother to the mighty champion, Mischief Maker, and a host of great hogs. Challenger is also an excellent breeder and among his get are many show prospects. Nothing on the farm that is not of the most

popular blood lines. If anyone is wishing to start a herd or to introduce some popular blood in his herd, he will do well to give us a trial. Considering the quality of the goods, our prices are astonishing. We also have a nice lot of late summer and fall boars that will make good herd headers another year. Kindly mention this paper and write your wants to us." See advertisement on page 30.

### Big Sale of Registered Percheron Mares and Stallions.

On page 36 appears the announcement of Mr. E. F. Rogers and others of an important sale on Wednesday, February 6th, at Union, Iowa, of twenty-three Percheron stallions and mares and three German Coach stallions. Mr. Rogers himself contributes thirteen head, including five splendid Percheron mares, all in foal; the remainder being fillies and stallions. Included in the number is one imported mare. Mr. F. A. Frost, of Grundy Center, Iowa, is the next largest contributor and sells five Percherons and three German coaches. There will be eleven stallions in the offering. These horses have been reared out of doors in the ordinary farmer's way, and have not been pampered or specially fitted for the sale ring. Nevertheless, this does not detract in the least from their usefulness in any way, but is rather to their advantage from the fact that this class of stock in the hands of new buyers will go on and continue to improve. This offering

of twenty-six head will certainly afford the farmers of Iowa the best opportunity to secure registered Percheron stallions and mares at their own prices, and the sale being located almost in the geographical center of Iowa, makes this point of Union easily accessible from all parts of the state. The town of Union is located about eighteen miles north of Marshalltown on the Iowa Central railroad. In addition to the principal part of the offering made by the two gentlemen named, there will be four or five other stallions contributed by breeders of central Iowa. The ages of these horses range from weanlings to aged stock; they are all registered in the Percheron Stud Books of America and certified copies of registration will be furnished with each sale. All the mares of breeding age are bred either to good imported stallions or to the best home-bred ones in the community. All mares three years old and over are thoroughly broken to work. With land selling at \$100 per acre, and over, it stands the Iowa farmer in hand to cease using grades for doing his farm work, and use registered mares of some of the pure-bred draft breeds for this purpose and raise a colt each year that will be worth the price of two or three grades. This can only be accomplished by the purchase and use of such high-class mares as will be found in this sale. At this writing we have not a complete catalog at hand and can only say that it is in the hands of the printer and will be ready for distribution by the time this article is read by more than 100,000 of our readers. Inas-

much as these contributors are comparatively new to our readers and new to the fraternity aside from their immediate community, it may be possible that this is a splendid opportunity for farmers and breeders to secure high-class stallions and mares at a less price than is ordinarily paid for the same at the more important sale centers or in sales where the consignors have national or state-wide reputation. Application for the catalogs should be made at once to Mr. E. F. Rogers, of Union, Iowa.

### B. C. Martz's Sale of Growthy Durocs.

Following the sale of Mr. A. P. Alsin at Boone, comes that of Mr. B. C. Martz, at Polk City, Iowa, to take place February 13, 1907. The selling will take place at the farm, which may be reached from Ankeny or Polk City; however, if possible, visitors should stop at the latter place. For the sale forty head have been selected, consisting of nine yearlings which we can honestly say are as large and well-formed hogs of this age as we have seen for some time. They should be a great attraction, as their breeding is representative. Among them will be some prize winners at the last Iowa State Fair. You can safely send a bid on these. The gilts are a very even matured lot and are sired by Model Chief, a prize hog, Keep On, Joe Patten, Manly Orion and others. They are mostly bred to Ohio Chief and Keep On 2d. Get posted on this sale by sending for a catalog at once. On page 35 is the formal announcement.

## Griffitt's Duroc Sale.

The reader of this paper who is familiar with Duroc Jerseys and is in the market for good ones will find it to his advantage to be present at Bowen, Ill., on Thursday, January 31st, on which date Mr. H. B. Griffitts will offer to the public one of the best lots of Durocs to go under the hammer this season. In our issue of last week we were pleased to present to readers of this paper something in regard to the herd boars which Mr. Griffitts has been using in his herd, and it is hardly necessary to state that they represent some of the best blood that the breed has ever known. Individually they are of show-yard merit, and will compare very favorably with the best to be found anywhere. The females which have been selected for this sale have not been pushed, as some are for show purposes, but have been put in splendid breeding shape, and the writer is sure that the offering will please all present sale day. We wish to call the attention of our readers this week to some of the sows which go into this sale. Queen Quality is a September yearling by the noted Kan't Be Beat. Her dam is Xenia Belle by Top Notcher, and was first in class and sweepstakes sow at Ohio and Indiana State Fairs in 1905. This splendid yearling was bred to Top Notcher Chief, first prize junior champion and reserve grand champion at World's fair, and is one of the attractions of the year. Two Big I Am gilts of March farrow are listed bred to Helen's Tip Top Notcher 2d, a litter brother to Helen's Tip Top Notcher, the highest-priced Duroc Jersey boar ever sold at public auction. They should prove valuable additions to any herd. My Choice, a daughter of Buddy K. IV., goes into the sale bred to Top Notcher Chief. This is a tried brood sow of more than ordinary merit and has proven herself a good producer. Ethel Mc, a fall yearling by The Great Conqueror, is a litter sister to the sow which topped Messrs. McNeil Bros.' sale last fall at \$400.

owners of Commodore, bred to this great boar. The opportunity is seldom given to breeders to buy as good a sow as this one bred to as good a boar at their own price. Mr. Griffitts has gone to a great deal of expense to secure such sows, and brings them to your door, thus saving the breeder's expense of traveling and shipping. This sow should be looked after by breeders who wish to improve their herds. Helen Blazes V., one of the highest-priced litters ever sold at auction, goes into this sale bred to Hanley. This sow is sold for no fault, but is included solely as an attraction, and to wind up a partnership. This sow has proven herself a good breeder and a good mother, and will do well for the man who secures her. There are other very good sows in this offering which for lack of space we have failed to mention, but the readers of this paper who are interested in this sale may secure catalogs and find therein as good a lot of Durocs as will go under the hammer this year. Those who cannot be present sale day may send bids to Mr. D. M. Pierce, representing this paper in care of Mr. Griffitts, and he assured that they will be properly handled. Plan to attend this sale and go on through the circuit. This is the first of a series of sales to be held in the vicinity of Bowen and Golden, and the offerings are of such a nature that breeders are warranted in attending these sales. See announcement on page 48 of this issue and write for catalog, kindly mentioning this paper.

## Mossman's Bred Sow Sale.

One of the Duroc Jersey brood sow sales that is deserving of more than a passing notice is that of Mr. A. L. Mossman, at Radcliffe, Iowa, on January 29th. Mr. Mossman has a herd that is made up of the most popular blood lines, and the hunch of sows that he is selling in his forthcoming sale must be considered one of the good offerings of this year. The breeders will remember

## Two Grand Sales

70 HEAD DUROC JERSEY BRED SOWS  
MAXWELL, STORY COUNTY, IOWA 70

Friday, February 8, 1907

On my farm seven miles south of Maxwell and one-half mile from Farrar, I will sell THIRTY-FIVE HEAD choice sows and gilts. Offering will contain two aged sows sired by Carlin 14037, a hog bred by Mr. N. P. Clarke. They have regularly produced large litters and are safe in pig to Perfection King 41711. There will be eight fall yearlings sired by Reed's Cashier 25675, a grandson of Advance, and also by Gold Standard 33231. This part of the offering is bred to Perfection King, one of the well-bred red boars of the day, and a very prepotent sire. The twenty-six head of gilts are sired by Perf. King, Manly Orion and Long Tom. As smooth and growthy a bunch as you will find this spring. Bred to grandsons of Crimson Wonder. A choice collection bred right and fed right. Send for catalog.

O. Osborn, Prop.

Saturday, Feb. 9, 1907

At Shyrock's sale pavilion in Maxwell on the above date I will offer at my third annual sale THIRTY-FIVE HEAD, consisting of mature sows and yearlings which represent the blood of Orion, Duroc Challenger, Proud Advance, Billy K., Top Notcher and others. Many of these I reluctantly put in the sale. You will find every one of them O. K. They have demonstrated their ability to produce prize winners by the ribbons their progeny have taken. Among the gilts are many of their produce sired by Malcolm's Model II., Manly Orion, the sire noted for home, build and prepotency, also by Keep On 2d and 3d. My gilts are well grown and in prime condition. I have mated the individuals in the offering with Malcolm's Model and Tom Wonder 51699, a son of Crimson Wonder Again, the champion. Be with us and we will return the favor. Catalogs now ready for mailing.

W. J. HARTUNG

COL. F. F. LUTHER CONDUCTS BOTH SALES and will give bids sent him in care of consignors the best attention. Mention The Homestead when sending for catalog.

POLAND CHINA BROOD  
SOW SALE

At Aledo, Ill., Thursday, February 7, 1907

40 Head of Aged Sows and Gilts

Twelve aged and yearling sows, twenty-eight March and April gilts. A choice lot of matured sows and gilts of choicest breeding and individuality. They are mostly the get of Faultless Perfection 2d 70889, Perfect Sunshine 71895, Rising Sun 2d 92463, Perfection E. L. 71635, Young Delight 104551, On and On 2d. These sows are bred to Young Delight 104551, On the Dot 2d 117431, Young On and On 2d 116061 and Young America 117429.

This is a good, useful lot of heavy-boned, growthy sows, and they are the money making sort. They have been fed for usefulness, and not for show, thus insuring buyers success with pigs. Write for catalog, kindly mentioning The Homestead. Bids sent to Mr. D. M. Pierce, representing this paper, in our care, will be properly handled.

Bridgford & Nesbitt, Aledo, Ill.

## Geo. H. Miller's Short-horn Sale

IN THE HEATED SALE PAVILION

Harlan, Iowa, Wednesday, February 6, 1907

45 HEAD, 30 Females, 8 with Calves at foot  
12 to 15 bulls from 9 to 24 months of age 45

Few sales will be able to show as uniform and as beefy a lot of cattle as I will sell in this sale. They will all have from one to five Scotch tops, and the greater number of my foundation stock was purchased from the late T. R. Westrope. I have used two half-brothers of the great cow, Sweet Violet 2d, at the head of my herd. Some of the helpers and all the bulls in the sale are sired by my pure Scotch bull, GLOSTER BUD 194649, which good judges pronounce one of the good Scotch bulls in the state of Iowa. The heifer stuff is bred to Idlewild Favorite 200411, an extra fine Scotch bull, the sire of two steers and one young bull now being used by the Nebraska Experiment Station, the steers for feeding experiments, the bull for breeding. All cattle guaranteed to be breeders. Write me for catalog. Address,

COL. GEO. P. BELLONS,  
Auctioneer.

GEO. H. MILLER, HARLAN, IA.

that our readers can get what they are looking for in his sale. He certainly has a lot of well-bred Durocs, and he is going to offer them at public sale on Jan-

uary 29th. We hope those of our readers who want Duroc Jersey sows will send for catalog and then remember him on sale day.

Mr. H. B. Griffitts, of Bowen, Illinois, proprietor of Suburban Herd of Duroc Jerseys. See field notes.

She is safe in pig to the noted breeding and show boar, Hanley. Two especially attractive sows are found in Goldie Notcher I. and Goldie Notcher II. These two sows are daughters of the grand champion boar, Tip Top Notcher, and on the dam's side trace to Kan't Be Beat. One of them is bred to the noted boar, Proud Advance, and the other to Fancy Orion Chief. The breeder or farmer who wants something good should not overlook these two sows. Queen Dotie is an April gilt out of the grand champion sow at the World's Fair, Dotie. She is bred to Helen's Tip Top Notcher II. This sow is one of the best prospects to be sold this year. She is a product of the champion sow; is bred to a son of the grand champion boar, and her sire was a state fair winner, and she is good enough individually to go into any sale ring or show ring of this country. Breeders who want to improve their herd should not fail to see this gilt. Four daughters of Ambition, winner of first prize ribbon in the under six months class at the Illinois State Fair, 1905, and the breeder's choice for first again in 1906, although being placed second in under year class, are worthy of a place in any herd. All four of them are bred to Top Notcher Chief. Big Gold Dust Rose is a very good yearling by Big I Am and out of a Tip Top Notcher sow. She is bred to Fancy Orion Chief and should prove an exceedingly good bargain for someone, no matter what the price. A yearling daughter of High Chief, one of the best sons of the noted Ohio Chief, and the top of Mr. H. E. Watson's fall sale goes into this sale bred to Commodore. We doubt if another sow will go into any sale outside that of the

that the noted boar, Tientsin, the sire of the great show sow, Ruberta, that won first at the Iowa State Fair, formerly headed this herd. There will be a number of his daughters in this sale, and no breeder will go wrong in buying them. The boars now in use are A. L.'s Chief 43327, a son of I. J.'s Chief by Winchester Chief; J. Wonder 43861, a son of West Side, a litter brother to Crimson Wonder; Iowa Chief 48695, a son of Ohio Chief, dam Queen Beatrice by Crimson Wonder; King Radcliffe 55871, a son of the noted show boar, Corrector, out of a Longfellow dam. These boars are as good a lot as is ever found in one herd, and represents a line of breeding that is decidedly popular. They will be used on the sows that go into the sale. We desire to call attention to the Tientsin sows. There are four yearlings and one spring gilt, and they show the same character and resemble their great half sister, Ruberta, in many ways. They are all safe in pig, some for early farrow, and there will be some decided bargains in these because there has always been a great outcome to them. One of the good things is an Ohio Chief gilt, out of a Crimson Wonder dam, and she will be one of the best things in the sale. She is bred to King of Radcliffe. A great many of the gilts are sired by A. L.'s Chief, and they are a first-class lot of gilts in every way. We wish to say for Mr. Mossman that he not only has the most popular blood lines, but he is a good feeder, and he always puts up an offering that pleases the buyers when they come to his sale. He is selling some choice yearlings and some good matured brood sows, and we believe

### Moats & Sons' Splendid Poland China Offering.

One of the firms that it is always a pleasure to call the attention of our readers to their sale, is that of Messrs. Harvey B. Moats & Sons, of Villisca, Iowa. They make their annual brood sow sale on February 5th, at which time they will sell forty-five head of as good and as toppy a bunch as will be found in any sale ring. In this year's offering they are selling a lot of sows that will have plenty of size. Thirty-five of these are fall and spring yearlings, and a few matured sows. They are selling a very attractive two-year-old sow, a daughter of the noted boar, Chief Perfection 2d, and she was bred to one of their present herd boars, Shamrock, on November 12th. This sow was bred by Mr. Link Lukens and he says she was one of the best he has ever bred. Another good sow they are selling is a yearling daughter of Perfect Tecumseh. The sire of this sow is a litter brother to Perfect Perfection and just as good a breeder. She is good enough to go into any herd and is bred to G's Equal November 10th. Best Elect 5th is one of their old standbys. She is a large sow and raises good pigs, the kind they have always had a demand for. Mr. E. L. Jamlson, her former owner, sold four hogs from her for \$250. She is an excellent brood sow and goes into the sale bred to Shamrock. We have seen the Moats sale offering and will say to Homestead readers that they are strictly all right. They are using their old boar, Shamrock, on these sows, also Big Perfection Stamp 29743, a son of Big Perfection, that formerly headed their herd, and was considered one of the greatest Poland China boars ever used in southern Iowa, also a son of G's Perfection. This herd has always had the reputation of having all kinds of quality, and with the size that some of these sows show, we will simply say to our readers that if they want something very choice they

find them as good as a national bank. The cattle are a good, practical lot. The cows have plenty of scale, are exceedingly good breeders, uniform in type and color, and are sold by a reliable breeder. The young bulls are a particularly attractive lot, and well grown out. Write Mr. Miller at once for catalog and kindly mention The Homestead.

### William Lentz Makes Sale of Poland Chinas.

It is with a great deal of pleasure that we introduce our readers to a new breeder in the Poland China business. New merely in the sense that he is about to make his first sale of sows and gilts, to take place at Ankeny, Polk county, Iowa, Friday, February 8th. For a number of years Mr. Lentz has been looking forward to the time when he could entertain his fellow breeders at a sale made up of stock of his own breeding. From time to time new individuals of recognized breeding have been added to the herd. The foundation stock was chosen from strains of blood that are especially noted for straight limbs and strong pasterns, long, deep bodies and good breeding qualities. Among the foundation sows some of which will be included in the sale, will be daughters of Johnson's Chief 62243, the sweepstakes boar at the Nebraska State Fair in 1902. He was at one time at the head of the herd of Mr. J. Blain, of Pawnee City, Neb., and his get was always sold for good prices. Others are by Chief Perfection 2d and Nemo L's Dude, both boars of recognized merit as individuals and sires. The gilts are a very even bunch in size, type, and quality, and are just what a great many breeders and farmers are looking for. They are large for their age, many will tip the scales at 300 pounds on sale day. They are sired by Tecumseh Longfellow 87375 and are bred to two very good boars, one a son of Top Chief and another of Blain's Tecumseh. Sale will be held in town and we would

## The Ames, Boone, Polk City Sale Circuit. In Central Iowa.

Four days' sales, February 11 to 14, inclusive.

### 160 Duroc Jersey Bred Sows and Gilts 160

February 11, Ames, Iowa.

I will sell on my farm, four miles southwest of town, 35 HEAD, consisting of fourteen tried sows and yearlings and twenty-one gilts. The mature sows include some very attractive numbers: Five are sired by Iowa Thomas, a Des Moines prize winner; another is Ruth G. 2d, the dam of Ruberta, the prize-winning yearling at Des Moines, 1906. There are five of her gilts in the sale. Gilts are sired by Manly Orion, one of the good boars of the day, others by Keep On 2d, Malcolm's Model 2d. Here is a chance to secure some of the best blood with individuals of superior excellence. Send for catalog. Sale under cover.

S. P. Freed.

February 12, Boone, Iowa.

For my offering I have selected and am preparing 45 HEAD of my best breeding and young stock. Among the seventeen yearlings and tried sows will be daughters of Old Brilliant, Young Pilot, King West, Belle's Perf. King, Teddy R. and others. Among them will be producers of prize winners and all are reliable regular breeders. Violet Blossom, dam of champion sow at Sioux City, 1906, is included. The gilts are sired by Ohio Chief, Proud Advance and Arion's Type, also to Advance Dandellon. They are bred to several boars, among which is Nash's Model 21395 and a Crimson Wonder and Tip Top Notcher boar. Write for catalog. We welcome you to Pine Hedge Farm.

A. P. Alsin.

February 13, Polk City, Iowa.

On the above date I will offer for sale on my farm near town as growthy and well-bred a bunch of sows, yearlings and gilts as will be sold this spring. There will be 40 HEAD in all and will include nine yearlings and thirty-one gilts sired by Top Notcher Chief, Joe Patten, Model Chief, Keep On, Manly Orion and others. I have mated the offering to the best blood I could secure, such as Ohio Chief, Keep On 2d and a Crimson Wonder boar. Size and bone with the best breeding is my hobby. Send for my catalog.

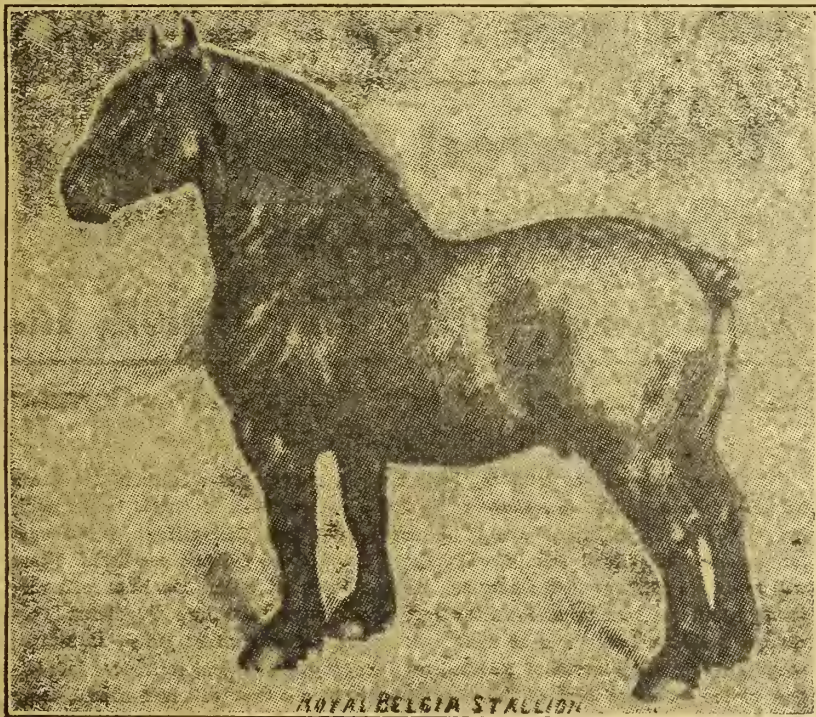

B. C. Martz.

February 14, Polk City, Iowa.

Our sale will be held on the farm near that of Mr. B. C. Martz and for our offering we will have 45 HEAD which will be made up of fifteen mature sows of recognized breeding, representing the blood of Orion, Reed's Banker, Tientsin and others. They are good producers, having raised us two litters regularly each year. The fifteen head of fall yearlings are sired by Challenger II. and as many gilts sired by Orion's Rival and Model Jim. We have bred the offering to three good boars, a grandson of Billy K. and one of Malcolm's Model and Councillor 57237. We want you to have our catalog.

Shotwell & Menefee.

Col. F. F. Luther conducts the selling.

A three-year-old roan Belgian stallion, weighing 2,100 pounds, sold last November by Messrs. Peter Hopley & Son, of Lewis, Iowa, to go to South Dakota. They are the pioneer Belgian importing firm, and have a grand lot of stallions now in their barns. Anyone who wants a Belgian stallion should see the Hopley horses. They sell their horses right at their farm, and consequently the prices are always right.

will find it in the Moats sale. There is not a more reliable firm in the hog breeding business than Messrs. H. B. Moats & Sons. Write at once for catalog and kindly mention The Homestead.

### Geo. H. Miller's Short-horn Sale.

On Wednesday, February 6th, Mr. George H. Miller, one of the most representative Short-horn breeders in Shelby county, will make a public sale of forty-five head of cattle, at the sale pavilion in Harlan, Iowa. Mr. Miller has been breeding Short-horns for the past twenty-one years, and the most of his foundation stock was purchased from the late Mr. T. R. Westrope. He has always kept a Scotch bull at the head of his herd, and everything that goes in the sale will have from five to six Scotch tops on them. He is selling forty-five head—thirty females, eight with calves at foot, and from twelve to fifteen holls. The holls will range in age from nine to twenty-four months, and are a sappy, growthy and well-developed lot. Here is one of the very best places we know of to secure a car load of young holls. These holls are all sired by his well-known Scotch bull, Gloster Bud, that has stood at the head of his herd for the past few years, and a Scotch holl of considerable reputation. He has been an excellent breeder and the young holls and the heifers are to be sold in this sale are all sired by him. The cows are large, very beefy and there are some good milkers in the bunch. The offering is very uniform in color, nearly everything being a dark red. Eight of the cows will have calf at foot by Gloster Bud. Within the past ten years Mr. Miller has used two holls at the head of his herd that were half brothers to the noted cow, Sweet Violet 2d, that sold in the Westrope dispersion sale for \$3,705. The heifers that he is offering are all bred to Idlewild Favorite 200411, an extra good Scotch bull, and the sire of two steers and one young holl, now being used by the Nebraska Experiment Station, the steers for feeding experiments, the bull for breeding. All the cattle that go into the Miller sale are guaranteed breeders, and the man he-

advise breeders and farmers to give this sale their attention, as it will contain many very useful numbers. When sending for catalog kindly mention The Homestead. Remember the date and see further notice of this sale on page 34.

### S. P. Freed's Grand Duroc Sale.

Among the names of Iowa breeders who have achieved splendid success breeding red hogs will be found that of Mr. S. P. Freed, of Ames, Iowa. A good share of this success is due to the fact that Mr. Freed has always been very careful in the selection of his herd header, being one of those men who believe that this position in the herd cannot be too well filled. By the purchase of Manly Orion, conceded one of the best sons of old Orion by many of the best swine men, the herd has been greatly benefited. No other herd is so well and favorably known for strong, straight bone combined with moderate scale and excellent quality as this one. Manly Orion has made a record in the show ring, winning second in his class at the Iowa State Fair in 1905 and was the favorite with many in 1906 at the same fair for first place. As a producer of first-class stock he has proved a splendid sire, always impressing his good characteristics on his get. There will be a great many of the offering in the sale that will be sired by this noted hog, likewise many will be bred to him. Here is your chance to secure some of the blood of this splendid sire. Can you afford to miss the opportunity? Sale will be held under cover and transportation to and from the farm will be furnished. Send for catalog and turn to page 35 for further announcement.

### Rankin's Brood Sow Sale.

On February 1st, Mr. W. A. Rankin will sell forty of the very best sows in his herd at Carson, Iowa. Here is a herd that has made rapid strides to get to the top, and his offering is by far ahead of anything he has ever sold before. As an attraction he has consented to sell Miss Brown, one of the

## ATTENTION! POLAND CHINA BREEDERS. AT WOODWARD, DALLAS CO., IOWA.

I Will Offer on February 11, 1907,

**8 Tried Sows** Valuable producers, in the best of condition, with produce among the gilts. Sired by Proud Perf. 2d and a son of Johnson's Chief 62243.  
**6 Yearlings** Sired by One Spot 90201, one of the good hogs at Des Moines in 1904. These are big ones and breed, with every indication of prolific producers.  
**26 Gilts** Sired by Mischief's Model 98435, Hands Down 105713, One Spot, Jumbo 91987 and Mainspring 102681. They are as large and as well formed as are to be sold this spring. Bred to Perf. King, a hog of wonderful bone, back and ham. Size and bone are my hobby. Remember the date, Monday, February 11th.

D. S. NEEDHAM, Prop.,

WOODWARD, IOWA

COL. H. S. DUNCAN, Auctioneer.

## 50 HEAD DUROC JERSEY BRED SOWS 50

"Big Bone, Good Size, Plenty of Length," My Motto.

RED OAK, IOWA, FEBRUARY 8, 1907.

I am selling a splendid lot of yearling and matured sows and spring gilts, the best ever. There will be fourteen granddaughters of Red Chief I Am and the great Nebraska Belle. Others sired by Brighton Wonder (a full brother to Crimson Wonder) Higgins Jr., Jim's Gold Dust, Miss Bob's Wonder, Educator and Hardy's Improver. They will be bred to Peerless Chief, a son of Ohio Chief; Belle's Red Chief (a son of Nebraska Belle), Educator and Royal Knight. My fall sale of sixty head of boars averaged me \$28, the best sale of the season. Write me at once for catalog and come to my sale. Address,

T. H. ISAAC,

RED OAK, IOWA

Col. Bob Adkins, Auctioneer.

## BABCOCK'S FIRST ANNUAL POLAND CHINA SALE.

MANNING, IOWA, SATURDAY, FEBRUARY 2, 1907.

**50 HEAD** | 40 Big Sows safe in pig to Brookline's Express, Illinois Interstate prizewinner, and the massive boar Long John, not a show hog, but a wonder. | **50 HEAD**

THESE sows are the best I have ever owned or seen put in one sale. Thirty head are yearlings or past and will weigh from 300 to 700 lbs. All are to be sold with a guarantee that will be absolute. Ten head are gilts with plenty of bone and quality; 10 head fall pigs, 5 boars, 5 gilts, the cream of the bunch of 80 head. Plan to come and I will make the day a pleasant one. Send for catalog.

ERNEST S. BABCOCK,

COL. GEO. P. BELLows, Auctioneer.

MANNING, IOWA

best daughters of old Orion, and she is bred to the great boar, Ohio Chief. He hates to part with her, but he says he is selling the best and she goes with the rest. Another good sow that he sells is Glendale Belle, the dam of the Glendale Critic litter that he raised last year. She is another of the good things and will be bred to Wonder's Ohio Chief, a son of old Ohio Chief. He will also sell five granddaughters of Gold Dust Jim, and they are good ones. He is selling

a nice, smooth Glendale Critic gilt bred to the Ohio Chief boar. There are some good yearlings in the sale and some good brood sows. They are bred to Miss Bob's Wonder, a son of Crimson Wonder; Proud Lady's Orion, a son of the noted sow, Proud Lady, and he cost Mr. Rankin \$425 as a pig. Then he has Wonder's Ohio Chief, a splendid young boar sired by Ohio Chief. Write for his catalog or send your bid to Mr. M. T. White, of the Homestead, in care of Mr. Rankin.

## GRAND CENTRAL IOWA DUROC JERSEY SALE CIRCUIT. FIVE DAYS' SALES, FEBRUARY 4TH TO 8TH INCLUSIVE.

200--The best work of six noted Iowa breeders. Daughters and granddaughters of prize winners. Representatives of choice strains--200 Bids will be cared for by C. E. Luther or L. E. Troeger of this paper, to be sent in care of the respective consignor.

February 4, 1907, Roy West, Bondurant, Iowa.

**WILL sell FORTY HEAD** of tried sows, yearlings and gilts from the Polk County herd, 2 miles from town. There are nine daughters of Matchless Challenger 37301, 5 daughters of Col. Newburn, 4 by King Perfection, a son of Bunker Boy 11; 4 daughters of Young Advance 44315, a good son of Proud Advance, and 5 of Onward 36833, by Long John Son 26501. Others are sired by two noted sons of Old Orion, namely Manly Orion 30925, and Proud Orion 31337. Also by Billy K 20373, Tentslu 17261 and others. The sows are bred to the herd book, Goldie O's Top Notcher 52647, a son of the St. Louis Champion. The gilts are bred to Kau't Be Beat 1 Know 52645, by Kau't Be Beat and Orion Chief 1 Am 52125, by "Old Orion." Here is some of the best blood of the breed. It will be in fine condition sale day. Write for catalog in due. Col. C. E. Luther, Auc.

February 5, 1907, Sam. Sundburg and O. A. Olson, Madrid, Boone County.

**OFFER**, at the farm of the former two miles north of town, FORTY HEAD, consisting of ten yearlings and tried sows which have proved first-class producers and are sired by Madrid Perfection 30223, Nush's Model 21395, Perfect Sunshine 38483, Red Dick 53243, King Perfection and Eclipse. These sows are bred to Gold Dust Pete 45323, a grandson of Hugh Tucker 8963, also to Golden Model 53675, and Advancer Boy 53869, a grandson of Advance. There will be thirty gilts of choice breeding, some of early litters, and sired by Duroc Wonder 32008, by Crimson Wonder 26355; also by Madrid Perfection, Gold Dust Pete and two good sons of Proud Advance. The gilts are mated to Advancer Boy 53869, a heavy boned, smooth bodied son of Advance; also to Ohio 56105, a son of Ohio Chief, and to Golden Model by Golden Hero 12505 (a.). Prolificacy and scale with plenty of quality are well represented in this offering. Kindly mention The Homestead when sending for catalog. A good dinner on the side. Auctioneer, C. E. Luther.

January 7, 1907, A. T. Sundell, Paton, Greene County.

**WILL offer** at his farm six miles east of town FORTY HEAD of bred sows and yearlings and twenty-eight gilts. Some of the best sows are Miss Ruth, sired by Tentslu 17261, a sire of prize winners. Another is Melinda Lady by Lord Roberts 17339 and a grand daughter of Ohio Auntie IV. Also Ellen V 122940 by the same sire and out of Ellen Roberts 22480. The sows are bred to the several sires, Lord Roberts, King West 26163, Admiral 43273, Sundell's Advance, and Sundell's King. Of the twenty-eight gilts, there are seven sisters sired by Scratch 26159 and others related to him. Most of this breeding is mated with Sundell's Advance. Others are by Sundell's Choice, Jerrie Roberts and others. Put are bred to Sundell's Top Notcher and Sundell's King. The individuality here is as good as the breeding. A good chance to select some show stock as well as good valuable producers. Drop a postal for catalog. The best treatment assured. C. E. Luther, Auc.

January 6, 1907, W. E. Bennethum, Madrid, Boone County.

**SELLS FORTY HEAD** of bred sows and gilts that are O. K. in every respect. The seventeen head of tried sows will include such attractions as Miss Advance 126766 and May Advance 136992, litter sisters as good as any sired by Proud Advance. Another is Miss Rose 93806 by Billy K. This sow won second at Des Moines in 1904, second in young herd and third in get of sire. She has a show gilt in sale, and is bred to Keep On 3d. Belle 94612 is one of the good ones and a great producer, sired by the sweepstakes Des Moines Fair hog Gold Dust Jim. There will be others as good, besides seven fall yearlings, all large and growthy and bred to Keep On 3d for early litters. The twenty-three head of gilts are as even a bunch as will be seen at any sale this year. They are from early litters, and for size and quality are hard to beat. Three are sired by Advancer 28773 out of Top Notcher Chief sow. Others by Keep On 3d, Biddle R 104778 and Malcolm's Model 11 42735. Many are bred to Ohio. What do think of such a collection, combining breeding with high merit? Sale in heated building. Come to Cedar Lawn Farm and get your eye full of good hogs. Send for catalog at once. C. E. Luther, Auc.

February 8, 1907, E. R. Wood, Jefferson, Greene County.

**40 HEAD**, including sixteen aged sows and yearlings and twenty-four gilts. The blood of Proud Advance, Orion, Crimson Wonder 1 Am, Jumbo Red, Corn Cracker, Top Notcher Chief, Perfect Chief, Top No cher R., American Royal, Cantine Boy, Lluwood Cashier and others. Sale to be held in heated tent on farm six miles northwest of Jefferson. Some of the sow attractions are: Lady Top Notcher, a splendid individual as a producer, and is a hundred dollar sow, sired by Top Notcher Chief 29247; another is Lluwood Cashier, a four-year-old; also two two-year-olds by Long Knouth 25379, two by Bristol Jumbo 33095, and one by Radiator 23866, tracing to Corn Cracker 14205. The sows are bred to Clovercroft Orion 37515, a son of old Orion out of Peerless Beauty 71360. The gilts are a nice growthy lot of with plenty of size and are sired by Otto 13321, Top Notcher R. 40457, and Clovercroft Orion. The gilts are mated principally with Crimson Wonder You Are. All parties will stop at Jefferson, where conveyances will take them to the farm. There should be something here to please everyone. Kindly mention The Homestead when writing for catalog, and be sure to attend. C. E. Luther, Auc.

### Norrish & Bevington's Sale of Durocs.

On January 31st, Messrs. Norrish & Bevington will make their annual brood sow sale at the farm near Kingsley, Iowa. That they are putting up a most excellent offering is attested by every man that has seen them. This sale draft consists of twenty-five March and April gilts, ten yearling sows (fall and spring farrow), and four or five older sows, the whole lot selected as being representative of the best the big herd affords. The gilts are sired by the old head of the herd, Pericles H. 29733; Sir Riley 29375 by the famous Advancer, out of a Duroc Challenger dam; King James 37341 by Ohio King; Jumbo Giant by old Jumbo Red; Cedar Lawn Model 39379, a this year's second prize winner at Sioux City, by Defiance 30015; and Don Caesar 39373 by Noble King by King Perfection, and out of a dam by old Duroc King. This Sir Riley, mentioned above, is a very long, generously built, well-put-up boar that is in use at Mr. Bevington's place and doing fine work. It is hard to name a stronger list of fine hogs as sires of sale stuff than we have just written out, and what is better, the individuals themselves are there. Mr. Bevington has not crowded these gilts—they are just in prime breeding shape, growthy and smooth, of nice color, add with the capacity of fine brood sows. Old Pericles H. was used for several years in this herd and his stamp is found on much of its best stuff. He won second prize in the aged class at Sioux City this year in competition with several other very strong boars; he did the same last year and the year before. Among the older sows we will name two or three as being especially good to look out for. Fashion Queen 12th 71528 is a first-class all round sow by Iowa Banker 2389, out of Fashion Queen 10th, by old Advance, that is included in the sale simply because they want to show the people that they are not afraid to sell some good ones. This sow is a mighty fine animal and won at the World's Fair at St. Louis as a pig. She is bred to Cedar Lawn Model. Try to buy her. Her daughter, a yearling by the old sire of great hogs, Advance, is also in the sale and is another case of bargain for someone. Jem Advance 129910, by old Proud Advance, the \$3,000 boar, out of an Orion dam, is an all right, good, big, smooth, broad sow that sells. And then there is Topsy Orion by old Orion, out of a Peerless dam, that is one of the sure good ones. She raised ten pigs this year that are all O. K. There are also two or three fall yearlings by Pericles H. that should be emphasized. The sows are all bred to one or another of the four boars, viz., Cedar Lawn Model, King James, Sir Riley and Red Prince 52695, a big, long, smooth spring pig with fine back, sides, feed and bone, by Cedar Lawn Model, out of a Royal American dam. And Cedar Lawn Model himself is a model of big bone, good feet, fine hams, head and ribs. It is a most excellent offering of Duroc sows. Write for catalog and mention The Homestead.

### G. W. Fink's Angus Dispersion.

Attention of the Angus men of the corn belt is once more called to the dispersion sale of the Glenmar herd of Aberdeen Angus, owned by Mr. Geo. W. Fink, of Maryville, Mo. We last week spoke of the bulls that go in Mr. Fink's sale and we now wish to call attention to the superior lot of females to be sold. As every cow and heifer that Mr. Fink owns is to go in this sale buyers will be given such an opportunity as is only found in dispersion sales. Starting with Lot 2 of the catalog we find the Blackbird cow, Eclipse, that was got by the great Moon Eclipse. She will be found a smooth, tidy, beef type, good at all points and a producer. Lot 3, Queen Ida of Mid-night, a Queen Mother, will be found a low-down cow, a typical Angus and a reliable producer of good things. She sells with heifer calf at foot by Black Monarchist. Some breeder wishing a choice cow should watch her sale day. Lot 7, Orleans Queen, is another Queen Mother that should appeal to some critical buyer. She is one of those smooth, thick-fleshed, easy keepers and a good one to own. In Lot 3, Home Dale Erica 2d, Mr. Fink sells one that is fashionably bred, and an absolutely good heifer just past three years of age. She was got by a son of the great prize-winning Blackcap King and out of a daughter of the champion Heather Lad 2d. Lot 4, Pride of Heatherlon 12th, imported in dam, is one of the most desirable things Mr. Fink ever owned. She was got by the great Juba of Morlich and out of Imp. Pride of Aberdeen 164th. This will be one of the rare oppor-

tunities to secure this breeding through such a good individual. A fine young cow will be found in Lot 10, Bambo Queen, a granddaughter of Heather Lad 4th. She sells thin in flesh on account of raising a good, strong calf. In the Queen Mother heifer, Beauty of Glenmar, Mr. Fink sells a heifer that should go to someone wanting a good, reliable breeder. She is not far from a show heifer and was got by a son of Bambo that had for his dam a daughter of Moon Eclipse. Her dam, Orleans Queen, is one of Mr. Fink's best brood cows. The young females cataloged are all the offspring from Mr. Fink's cows and are of much the same breeding as those mentioned above. We urge those of our readers who are interested in good Angus that are well bred to write Mr. Fink for a catalog and arrange to be with him sale day. See page 39 for advertisement and address.

### Fifty Selected Poland China Brood Sows.

On Saturday, February 2d, Mr. Bert Fry, of Plainfield, Iowa, will hold his first public sale of Poland China brood sows, the sale to take place at his farm, one mile from town. Mr. Fry's herd boar is Gay Meddler, dam Thistle-down by Corrector. He is said to be a fine animal and right up at the top of the great family from which he comes. He is three months old and has proven himself a great breeder. The sows to be sold are extra good ones and the blood lines should vouch for their worth, taking into consideration the fact that Mr. Fry has seen to it that they have been properly developed. There are sows by Chief Perfection 2d's Son 71631, Champion Perfection, W. G.'s Keep On and other sires. Besides Gay Meddler, Mr. Fry has been using the great two-year-old boar, Midwood Perfection, his dam Midwood U. S., bred by Mr. W. Z. Swallow. He is pronounced a very good boar, as well as Keep On Chief, another boar to which a few of the sows have been bred. The monster fall yearling, Big Keep On by Reliance, has been used on some of the sale offering, the dam of which was by Champion Perfection. Mr. Fry invites all interested to attend the sale and will appreciate bids from those who are unable to attend. Write him at once for catalog, after reading the advertisement found on page 32 of this issue.

### Attention, Poland China Breeders!

Mr. D. S. Needham, of Woodward, Iowa, will dispose of a very fine bunch of sows and gilts at public sale at Woodward, Iowa, on Monday, February 11, 1907. Mr. Needham has been breeding the large kind of black hogs in Dallas county for a number of years. For large, growthy hogs he is right at the top of the list and like his neighbor breeder, Mr. J. H. Watson, of Madrid, he will have a collection on sale day that will be a surprise to those after the old reliable, growthy, straight-boned kind of Polands. Included in the offering are eight tried sows which have produced regularly one and two litters per year. They are the kind that will appeal particularly to those looking for something which is absolutely reliable. In next week's issue we shall tell something of their breeding, as well as that of the yearlings, which number six head. With twenty-six head of gilts they make up the offering of young stock and are well along, as the gilts are from early litters. As will be seen in the advertisement on page 35, their breeding is of the best. Sale will be held in comfortable quarters in Woodward, which may be reached from the south on the interurban and from other points on the C., M. & St. P. Write for catalog at once and get next to some good numbers which it contains. Kindly mention The Homestead.

### Manley & Co.'s Sow Sale.

There never was a time in the history of Duroc Jersey sales in the West that the firm of Messrs. Manley & Co. did not put up an offering that attracted breeders from both far and near. This year is no exception to the rule and they have been making every effort to make this one of the most attractive sales they have ever held. They therefore will sell, on February 5th, their 1906 show herd, including all their prize-winning sows, and there are among these some of the toppest sows that will be sold this winter. They are also selling ten good Orion sows and ten Junior Jim gilts, besides others by Young John, Belle's King and Proud Advance. One of the best sows they will sell is their show sow by Young John, and she is bred to Junior Jim for early farrow. The most of their offering is bred to Junior Jim and Advance Lad, the latter boar being a full brother to Proud Advance and Advancer. Their sows are now in nice shape and when

# BIG SALE

—OF—

## Registered Percheron Mares and Stallions

### Wednesday, Feb. 6th, Union, Ia.

### 23 Percheron Stallions and Mares and 3 German Coach Stallions.

Mr. Rogers himself contributes thirteen head, including five splendid Percheron mares, all in foal; the remainder being fillies and stallions. Included in the number is one imported mare. Mr. F. A. Frost, of Grundy Center, Iowa, is the next largest contributor and sells five Percherons and three German coachers. There will be eleven stallions in the offering. This offering of twenty-six head will certainly afford the farmers of Iowa the best opportunity to secure registered Percheron stallions and mares at their own prices. The town of Union is located about eighteen miles north of Marshalltown on the Iowa Central railroad. In addition to the principal part of the offering made by the two gentlemen named, there will be four or five other stallions contributed by breeders of central Iowa. All of the mares of breeding age are bred either to good imported stallions or to the best home-bred ones in the community. All mares three years old and over are thoroughly broken to work. Inasmuch as these contributors are comparatively new to our readers and new to the fraternity aside from their immediate community, it may be possible that this is a splendid opportunity for farmers and breeders to secure high-class stallions and mares at a lesser price than is ordinarily paid for the same at the more important sale centers or in sales where the consignors have national or state wide reputation. Application for the catalogs should be made at once to

## E. F. ROGERS, UNION, IOWA

## NOTED DISPERSION SALE OF HIGH CLASS HEREFORDS

HELD IN EAST ST. LOUIS, ILL. National Stock Yards OWNED BY THE AVERY & HINES CO.

### Friday, Feb. 1, 1907

THIS famous herd including Imp. Albany, 72 head of fine bred cattle, in excellent flesh, and money makers for the buyer, will be sold regardless of cost. None reserved—all go. Albany, never defeated in the show ring and a great sire; William, the sire of great cattle, with 20 other splendid bulls included in sale. Sons of Imp. Albany, Perfection and William and grandsons of Imp. Diplomat, Dale, Beau Brummel, Java and Wild Tom. The females are great daughters of famous bulls of England and U. S. Ladies, Imp. Albany, Gold Box, Beau Brummel Jr., Java, Keep On, March On 15th, Archibald V., Dale and a fine lot of great cows and heifers. Queen Quiratic, Lady Barbara, Polly, and Peppa Java (all imported), with 35 more splendid cows and heifers, all carrying the best blood lines and individuals. The best lot of cattle cataloged by one breeder for years. Don't forget the day and place, East St. Louis, Ill., February 1, 1907. A money maker for you if you will buy, and you will buy if you see the cattle. Come and bring your friends. Write for catalog.

F. B. HINES, ALBION, ILL.

RETNA 2D.

sale day arrives the breeders will say that it is as good an offering as they have ever put up. It will be the last time this firm will ever put as large a bunch of Orion sows, as they will not have them in the fu-

ture. If you want to avail yourself of the opportunity to get an Orion sow, just write them for a catalog and then go to the sale. When writing please mention The Homestead.

## Dispersion Sale of the Famous Herd of O. I. C. Swine Owned by the Late O. L. Kerr, of Independence, Mo., Wednesday and Thursday, February 6 and 7, at Independence, Mo.

### ONE HUNDRED AND EIGHTY HEAD

Fifty-five bred sows—twenty-five bred to the great Kerr Dick, three, including Sally, the 1906 champion, are bred to Kerr Shelton, the \$625 champion; others are bred to the remaining herd boars. Thirty boars ready for service. Fall and summer pigs compose the balance of the offering. This will be a golden opportunity for O. I. C. breeders to secure the cream, as there has not been an animal sold from the herd since the death of Mr. Kerr. Every animal sells to the highest bidder for cash, as Mr. Kerr's estate must be settled. Write me for catalog. See field notes. Bids may be sent to auctioneers or C. J. Hiles, secretary O. I. C. Association.

### Henry Dorr's Brood Sow Sale.

The ninth annual sale of Mr. Henry Dorr will be held at his farm near Remsen, Iowa, on February 5th, when he will sell sixty-three head of as good Poland China brood sows as has ever been sold in a northwest sale. Thirteen years of his life have been devoted to breeding Poland Chinas, and in that time he has bred some good hogs and has made some good sales, but he never offered a better lot of sows than will go through his February sale. Just a word about his herd boars, Dorr's Tecumseh and Hands Down, now in use in the herd. Dorr's Tecumseh is a son of Johnson's Chief, and cost Mr. Dorr \$150 in the John Blain sale as a pig, and it has been one of the best investments he ever made. This is a hog with lots of size and a very large bone and carries great finish with it. He is a great breeder, as his gilts will show on sale day, and he will also be bred to most of the old sows and yearlings. He is a Chief Tecumseh 3d and Hadley cross, a line of breeding that has produced some of the good herd boars today in the West. Hands Down is Mr. Dorr's young boar and is a son of Hands Spring by Mischief Maker, out of Miss Alix by Big Perfection, the latter boar being as good a sire as was ever used in southern Iowa. Mr. Dorr is breeding this young boar to the Dorr's Tecumseh gilts. Some sows will also be bred to Evergreen Model 118335, a son of Empire Chief 2d. This young boar was the top pig in Mr. Roy Rockwell's herd this year. He may be offered in the sale. Twelve fall yearlings in the sale will be sired by Tecumseh Keep On, a son of Big Tecumseh. Lady Peerless 4th, a daughter of the great show hog, Perfect Chief, that sold for \$2,100 last year, goes into the sale bred to Dorr's Tecumseh. She is a good brood sow and her litter should prove a good thing for the man that buys her. Miss Mischief is a daughter of Mischief Maker and is a half-sister to Meddler, the grand champion boar at St. Louis. Mr. Dorr has sold boars out of her all the way from \$30 to \$100 and she is bred to Dorr's Tecumseh. He also sells daughters of Nemo L's Dude, Columbia Chief, Pilatis Chief, Ohio Sunshine, Indiana King and the great Meddler. His offering fairly revels in the blood of leading winners and all in all it is a sale that should command the attention of our best breeders. A thing about the Dorr offering is that they have the size and the bone, together with plenty of finish. If you are looking for Poland China sows and you want good ones, it will pay you to attend the Henry Dorr sale on February 5th. Write for catalog and mention The Homestead.

### Toop's Poland China Sale.

Lovers of good Poland Chinas will be interested in the brood sow sale of Mr. W. I. Toop, of Auburn, Iowa, on February 7th. After an inspection of the offering we will say that Mr. Toop is putting up an excellent lot of sows, and both breeders and farmers can well afford to attend his sale. Of the fifty-one head cataloged, fourteen are fall yearlings, two old sows and the rest are spring gilts, and there are some right toppy ones among the lot. Most of the fall sows and the spring gilts are sired by Auburn Chief 99025 by Chief Tecumseh, out of Queer Wilkes by Marcus Hadley. He is a large hog himself and sires pigs with plenty of bone and lots of stretch. Another boar used with much success in the herd is Right Kind 2d, a son of Look Me Over Chief, and he will be bred to a number of the sows in the sale. There is an excellent gilt in the sale sired by Black Chief's Rival and two big, growthy gilts by John Chief. Quite a number of the gilts are sired by Perfection I Am, a grandson of Brownwood Perfection. There are some splendid yearling sows in the Toop sale and also a very representative lot of gilts. They are bred to Black Sensation, a son of Black Chief's Rival, and he is one of the good young boars in the state. Also to Pilatus U. S., a son of Pilate's Chief, and to Right Kind 2d. The offering is a good one and we sincerely hope the farmers and breeders in that vicinity will turn out and buy these sows. Write for his catalog at once and mention The Homestead.

### Harding's Great Duroc Sale.

On January 31st, Mr. R. J. Harding, of Macedonia, Iowa, will again come before the Duroc Jersey breeders with a grand offering of brood sows, many of which will be bred to that great sire, Ohio Chief. The home of the great sows, Nebraska Belle, Proud Lady, and the great boar, Ohio Chief, was never better represented than they will be in this sale on January 31st. It is an offering that every breeder in the land can look forward to. There will be six daughters of Proud Advance in the sale, all bred to Ohio Chief, and six granddaughters of Nebraska Belle, also bred to the same boar. One of the very best of these Proud Advance gilts is No. 1 of the catalog and she is a good one. Anyone sending a bid on her will not go wrong. Improver's Belle is a fall yearling, sired by Belle's Perfect King and out of an Improver II dam. She is also bred to Ohio Chief. Mr. Harding is selling a good Orion Dandelion sow bred to the same boar. Queen Perfection is a daughter of the prize-winning boar, Perfection

Chief, and she is one of the good things that he is offering. Pottawattamie Belle is one of the greatest brood sows he has ever had in the herd. She has been a gold mine to Mr. Harding and she will be bred to Ohio Chief. There will be daughters of Red Chief I Am, Advancer Lad, Brighton Wonder, Ohio Chief and Tip Top Notcher in the sale. A great many of the best of these will be bred to Ohio Chief and the rest to Belle's Chief I Am, Keep On Protection and R. J.'s Proud Orion. It is the best offering Mr. Harding has ever sold. It will be one of the great occasions when the best Duroc Jersey breeders will come together. Write for his catalog and if you cannot attend in person send your bid to Mr. M. T. White, of The Homestead, in care of Mr. Harding.

### Hereford's Dispersion Sale.

At the National Stock Yards, East St. Louis, Ill., on Friday, February 1st, a dispersion of the well-known herd of Hereford cattle, the property of the Avery & Hines Co., of Albion, Ill., will take place. The offering will include Imp. Albany and seventy-two head of line-bred cattle, said to be in excellent flesh and sure to be money makers for the men who are lucky enough to

be the buyers. There is to be no reservation and every animal will be sold regardless of cost. Besides Albany and William, there are twenty other splendid bulls in the sale. They are sons of Imp. Albany, Perfection and William, and grandsons of Imp. Diplomat, Dale, Beau Brummel, Java and Wild Tom. The females that are in the sale are great-granddaughters of various bulls of England and the United States, including Ladas, Imp. Albany, Gold Box, Beau Brummel Jr., Java, Keep On, March On 15th, Archibald 5th and Dale, and a fine lot of great cows and heifers, all being splendid individuals and carrying the best blood lines. Don't forget the day and place, East St. Louis, Ill., February 1, 1907. See advertisement on page 36.

### Huffman's Duroc Sale.

It is with pleasure that we call the attention of our readers to the brood sow sale of Mr. Claud Huffman which takes place at his farm, five miles southwest of Scranton, Iowa, on January 29th. Mr. Huffman is one of the younger breeders, but is one of the most discriminating buyers and one of the best feeders in his section of the state, and when he runs a bunch of brood sows through the ring they are generally in the best of condition, and in a condition that will do the buyer good. He will sell eight tried sows and two fall yearlings, together with twenty-two spring gilts. The blood of old King Perfection (the Iowa State Fair sweepstakes boar), Crimson Wonder I Am and Proud Advance predominates in the herd. About three of the sows will have litters of pigs at side. He has selected twenty-two of his toppest gilts for this sale. They will be bred to Proud Orion 31337, Manley King 50293 and Only a Wonder 54307, a son of Crimson Wonder I Am. Kindly write at once for catalog and mention The Homestead.

### Closing Out Herefords.

Those who are on the market for Herefords should take notice of the closing out sale of Mr. W. H. Leslie, at Auburn, Iowa, on February 9, 1907. This herd has been one of the select ones in the state, and it will pass the test of the most critical Hereford man. There are more good individuals in this herd than is generally found in one offering. Mr. Leslie has been a good breeder and has built up his herd by buying the very best. It need not surprise any of our readers to see some good cattle sold in this sale. Mr. Leslie is leaving the farm and therefore closes out the entire herd. Thirty-seven head will be sold, including his herd bull, Dale Lad 35th 158312, a grandson of old Dale, together with many of his get, mostly young bulls and heifers. The young bulls will all be sired by him except one. The cows are a grand lot of broad-backed, deep-bodied and nicely-turned females, many of which will weigh 1,600 to 1,800 pounds. Many of the larger cows are sired by the bulls, Masher and Jumbo, both used in the herd. Jumbo was a grandson of Star Grove 1st and Masher was a son of Pretty Wilton 2d, one carrying the blood of The

## PUBLIC SALE

### Duroc Brood Sows and Shropshire Sheep

Wednesday, Jan. 30, 1907,

In Hoghouse on Farm, One Mile S. E. of Gosport, Indiana.

**50 Duroc** Sows and gilts, all bred to our best herd boars, ten to Beat Him If You Can, the \$3,000 boar. Will commence selling at 10 o'clock, as soon as trains are in.

Mr. J. Rothrock, of Centerton, Ind., will consign 10 head.

**80 Shropshires** Forty bred ewes, some imported; thirty ewe lambs, the older ones bred for May lambs; eight young rams and two flock rams. A closing out sale, as our farm is too much bottom for sheep. We regret to discontinue sheep, as we have been breeding Shropshires profitably for a quarter of a century. Send bids to D. M. Pierce, representing this paper.

## HUFFMAN'S DUROC-JERSEY BRED SOW SALE.

To be held at his farm, five miles southwest of Scranton and four miles southeast of Ralston, Iowa, Tuesday, January 29th. No postponement on account of weather. Sale to be held in seated tent. The offering consists of eight aged and tried sows, two fall yearlings and twenty-two spring gilts. The blood of King Perfection, Crimson Wonder I Am and Proud Advance predominates throughout the entire herd. Two of these sows will be sold with litter by their side. The sows will be bred to the great hogs, Proud Orion 31337, Manley King 50293, one of the best sons of Manley Orion, and Only a Wonder 54307, a son of Crimson Wonder I Am. Send for catalog. It is free for the asking.

CLAUDE HUFFMAN, Proprietor.

COL. J. L. LUTHER, Jefferson, Iowa, Auctioneer.

## TOOP'S ANNUAL POLAND CHINA SALE.

AUBURN, IOWA, FEBRUARY 7, 1907.

**51 HEAD** 14 Fall Yearlings  
2 Matured Brood Sows  
23 Spring Gilts **51 HEAD**

I HAVE selected the very tops of my herd for this sale. A good many of the gilts are sired by Auburn Chief, a son of Chief Tecumseh 3rd and Perfection I Am, a son of Fancy Perfection. Bred to Black Sensation, a son of Black Chief's Rival, and one of the best young boars in the state; and also to Pilatus U. S., a son of Pilate's Chief. The yearlings are a superior lot in every way. The aged sows have been great brood sows. Write me at once for catalog.

W. I. TOOP,

AUBURN, IOWA

Grove 3d, the other of old Lord Wilton. Both of these bulls left some good things behind them and many of the best will be sold on this occasion. Ella Britton is a daughter of the World's Fair bull, Ancient Britton, out of a Cherry Boy cow. She will have calf at foot sale day by Headlight Dale 4th and this is one of the last chances that anybody will have to buy a daughter of that famous old sire. There are some choice heifers in the sale that would look well in any herd. The herd bull, Dale Lad 35th, a grandson of old Dale and out of a Star Grove 15th cow, will be sold, also a

good young bull called Cyril that he has been using on the herd. There will be six young bulls in the sale, ranging in age from eight to fifteen months. Mr. Leslie will sell his small herd of Chester White hogs, including a splendid herd boar, Duke of Headlight 15866. Here is a well-made boar, with a good arched hack and will weigh 600 pounds. He has been a splendid breeder and could be used by most of our Chester White breeders. There will also be some good sows in the sale, all bred for spring farrow. Write Mr. Leslie at once for catalog and mention The Homestead.

IN HARRISON'S BARN AT

**SHELBINA, MISSOURI**

We offer twenty-two aged and yearling sows, ten fall and winter gilts and twenty-eight spring gilts. We have this past year bought such great boars as Belle's Chief 51323, a son of the great Ohio Chief and Savannah Belle, the \$750 Murphy gilt; Buddy O. 2d, a son of the champion, Buddy K. IV., and Tip Top Notcher's Baby, and Queen's Advance, a son of Proud Advance, and have used them on our sale stuff, along with Paul Kruger, a grandson of Gold Finch. We are offering some great attractions in Helen's Sister, bred to Belle's Chief; Rose and Rosebud, litter sisters, some show material here; Maud and seven sisters, by Missouri Chief; Helena 8th by Oom Paul, and her two daughters. Our entire offering consists of tops of two good herds. Send for catalog and try to be our guests sale day.

**Maupin & Applegate, Shelbina, Mo.**AUCTIONEERS:  
Cols. Reppert and McGowan**For Catalogs Address Each Breeding Firm and Kindly Mention This Paper.****The Shenandoah Short-horn Sale.**

We call particular attention to the forty-four head of Short-horn cattle which will be sold at public sale by various southwestern Iowa Short-horn breeders, to be held in the sale pavilion on the fair grounds at Shenandoah, Page county, Iowa, January 30th. The contributors to the sale are Messrs. G. H. White, John S. Dickey, W. B. Clark, C. F. Mitchell & Son and the estate of Samuel Speers, it being a complete dispersion of the latter herd to close up the affairs of the estate. Mr. Speers was one of the most successful and painstaking breeders in southwestern Iowa, and a good judge of individual merit, as well as breeding. As a result he was quite a successful breeder and the cattle of the estate which go into this sale, comprising eighteen head, go to prove this fact. Four of the eighteen head are bulls. Of the females five will sell with calves at foot, and all the others are of breeding age. They are profitable Short-horns, and the kind that should prove attractive to start a herd with. Messrs. C. F. Mitchell & Son sell two bulls sired by Pride's Lavender, a Cruickshank Lavender bull sired by Imp. Scottish Pride, which sired the phenomenal show heifer shown so successfully by Mr. N. P. Clarke, of St. Cloud, Minn., which stood at the head of her class around the circuit last year. Mr. W. B. Clark, of Farragut, Iowa, contributes four bulls, all yearlings. Two of these are sired by Royal Crown, a bull of Mr. George Bothwell's breeding, sired by Nonpareil Victor, whose get won for Mr. Bothwell a great reputation as a showman. Two other calves are by Mr. Clark's Cruickshank herd bull, bred by Messrs. Cummings & Son, of Buda, Ill. These bulls are large, lusty fellows and of good age to buy. Mr. John S. Dickey is selling two young bulls, almost a year old, and one yearling heifer. The bulls are both sired by Barmpton King, a Cruickshank Butterfly bull, and the heifer is sired by Royal Crown, a son of Mr. Geo. Bothwell's Nonpareil Victor. These are all red in color and are good individuals. Mr. Geo. H. White, of Emerson, Iowa, sells eight head in the sale. Three or four of these are young bulls, the rest cows and heifers. He is consigning his state fair prize-winning bull, Contractor's Banner Bearer. He is a son of Cumberland's Banner Bearer and he by the noted bull, Cumberland. Mr. White won on this bull at the Iowa State Fair and also got second prize on him at the Nebraska State Fair. He is a massive roan bull with a splendid head and horn, good width over crops and a good heart girth, with a nice spread of rib and good over the tail, flanks down well, and he is a decidedly good proposition for some man who wants a herd bull. He is a two-year-old and a splendid flesh carrier. Mr. White is putting some young bulls into the sale and he also sells a few nice cows and heifers. Write Mr. C. F. Mitchell, of Farragut, Iowa, for catalog and mention The Homestead.

**Ray & Son's Poland China Sale.**

On February 9th, at Defiance, Iowa, Messrs. Wm. Ray & Son will sell at their Evergreen Stock Farm about forty head of

Poland China sows. The offering will be made up of matured sows, yearlings and spring gilts, and are sired by Dakota Chief 2d, R's Perfection and other boars. A great many of these are bred to Impudence III., a son of the sweepstakes boar, Impudence. The most of the sows are bred for early farrow. Messrs. Ray & Son write as follows about their forthcoming sale: "We think we are selling the best bunch of sows that have ever been sold in this neck of the woods. The older sows that we are putting in are all good individuals and good brood sows. The yearlings are large and deep bodied, and the gilts are the pick of this year's crop. Altogether we think it is a most excellent lot of brood sows." The Ray herd is one of the good herds in that part of the state, and their annual sales always bring out some very topsey stuff. Write them at once for catalog and mention The Homestead.

**Last Call for the McKeever Poland China Sale.**

One of the good offerings of the large type of Poland Chinas to be held this month is that of Messrs. McKeever & Sons, of Hubbell, Neb., on January 31st. The offering will consist of forty head, twenty of which will be aged and yearling sows and twenty good, growthy spring gilts. They have selected a number of their best producers and as well bred as they are individually good and having crossed them with as good boars as the breed affords the produce will not in any way be a disappointment to those who secure stock from this great offering. Females that are known breeders of high-class stock when properly mated have been selected for this auction. The writer has seen but few herds of the large type of Poland Chinas that compare with this one, and Messrs. McKeever & Sons are to be highly complimented on being able to put before the public as grand a lot of females as will be offered by these gentlemen on the above date. It will be remembered by those visiting the Nebraska State Fair last fall that this was the firm that exhibited the largest black hog on the grounds. Expansion See, as he is called, weighed 1,125 pounds at that time. It is a rare thing that a hog of this size will breed that great smoothness and wonderful feeding qualities as does Expansion See. The greater part of this grand offering are daughters of this great hog. It will also be remembered that this firm own a one-third interest in Grand Look, first-prize hog in class at Nebraska State Fair last fall and first and sweepstakes at Hutchinson and St. Joe, Interstate Fairs. They are crossing the get of Expansion See with Grand Look and we consider there could be no better than this is bound to make. There will be daughters of such noted boars as Highland Chief Jr., Mogul Exwasee, Growthy Perfection, Ontier, Kansas Chief and other boars of show-yard character. Breeders wanting to add this great Expansion-Grand Look cross to their herd should keep this sale in mind, as it will be the last opportunity of this kind this year. Messrs. McKeever have a great prospect in a young Expansion See boar pig that will be used on a very few of the later-bred gilts. He is a June pig and weighed

300 pounds January 1st, as round and smooth as an apple and a great show prospect if he develops as fast as he is coming now. We are very much pleased to recommend this offering to our readers and are confident that you will be royally treated by Messrs. McKeever if you care to attend this sale. Catalogs are now ready and can be had by dropping a card to Messrs. McKeever & Sons, at Hubbell, Neb. The breeding of every animal is brought out plainly and the blending of blood contained in this herd has given to the herd some of its greatest show and breeding animals. Those who cannot attend may send bids to Mr. Ray Page of this paper and they will be carefully handled. Arrange to attend this sale. Write for a catalog and mention this paper.

**- Alldritt Sells Bred Sows.**

On February 5th, at Friend, Neb., Mr. Frank Alldritt will offer a very choice lot of bred sows. He has selected a number of his best producers which are exceedingly well bred and having crossed them with as good boars as the breed affords, the produce will surely not disappoint the men who purchase stock at this sale. Col. T. C. Callahan will conduct the sale, which will be entirely a female offering of forty-five head of gilts, yearlings and aged sows, and every sow guaranteed in pig to the service quoted in catalog. The great variety of breeding to be offered in this sale should make it a special attraction, having gilts and yearling sows from ten of the most noted sires of the breed. The writer has seen but few herds in a more thrifty growing condition than this one. Most of the aged and yearling sows are bred to Royal Prince, one of the best sons of Higgins' Model we have yet seen. He is very large, carries a wonderful loin and spring of rib, has good head and ear, good bone and stands well on his feet. This hog would make a very creditable showing and has proven a good sire. Others are bred to Adams' Express, a full brother to Crimson Wonder. Mr. Alldritt is also using a son of Ohio Chief that is an extra pig. We will go into further detail in regard to the good sows in our next issue. Sale will be held in comfortable quarters right in town, within one block of the depot. If you are wanting sows of this breed you cannot afford to miss this sale. A nice catalog has been made explaining everything and can be had by dropping a card to Mr. Frank Alldritt, of Friend, Neb. When writing please mention this paper.

**Weber Sells Bred Sows February 4th.**

On February 4th, at Friend, Neb., Mr. Henry Weber will offer a bunch of Duroc Jersey bred sows in which will be some choice individuals. Although young in the breeding of thoroughbred hogs, Mr. Weber has shown good judgment in selecting his breeding animals and has produced some extra good stuff. Some rare bargains will be offered in this sale. The sale will be held at his place, right at the edge of town, in heated quarters and those attending will be entertained at best hotel in the town. We invite all who are interested in this breed to attend. Included in this sale will

be some of his tried brood sows and we wish to make special mention of the great sow, Paragon, a daughter of the great Red Knight. This sow is especially large and of the rooky brood sow type that so many good breeders are looking for. She is bred to Improver III. for an early litter. Mr. Weber will also offer a daughter of Orion that has proven a good breeder. This good bunch of aged and yearling sows are bred to Improver III., one of the best sons of Improver II. the writer has ever seen. He is extra large, weighing right at 700 pounds in breeding condition, and is an individual that is good enough to head any herd. He is assisted by Gold Finder, a son of Hambletonian that was considered the best pig in the L. H. Page & Son sale this fall and bought by Mr. Weber at a good figure. Catalogs are now ready and can be had by dropping a card to Mr. Henry Weber, of Friend, Neb. Write him at once and mention this paper.

**Husman Makes a Dispersion Sale February 6th.**

On February 6th, at Exeter, Neb., Mr. J. H. Husman will disperse his entire herd of Duroc Jersey hogs, including his two herd boars, twelve good tried sows and twenty-two choice gilts, the tops of this year's crop of pigs. The sows that he is offering are descendants of such boars as Improver II., Billy K., Higgins' Model, Jumbo Red, and are bred to Von Billy K., a son of the prize-winning boar, Billy K.; Fashion Profit, a son of Fashion's Improver, and Lankage, a son of Belle's Echo. Mr. Husman has fed these hogs on alfalfa and feed that is not fattening and has spared neither time nor labor in getting these sows in proper condition to do the purchaser a lot of good. He is offering the boys a good class of sows and they are not only bred right, but are fed right to produce the best results. This is Mr. Husman's second sale and we would like to see every breeder in his section of the state turn out and lend him a helping hand. He needs your assistance and you will be pleased with the offering he will put into the sale ring on this date. The twenty-two gilts are a very growthy lot, being the tops of about 100 head raised this year. Mr. Husman always puts the culls on the market, so you can rest assured that they are a good bunch. The old sows are all of the large, rooky type and a bunch that it has taken Mr. Husman a long time to get together. Arrange to attend this sale and you will be well entertained while in Exeter. Catalog now ready and will be mailed to you on application. When writing please mention this paper.

**Twenty-five Chester White Bred Gilts.**

Among the "Too Late to Classify" advertisements will be found that of Mr. J. M. Janssen, of Sibley, Iowa, who offers to sell twenty-five head of Chester White bred gilts, safe in pig to White Leader 16513. If any of our readers are on the market for Chester White gilts they should write Mr. Janssen at once.

When writing to advertisers please mention this paper.

## Tom Isaac's Duroc Jersey Sale.

One of the Duroc sales that never fails to make a good average is that of Mr. T. H. Isaac. His annual brood sow sale will be held at Red Oak, Iowa, on February 8th, when he will offer fifty head of top, heavy-boned brood sows. The Isaac herd has gained considerable notoriety because of the size of bone and stretch of sows that he breeds. He never buys a light-boned sow nor boar, no matter how good otherwise, and consequently he has bred along these lines until he has a class of sows that they all want. His fall sale averaged nearly \$30 on sixty head of boars, and it was one of the best sales of the year. There were not any great high prices paid, but a good average was maintained and he had the money in his pocket when the sale was over. There will be fourteen granddaughters of Red Chief I Am and Nebraska Belle in the sale, four gilts by Brighton Wonder, two by Higgins Jr., eleven by Educator, a son of Indicator, and others by Hardy's Improver, Red Rustler, Robert H. and a few scattering. They will be bred to Belle's Red Chief 39543, a son of Red Chief I Am out of Nebraska Belle; Educator 39543 by Indicator, Peerless Chief 56345 by Ohio Chief and Royal Knight by the sweepstakes boar, Red Knight. Mr. Isaac writes: "I think my fall sale is an indication that I breed what the people want. I will sell fifty head of sows unless the weather keeps the buyers away. I will sell every sow cataloged to the highest bidder, unless some prove not to be with pig. I never had a sow or boar come back on account of being a non-breeder, and am getting the very best kind of reports from my fall sale." Write for a copy of Mr. Isaac's catalog and kindly mention The Homestead.

## Hughesdale Dual-Purpose Short-horns.

Mr. H. J. Hughes, of Trenton, Mo., proprietor of the Hughesdale herd of dual-purpose Short-horns, has on hand several bulls of serviceable age that should go to good herds where the milking qualities of the cattle are looked after as well as the beef-making qualities. But few herds can show better breeding than can the Hughesdale herd, and Mr. Hughes maintains the milking qualities of his cows by selecting only such stock as is known to give good quantities of milk and descend from stock of milking qualities. Mr. Hughes can show visitors as many 1,500-pound cows as can be found in any herd of like size, and all are the kind that produce good calves, as well as give a good quantity of milk. See page 43 for Mr. Hughes' advertisement and if interested write him about these dual-purpose Short-horns.

## The Central Iowa Duroc Jersey Sale Circuit

commences February 4th, on the farm of Mr. Roy West, two miles out from Bondurant, Iowa, on the Great Western railroad about a thirty-minute ride from Des Moines. Buyers from a distance will find everything in readiness for their reception, as all trains will be met both on the steam road and on the interurban at Altoona, only four miles from the farm. A representative of The Homestead found Mr. West very enthusiastic over the prospect of his sale and suffice it to say that the quality of the offering would do credit to a much older breeder. From time to time representatives of the best red hog blood have been added to this herd and a very good foundation has been laid for future work. Mr. West has an ambition to have some of the best and he extends the most cordial welcome to his brother workers to lend their presence on sale day. There will be offered just forty head, which will include a fine bunch of thirty choice gilts. Careful feeding has brought the bunch along without a check at any point of their existence. Their breeding represents some very good blood and in good variety. Reference to the advertisement, which appears on page 36, will convince you of that. Plan to attend this sale. If you are beginning in the business it will be a chance to get some good Duroc sows at prices you can afford. Let all the breeders turn out and make the sale at the Polk County herd a rousing success. A good dinner at the farm. Send for catalog.

## SUNDBURG AND OLSON'S CONSIGNMENT SELLS FEBRUARY 5TH.

Messrs. O. A. Olson and Samuel Sundburg have each a farm of their own, but they have been buying and selling red hogs under a partnership name. The advantage of this arrangement has made it possible to have some of the very best blood at the head of their herds. In this connection we will say that the importance of having good individuals as breeders in the working herds is a point to which these gentlemen have paid especial attention. Large litters and thrifty, vigorous ones are necessary for financial success. This is one of the strong points of the forty head of sows and gilts—which Messrs. Sundburg and Olson will offer. You will find plenty of quality, too, and a nice large, smooth bunch of gilts which possess every indication of making valuable property for any farmer or breeder. The sale will be held on one of the farms two miles north of Madrid. Conveyances will wait upon those from a distance and a comfortable place will be provided for the selling. Write at once for catalog to Mr. Samuel Sundburg. See the advertisement on page 36.

## THE DAY FOLLOWING AT W. E. BENNETHUM'S.

Those who attend the Sundburg-Olson sale will find it very convenient to remain over for the sale on the farm of Mr. W. E. Bennethum, three miles south of Madrid, on Wednesday, February 6th. The selling will take place in a very commodious heated building and plans are well matured for handling the sale successfully. Mr. Bennethum stands well in the estimation of home breeders, as well as those from a distance. For ten years he has been breeding the red hog and his start was made at a time when this breed was not so well known as it is today. It is common talk among fieldmen and breeders that in the Cedar Lawn Farm herd there are some of the best gilts and yearlings to be seen this season. A Homestead representative found this to be the case and

can freely say that the bunch of twenty-three gilts that will be sold are about as large, as smooth, as typical and as uniform throughout as any that will be brought under the auctioneer's hammer this spring. This is a strong assertion, we know, but we do not stand alone and we feel that more will venture that opinion on sale day. In the advertisement we have given the breeding in general. Watch for the attractions next week. In the meantime send for a neat catalog and post yourself.

AT. A. T. SUNDELL'S, PATON, IOWA, FEBRUARY 17TH.

The fourth sale of the circuit will take place on the farm of the above named breeder near Paton in Greene county. As is generally known, Mr. Sundell secured the herd of the late Wm. Roberts, one of the most noted of the early Duroc breeders in the West. With this start along the right line and by careful management Mr. Sundell has made an enviable reputation for the quality of red hogs produced at Maple Grove Farm. From his herd has been selected twenty-eight spring gilts and twelve aged sows. Among them will be some attractions that will undoubtedly prove a good investment for foundation stock, as their record as producers testify. A glance at the advertisement on page 36 will tell something of the breeding of the offering. Send for a catalog just to get yourself posted on what is doing, even if you are not sure of buying.

THE LAST DAY AT E. R. WOOD'S, JEFFERSON, IOWA.

From Paton the circuit followers will move to Jefferson, where the last sale will be held on the farm of Mr. E. R. Wood. Because of the position of this event on the circuit, breeders need not feel that it is the least important by any means. You need have no fear of getting left without a red hog to take home with you on account of the quality of the offering; however, you may need to get into the game of bidding early to get one, for the offering will show up well even if you have had eyes on red hogs for several days. Clovercroft Orion, a son of old Orion, is bred to most of the sixteen head of old sows and yearlings, while he is the sire of about half of the gilts. Thus the chance will be offered to secure some very good individuals of this kind of breeding. Some are sired by a Top Notcher boar and by Otto 17321. All the stock will be as represented and buyers can depend on Mr. Wood to do what is right in the catalog and on sale day. In this offering, as in all the previous ones, there will be some red hogs as choice as anyone wishes. There will be show material, attractions and something for everybody. Remember this sale, Friday, February 8th, and write for a catalog which Mr. Wood wishes to be in every breeder's hands. Take a look at the advertisement on page 36 before you read any more field notes.

## More of the Dispersion Sale of the Herd of O. I. C. Swine Owned by the Late O. L. Kerr.

Breeders of O. I. C. swine are once more reminded of the dispersion sale of the great herd of O. I. C. swine owned by the late O. L. Kerr, of Independence, Mo. The sale will be held on Wednesday and Thursday, February 6th and 7th, at Independence, Mo., in the same sale barn where all of Mr. Kerr's sales were held. It is not necessary to comment further than to say that in the dispersion of this herd the breed will miss a herd that was attracting the attention of all breeders of hogs, no matter what the breed, as it was Mr. Kerr who was considered the most active breeder in America of this great breed. Since the great showing made by his herd at the St. Louis World's Fair Mr. Kerr had gone on, improved his hogs, won further honors and at his death the herd was in the best shape since it was founded. Fortunately Mr. Kerr's brother, Mr. Ernest Kerr, and his brother-in-law, Mr. Robinson, were in such close touch with the herd that they have since been able to carry it along and have had practically the complete management since Mr. Kerr's death. They have seen that the sows were bred to the boars Mr. Kerr had spoke of using on certain sows and at the dispersion sale fifty-five or sixty bred sows bred to such hogs as the great Kerr Dick, Kerr Rex, Kerr Dexter and Kerr Paul go in the sale. Big Mary, Nancy, Silver Mine, Sally, the 1906 champion sow, and all the great brood sows Mr. Kerr owned go in the sale. The herd boars also go, as the entire herd must be sold in order to settle the estate. Not an animal has been sold since Mr. Kerr's death and about 180 head are to be sold. The catalogs were compiled under the direction of Mr. C. J. Hiles, secretary of the association, so that few, if any, errors will be found. Mr. Hiles has also promised Mr. Llewellyn Jones, administrator of the estate, that he will be at the sale and render any and all assistance possible to breeders who attend, or in executing any buying orders from those who cannot attend. Catalogs are being mailed to all who write for same. Cols. J. W. Sparks and F. Zaun will do the selling and bids may be sent to them in care of Mr. Jones. For catalogs and further information of any kind regarding the herd write Mr. Llewellyn Jones, administrator, Independence, Mo. See page 37 for advertisement.

## Shropshire Rams and Ewes.

Any of our readers who want Shropshire rams or ewes can purchase them of Mr. Willard Miller, of Anita, Iowa. Mr. Miller has been breeding Shropshires for the past fifteen years and he has some good sheep. He has an imported ram at the head of his flock and he is now offering a splendid lot of lambs sired by him. If you want Shropshires write Mr. Miller at once and mention this paper.

## Young Has Good Gilts to Sell.

Mr. E. K. Young, of Havelock, Neb., has a few very fine Duroc Jersey bred gilts for sale and they will be priced right if taken at once. They are a growthy, big-boned lot and in proper breeding condition. They are of the most popular strains, as Mr. Young has never bought anything but good individuals of best breeding. Write him for particulars and mention this paper.

## HANN AND MAYNE PUBLIC SALE OF

## HEREFORD CATTLE

TO BE HELD AT

HARLAN, IOWA, FRIDAY, FEB. 1, '07

50 HEAD. A GRANDLY BRED LOT OF COWS AND HEIFERS AND ABOUT SIXTEEN EXCELLENT YOUNG BULLS IN THE SALE 50

MR. HANN sells twenty-one head of cows and heifers and seven young bulls. All of the young cows and heifers are sired by the great show and breeding bull IKE 77264, a 1st prize and sweepstakes winner at the New York and Michigan state fair. Dolly the 2d was in calf to IKE when she sold at the Chicago sale for \$5,000. All of the daughters of IKE are bred to SPARTAN GROVE 2d 153707, a 1st prize and sweepstakes bull at the Nebraska State Fair in 1903, and 1st prize bull at same fair in 1904. This bull will be sold in the sale and he is a great herd bull. Mr. Hann has sold his 240-acre farm and therefore must sell these cattle in order to reduce his herd. Some of the young bulls that Mr. Hann is offering for sale are exceptionally good ones.

MR. J. S. MAYNE, HARLAN, IOWA, is practically closing out his entire herd. He is one of the oldest breeders in Shelby county, and got most of his foundation stock from the herd of the late Ben Hershey. The Mayne herd has been for the past thirteen years one of the best known Hereford herds in Shelby county, and as he is disposing of his entire herd he will therefore offer some splendid bargains in females and bulls.

No postponement on account of weather. Sale in new heated pavilion. For catalog address,

F. W. HANN, Mgr., HARLAN, IA.

COL. GEO. P. BELLOW, AUCTIONEER

Harlan is on the Chicago, Great Western, Chicago & North-Western and Rock Island railroads; one hour's ride from Omaha.

# DISPERSION SALE

## Of G. W. Fink's Glenmar Herd of

# ABERDEEN ANGUS

At Gray's Sale Pavilion, Maryville, Mo., Monday, February 4, '07

35 Head - 27 Cows and Heifers and 8 Bulls.

BLACK MONARCH 7682, my double Blackbird herd bull, got by Black Monarch of Emerson, should suit any breeder looking for a herd bull. Two grand sons of Prince Ito, both Blackbirds, two Pride bulls and a Queen Mother will be found desirable. My herd of cows represents such families as the Prides, Blackbirds, Queen Mothers, and Ericas. When laying the foundation for my herd I bought animals that in my estimation were best suited for one wishing to sell to the general public, animals that would be a credit to any herd large or small—the so-called fashionable kind. I have never lost an opportunity to better their condition, always using the best bulls at my command. They are all prolific, every one a regular breeder, of the beefy type. You are cordially invited to be my guest sale day. Write for catalog.

G. W. FINK, MARYVILLE, MO.

In the quarter of a century that I have been breeding Short-horns I have never offered a more useful or more valuable lot of cattle. Nearly one-half are pure Scotch, of the very choicest breeding. Three of them are among the best imported cows ever brought from Scotland, one of them being my great Cruickshank Broadhook's cow, Fair Duchess, the best cow in Bluffview herd. She sells with a show bull calf at foot, sired by the royally bred Cruickshank Secret bull, Secret Viscount 212705. Her daughter, Imp. Fair Duchess of Bluffview, and bull calf, together with a choice two-year-old daughter by Duke of Oakland 2d, are other attractions of this very prolific and profitable family. I am selling the best cow I ever owned and the best heifer I ever bred. Also an unusually good lot of daughters and granddaughters of Duke of Oakland 2d, bred to Secret Viscount. The bull offering includes five pure Scotch, two of them out of imported dams and by an imported sire. They are a top lot and afford a good selection for herd headers.

I hope to meet all my former patrons and all lovers of good cattle who can be with me on sale day. Catalog on application.

Cols. Geo. P. Bellows and  
M. L. McCullogh, Auctioneers.

**F. A. EDWARDS, Webster City, Iowa.**

## Illinois and Missouri's Great Duroc Bred Sow Sale Circuit.

Breeders of the Duroc Jersey throughout the corn belt if looking for desirable bred sows should investigate the various offerings that are to be made by the men who have formed the four days' circuit in Illinois and east Missouri. The second week in February was chosen by these breeders for their sales, and on February 12th Messrs. Harry Riggins and C. T. Rogers, of Petersburg, Ill., will open the circuit, selling twenty yearlings and twenty spring gilts, the tops of two good herds that deserve more prominence than they have gained heretofore. Each of these gentlemen have been and are breeders of the right kind. At the head of Mr. Riggins' herd is that great show and breeding boar, Gold Finch, that made such a great showing in 1903. He is now nine years old, but as sure and as active as a pig. A greater constitution or a smoother hog is hard to find. Gilts by him or sows bred to him should be in demand. At the head of Mr. Rogers' herd is Chicago Lad, the champion at the International the same year Gold Finch won first in class. Here, too, is a great breeding boar and some of the best things in the sale are daughters of this boar. These gentlemen own together a son of Helen Blazes IV, called Uncle Fred, and a son of Crimson Wonder called Proud Wonder. These have been used along with the older boars and those wanting bred sows will find that Messrs. Riggins and Rogers have them good and well bred. They sell in town in heated sale pavilion where all can be comfortable.

### SECOND DAY.

On Wednesday, February 13th, at his farm, Mr. T. E. Laurie, of Jacksonville, Ill., will sell forty-five head, twenty yearlings and twenty-five spring gilts. Mr. Laurie is one of those men who stand by their colors first, last and all the time, and good Durocs are his hobby. If indeed they may be called such. Mr. Laurie is a breeder who understands the business of mating so as to produce good ones, and breeders will get the advantage of his years of experience at this sale. The herd boars in service at Mr. Laurie's are He's Our Pride, a grandson of both Kant Be Beat and Top Notcher; Buddy K., a litter brother to Buddy K. 4th; Buddy Perfection, a grandson of Sensation. He's Our Pride is a boar that pleases the eye of the man who likes a strong-constituted hog with a back, loin, spring of rib and two good ends and all set on four legs of the milpost variety. Buddy K. is a boar that has good outline and, but for an accident which caused him to go lame he would be in a class of top notchers. He is a breeding proposition. Daughters of these great boars and sows bred to them should be in demand. As special attractions Mr. Laurie will include some of the sale-toppers he has been buying of late. Among these is Corrine Laurie got by Buddy T., sire of Buddy K. 4th. She is bred to Tip Top Notcher. Corrine Laurie was in second-prize herd at Illinois State Fair this last year. Breeders, stick a pin here. Two daughters of Buddy K. 4th are in the sale, one bred to Tip Top Notcher and one to Proud Advance. There will be a Proud Ad-

vance gilt bred to Buddy K. 4th in the sale that will make a great sow, also one bred to Tip Top Notcher. A Proud Advance gilt and a Buddy K. 4th gilt are being bred to Gold Finch and great results may be expected here. Mr. Laurie invites the breeding fraternity to be with him sale day, as this is his greatest effort and as good as he owns go in the sale.

### THE THIRD DAY.

On to the show-me state will be the order of the day on Thursday, February 14th, at which time Mr. B. W. Hale, of Laddonia, Mo., will sell twenty matured and yearling sows and twenty spring gilts. Mr. Hale is not an old timer, yet he is one of the most enthusiastic breeders in the business. At the head of his herd is Champ Clark, a son of Tip Top Notcher and out of Gold Dust Rose, the granddam of Helen Blazes III, and litter that sold for \$1,900 in the Fagin, Browning & Hess sale last winter. At their last fall sale the boar, Chief Paul Finch, was bought. He was got by King Morton and out of a daughter of the great Gold Finch. He should cross well on the Champ Clark gilts. As attractions Mr. Hale sells Perfect Gold Dust 33d; four granddaughters of Top Notcher, an A. F. Russell-bred gilt by Iowa King, two daughters of Gen. Cronje, the American Royal champion in 1906. These with the great lot of Champ Clark stuff will be found attractive. Mr. Hale says come and be his guest sale day.

### THE FOURTH AND LAST DAY.

At Shelbyville, Mo., on Friday, February 15th, Messrs. Maupin & Applegate, of Shelbyville, Mo., will sell sixty head, the largest number that go in any sale in the circuit. Messrs. Maupin & Applegate own two herds, but buy boars and own them in partnership, which enables them to line up most anything they wish, such as the young boar, Bell's Chief, got by the great Ohio Chief and out of that great young daughter of Nebraska Belle, Savannah Belle, for which Mr. Sam Murphy paid \$730. Messrs. Maupin & Applegate paid Mr. Murphy \$300 for this pig long before he was six months of age. As an individual he merits the expenditure and if breeding counts he should breed on. They are also using a good son of Buddy K. 4th and out of a Tip Top Notcher sow, a Proud Advance pig and Paul Kruger got by Kruger and out of an Oom Paul sow. Their sale is full of attractions, such as Helen's Sister, a litter mate of Helen Blazes. Mention of others will be made in future issues. These gentlemen sell in town and request you to come if possible. For address of each member of this four days' sale circuit see advertisement on page 38 and kindly mention this paper when writing them.

Buddy K. IV. Sells at Auction Feb. 6th.

The only reason that Ed. A. Baxter would ever part with Buddy K. IV. is that he is going to quit breeding Duroc Jerseys. The writer, representing this paper recently inspected the herd of Mr. Baxter at Pawnee, Ill., and wishes to state for the benefit of our readers that the lot which will be offered to the public is one of the best that the breeders will see this season. There are

many sows which would not be priced, let alone sold, were it not for the fact that Mr. Baxter is absolutely closing out his herd. There have been sales that were advertised as closing out sales where the breeders had no idea of quitting the business, but this is not the case with Mr. Baxter. He has assured the proprietor of this paper that he means to sell everything he owns in the Duroc line, and told a representative of this paper that his breeding crates, self feeders, of which he has four, and other property connected with his hogs would be for sale. Sixty-five head have been cataloged. They include twenty-two brood sows from one to three years old that have been regular producers, many of them having raised two litters. The spring gilts are good ones and those not related have been bred to Buddy K. IV. This is the case with all the sows in the herd. Those not related have been bred to Buddy K. IV. This noted sire and show-yard winner will be sold at auction to the highest bidder without reserve of any kind. No matter at what price he sells he goes. The breeder in search of a herd boar, one that has given to the breed boars and sows fit to win ribbons in the strongest shows, and to be used at the head of some of the best herds of the breed, cannot afford to miss being present on sale day. The man who is fortunate enough to secure this boar will never regret it. The catalog which Mr. Baxter has just issued, will show the breeding and families represented in this offering. It should be in the hands of every breeder of Durocs and will be sent free to those who write for it, saying you did so at our suggestion. Plan to be present at Pawnee on Wednesday, February 6th. Those coming from the sale of Messrs. Fagan Browning & McCabe, stop at St. Nicholas Hotel, Springfield, Ill., at Mr. Baxter's expense. Can leave in the morning and be in plenty of time for the sale. Kindly mention this paper when writing.

### Pollock's Closing Out Sale.

An opportunity to buy something exceptionally good in Duroc Jersey herd boars and brood sows is offered in the closing out sale of Mr. D. J. Pollock, of Thayer, Iowa, on February 1, 1907. Mr. Pollock has been one of the most successful breeders and showmen in the ranks of the Duroc Jersey fraternity. It was he who brought out the great Iowa State Fair prize-winning boar, Perfection Chief, and he is selling some of his very best daughters in this sale. Of the two herd boars we desire to speak first and we will say to the Duroc breeder who is looking for a herd boar, go to the Pollock sale and get one that will suit you. Fancy Perfection 47967 is a yearling, sired by Perfection Chief, and one of the promising boars for next year. Mr. Pollock showed this boar last fall at the Iowa State Fair and won two, fifth places on him with four states represented. He got one of the two premiums that came to Iowa on this young boar, which certainly speaks well for him. This boar is proving himself an excellent breeder and we want to say to the many breeders who are in the market for a herd boar, go and buy Fancy Perfection. We will refrain from describing this young

boar and will rely on his state fair winnings in one of the greatest shows ever held to speak for his true character as a typical Duroc Jersey boar. His other boar is D. J.'s Orion Chief, a son of the great Ohio Chief out of Pilot's Nancy by Young Pilot. Mr. Linn Roberts assisted Mr. Pollock when selecting this pig and predicted a great future for him. He said at the time that he was the second best Ohio Chief boar that he knew of and thought he had in him a great outcome. Both of these boars have been bred to the sows that will be sold in the sale. Either one is good enough to head any herd, and the breeder who wants a herd boar we will say to him, don't miss the Pollock sale. Among the best sows is Princess Alice, a fall yearling and a daughter of Perfection Chief. She was one of the three sows in his young herd at Des Moines last fall. She is an especially good young sow and is safe in pig to D. J.'s Ohio Chief for early farrow. Another good Perfection Chief sow is Red Duchess, a litter sister to Fancy Perfection, the herd boar referred to above. Fay Janice is a yearling, a daughter of Alix Pride out of the second-prize Iowa State Fair sow, May Janice. She is bred to Fancy Perfection and is something that will not make a bad show next year. He also sells a good daughter of old Brilliant in the sale and a good daughter of Fairview Chief, both bred to Fancy Perfection. Another good Fairview Chief sow that deserves more than a passing mention is Faultless. This sow he has had some very tempting offers on before he concluded to sell his herd, but she now goes with the rest and she is bred for an early farrow to Fancy Perfection. Queen Nichols, considered the best sow in his show herd, will also be sold, and she is bred to the Ohio Chief boar. There are two good Fancy Perfection gilts in the sale out of a daughter of old Brilliant. There are a number of good things in this sale and inasmuch as it is a closing out sale there should be a lot of good bargains. There are several things in this herd that breeders should go after. If you cannot be present, send a bid to Mr. Alva Manifold, the auctioneer, in care of Mr. Pollock, and he will select for you just what you want. Write at once for a catalog and mention The Homestead.

### A Coming Duroc Sale.

Mr. J. S. Teale, of Lamoni, Iowa, in sending in request for The Homestead to claim February 28th for his sale of Duroc Jerseys, writes: "My sale will represent the best families of the Duroc breed, such as Ohio Chief, Proud Advance, Ben Davis, American Royal, Brilliant and Tip Top Notcher. The boars I have used on the sows are Ben Davis, My Chief by Ohio Chief and American Royal Jr. by American Royal. There will be two Proud Advance gilts, one of them a granddaughter of Tip Top Notcher and they are bred to My Chief. This is the blending of Tip Top Notcher, Proud Advance and Ohio Chief blood which should make something good. My Chief has been used freely in the offering on sows sired by Ben Davis, American Royal Jr. and Genevieve Brilliant. Write for catalog which will be ready February 15th."

# TWO GREAT OHIO CHIEF SOW SALES

TWO OF THE GREATEST DUROC JERSEY SALES EVER HELD

**WESTON, IOWA, JANUARY 30, 1907.**

Included in my sale will be Allen's Maid, first-prize sow at Iowa State Fair, 1906, and bred to the great Ohio Chief. There will be forty head in my sale, and they will be bred to Ohio Chief, Briggs Prince, and Baxter's Buddy K.; daughters of my splendid boar, Indicator, and daughters and granddaughters of Orion, Proud Advance, Red Chief I Am, and other noted sires. I never sold as good an offering as I sell in this sale. About fifteen head bred to Ohio Chief. Write at once for catalog. Address.

**O. E. Osborne,**

**Weston, Iowa.**

**CARSON, IOWA, JANUARY 31, 1907.**

"The Home of Winners." Forty head of big-class sows, daughters of Proud Advance, Orion, Dandelion, Advance, Perfection Chief, and grand daughters of the great Nebraska Belle bred to Ohio Chief. There will be sixteen head bred to Ohio Chief in this sale. Others bred to R. J. Proud Orion, by old Orion, and out of Proud Lady, the \$1,275 sow; also to my great young boar, Keep On Perfection. Nothing but the tops go into my sale. Write at once for catalog. Address

**R. J. Harding,**

**Macedonia, Iowa.**

Bids sent to Mr. M. T. White, representative of The Homestead, or to Colonel Luther, in care of either breeder, will be properly cared for. Kindly mention The Homestead when writing for catalog.

## Final Notice Bluffview Short-horn Sale.

This will be the last opportunity The Homestead will have to direct the attention of more than 100,000 of its readers to the very important sale of Scotch and Scotch-topped Short-horns, to be sold at Webster City, Iowa, on January 29th, by Mr. Fred A. Edwards from his famous Bluffview herd. A Homestead representative who has recently inspected this offering was very much impressed with the high character of the cattle to be sold. They are in splendid condition for a winter sale and all females are of breeding age and with only two or three exceptions are unusually choice. The sale includes what Mr. Edwards believes the best Short-horn cow that he ever owned and the best two-year-old heifer that he has ever bred during his twenty-five years' experience in the business. These two animals were referred to in our last issue and are Lots 1 and 3 of the sale catalog. While we mention a goodly number of the Scotch females, we are not unmindful of the splendid young bulls to be sold, chief among which is Nonpareil Stamp and Count Marjory. The first named is Lot 11 of the sale catalog and was sired by Imp. Morning Star. His dam was Imp. Nonpareil 33d by Clan Alpine. Imp. Morning Star was a beautiful roan bull bred by Mr. Philo Mills and sired by the great Duthie bull, Pride of the Ring, the highest-priced calf of 1898 in the Collingie sale. Imp. Nonpareil 33d is one of the very best representatives of this illustrious family. Mr. Cruickshank, as well as Mr. Campbell, thought very highly of this family, and from them produced some splendid cattle. They have furnished numerous prize winners at the leading shows. Count Marjory was out of Imp. Lady Marjory, a daughter of the celebrated Count Lavender, which won fifty-two first prizes and championships. Her dam was Lady Mary 12th by that grand old bull, William of Orange, whose tower of strength was felt in the Uppermill herd of Mr. W. S. Marr to a greater extent than that of any other bull ever used. As to choice between these two bulls, Nonpareil Stamp and Count Marjory, there may be an honest difference of opinion, but perhaps as many well-informed breeders would select one as the other. At the present time The Homestead man's choice is Nonpareil Stamp. Both are choice reds with long, mossy coats of hair and give every promise of making a pair of choice herd bulls. No breed in the world is too good to put at its head a bull like either of them. Another good bull is Scottish Count, a grandson of the \$1,530 cow, Emma 17th. He belongs to the famous prize-winning Emma family, celebrated at the hands of Messrs. J. H. Potts & Son with their famous twin Emmas, undefeated in the show ring. This young bull was sired by College Fairwell and he by Scotland's Crown. Hence is a half-brother to Scottish Crown that sold for \$1,025, Imp. Scottish Signet that sold for \$1,315 and of Silver Crown, the first-prize steer calf at the International in 1901. Another splendid bull sired by College Fairwell is His Highness out of a Cruickshank Bra-with Bud cow sired by Duke of Oakland 2d. This bull is roan, calved July 23, 1905, and is a deep, thick, massy fellow, full of quality and one that is a credit to the family to which he belongs. Perhaps the best individual bull in the entire offering is Lot 37, Victor's Prince. He was sired by Prince of Bluffview, he by Duke of Oakland 2d and out of Imp. Fair Duchess, the Broadhocks cow referred to as No. 1 of the sale catalog. The dam of Victor's Prince was Bonnie Victor by Greengill Victor and she out of Bonnie Mabel by Imp. Prince William. While this bull may not be termed a Cruickshank bull, there is a preponderance of Scotch blood in his veins, and that of the very best. He is a dark red roan bull, calved November 27, 1905. His straight, level lines and true Short-horn character certainly place him in the front rank among good bulls of this age. He has an ideal Short-horn head and is a typical beef beast from end to end. He is a credit to his breeder, as well as to his splendid sire. Fortunate, indeed, will be the man who secures this bull. There will be five of these Scotch bulls in the sale that are well worthy of places where good qualities from a breeding standpoint can be better demonstrated. Referring again to the female offering of the Scotch cows not already mentioned, Lady Nell 2d occupies a prominent place. She is a daughter of Great Light and out of Imp. Lady Nell by Bapton Conqueror. She belongs to the Cruickshank Clara family. Lot 7 is Sweet Jasmine 2d, a daughter of Imp. J. I. Marengo and out of Sweet Jasmine by the Linwood-bred bull, Gaveston, and she out of Imp. Jasmine 2d by Cumberland. The writer well remembers Imp. Jasmine 2d, the massive roan cow that stood in a class by herself during her younger days in America. The rich breeding in this pedigree should be seen to be appreciated. The list of sires runs something like this: Imp. J. I. Marengo, Gaveston, Cumberland, Cawdor, Barmpton Prince, Master of Arts and Champion of England. Could the Scotch critic demand anything richer than this? Lot 8 is a royally-bred Duchess of Gloster, with her heifer calf at foot by this splendid Victoria Cruickshank bull, Double Victor. A fitting companion for Heather Bell, Lot 3 of the catalog and the one that Mr. Edwards considers the best that he has ever bred, is

her stall companion, the rich red roan heifer, Pleasant Ridge Athene. This is a daughter of that grand good bull, Double Victor. She is a splendid thick heifer, level in her lines and is but four removes from Imp. Athene, brought over by Mr. Luther Adams, of Storm Lake, Iowa. She was bred December 9th to the Victoria bull, Fearless Victor. A splendid Cruickshank Matchless cow or heifer will be found in Lot 10, Matchless Bell. She, too, is a daughter of Double Victor and traces directly to Imp. Matchless 16th by Senator. This is a red heifer and one that will bear acquaintance. Aside from the Scotch females in this offering are some choicely-bred Wild Eyes, Kirklevington, Rose of Sharon, Young Mary and other select American sorts. Mr. Edwards could not afford to make the entire offering of that high character and select all Scotch cattle, but the offering throughout is one that is desirable and a credit to the proprietor of Bluffview. His beautiful catalog now ready for mailing should be in the hands of every Homestead reader, and we trust all who are interested will send for one at once, mentioning the fact that they were induced to do so by the announcements in The Homestead. Col. Geo. P. Bellows, of Maryville, Mo., will conduct this sale, assisted by M. L. McCullough. See advertisement on page 40.

## Last Call Schmieder Poland China Sale.

The breeders of northwest Iowa will be present on January 29th, when Mr. John Schmieder, of Remsen, Iowa, makes his public sale of Poland China brood sows. Mr. Schmieder came prominently before the breeders of his section of the state when he showed a few of his herd at the interstate fair last fall, and came away with the first prize on his boar pig under six months, a son of his herd boar, Winning Perfection. He sells four litter sisters of this first-prize pig in this sale, and they are worth buying for brood sows. In fact, most of the gilts in the sale are sired by Winning Perfection, and about ten head cataloged are bred to him. One good lengthy gilt is sired by Grand Chief Tecumseh 2d, the Nebraska State Fair sweepstakes boar, and her dam is Lady Moss by Moss Chief and she is bred to Winning Perfection for early farrow. Four gilts in the first of the catalog are out of Best of 1904, she by Large Perfection. This is the dam of his first-prize interstate fair pig and she is one of his greatest brood sows. He sells a two-year-old daughter of Moss Chief and a yearling sow called Whiteface Beauty, both bred to Winning Perfection. Mr. Schmieder also sells five gilts by Keep On 3d, all bred to his old boar. The old boar is bred to about ten head that go into the sale. He sells All Dude 2d 116967 in this sale. All Dude is a grandson of Nemo L's Dude and will make some breeder a good herd boar. Readers of The Homestead are requested to write for catalog and then go to the sale. Please mention The Homestead when writing. See page 44.

## Babcock's Poland China Sale.

On Saturday, February 2d, Mr. Ernest S. Babcock, of Manning, Iowa, will make a public sale of fifty head of Poland China brood sows in the new sale pavilion. Mr. Babcock is one of the enthusiastic young breeders of the state and comes from a family of stock raisers, his father and brother being well known Short-horn cattle and Poland China breeders at Lyons, Neb. He will sell fifty head in this sale, the cream of the 150 head now on the farm. In a recent letter he writes: "I am selling some of my very best sows, many of which will weigh from 500 to 700 pounds and these are all tried brood sows. Every sow that will be sold in my sale will be guaranteed. The sire of several of these sows will weigh over 900 pounds. These sows will be bred to Brookline's Express (Illinois interstate winner) and Long John, a bog that will mature into a 900-pound boar. Brookline's Express will be fitted for show at the Iowa State Fair next season. Just say to Homestead readers that I am selling the cream of my herd in my first annual sale in order to attract the best breeders. My gilts are growthy and full of quality, and every one carries a guarantee with her." Those who are wanting Poland China sows should write Mr. Babcock at once for catalog and then attend the sale. Kindly mention The Homestead when doing so.

## Last Call for Vrtiska's Bred Sow Sale.

With this issue we call the attention for the last time to the Duroc bred sow sale to be held at Pawnee City, Neb., on January 29th, by Mr. Frank Vrtiska. This is Mr. Vrtiska's first attempt at holding a bred sow sale and he will endeavor to make it a drawing card by putting in the very best that he has on the place. He will offer thirty-five head, including some of his good tried sows, a few good yearlings and about twenty growthy spring gilts. They are a growthy, big-boned lot in prime breeding condition and bred to well-bred boars. There will be fourteen head in the sale bred to Chief Kan't Be Beat, a grandson of Kan't Be Beat, ten head bred to Advance, Proud by Proud Ad-

## ANNUAL SALE POLAND CHINA

**60 BRED SOWS, 60 Yearlings and Gilts**

**At Bennett, Cedar County, Iowa, January 29, 1907,**

I will sell on the above date, in the Bennett Sale Barn, 47 head of yearlings and tried sows, bred to the several boars, Iowa Perfection 102717, Young Wonder 117033 and Chief Price 4th 118007. The result of this combination of breeding should prove a good one. I also offer 12 head of gilts of spring farrow, sired by King Perfection 89209, and bred to the above named sires. Scale and bone are my specialties. I also offer one good breeding boar, Iowa Perfection 102717. Send for catalog. Bids will be cared for by the auctioneer, Ira Cottingham, Eden, Illinois.

**GEORGE REGENNITTER, PROP.**

## Rankin's Great Duroc Jersey Sale

vance, four to Pawnee Improver by Improver II. So you can note from this that the breeding of both sire and dam is of the most noted strains. This is a very useful offering and are the thick kind that pull

down hard on the scales when weighed for market. Catalogs now ready and can be had for the asking. Write for one and mention The Homestead. See page 42 for the advertisement.

## COMBINATION SALE OF REGISTERED

## SHORT-HORN CATTLE

To Be Held at Sale Pavilion on Fair Grounds

SHENANDOAH, IOWA, JANUARY 30, 1907.

40 Head---26 Females and 14 Bulls---40 Head

From the herds of Geo. H. White, Emerson, Iowa; W. B. Clark, Farragut, Iowa; John S. Dickey, Farragut, Iowa; C. F. Mitchell &amp; Son, Farragut, Iowa; and the executors of the estate of the late Samuel Spears, Shenandoah, Iowa.

The above breeders are selling some of their best cattle. Among the bulls are several strong, vigorous yearlings of outstanding merit. The females are a good lot and comprise the tops of these herds. The Spears herd will be closed out in this sale, and they are selling some splendid cattle, their herd being noted as one of the best in southwest Iowa. There will be show bulls that were prize winners at the Iowa and Nebraska State Fairs, as well as at some of the best county and district fairs in the state. Mr. White sells Contractor's Banner Bearer, second-prize bull at Nebraska and one of the leading prize winners at the Iowa State Fair.

This will be one of the best Short-horn sales ever held in southwest Iowa. The cattle are an exceptionally good lot individually and many of the cows will have calf at foot. Write for catalog and kindly mention The Homestead. Address,

C. F. MITCHELL, MANAGER, FARRAGUT, IOWA.  
Col. Geo. P. Bellows, Auct.

PRIZE WINNING DUROC JERSEY SOWS

It is the cream of the herd we are offering in this annual sale and we hope to have all the breeders at our sale. Catalog now ready. Address

NORRISH & BEVINGTON,  
Col. Pat McGuire, Auct. KINGSLEY, IA.

A. L. MOSSMAN'S BROOD SOW SALE, JANUARY 29, 1907  
40 BROOD SOWS, RICHLY BRED 40

A. L. Mossman of Radcliffe, one of the Reliable Duroc Breeders of Iowa, will sell at auction on his farm, one-half mile east and 2½ miles north of Radcliffe, Iowa, under sealed and heated tent, 40 richly bred Duroc sows and gilts. Ten tried brood sows of the cream of his herd, which have proven themselves to be breeders and good mothers, no deformities, but all useful, fine individuals with good dispositions, being gentle and kind and daughters of Tientsin 1261, the boar that sired the champion junior yearling sow at State Fair 1906. Some of these yearling sows are half sisters to this fine sow and bred to A. L.'s Chief, one of the best yearling boars of the breed. The boars used on the sows are A. L.'s Chief 4337n, 15723a, by I. J.'s Chief 1245a, L. J. taking first at Indiana State Fair 1905, weighing 1,000 lbs. and as smooth as a perch. A. L.'s Chief has proven himself a great breeder, as will be seen on sale day in gilts in the sale. 20 Iowa 43559 by Ohio Chief 41419u is one of the good ones. King of Radcliffe 55871 by Corroctor, the J. D. Nidlinger show and breeding hog, King of Radcliffe, is a very promising boar, his dam being Decatur Belle M 112283, Mr. Nidlinger's show gilt at Indiana State Fair, Ohio State Fair, Illinois State Fair and other shows, always winning first. J. Wonder 43861 by West Side 23983, is a litter brother to Crimson Wonder and a good individual. Promoter Chief by Chief Promoter by Top Notcher Again 10787a. Now these sows and gilts have been handled and fed so we believe they will do the purchaser and myself good. All breeders and neighbors and others are cordially invited to attend this sale to be held on farm 2½ miles north and one-half mile east of Radcliffe on the C. & N. W. R. R. and 2½ miles west of Sherman on the Des Moines, Iowa Falls & Northern R. R. Parties from a distance will be entertained at hotel in Radcliffe or at farm, and conveyed to and from sale free of charge. Catalogs are now ready and being mailed. If you have not received one, write to A. L. Mossman, Radcliffe, Iowa, mentioning The Homestead, and he will mail you one. All mail bids can be sent to Col. F. F. Luther, or O. L. Mossman or W. F. Stratton in my care and will receive honorable treatment.

A. L. MOSSMAN, C. G. WERNER, Clerk.

Champion Shire stallion at International, Chicago.	Second—Best five Belgian stallions, Illinois State Fair.
Reserve champion Belgian stallion, International, Chicago.	Second—Best five Belgian stallions, American Royal, Kansas City.
First—Best five Shire stallions, American Royal, Kansas City.	Second—Best five Percheron stallions, American Royal, Kansas City.

His Majesty King Edward VII. of England and Lord Rothschild's exhibit of stallions were purchased by us at the Great International Exposition at Chicago, 1906. These Grand Stallions, Girton Charmer and Premvictor, will be on exhibition at this sale. Do not fail to see the Highest Priced Draft Stallions ever imported to this country.

As we are now located at Wichita, we intend holding an annual sale in this city, this being our first. Our AIM is to surprise the PUBLIC with such Stallions as were never before placed at auction. All Stallions will be sold with our regular guarantee of 60 per cent and will be sold so that all payments will not become due until you have made two seasons and one collection from your HORSE.

This sale will not affect our business in any way, as we will have over 250 head left after the sale for our Spring trade, not including our New Importation which will arrive soon.

TERMS—Will be one year and six months from date with interest at 6 per cent from date, or six per cent discount for cash. All credit must be bankable. Send for catalog and calendar.

**Robt. Burgess & Son, - Wenona, Ill.**

NICHOLAS STAMM, Letts, - - - - - Iowa

## HORSES.

# FRANK IAMS'

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND," Iams' "HORSE SHOW" at Nebraska, Iowa and Illinois State Fairs WAS the "TALK" of the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER," "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE," "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

## 168 Percherons, Belgians and Coachers 168

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." All REGISTERED and APPROVED. Mamma, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES," they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He buys, owns and sells more stallions than any man in United States; saves THOUSANDS OF DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

## \$1,000 SAVED AT IAMS \$1,000

IKEY! What a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "TOP NOTCHERS" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "bunts in," sells more stallions each year. He makes every statement good. Georgie, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. ## ST. PAUL, - NEBRASKA

### THE LAFAYETTE STOCK FARM

J. CROUCH & SONS, Props. Lafayette, Ind.

Our sweeping victories at all the leading live stock shows in the United States is evidence of the class of horses that we handle. At the late International, the greatest live stock show in the world, we won 21 first prizes and 12 seconds, including 3 championships. Our horses are all fresh imported, on which we will put a gilt-edged guarantee that they must be good breeders. All stallions are personally selected by one of the members of our firm and are purchased direct from the breeders in Europe. Our facilities for purchasing and handling stallions are equalled by no other importer and thus we are enabled to handle higher-class horses at less money than our competitors. Our terms are liberal. Importations arrive frequently, insuring buyers a large selection from which to select a stallion.

J. CROUCH & SON.

No money required.

## OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gild from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percherons and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landschaftstrut O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best old country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

OLTMANNS BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.

## S. J. MILLER, KIRKSVILLE, MO.

IMPORTER AND BREEDER OF

Percherons, and French Coach Horses.

25 Percheron stallions, among which are prize winners in France, coming threes and fours, weighing 1,900 pounds, all dark colors. 25

No importer can sell you a better horse at from \$700 to \$1,400 than I am offering, for they were not brought over this year. Among my French coachers you will find a four-time winner in France. To the man wanting a first-class mammoth jack or jennet, will say I have them. Come to my barns and let me show you, or write me, telling what you want. Barns in town. Kirksville is on the Wabash and Burlington railroads.

## Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

# The Grand Champion Duroc Jersey Sale Circuit

Jan. 31st to Feb. 8th Inclusive

## Of Illinois

Jan. 31st to Feb. 8th Inclusive

### 350 Head

Of choicely bred Duroc Jersey sows sired by and bred to Champion and Prize Winning boars of National Reputation.

### 350 Head

#### Thursday, January 31st H. B. Griffiths, Bowen, Ill.

Thursday, January 31st, Mr. H. B. Griffiths, Bowen, Ill., proprietor Suburban Stock Farm, will offer sows sired by Tip Top Notcher Chief, Tip Top Notcher, Kan't Be Beat, Advancer, Hanley, Big I Am, Ambition, Buddy K. IV., Gold Cloud, Mayor Jr., Il Chmax and C. E. Col., every one a first-prize winner, and bred to Tip Top Notcher Chief, Fancy Orion Chief, Helen's Tip Top Notcher II., Proud Advance, Buddy K. IV., and Hanley. Don't forget that Helen Blazes V., sister of the \$1,000 Helen Blazes III., and Queen Dotie, a daughter of the grand champion sow, will be two of them. Send for catalog.

#### Tuesday, February 5th Fagan, Browning & McCabe, Hersman, Illinois. Banner Bred Sow Sale---50 Head

Many sired by and bred to Tip Top Notcher, pronounced by most breeders the king of the breed, grand champion boar at the World's Fair, St. Louis, 1904. He is sire of state fair winners and class prize winner, also sire of highest-priced boar ever sold at auction and third highest-priced sow. If you want the kind of pigs that sell high, buy a show sow in our sale bred to the world's champion. We will sell you the seed of champions. Every sow in our sale bred to Tip Top Notcher is a show sow. Show sows by Kan't Be Beat. Quality and breeding bred to Tip Top Notcher cannot fail to win out. Many good ones will be sold. They won't all sell high. One of the finest catalogs printed free for the asking. Farm three-quarters of a mile from depot. Address Fagan, Browning & McCabe.

#### Friday, February 1st Manlove Bros. & J. H. Norris, Bowen, Illinois. 50 Head to Be Sold at Maple Lawn Stock Farm.

This stuff is all selected as tops from the two great herds, having the quality and blood to qualify them for the highest honors. There are 16 tried sows, 13 fall yearlings, 21 spring gilts that are hard to fault, the pick of the crop. Also "Remington Queen," the sensational young show sow with 5 firsts to her credit. We invite all breeders and good farmers to attend our sale and we can guarantee you will not be disappointed in the character of the stuff. The noted boar, Hambletonian, and the sensational yearling, Illinois Chief, both prize winners, are in service for this offering. We should be pleased to have you see this stuff and will appreciate your attendance or your bids. Bids sent to the auctioneers or the paper representatives in our care will be properly treated. Write either of us for catalog.

#### Wed., Feb. 6th, Ed A. Baxter, Pawnee, Ill.

The closing out sale of Pawnee herd of Durocs. This is absolutely a closing out sale of 70 head of as good boars and sows as can be found anywhere. The boars are three herd boars now in use—Buddy K. IV. 20861, a champion hog and a hog renowned as a breeder; Kruger Again 39315, a young hog that will bear inspection anywhere, and Major A. 44567, farrowed March, 1905. They will all be sold unless Major A. is sold before sale, but the other two will positively go through the sale ring. Twenty tried sows, such as Tip Top Notcher's Baby 71202, West No. 5 105806, Choice Goods You Bet 120804, Bianca 62220, Mo. Girl 119296, Red Rover 96692 and others equally as good. Six Buddy K. IV. fall sows, two Proud Advance sows, three Tip Top Notcher sows, one Lafolette, fall yearling bred to Tip Top Notcher, Buddy K. IV., Kruger Again, Hanley and Gold Cloud with about 50 spring gilts, the very best that could be bought in ten or twelve sales last fall, all bred and in fine condition to do any man good. Stop at St. Nicholas hotel, Springfield, Ill., night before sale at my expense.

#### Saturday, February 2d Thomas & Hogsett, Golden, Illinois.

There will be a number of yearlings and two-year-old sows sired by Big I Am, Tip Top Notcher and other noted sires. And there will be a lot of those beautiful Ambition gilts that so many of the breeders have been admiring, several of them bred to Tip Top Notcher and some to Golden Orion. Then we have quite a herd bred to Ambition, and if his breeding does as well next year as it has in the past and his get does as well for other breeders as it has for us, none will buy them too high. We confidently believe that Ambition has sired more prize-winning and high-class stuff than any other pig of his age. Will have 10 or 15 in the sale bred to the old champion, Tip Top Notcher. Come to Golden on the 2d of February and you will be well taken care of till the following sale, February 5th. We will show you some of the best gilts and sows that will go through a sale ring this season.

#### Thursday, February 7th Fred Kraschel & Son, Macon, Ill. 40 Head From the Tops of Our Herd

and the top of five different herds, including Perfection Maid, the dam of the two gilts that sold for \$395, and Buddy T.'s Belle, the dam of the five gilts that sold for \$655. Bred to such noted boars as Gold Cloud, champion at Illinois State Fair and sire of champions; Mayor Jr., first in class in Illinois State Fair, 1905, first at Indiana, 1904; High Notcher, sire of Red Express and other noted hogs, and a son of old Tip Top Notcher 8803a; also a few bred to Gold Standard, a winner in strong competition. Sale will be held in heated pavilion, and everybody will be made comfortable.

Catalogs for each of these noted sales will be sent to all who write, kindly mentioning this paper.

#### IMPORTANT:

Those who cannot attend send bids to Mr. D. M. Pierce, representing this paper, in care of parties holding sales.

#### Friday, February 8th

T. W. Stoner & Son, Henry, Ill. 45 Head Bred Sows.

Yearlings, fall yearlings, gilts and three or four two-year-old sows of fashionable families. Our motto has always been "Individuals as well as Pedigrees." Our hogs when properly fitted have ranked second to none. This will be an opportunity to get bargains. This offering is sired by and bred to such boars as Advancer Col., a litter brother to Proud Lady that sold in Manley & Co.'s sale last winter for \$1,275. Also Stoner's Improver, Ohio Ben and Dandy Joe. The breeding of these boars is too well known to need any comment here. You will see their produce in this sale. Mr. J. W. Remley, of Lacon, Ill., will sell ten head of splendid sows, two or three two-year-old sows sired by None Such. The others are sired by Choice Goods and J. L. C. Choice Goods, one of the best sons of Echo King, J. I. C. is sired by Kan't Be Beat 28067, dam Cedar Vale Queen VIII. 70898, first in class and junior champion at the World's Fair, St. Louis. We will welcome you all. Come to the sale and bring your friends.

Cols. McGowan, Reppert and Keil, Aucts.

Everyone interested in Durocs is invited to be present at each of these sales. You will be well entertained and the offerings are of the high standard which please discriminating buyers.

WRITE AT ONCE FOR CATALOGS.

DES MOINES, IOWA, JANUARY 31, 1907.

WHOLE NO. 2585

### LINE-BREEDING—WHAT IT IS AND ITS VALUE.

A subscriber at Amsterdam, Mo., sends the following communication:

Some time ago you had something to say on the question of line breeding. That is a subject that I would like to know a little more about, and I believe there are other readers in the same position as myself. Of course, I understand that it means the breeding of animals that are some relation, but what puzzles me is to know why it is not called "in-breeding." I desire that this subject be treated in every-day language so that the man who is not an expert on pedigrees will grasp the situation.

Suppose you have ten sows on your farm at the present time and these are all bred to the same male. After they have weaned their litters next summer the high price of pork tempts you to fatten these ten sows and sell them, your plan being to keep out some of the gilts for breeding purposes next year. Now, in order to avoid the expense involved in buying a male, suppose you keep one from one of these litters to use for your 1908 crop of pigs. You see in the first place that all your young sows are either full sisters or half sisters to this young male, and therefore you are in-breeding. If in turn the dams of your 1908 crop of pigs are turned off and their gilts kept and bred to their full or half brother, you are then engaged in the business of "in and in breeding" your hogs, and the chances

are that if this is kept up you will soon be out of the hog business or will have to resort to the purchase of some new foundation stock.

Turning now to the question of line-breeding, we find that there is no such close relationship. Supposing you have a sow that traces back to a noted state fair winner three years ago. If she is a good individual it will naturally be your desire to propagate her characteristics. What is the surest way to do this? To line-breed, of course. In looking for a male to mate with this sow the natural thing would be to find one that traces back to this same noted prizewinner. Of course you may find this pig two, three or four generations back, but if you use one of his descendants you are then engaged in the business of line-breeding your animals. Of course if this noted animal is "close up" to your male and to your females you are then verging on the borders of in-breeding. However, just where one leaves off and the other begins is a little difficult to say.

Both in-breeding and line-breeding have played an important part in the improvement of domestic animals. Indeed, without the employment of these principles in breeding it is doubtful if there could have been anything like the fixity in form that now exists in our best breeds. There will be in-breeding

and line-breeding in the future, and it is well that such should be the case. Nevertheless the practice is not for the use of every man who is engaged in breeding live stock. Those who employ the principle should be expert judges and should breed together related animals only when they come very near to the mark of being perfect in form. If you have a type that just suits you and suits the trade, and you want to hold that type, it will be necessary to put a little study on pedigree so that you can keep to the same line of breeding in the purchase of your males. See to it, however, that the male is of the right stamp, and let no merit in his pedigree blind you to any defect in his makeup. The line-breeding animal is valuable because of its prepotency, but bear in mind that it is just as prepotent for evil as it is for good.

### SHOULD SMALL GRAIN BE DRILLED?

The following inquiry has been received from one of our subscribers, Mr. Wm. Houtz, of Louisa county, Iowa:

I would like to ask you or some of your readers about the practice of drilling spring grain, notably oats. It seems as though on our light land here we are only able to produce from eighteen to thirty bushels per acre, and it has occurred to me that something might be done to increase this yield. How much work should be put on the soil before drilling the seed?

Farmers of the corn-belt as a body

have not yet come to realize the value of the grain drill for sowing small grain. No doubt as land appreciates in value the day will come, and come soon, when there will be absolutely no profit in growing small grain unless it is put in with more care than is the case at present.

The grain drill distributes the seed over the ground more evenly; indeed, absolutely uniformly. If the seed bed has been well prepared it will also cover all the seed the same depth. This means that the crop will start evenly, and unquestionably it will contribute to an increased yield.

As to the amount of labor required on ground before grain should be sown with a drill, much depends upon the character of the soil. In the case of corn stalk ground it is generally advisable to disk the surface at least twice, and so much the better if it can be harrowed once or twice. This brings the surface soil into a fine condition, and such a condition contributes to the rapid growth of the crop immediately after it is sown. Of course where one is in a great hurry some of the drills now on the market will cover the seed fairly well without any preparation of corn stalk land at all, though we do not favor seeding grain in this manner. One will be well paid for his labor if he will take the time to disk the surface once or twice and also harrow it.

The subject of our illustration represents the new and commodious horse barns of Messrs. Champlin Bros., of Clinton, Iowa. This firm have recently located equi-distant between Clinton and Lyons on the electric street car line and have built one of the most commodious and modern importing sale stables in the state. They import direct from across the water, Percheron, Belgian, French Coach and German Coach stallions. The scene in front of the barn represents a life picture of their own imported horses and one that can be witnessed almost any day at this season of the year at this famous business establishment. The Messrs. Champlin Bros. have adopted a new plan of selling horses. The plan is one entirely original with them and which seems to be meeting with general approval among buyers. It will be fully explained to all Homestead readers who write Messrs. Champlin Bros., of Clinton, Iowa, for their new plan. The horses that they bring over are of choice selection made by a member of their firm, and inasmuch as he is a very critical judge, the class of horses imported by them are the sort that Iowa farmers and breeders are looking for. This firm will be pleased to furnish any information to Homestead readers that it is within their power to do, if they will but write them making known their wants.

## THE IOWA STATE FAIR IN 1907.

The distribution of a neat little hangar announcing the Iowa State Fair and Industrial Exposition to be held on the grounds of the state department of agriculture at Des Moines, August 23d to 30th, serves as a reminder that we are already making headway into the new year, and that there are work and opportunity for the Iowa farmer and stockman in the near future. The card is a clever little advertisement for both the fair itself and the great state of which it is a valuable institution; for it presents a summary of Iowa's field crops for 1906, footing up the handsome aggregate of \$330,495,421, which we are invited to keep before us, with the dates of the fair.

To those who attended the last Iowa State Fair and enjoyed the inspiration it imparted to every participant, no reminder will be necessary to recall its splendid exhibits of live stock, machinery, agricultural, horticultural, dairy, domestic and other products, and the great, happy, orderly throngs of well-dressed men, women and children who enjoyed the exposition.

But, although the last exposition broke all records as to attendance and exhibits, the present able management of the fair, of which Mr. C. E. Cameron, of Alta, is president, and Mr. John C. Simpson, of Des Moines, secretary, is looking sharply for new worlds to conquer. At the recent annual meeting, about \$5,000 was added to the premium offers and several decidedly progressive steps taken. One of these, adopted on the recommendation of Prof. C. F. Curtiss, was the introduction of a new class in horses—the American carriage horse, which the United States Department of Agriculture has undertaken to originate—the proposed improved type of the American standard trotting horse developed along the lines of utility as a carriage horse. It is understood that Professor Curtiss is working on a standard of the qualifications for this class, which will be duly announced. The fair management believe that they are entitled to the credit of being the first fair to enter this new and inviting field.

The fair authorities have a considerable surplus on hands available for permanent improvements. A water system costing \$12,000 will be installed and connected with the city water works, insuring additional immunity from fire. Lighting facilities are in contemplation, which will put the fair on the same plane as other great expositions as to illuminations and night sessions. The legislature will be asked to appropriate money for a horse barn and amphitheater, both of which are urgently needed if Iowa's fair is to be on the same level in these respects as those of other states which have acted on these liberal lines.

The Homestead congratulates President Cameron, Secretary Simpson and the board of directors on the splendid start they have made and trusts that their highest hopes for the fair of 1907 will be more than realized.

## A BULLETIN ON HIGH-CLASS FARMING.

The department of agriculture at Washington has recently published Farmers' Bulletin No. 272, this being a detailed description of the affairs on the farm of Mr. W. H. Rowe, of central Illinois. The farm in question contains 131 acres and there is marketed from this farm each year an average of 120 fat hogs and something like 450 bushels of seed corn. At six cents a pound the income from the hogs last year was \$2,426 and from the 450 bushels of seed corn \$819, making a total of \$3,245.

Fifteen sows are kept on this farm. They have raised in the past an average of eight pigs to the litter. They have access to a clover pasture and, in addition, are fed a little grain daily. By the end of summer the pigs weigh from 100 to 125 pounds each; and at that time they are consuming about two pounds of grain daily. In the winter these hogs are given about five pounds of grain daily, composed of three and a half pounds of corn, three-quarters of a pound of shorts and three-quarters of a pound of oil meal. In addition, they are fed soy bean hay during the winter. At one year of age these pigs weigh from 200 to 225 pounds.

In the spring the hogs are again turned onto clover pasture and are started in on about two and a half pounds of grain daily each. This amount is gradually increased until August 1st, when they are marketed, at which time about four pounds of grain is being fed to each

hog daily. At marketing time, the hogs being then about sixteen months old, weigh from 325 to 350 pounds.

It is claimed that by this method of feeding a large proportion of the grain is made from clover, which, of course, is cheaper than grain.

In publishing the bulletin containing Mr. Rowe's methods it is the intention of the department of agriculture to spread before farmers a knowledge of the method employed by men who are making a success of their business. It is this, rather than to hold up the example of any individual as being ideal.

There are a good many farmers in the corn belt who are getting more profit out of their hogs than Mr. Rowe, because the average man wants more than 325 to 350 pounds if he keeps a hog until he is sixteen months old.

We can scarcely understand, even with the amount of grain that is fed in this instance, why these hogs are not heavier at twelve months, because, as stated above, they received five pounds of grain daily each during the winter and that is nearly enough to finish out a hog at twelve months and make him weigh at least 300 pounds. We do not infer that it is never practicable to keep a hog until this age, because a steer feeder can invariably make more economical pork by doing this very thing than by making an attempt to finish his hogs early.

There is another objection to carrying hogs to this weight and to the plan of marketing them in August, namely, that you put a heavy fat hog on the market at a time when the light hog is at a premium. By feeding a little heavier in the winter and bringing them to this weight at ten, eleven or twelve months, one will then strike the right kind of a heavy-hog market. Furthermore, when you finish hogs in August at this weight you compete with the old sows that have raised litters and have been on corn and sent to market. The average man who makes pork-raising a business aims to miss that market with his younger stuff.

This matter as to the age that hogs should be marketed is an important question, and while the method adopted by one man might not be practical in another case, yet in a general way men on high-priced land should in the future go in the direction of marketing hogs earlier rather than later than they have in the past. Unless he is following cattle, the average hog has no business to live longer than twelve months.

## GOOD LOOKS IN CORN.

We like good-looking corn; we like it a little better than corn that is just as good, but does not look so well. All those who believe that the score card has done some good in educating farmers to select their corn generally like the good-looking corn. On the other hand, you will find men who have looked with suspicion on the score card, denouncing "beauty" marks in an ear of corn.

Now, what is the real value of the so-called fancy points in an ear of corn? In the first place, if an ear is cylindrical—that is, if it carries its width well from the butt to the tip—this, in itself, is one item that contributes to beauty. Such an ear will produce a larger percentage of kernels that are uniform in length than one that is tapering. Here we have a beauty point that is a utility point. Then, take the matter of straightness of rows. Possibly no one thing contributes so much to the beauty of an ear of corn as this. Now, straight rows mean that kernels are uniform—that is, they are uniform in thickness and in width—otherwise the row will not be straight. Seed that is uniform will surely plant more evenly than seed that lacks uniformity. This would appear that another beauty point is after all a utility point.

Most men like corn in which the rows are somewhat close together. This seems to add to its beauty, and it also means that when such corn is shelled it will produce a larger percentage of grain to the ear. When it comes to color, surely a uniform color is preferable to a mixture, and no man will deny that an ear of pure yellow corn is more beautiful than one of mixed yellow and white.

In good tip and butt covering there is certainly something that appeals to the eye, and yet if the length is kept up, covering here means just a little more corn.

If in aiming to produce "beautiful" ears men fail to keep up yielding ability, as well as quality in the grain, our

colleges and stations would be doing an immense amount of harm in propagating the theories that are now being spread broadcast by these institutions.

We find, however, that a good-looking corn is generally a corn that yields. This is because it has been selected to conform to a certain standard and that the field of pure corn tends to a marked degree of uniformity. This above all else contributes to yield. On the other hand, you take a large, homely corn and as a rule you will find in it a decided variation in the size of ears. This is simply because there has been no fixation in the matter of type. Selection of seed having been made on the basis of size alone.

Now, we advise no man to be led away from methods that have proved to be profitable as applied by him. If he has his ideal type of corn in mind and has been endeavoring to fix that type for years and finds that his dreams are coming true, let no college or station veer him from his path.

## NEBRASKA BREEDERS ORGANIZE.

Although there are a hundred or more breeders of Angus cattle in the state of Nebraska, there has never been any state organization affecting this noted breed of beef cattle.

In response to a request from Mr. A. B. Christian, of the firm of Christian & Lang, breeders of Aberdeen Angus cattle at York, Neb., most of the Angus breeders of the state assembled at Lincoln during the week of the organized agricultural meetings, and in a body effected a state organization.

The meeting was first addressed by Mr. Christian, who called attention to the need of such an organization as this, stating that as the breed is right at the front now, it needed organized effort to keep it there. He dwelt on the adaptability of the Angus cattle to conditions in Nebraska, and expressed great faith in the future growth and development of this breed. The officers elected were A. B. Christian, of York, president; M. M. Stearns, of Humboldt, vice-president; D. N. Syfor, Lincoln, secretary-treasurer.

The officers were requested to get up by-laws and the constitution for adoption at the next annual meeting. It was decided to hold a meeting at the agricultural college, Lincoln, during the week of the organized agricultural meetings next winter.

## The Cement Tank.

To the Editor of The Homestead:

The first thing is to have good material. It will require one yard of gravel and sand, about three-fourths gravel and one-fourth sand. If very coarse gravel is used there must be more sand. The next thing is to dig the hole, which must be on level ground or nearly so. Dig the hole nine feet ten inches long at the top and four feet ten inches long at the bottom, one end to slant back four feet to the bottom, the other end one foot. The hole must be thirty inches wide at the top, twenty-two inches wide at the bottom and four feet five inches deep. The walls will be five inches thick when finished. The outlet end for stock will be on a slant of 45 degrees.

The next thing is to make a form. Make the sides of the form nine feet long on top and four feet long on the bottom, one end to slant back four feet, the other one foot. Fasten the boards together with a cleat at each end. Nail them together with small nails, just enough to hold them together, or you will have trouble when you go to take them out. Space these sides twenty inches apart from outside to outside at the top and twelve inches from outside to outside at the bottom. Now cut the ends to fit the slant of the sides. Keep the ends even and round the corners off smooth. Nail the ends to the corner cleat, not to the side boards. Put cross pieces in the middle to keep the side from springing in when the concrete is put in. You now have a false tank. Set this in the hole space, even from all sides. You are now ready for the concrete. Make this by mixing the gravel and sand together. Use one-fourth cement and three-fourths gravel and sand. Make the mortar thin enough to run. Pour this in around the form. Keep it tamped down even until the hole is full. Trowel the top down smooth. Your walls will be five inches thick. Let this set for twenty-four hours; then remove the form by taking the corner strips out first, then the sides by lifting the end with the most slant first. Then fill the bottom five inches deep and

## TWO-Row "Doublet" Good Points

Good for not only the "Big Farmer" but equally so for the "Smaller Farmer" who finds help scarce. The principle is beyond question a complete success. Our kind in particular has two exclusive features—Straight Forward Push Guide; Fell View of Both Rows, besides being fully equipped in other good points. Ask for complete Catalogue of Wagons, Farm and Threshing Machinery.

AVERY MFG. CO., 169 Iowa St., Peoria, Ill.

smooth off. Make steps for the stock by putting on rows of cement about ten inches apart or cut pieces two by four to fit in. (I like the wood best.) If there are any rough places in the walls, smooth them up with sand and cement. Do not let this dry out too fast. It will be ready for use in about two weeks. This size is large enough for hogs, sheep and calves. The one I have on my farm I made with a dripping pan for the stock to stand in and the water to run off back in the tank.

To make this, dig ten inches deep, the width of the tank and five feet long at the slanting end of the tank; put in a four-inch bottom. You will have a six-inch side. If this is made it must be made at the same time that the tank is made. (This is an improvement which I like very much.)

It will require about seventy-five feet of lumber for the form, and from six to 800 pounds of cement. Two hundred gallons of water will be enough for ordinary use.

Polk county, Iowa.

## Types and Breeds of Farm Animals.

The above is the title of a 560-page book that has recently come from the press and written by Prof. C. S. Plumb, of the Ohio State University. This deals with all breeds of live stock and describes the commonly-accepted types of the draft and speed horse, dairy cattle, bacon and fat hogs, and, indeed, all other classes of live stock. It goes into the region of the various breeds and deals with their American as well as European history. The work of pioneer breeders is given considerable attention and there are given descriptions of many famous animals. Records, for example, are brought up to date of speed horses, butter as well as milk yield in cows, etc. There is scarcely a page of this book without an illustration, and everyone of these is taken from the natural photograph.

Professor Plumb has placed live stock interests of this country under obligations to him in the preparation of this comprehensive work. Its mailing price, \$2.20, may at first seem a little high and yet when one considers the heavy expenses in getting out an illustrated book of this kind, the price, after all, is entirely reasonable. This paper will handle this work for the benefit of its readers, and it will be sent upon receipt of the above price.

## Opening a Factory in Canada.

The Standard Paint Company, manufacturers of Ruberoid roofing, have opened a factory for the manufacture of their product in Canada. The inauguration of the new enterprise was made the occasion of a dinner at the Canada Club in Montreal, to which friends of this great concern from all parts of both countries were invited. This firm has headquarters at 100 William street, New York City, and branch offices in many large cities throughout the United States and abroad.

## HOMESEEKERS' EXCURSIONS.

On the first and third Tuesdays of each month, the Iowa Central Railway will sell round trip excursion tickets to points in the North, Northwest, South, Southwest and Southeast. The rate is only one fare plus \$2 and less, with liberal stop-over privileges. Tickets sold to points in the following states: Minnesota, South Dakota, North Dakota, Arizona, Arkansas, Colorado, Idaho, Indian Territory, Iowa, Kansas, Louisiana, Mexico, Missouri, Nebraska, Montana, New Mexico, Oklahoma, Texas, Utah, Wisconsin, northern Michigan, Wyoming, etc. For rates and full particulars call on agents or address A. B. Cutts, G. R. T. A., Minneapolis, Minn.

## Farm Furrows

Turned by a Practical Farmer.

Boys will be boys, and lots of girls would like to be.

"Worth makes the man and want of it the fellow" is sound doctrine.

The gladdest words of tongue or pens just now are these, "I own some hens."

Nothing is quite so grinding on one's nerves as to have the windmill run dry some cold night.

Because our fathers always used a one-legged stool to milk with is by no means proof that we should.

I was at a public sale many years ago and gave forty cents for eight chairs and have lots of stools left today.

Nothing suits me better as a milk stool than a common kitchen chair with the legs cut off to the desired height. Try this.

I am not a believer in a very large orchard on the farm. Last year we couldn't get our cherries picked and couldn't even give them away.

When I was a boy long boots were all the fashion. I have worn a hole in more than one plank kicking on an old pair of hard boots. The modern kind are much better.

If you have never graded your corn before, do it this year and you will be surprised what good results will follow. No planter can handle irregularly shaped kernels.

It always puzzles me a little to know just how rough to be with male animals. If you are cross with them they are apt to get grouchy, too. Generally speaking, I think it pays to be firm, but not cruel.

A close reader of the Furrows asks those who have used the self-feeder for feeding grain to hogs to give their results through this paper. This is an important topic and your ideas on this question are solicited.

I have a kind of a secret feeling that the corn belt will raise another bumper crop this year. If every man will use good seed and cultivate well it will bring this to pass even though climatic conditions are not perfect.

You can inculcate no more silly idea into the heads of your children than to give them the notion that because you are quite a good deal above the daily-bread line that they are better than the children of a poorer neighbor.

I don't believe there are many farmers in the corn belt who can afford to be without ice during the warm weather. For a long time I didn't think I could afford to build a house and put in a supply, but my views have changed on the subject.

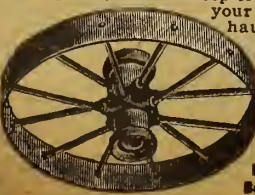

It has always seemed peculiar to us why more farmers do not have a writing desk or secretary where all their correspondence and business papers can be kept. When one has to hunt half an hour for paper and ink to answer a letter he is not in a frame of mind to make a good impression on his correspondent.

## SOMETHING ABOUT WAGONS

YOU NEVER KNEW BEFORE

How the Farmer's Handy Wagon saves horse-flesh and man labor; how Empire Steel Wheels make an old wagon worth a new price; how to keep from cutting up your roads; how to haul a winter load on spring ground; how to save repair bills and other bills.

It's all in the Wagon Book we send free. EMPIRE MFG. CO. Box 793 - Quincy, Ill.

# Get Your Money's Worth

Send us your order for

## Standard Stock Food

Under Our Square Deal Guaranty

You take no risk. We guarantee absolutely that if you use Standard Stock Food as directed and it does not do all we say, you being the judge, it shall cost you nothing. A dollar's worth of Standard Stock Food contains more feeds, will go farther, last longer, and produce more and better results than a dollar's worth of any other stock food made whether it costs 5 cents or 15 cents a pound.

You can test it right on your own farm—with your own stock. You can try it out thoroughly and see for yourself just what it will do. There is no question about

## Standard Stock Food

paying you, and paying you big, too. We have been making and testing it over twenty years. We have over 400,000 customers who have proved that it is the best condiment- tonic to mix with the feed that can be had at any price.

Standard Stock Food makes the feed taste better. It sharpens the appetite and stimulates the flow of all the digestive fluids so that the process of digestion is increased. Its tonic properties quicken the blood circulation and aid in assimilating more of the nutriment in the feed. It tones the entire digestive system and produces health, condition and thrift, which means more production, better animals, bigger profits.

### WE PREPAY THE FREIGHT

We will furnish you Standard Stock Food through our dealer, if we have one in your town; or ship it to you direct, freight prepaid.

And if you don't find it all we say after a fair trial, you to be the judge, it shall not cost you anything.

Can you ask a fairer offer? Remember, this paper stands behind our guaranty to you.

### SEND FOR OUR DIRECT OFFER.

Our Big 50c Stock Book, "The Standard Feeder," Free to You.

Our plan is to have an exclusive dealer in every town. If we have none in yours, write us now, tell us how much stock you keep; give us the name of your dealer, and we will send you our book, The Standard Feeder, 160 Pages, 200 illustrations, full of good live stock information, Absolutely Free, and show you how little it will cost and what good results you can get by using Standard Stock Food on your own stock. See our dealer or write us.

A delay of half an hour may miss the mailman and in consequence lose some valuable business.

Some men look for work with about the same enthusiasm that they would look for a needle in a hay stack.

They say it is only three generations from shirt sleeves to shirt sleeves. In other words, a man whose parents were poor becomes wealthy but his sons in turn will have to work with the coat off. I feel sorry for no man who has to work and work practically every day.

I would like to take the boys aside and give them this advice: When you lead a horse out to water never, under any circumstances, no matter how old the horse may be, tie the strap or rope to your waist. I have seen boys do that while they were pumping the water,

and I have read of a great many that were dragged to death.

The late appalling disasters to large cities should make farmers more than ever thankful that their lot has been cast outside of the great centers of population.

"The rich is fairly burnin' money," said Mike as a chug wagon flew past. "And by the smell of it," sniffed his companion, "it must be that tainted money we do be hearin' so much about."

Fashions change much faster now than when I was a boy. Nowadays when the women folks get a dress nicely broken in it must be discarded for something new. I remember well when the oldest girl in the family put on a homespun dress and wore it until she outgrew it, the second girl did likewise, and so

on down the line. Of course clothes don't wear now like they did in those days.

One of the most delightful relationships in life is that of brother and sister. Where each keeps the other constantly in the highest regard—bearing the relationship of "chums," heaven itself can have nothing better to offer.

Speaking of boots reminds me that the hand-made kind are nearly a thing of the past. An old shoemaker told me recently that you could buy a better pair for \$5 than could be made by hand for \$10. I used to feel sorry for the boy who had to wear store shoes while mine were hand-made.

I recently talked with a man who used to farm high-priced land in France. He says we don't know how to cultivate soil here. This year on a strip of land one rod wide and eight rods long he raised \$25 worth of produce. This is at the rate of \$500 an acre, which is going some.

### Bergsten Duroc Sale.

The Duroc Jersey sale of Mr. A. L. Bergsten, at Mt. Union, Iowa, January 15th, resulted in an average of \$35.70 on the twenty-five head sold. The top price was \$135, this being paid for No. 7 of the catalog, Choice Rose, by Mr. H. E. Browning, of Hersman, Ill. Following is a list of all animals sold:

Lot.	Price.
1. J. R. Ford, Mt. Pleasant, Iowa...	\$41.00
2. John McCosh, Emporia, Kan....	38.00
3. Frank Kean, Mt. Pleasant, Iowa...	51.00
4. E. Greer, Mt. Pleasant, Iowa....	27.00
5. Hanks & Bishop, New London, Ia.	40.00
6. Joe Beech, Nevada, Iowa.....	36.00
7. H. E. Browning, Hersman, Ill....	135.00
8. W. F. Bowser, Morning Sun, Iowa	22.50
9. Joe Beech .....	26.00
10. W. F. Bowser .....	23.00
11. W. H. Copeland, Fairfield, Iowa...	21.00
12. Frank Warway, Mt. Pleasant, Ia.	31.00
13. Alvin C. Hasty, Kalona, Iowa....	50.00
14. Jno. Schowalter, Wayland, Iowa...	36.00
15. ....	47.50
16. E. P. Greer .....	36.00
17. J. D. Dohrman, Mt. Union, Iowa...	40.00
18. Joe Beech .....	30.00
19. J. C. Jay, Mt. Pleasant, Iowa....	22.50
20. Frank Warway .....	24.00
21. W. F. Bowser .....	22.00
22. B. Welch, Crawfordville, Iowa....	22.00
23. H. W. Dorn, Roscoe, Iowa.....	20.00
24. Joe Beech .....	27.00
25. W. F. Bowser .....	19.00

Top Notcher Again was champion at Indiana and Illinois State Fairs, 1903. He is also sire of Top Notcher Chief Jr., champion at St. Louis World's Fair. He and his get won nine prizes at St. Louis. He is a half-brother to grand champion Tip Top Notcher. He weighed 915 pounds when shipped for St. Louis. Eighteen daughters of this old warrior go in Mr. H. S. Allen's sale at Chariton, Iowa, February 7th. They are safe to Crimson Wonder Again, champion of 1906.

# THE HOMESTEAD

A Practical Journal for the Farmer,  
Stockman, Fruit Grower, Poultryman,  
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance, \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,  
Des Moines, Iowa.

## INTERSTATE BREEDERS' ASSOCIATION MEETING.

The annual meeting of the Interstate Breeders' Association and the Iowa Swine Breeders' Association will be held in the sale pavilion at the stock yards, Sioux City, Iowa, February 5th, 6th and 7th. On those dates the following program will be carried out:

Tuesday, February 5th. Morning Session, 11 o'clock a. m.—Opening address, James Walpole, president Interstate Breeders' Association, Rock Valley, Iowa. Afternoon Session, 1:30 o'clock p. m.—"Cattle Feeding in the Corn Belt," Prof. H. R. Smith, chair of animal industry, University of Nebraska; "Judging Cattle and Horses," Prof. Andrew Boss, chair of animal industry, University of Minnesota. Evening Session, 7:30 o'clock p. m.—"Draft Horses," Hon. H. G. McMillan, Lakewood Farm, Rock Rapids, Iowa; "Farm Management," Prof. John Thompson, editor Farmers' Tribune, Sioux City, Iowa.

Wednesday, February 6th. Morning Session, 9 o'clock a. m.—Opening address, Wm. D. McTavish, president National Association of Expert Swine Judges, Coggon, Iowa; "Breeding and Feeding Swine and Building Up Trade From a Breeder's Standpoint," A. J. Lovejoy, Roscoe, Ill.; "The Value of Pure-Bred Swine for the Average Farmer," P. W. Peterson, Vermillion, S. D.; demonstration of representative types of market swine to be followed by carcass illustrations of methods of cutting hogs for domestic and export trade, by J. J. Ferguson, Swift & Co., Chicago, Ill. Afternoon Session, 1:30 o'clock p. m.—"Opportunities for Increasing Returns from Swine on the Average Farm," L. H. Roberts, Paton, Iowa; "The Bacon Hog Industry in the Northwest," Harry G. Krum, secretary American Yorkshire Club, White Bear Lake, Minn.; demonstration of hog carcasses, J. J. Ferguson, Swift & Co., Chicago, Ill.; "The Danger from Pads and Fancies in Breeding Pure-Bred Swine," B. R. Vale, Bonaparte, Iowa. Banquet, 8:30 p. m.

Thursday, February 7th. Morning Session, 9 o'clock a. m.—Swine scoring exercises under direction of the National Association of Expert Swine Judges; carcass demonstration of tuberculosis and hog cholera. Dr. G. A. Johnson, chief of the bureau of animal industry, Sioux City, Iowa. Afternoon Session, 1:30 o'clock p. m.—Business meeting Interstate Breeders' Association.

The railroads have granted a rate of a fare and a third for the round trip on the certificate plan, based on an attendance of 100, from points in South Dakota and east of the Missouri river, where the one-fare rate is more than fifty cents, also from points in Iowa, Nebraska, and Minnesota, where the one-fare rate is more than fifty cents and not more than \$4.50. Each person, therefore, who contemplates attending these meetings, should secure a certificate at the time of purchasing ticket.

## THE CHICKEN-EATING SOW.

One of our subscribers living at Dixon, Ill., sends the following communication:

I would like if you would tell me what to do for hogs that get started eating chickens. I have one brood sow that I will have to sell for pork, because I do not seem to be able to cure her of this practice. However, she is not worth for pork more than half what she would be worth as a brood sow, so it is a loss to me.

When hogs once become addicted to this vice there is small chance of breaking them of the habit. Chicken meat makes rather luscious eating and

when once it is tasted the old sow will break down a stone wall for a meal of this kind of fresh meat.

We do not say that it is always caused by improper feeding, but we know of instances where the habit has been contracted by hogs being improperly fed. A case comes to mind where six sows owned by one farmer all acquired this habit, and upon inquiry we found that these sows were fed nothing but corn and water during the winter. Several of them lost their pigs in the spring, and those that did not lose them ate them up afterwards. They were more like crazy hogs than anything else, and we think that the trouble was entirely due to the fact that they were not supplied with the right kind of material when they were in pig.

We have found nothing better for sows when they show any indication of having a depraved appetite than a little tankage fed daily with their grain. This, as most of our readers are aware, is a by-product of the packing houses and it is composed largely of lean meat. Oil meal is also good, and while these products may appear high in price as compared with corn, yet when they are considered from the standpoint of their flesh-forming content they are much cheaper than corn.

Rather than sell a good-brow sow on account of the chicken-eating habit we wouldn't hesitate to try to put her on about all the tankage she will eat for a time. When her system catches up with the demand made on it the unnatural appetite will disappear and the probabilities are that this will cure the habit.

## DIFFERENCE BETWEEN EARS OF CORN THAT LOOK ALIKE.

Although the agitation of the seed corn question that has taken place during the last few years has accomplished much, we are yet in the alphabet of the business. It has been proclaimed from the housetop that the yield can be increased by selecting from year to year ears of good size, having a certain shape and with kernels of a particular character. This doctrine has unquestionably been sound because men in every county in the corn belt can be found, who have increased their yield all the way from 10 to 25 per cent by putting more skill into the selection of their seed.

There is of course a much quicker way to increase the yielding ability of a variety of corn than that of selecting the finest looking ears, and the result of an experiment carried on at the Ohio Station will make this clear. At that station twenty-four extra good ears of a certain variety were chosen. The seed from each of these ears was planted in a row by itself, five kernels being used per hill. It was afterwards thinned down to three stalks, thus giving each ear the same opportunity as its neighbor.

Now, what were the results? The seed from one ear out of the twenty-four produced a crop that yielded 114 bushels per acre, the next highest yielding ear produced 112 bushels and the third 104 bushels.

Turning now to the three lowest yielding ears, we find these to have produced fifty-five, sixty-five and seventy-seven bushels per acre, respectively. The lowest yielding row produced fifty-eight barren or worthless stalks, while the highest yielding row produced no useless stalks. On the second highest yielding row there were fifteen barren stalks, while on the sixty-five-bushel row there were fifty-two barren stalks.

Here was a case where the three highest yielding ears out of the twenty-four gave an average yield of 110 bushels per acre, while the three lowest yielding rows averaged sixty-six bushels per acre. It should be borne in mind that the germinating qualities of these ears were exactly the same, the difference being due to the fact that some ears were prepotent; that is, they had marked ability to reproduce themselves, while in the other cases prepotency in the right sense was entirely lacking.

From these results it would appear that much more can be done by way of increasing the yielding ability of corn if the individual row system is used than can possibly be accomplished by selecting even good-looking corn promiscuously. After all, it is not so surprising that good-looking ears should vary so much in their productive ability as was the case in this instance. The same

## THE OLD RELIABLE

..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills.

TWO HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs. I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.

Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

# PIPE At Less Than Half Price

We offer one million feet of pipe all sizes, also lumber, roofing, farm machinery, boilers, etc., at less than half the original cost. We guarantee everything we sell and refund your money if you are not thoroughly satisfied. References: Merchants-Laclede National Bank, or any commercial agency. Write today for complete catalog and prices.

ST. LOUIS WRECKING & SUPPLY CO. 3867 Manchester Avenue, St. Louis.

holds true in animals. It is not enough in these days to have correct individuality in a pure-bred animal, as the blood lines that have produced the animal play an important part in making it desirably prepotent. Just how much line-breeding must be used in the case of animals to fix a type is not definitely known, and in the case of corn it is not known at all.

We simply call the attention of our readers to these striking results obtained at the Ohio Station in order that those of our readers who have been improving their corn shall be impressed by the fact that much quicker results can be attained in the way of increasing the yield if the row system is employed. A very small acreage will answer this purpose.

## FEED RACKS FOR GOATS.

One of our subscribers in Nemaha county, Kan., desires to be informed of a feed rack for goats which will allow them to get out the hay and still prevent them from climbing into the rack and tramping down the contents. He finds it necessary to feed some forage during the winter when brush and aftermath are not available. He finds that the natural instincts of the goat for climbing cause him more or less trouble in the feed yards.

We think that the illustration herewith given of a rack should be a very

good idea to solve our inquirer's problem. As may be seen, this rack is easily made and can be attached to any fence or shed. The rope which is attached to the middle of the upper piece of the rack passes through a hole in the shed and over a pulley. A weight is attached to the rope inside of the shed which serves to keep the rack closely pressed against the hay. When there is little hay in the rack it naturally lies up close to the shed.

## Weighton's Sale.

The Duroc Jersey brood sow sale of Mr. John Weighton, at Audubon, Iowa, on January 22d, brought out one of the largest crowds of breeders and farmers so far this year. The temper of the people present showed that there would be a good sale, and so it was. The forty head cataloged averaged \$60.19, the highest-priced gilt being Claremont's Empress. She went to Mr. Pete Alsln, of Boone, Iowa, at \$315. Mr. Weighton certainly deserved a good sale and everybody took a hand in making it a success. Col. Luther cried the sale and was ably assisted by Alva Mansfield. Below is a list of prices paid:

Laura, Aug. Metzler, Audubon, Iowa..	\$ 41.00

## DOCTOR CURED OF ECZEMA.

Maryland Physician Cures Himself—Dr. Fisher Says: "Cuticura Remedies Possess True Merit."

"My face was afflicted with eczema in the year 1897. I used the Cuticura Remedies, and was entirely cured. I am a practicing physician, and very often prescribe Cuticura Resolvent and Cuticura Soap in cases of eczema, and they have cured where other formulas have failed. I am not in the habit of endorsing patent medicines, but when I find remedies possessing true merit, such as the Cuticura Remedies do, I am broad-minded enough to proclaim their virtues to the world. I have been practicing medicine for sixteen years, and must say I find your Remedies A No. 1. You are at liberty to publish this letter. G. M. Fisher, M. D., Big Pool, Md., May 24, 1905."

The House that Jack Built argument is applied in a rather forcible way in this issue in defining what troubles and repairs actually mean, in the Litchfield serial on page 5. Read it.

## HORSE OWNERS! USE

## CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, best BLISTER ever used. Removes all bunches from horses. Impossible to produce scar or blemish. Send for circular. Special advice free.

THE LAWRENCE-WILLIAMS CO., Cleveland, Ohio.

## 5 to 18 More Bushels of Corn to Every Acre

Sorts Seed Corn so Planter Drops Same Number EVERY TIME

When you set your corn planter to drop three kernels you want it to drop three, not two, four, five or any other number but three every time.

Why?

Because you know that the amount of ground that you allow for each hill will nourish that number of kernels and give the best possible results.

A uniform stand can only be secured by having good seed, hills the right distance apart and the right number of kernels in every hill every time.

If some of the hills have too many kernels the result is too many stalks for the ground to properly nourish; therefore stunted stalks and stunted corn. If there are too few kernels in some of the hills the stalks will bear good ears but you lose the yield of the missing stalks.

And all because your planter does not drop the same number of kernels in every hill. Don't blame the planter.

Planter plates are made to fit kernels of uniform size and if they are, any good planter will drop the number it is set for every time.

Seems a little thing doesn't it, but it means from five to eighteen more bushels of corn to every acre.

Worth considering, isn't it?

### THE MORECORN SORTER

Sorts seed corn for length, width and thickness. One thirty-second of an inch makes a difference to this wonderful machine.

If your planter is set to drop three kernels it will drop three, 100 times out of every 100. If the Morecorn Sorter will increase your corn yield only five bushels per acre, isn't it worthy of your investigation?

Your increase in yield will pay for the sorter twice over, the first year. Many farmers make considerable extra money by sorting their neighbors' corn.

But—send for the literature today.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

### LAW QUESTIONS CONSIDERED.

#### MOTHER HEIR OF SON.

A Subscriber, Ruthven, Iowa.—An unmarried man died in Iowa, leaving property there. His father is dead. His mother, brothers and sisters are living. Who are his legal heirs and how must his property be divided?

Answer.—His mother is his legal heir and is entitled to all his property.

#### WOVEN WIRE FENCE—SALE.

A Subscriber, Clarence, Iowa.—A and B own adjoining farms with a partition fence between. A put woven wire on B's part of the fence. A sold his farm to C, agreeing to give possession on March 1, 1907. Has A the right to remove the woven wire, or does it belong to C?

Answer.—As between A and C the woven wire is a fixture attached to the place and goes with it in the sale, if nothing was agreed to the contrary. A has no right to remove it.

#### STOCK AT LARGE.

A Subscriber, Armstrong, Iowa.—My farm is all fenced and I keep my stock on my own land. My neighbor across the road has no fence and he turns his stock on the public road. (1) Can I compel him to keep his stock off the road? (2) Is live stock allowed to run on the road in Iowa, without a keeper?

Answer.—(1) You can compel your neighbor to keep off the road his swine, sheep, goats, stallions, jacks, bulls, boars and bucks, but not other stock. (2) Stock other than that named in the preceding answer is not prohibited by law from running at large on the road in Iowa unless in a county where the herd law is in force.

#### DESCENT IN COLORADO.

A Subscriber, Monroe, Iowa.—A widow having no children died without a will, leaving valuable real estate in Colorado. Both of her parents are dead. Her surviving relatives are several brothers and sisters, one half brother and one half sister, the children of one sister, and the children of two half brothers. How will the property be divided by law?

Answer.—The property will be divided according to the laws of Colorado, where it is situated. In that state half brother and half sister will get share with full brothers and sisters—hence the several brothers and sisters and the half brother and half sister, will get share and share alike. The children of the deceased sister will together get the share she would get if living, and the children of each half brother will together get the share their father would get if living.

#### CONSTRUCTION OF CONTRACT.

A Subscriber, Kinsman, Ill.—I rented eighty acres of land, for which I was to pay one-half of the corn and oat crops raised on the place, and \$5 per acre for hay and pasture land to be measured. There is a narrow strip of pasture land with a large creek running through it. I have been told that I was not required to pay for the ground which the creek covers. What is the law on the subject?

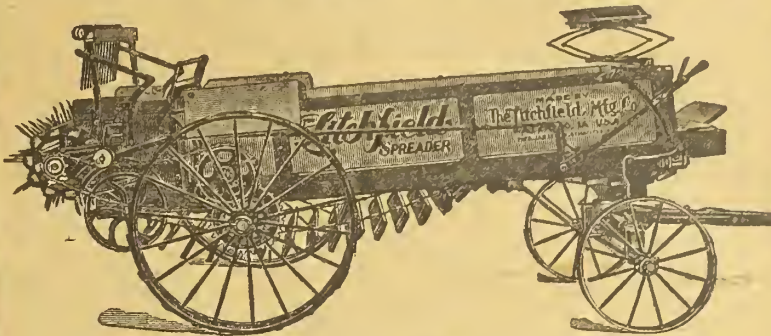

Answer.—There is no law specifying just such a case, but in case of trouble between you and your landlord in court, your rights would be adjusted by a legal interpretation of your contract. We are inclined to the opinion that a court would decide that the measurement of the pasture and hay land would include the creek, and that you could not have a reduction of rent for the ground covered by it.

#### RAILROAD STORAGE CHARGES.

Mr. J. L. W. Bazine, Kan.—A notice from the railroad agent informing me that certain goods had arrived for me at the railroad station was put in the postoffice late on Saturday evening. I got the notice on Sunday morning, and I went after the goods on Monday. I then found that the railroad company had charged storage on the goods. (1) Had it any right to do so? (2) Can the company collect storage? (3) What length of time must the company keep goods after arrival before the law allows it to charge storage?

Answer.—(1) Section 6484 of the statutes (1905) provides that railroad companies must, within twenty-four hours after arrival of shipments, give notice by mail to the consignee, and that a railroad company may collect storage charges on less than carload shipments of five cents per one hundred pounds for each day after forty-eight hours after giving such notice of arrival. The company in your case had no right to charge storage. (2) The company cannot collect storage in your case by law, but it

## TROUBLE AND REPAIRS

## ARE TWIN BROTHERS

**TROUBLE** and repairs go hand in hand. They were born and brought up under the same conditions. They pull at your patience and drag at your pocket-book. They affect your good judgment and they take the pleasure out of your existence. In fact, when you consider the purchase of any Manure Spreader, just make an inventory of the number and size of its parts and pieces and what they are made of. Here is the whole repair secret.

The Litchfield Spreader stands out in bold relief when compared with the average machine. The developing work that has been put on this modern spreader, to cut out parts, therefore repairs and therefore trouble, will be appreciated by our trade and is sure to add many days to the pleasure and prosperity of every man who owns one. The more pieces in a spreader the more complications, and, of course, the more complications, the more repairs, and as repairs mean trouble, about the only way to minimize trouble is to cut out every possible piece you can and still retain working efficiency.

The Litchfield Spreader originated the single lever to take the place of from three to half a dozen as used on other machines. This spreader also originated and is the only machine using the self-cleaning or automatic hinged conveyor, making it possible to use it endless and in its simplest form, securing at the same time most perfect results and avoiding the "automatic machinery" found on all return Aprons.

Wheel troubles have been eliminated (and when we say eliminated we mean cut out entirely) by the introduction of a shell constructed steel wheel, giving more than 200 per cent greater efficiency based on its weight, than has ever been offered in any other steel wheel made. It can be said to the credit of this steel wheel that out of thousands of them now in actual service, not one wheel (note this, not a single one) has ever needed repairs or given out in any way. How is this for a record of five years? Just consider what it means.

This same theory of simplifying has been systematically carried out through the entire machine. The Litchfield Spreader is not held up as an example to condemn other spreaders, because the "old timers" were all right in their day and are entitled to much credit but we simply want to emphasize the fact that this modern machine is putting the spreader business on a higher plane.

**THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA**

might refuse to deliver the goods till storage was paid and this would make a lawsuit necessary, which, in the end, would be a losing game. (3) The third question is answered in the answer to first question. Where unreasonable storage charges are made the law provides for written complaint to railroad commissioners and an investigation, but this remedy is not adequate in your case.

#### COLLECTION MATTER.

Mr. C. J. Carlson, Odebolt, Iowa. I sent a shipment of dressed poultry to a commission firm in Chicago, weight 179 pounds net. The firm sent me proceeds for seventy-nine pounds, while the sales account showed that it had received and paid express on the whole shipment. I wrote the firm about it and enclosed the sales account, but have received no reply. What can I do about it?

Answer.—Put the matter in the hands of a Chicago lawyer for adjustment and collection.

#### HUSBAND AND WIFE.

A Subscriber, Fort Ransom, N. Dak.—When a married man dies in North Dakota without a will, having property there, what portion of his estate does his widow get?

Answer.—She first gets what is called the widow's allowance out of the personal property—then if the deceased husband was without issue she gets all of his property up to \$5,000 and one-half of all over that sum. If the husband left only one child or its issue, the widow gets one-half of his estate; but if the husband left more than one child or issue, then the widow gets only one-third of his property besides her allowance first mentioned.

#### NEGLECTANCE OF BOTH PARTIES.

A Subscriber, Tindall, Mo.—A and B own adjoining farms of eighty acres each. The partition fence between the farms is kept up by them, each one having his own part. The fence is an old one. A's part of the fence fell down at a certain place and A's cattle got through on B's land. B took them out and shut them in another field, away from the partition fence. B had a stalk field along said partition fence and he turned his horses in the stalk field, knowing the partition fence was down, and the horses went back and forth between A's pasture and B's stalk field at will. Neither A nor B said anything to the other about the situation, being on good terms. While B's horses were running in A's pasture one of them, a colt, fell into a ditch and broke its neck. At that time the horses had been running in the pasture and stalk field for two or three weeks, both A and B knowing of it. Can B recover damages from A for the loss of the colt?

Answer.—We think not. The damage resulted from the negligence and carelessness of both parties.

#### PILES CURED IN 6 TO 14 DAYS.

**PAZO OINTMENT** is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

Active and retired farmers, and all persons owning, renting, dealing in real estate or property of any description to send for sample pages of the only work of the kind published in the world.

# HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

There are a great many plans for heating water in the winter for hogs. Generally one can buy or find an old stove or furnace bottom for a fire-place which can be used to heat water in a large kettle or galvanized tank. Mr. L. H. Roberts, of Greene county, Iowa, uses an old furnace for this purpose and a large tub made of galvanized iron fits in the top of the furnace. When once

a bed of coals is started water is easily kept warm, and it only requires a little firing to heat the water to the proper temperature. Another farmer told us this fall that he has a long hose which he connects with a galvanized tank and in this way he can reach a number of troughs very handily. The water is generally heated a little above the temperature at which the hogs will drink it, as there is generally some ice in the trough which will cool off the water to the right temperature. This seems a very simple plan of getting warm water to the herd when one does not care to bother with a number of tanks and tank heaters.

"Am sending you a plan of a hog waterer that I have had in use for eight years. Secure two empty oil barrels and have a blacksmith put four strong iron hoops about them, as the barrels

are to be set in the ground and the ordinary hoops will soon rust out. Barrel No. 1 is to be set flush with the surface, but barrel No. 2 is only partly set in the ground, so that the float will close the intake pipe when the water is to the top of barrel No. 1. Make a lid for barrel No. 1, leaving an opening at the south side large enough to allow hogs to drink therefrom. Fence all but this opening away from the hogs, and in the winter cover the barrels with stable manure and the only attention it will need will be to break the thin scum of ice that forms on barrel No. 1 in extremely cold weather. The hogs generally drink often enough to keep the opening free from ice. In the illustration, F represents the float and P represents the intake pipe from

# Why You Should Have A Cream Harvester

If you are keeping three or more cows, it will pay you to own a Cream Harvester, because its use brings greater returns in the form of increased quantity and better quality of products, and because it removes much of the drudgery connected with dairy work.

It makes no difference whether you are making your cream into dairy products on your own farm or are shipping to a creamery. In either case the separator is equally important. It gives you more cream and leaves you the skimmed milk to be fed while yet warm to pigs or calves. If ground feed is added to this skimmed milk it becomes as valuable for feeding purposes as whole milk. This is one of the great advantages of a cream separator.

Then, the three big advantages of a separator are—more cream, less work and fresh skimmed milk for feeding, and these are sufficient to pay the cost of a separator in a short

time. But not all separators will do the same for you. Some make more work instead of less work, for they are so hard to operate and so hard to clean. Watch out for these things when you buy a separator.

It will pay you to call on the International local agent and examine The Dairymaid and Bluebell Separators. There you can see by actual test how they will skim down to the one thousandth part, whether the milk be warm, cold, rich, viscid or old.

You can try for yourself, and see how easily they are operated. Notice in the illustration how the handle is at just the right height, and that the supply can be low while the milk and cream spouts are high.

You can see the excellent gearing, and how, though all the parts are covered to prevent dirt getting into the bearings, each is easily accessible; how strong and simple they are, and how this will give them great durability.

You can see how simple construction is the key note all through, and what rigid care is exercised to make every part just right, and exactly so as to get best results with the least work and the least trouble.

The Bluebell is a gear drive machine, and the Dairymaid is a chain drive—you can take your choice. If it isn't convenient for you to call on the agent, write for catalogs. These tell in concise descriptions and in many excellent illustrations what you will wish to know.

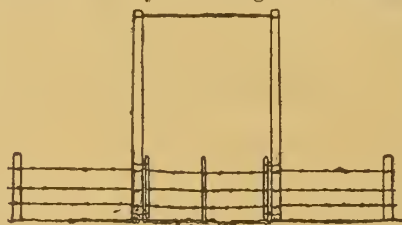

**INTERNATIONAL HARVESTER COMPANY OF AMERICA, CHICAGO, U. S. A.**

(INCORPORATED)

the supply tank. As will be seen, barrels No. 1 and No. 2 are connected with an ordinary water pipe."—W. R. Stewart, Marshall county, Iowa.

The illustration shows a very simple and complete way of bracing the gate posts in a fence. We are indebted to A. J. J., of Oskaloosa, Iowa, for this idea. Instead of using the ordinary posts at each side of the gate, use poles eighteen or twenty feet long. After these

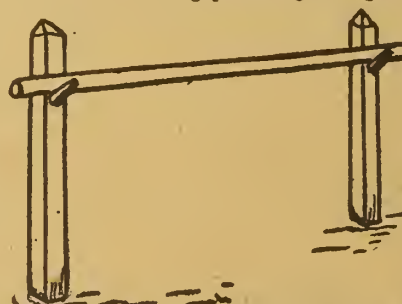

are set they are connected at the top with several strands of good heavy wire, which may be twisted to bring them into the right position. It is not always necessary to have poles this high. However, this height allows a load of hay to pass under conveniently.

We are going to ask our readers this week to help us answer some inquiries we have received lately. One subscriber asks for a dehorning rack which may be used for young and old stock. Another asks for the plan of a litter carrier which may be cheaply made and easily installed in a barn. Still another

wishes for a rule to measure hay in a stack. If any of our readers happen to be able to answer any of these inquiries we should consider it a special favor to hear from them.

Mr. G. A. Brooks, of Peoria county, Ill., has a very simple device for unloading a hay rack which should appeal to many of our readers for its simplicity and effectiveness. It is described in one of the exchanges as follows: "Set two posts in the ground far enough apart to allow the wagon with rack to be driven between them. About three feet from the ground bore a hole in each post. Into this hole fit a strong iron pin, as shown at A in the illustration. Next take a strong pole long enough to

METHOD OF UNLOADING HAY RACK. reach from one post to the other and rest it on these pins. To unload the rack raise one end high enough to allow the pole to pass under it and rest each end upon the iron pins in the posts.

**Gold Watch FREE AND RING**

We positively give both a Solid Gold Laid STEEL WIND American movement Watch highly approved and fully warranted timekeeper equal in appearance to a Solid Gold Watch; also a Solid Gold Laid Ring, set with a Famous Congo Gem, sparkling with the fiery brilliancy of a \$50 diamond, for selling 20 pieces of handsome jewelry at 10c each. Order 20 pieces and when sold send us the \$2.00 and we will positively send you the watch and ring; also a chain, ladies or gent's style. ALTON WATCH CO., Dept. 121, Chicago.

**BOWSER SWEEP MILLS**

Different from all others. 4 or 2 horses. Geared 18 to 1 or 7 to 1. Grind Corn with shucks or without. And all small grains including Oats and Wheat. (Also make 7 sizes belt mills.) E. N. P. Bowser Co., South Bend, Ind.

**PATENTS**

ORWIG & LANE, DES MOINES, IOWA. Send sketch or model of invention for free opinion as to patentability. Reference, The Iowa Homestead.

The rack should rest on the pole a little forward of the middle, so that the rear will about balance the forward end. Now uncouple wagon and draw out front wheels. Pull down on the front end of the rack and the hind wheels are ready to be taken out. Next let rack down until rear end touches the ground. If you leave it in this way your rack is in such a position that the water will not soak into it when it rains."

Mr. W. J. Moore, of Warren county, Ill., tightens loose barbed wire in the following manner: With a claw hammer the strand is picked up between the claws and a kink is made. Each kink reduces the slack until the wire reaches the proper tension.

Mrs. J. A. J., of Stanhope, Iowa, suggests that a very good plan for feeding calves is to make panels in the fence. In this way each calf will find a panel and you can stand on one side of the fence and feed them with less difficulty than if they had their heads through a common opening.

**TO CURE A COLD IN ONE DAY**  
Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. GROVE'S signature is on each box. 25c.

## The Rowe Sale.

One of the best crowds yet seen at any brood sow sale held so far this winter gathered at the J. E. Rowe sale at Stockham, Neb., on January 21st. There was a good crowd of breeders present who seemed eager to purchase the best stuff. The top sow sold for \$185. going to Messrs. Hopkins Bros., of Atlanta, Neb., and she was surely the bargain of the sale. An average of \$39.40 was made on the entire consignment. Below is a list of those selling at \$30 or over:

1. A. T. Deal, Stockham, Neb.	\$61.00
2. Hopkins Bros., Atlanta, Neb.	185.00
3. F. Anderson, Stockham, Neb.	50.00
4. B. W. Springer, Aurora, Neb.	48.00
5. H. E. Toof, Aurora, Neb.	40.00
6. I. Rath, Eldorado, Neb.	40.00
7. Crist Stieder, Giltner, Neb.	45.00
8. H. B. Hall, York, Neb.	52.50
9. Joseph Zebr, Aurora, Neb.	30.00
10. Archie Parr, Merna, Neb.	60.00
11. H. B. Hall	47.50
12. H. E. Toof	35.00
13. Chas. Sberwitz, Eldorado, Neb.	35.00
14. Same	45.00
15. John Jansen, Henderson, Neb.	35.00
16. Barney Sterbus, Aurora, Neb.	41.00
17. H. E. Toof	32.50
18. Chas. Sberwitz	30.00
19. H. E. Toof	30.00
20. J. Jones, Marquette, Neb.	30.00
21. Chas. Sberwitz	35.00
22. Same	31.00

The above is a correct likeness of I Am Allerton, a son of I Am Sunshine by Perfection. His dam was Miss Allerton by Allerton Tec. This is a grand specimen of the right type of Poland China and many of the best sows in the J. H. Hamilton & Son sale at Guide, Rock, Neb., will be bred to him. See sale advertisement and write for catalog.

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kansas City, Mo., without additional charge) for the low price of five cents a word for each insertion. No insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 130,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## HOGS.

A FEW very fine August and September Berkshire boars for sale. Good individuals and correctly bred. No fancy prices asked. Will be registered and transferred. C. K. Peirce, Germania, Wis.

## Hockett's Duroc Sale.

The best crowd of breeders that has ever been seen on the Grant Hockett farm was present on the occasion of his annual brood sow sale on January 21st. Many of the best breeders were there, and Mr. Hockett had a good offering to show them. The four-year-old daughter of Orion and Kruger Maid topped the sale at \$170 and went to Mr. A. P. Alsip, of Boone, Iowa. A daughter of Model Chief went to Mr. John Weighton, of Audubon, Iowa, at \$160. An average of \$52 was made on thirty-nine head sold. Below is a complete list of the buyers: Fancy Wonder, Aug. Voge, Portsmouth, Iowa, \$102.50; Model Queen, John Weighton, Audubon, Iowa, 160.00; Gilt, Hood & Baker, Dunlap, Iowa, 60.00; Gilt, Wm. Coburn, West Side, Iowa, 36.00; Gilt, E. B. Ryan, Neola, Iowa, 62.50; Gilt, F. E. Garrett, Lohrville, Iowa, 51.00; Gilt, John Norris, Audubon, Iowa, 72.00; Gilt, W. H. Hudson, Lohrville, Iowa, 51.00; Gilt, John Struve, Manning, Iowa, 37.00; Gilt, E. J. Anderson, Yale, Iowa, 41.00; Gilt, Claud Huffman, Scranton, Iowa, 40.00; Gilt, Henry Miller, Arcadia, Iowa, 40.00; Gilt, A. L. Mossman, Radcliffe, Iowa, 75.00; Gilt, J. E. Wehr, Portsmouth, Iowa, 70.00; Gilt, H. S. McDowell, Dunlap, Iowa, 43.00; Gilt, Guy Pangburn, Bayard, Iowa, 43.00; Gilt, J. H. Loge, Manning, Iowa, 39.00; Gilt, Wm. Coburn, 36.00; Gilt, W. A. ## WANTED.

DO you want a job? Structural steel and cement crowd the railroad yards and wharves of San Francisco. The banks are overloaded with the money of the people, anxious to put it into buildings. The commonest kind of labor commands from \$2.50 to \$3.50 a day; carpenters get from \$5 to \$8 a day; bricklayers and plasterers from \$7 to \$9 a day. If you want the facts, direct a letter to the Bureau of Publicity, R. 514 Union Trust Bldg., San Francisco, and get full particulars free of cost.

BOYS AND GIRLS. Easy learned form of double-entry book-keeping. Many taking advantage of this opportunity. Guarantee to teach you to open and close of books (blanks furnished) within a week or money refunded. Course by mail for \$5.00 continued until you are perfectly satisfied. John Randolph, 985-28th St., Des Moines, Iowa.

WANTED—All cream producers to know that the Des Moines Creamery Company pays at all times top prices for cream. Write for proposition. Des Moines Creamery Co., Des Moines, Iowa.

## G. W. Posts' Sale.

The sale of Duroc Jersey sows made by Mr. G. W. Post, of York, Neb., on January 22d, was very successful. Although the day was very cold, a good crowd gathered to buy this good offering. An average of \$43 was made on the entire lot, which was very satisfactory to Mr. Post. Below is a list of those selling at \$40 and over:

1. J. P. Cunningham, York, Neb.	\$75.00
2. Frank Laird, York, Neb.	75.00
3. A. Pahaska, Charleston, Neb.	50.00
4. Frank Laird	50.00
5. A. L. Price, Thayer, Neb.	42.00
6. James Grey, Sutton, Neb.	45.00
7. Fred Thomas, York, Neb.	40.00
8. Con McCarthy, Henderson, Neb.	50.00
9. F. H. Runner, Benedict, Neb.	42.00
10. John Peterson, Hampton, Neb.	50.00
12. C. R. Stahl, York, Neb.	40.00
14. A. L. Price	46.00
15. F. H. Runner	45.00
16. Same	40.00
17. M. E. Vansickle, Thayer, Neb.	40.00
21. D. H. Rockefeller, Lowell, Neb.	45.00
22. W. M. McFadden, McCool, Neb.	42.00
26. T. J. Curbie, Waco, Neb.	40.00
31. O. C. Larsen, Benedict, Neb.	58.00
32. C. R. Stahl	48.00
33. Chas. Peterson, York, Neb.	40.00
35. F. H. Runner	41.00
36. Wm. Collicor, York, Neb.	45.00
37. John Snyder, York, Neb.	41.00
39. F. H. Runner	46.00
Total of sale	\$1,672.00
Average	43.00

## Hammer Makes Good Sale.

The sale of Duroc Jersey bred sows made by Mr. John Hammer at Greenwood, Neb., January 17th, was quite a successful one for an early sale and everything was sold at a very satisfactory price. Colonel Callahan conducted the sale in his usual able

## SEED CORN AND GARDEN SEED SHIPPED ON APPROVAL. A "SHOW ME" PROPOSITION.

Lots of people write in and say, "These seed men have got to show me before I will believe that they have anything that will increase my yield of corn." And I don't know as I blame you, either. There are shysters in the seed business the same as in law and medicine. The woods are full of them. They are always mighty careful to get your money in advance and then they let you holler.

But suppose you had a chance to see the stuff first and take it home and test it, and go over the whole matter carefully before you paid a cent? Wouldn't that make it a pretty safe sort of a deal?

This question of moving seed corn all simmers down in the end to whether it's corn that's worth moving in the first place. You know and I know that lots of it ain't worth moving.

It's got to be "real seed corn" to start with. And it's got to be a sort suited to the soil and climate where it's going, and that's the highest point of any.

The trouble is, when you send off for seed corn, you don't generally consult the seed breeder as to what kind you ought to have. You just pick out the one that looks prettiest in the pictures—and maybe it's the right one and maybe not.

But the experienced corn breeder if he knows his business could tell you which kind is best suited to your soil and climate. It's his business to know. He knows the peculiarities of the different breeds of corn, and about what they would do under given conditions.

Now, for instance: I have thousands of letters filed away, reports from customers about the corn they have bought of me. By comparing these reports with their old orders I can tell what my corn will do in any state from Nebraska to Virginia—and what's more, I will give you the benefit of this. I will tell you truthfully what kind of corn will do best for you and about what you may expect.

I have proven conclusively that there is not a county in the corn belt that could not profitably use some one or more of the twenty varieties of corn I am breeding. I've got the letters to show for it.

Same way with garden seeds. I have been a trucker and seed grower all my life, and I can tell you what varieties you should grow. I am corresponding all the time with gardeners all over the country—they tell me their troubles and I tell them what to do.

Now, look here, Mr. Man. If I could furnish you seed that would increase your yield of corn twenty bushels, or even ten bushels to the acre, what would it be worth to you? And if that seed was good enough that you could sell seed to all your neighbors next

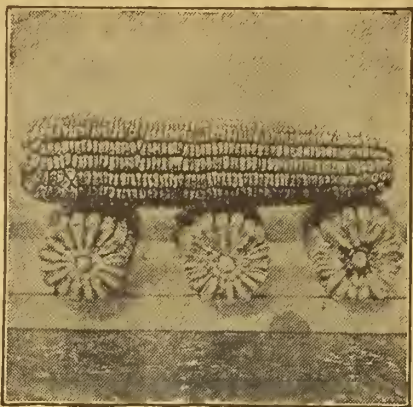

Acres to plant.....Nature of land .....

Color and type of corn preferred.....

Postoffice..... County..... State.....

Please ship me seed corn enough to plant the above. I will pay the freight on it, and, if it suits me, will pay for it within ten days after arrival at the rate of 30c. per acre. If, after a reasonable time for examination and test, I conclude the seed would not suit me, I will return it promptly at your expense.

Name.....R. R. Sta. ....

spring, how much more would it be worth?

I can do that very thing, and have done it for dozens of men right in your own part of the state.

I want to plant a field for you, just to "show" you. Anything from one acre to forty acres. Write me what kind of ground you have to plant it on, and what type of corn you prefer. I will ship you enough of my very best graded seed to plant it. If you like the looks of it, send me at the rate of 30 cents an acre. If it don't suit, ship it back, and I'll pay freight back on it.

I will send you corn that I know positively will be a winner with you. Corn that will increase your yield and the quality of the crop. I won't make much out of the deal—not near as much as you will—but I'll have the satisfaction of "showing you" anyway, and that's worth something.

This ad will not appear again. Now is the time to speak up if you want to get in on the deal. Fill out the coupon, so I will know what to send you.

Be sure and tell me where to ship it to, and how, whether express or freight.

Address me this way,

HENRY FIELD, SEEDSMAN,  
Box 25, Shenandoah, Iowa.

P. S.—If you want some really good garden seeds, or the madame wants some flower seeds that will really bloom, send me a list of them, and I will ship them along with the corn, and on the same terms, "pay if you like 'em." I've got the other fellow beat a mile on that kind of seeds, and I am not afraid of a show down.

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### LIME-SKIM MILK APPLICATION FOR FRUIT TREES.

The good results of applying a coat of whitewash to the fruit trees in the orchard are generally known, in farm orchards as well as in commercial ones. As a rule, the plain lime whitewash is used, but as it does not remain long on the trees when the spring weather commences its lasting qualities are not the very best. It is often necessary to go over the trees twice where one application of some good wash that will stay will suffice.

In this connection, we might say that a very good mixture for this purpose, and one that has been found highly successful on a great many farms, is made from lime and skim milk. The lime is slacked in the ordinary way, and instead of being thinned with water it is thinned with skim milk. The mixture is then applied as any other whitewash, and it is found to "set" much more firmly and securely than the plain wash.

The advantage of the skim milk over water is not easily explained. However, it seems that the case in the skim milk tends to produce a more elastic wash and it seems to be more impervious to the elements.

This skim milk paint, as it is called, seems to be nearer a paint than any of the water mixtures for this purpose. We have seen buildings painted with this admixture with very good results, and it seemed to last fully as long as some paints, at the same time it was a great deal cheaper.

Applying a white mixture to the trunks of trees often prevents borers from doing damage to the orchard. Another good result is that the white trunks reflect the heat of the stimulating spring sun which prevents early budding of the fruit trees.

### The Shaping of Orchard Trees.

There is considerable difference of opinion among good orchardists as to high or low heading of trees. The most favor low heads, especially for the western states. While many good orchards are headed four and more feet high in Pennsylvania and farther east, there are many very good ones that are not so. The general tendency among the best fruit growers is towards lower heads in all sections. No rule can be laid down as to any specific height at which to head all varieties of any one species, much less a common rule for all species, because there are such different styles of growth. I like an apple tree to start its head from two to three feet from the ground, and to send out its branches one after another on all sides of a central stem as far up as they may be induced to do so. This divides the strain caused by future crops. A Northern Spy tree, which is of upright habit, should not be allowed to begin to branch as high as a Winesap or a Rhode Island Greening, which are of spreading habit. It may be necessary, in many cases, to head in some of the lowest branches, as their tips are bent to or nearly to the ground in future years. But this is much better than to have the tree too high.

The main reason given by most of those who contend for high heads is that they may plough right up to the trunks. This I do not wish to do after the first few years, for there is no benefit in doing it. The feeding roots are not there, and the brace roots should not be disturbed. No weeds of consequence can grow under the shade of a well-branched tree. A wide cultivator will reach well under the limbs anyway. The disadvantages are greater difficulty in gathering the fruit from high trees than from low ones; greater distance of shade cast by them, and more purchase by the wind. One must use good judgment in planting the different classes and varieties of fruit trees. He must know his tree, what is its habit, therefore, its possible future. Pear trees should be headed lower than apple trees, because they generally have a more upright habit. Two feet is not far from right to begin their branching. Peach trees should be still lower—about twenty inches is an approved height. Plums vary greatly in

# Hoes

You can do twice the work with some hoes that you can with others.

Any boy that ever hoed a potato patch knows the difference.

The right kind of a hoe is neither too large nor too small; not too heavy or too light. It is just the proper size and shape to do the kind of work it is intended for. Its quality is excellent and its hang is accurate.

Hoing becomes agreeable work when you have the hoe that fits your hands and the work you have to do. There are just such hoes made.

Ask Your Dealer For

## TRUE TEMPER

Hoes

True Temper Hoes like the Forks, Rakes, Potato Hooks and all other farm and garden hand-tools that bear the label are "The best tools you have ever bought at the same prices you have always paid."

If they had not been tested for quality and construction by the most severe methods at the factory, they wouldn't be allowed to wear the label.

Remember there's a tool for every kind of work.

And you'll save time and money by using the right kind of a tool every time.

Let us tell you more about that. Just ask on a postal card for our free book, "Tools and Their Uses," and it will be sent to you at once.

**American Fork & Hoe Co.**  
435 Am. Trust Bldg.  
Cleveland, Ohio

## The Maule Seed Book FOR 1907

contains 63 Specialties in Vegetables, 69 in Flowers, besides everything else good, old or new, worth growing.

You need it. It is free to all sending me their address on a postal.

**Wm. Henry Maule** 1757 Filbert Street Philadelphia, Pa.

## SEED CORN

### Golden West

The latest novelty, and decidedly the best yellow corn in existence. It combines all the most desirable characteristics. Is the best rooted, the strongest growing and most productive. Ear large, bright golden yellow, solid and perfect shape. Notice in above cut that ears about the same size at both ends; see how nicely it is capped over at both tip and butt, and how closely the kernels wedge in; grain is deep and cob small. Per bu. \$3.00, 10 bu. \$17.50.

**FREE TO FARMERS**—A small sample of this corn will be mailed free if you mention this paper. Also a copy of our large, illustrated catalogue describing the above and all the best varieties Seed Corn and Farm and Garden Seeds.

**IOWA SEED COMPANY, DES MOINES, IOWA.**

**SALESMEN WANTED** to introduce Burbank's wonderful seedling plum, Miracle, and sell our well-known hardy nursery stock. Big pay. Best proposition offered salesmen. Oregon Nursery Co., Detroit, Mich.

style of tree. The Abundance and nearly all of the Japan class are very upright, while the Burbank is very drooping. The other classes of plums vary somewhat, too, but the native kinds are usually spreading and the European upright. From twenty inches to three feet is about the range for length of

## SEED CORN SOLD ON APPROVAL

Test it any way you please for ten days. If not perfectly satisfactory, return at our expense and money will be refunded. Best and largest yielding varieties: Sutton's Improved Boone Co. White; Sutton's Favorite White; Reid's Yellow Dent; Gold Standard; and Premium Yellow Dent. All corn carefully selected, placed in our mammoth dry house and perfectly dried with steam pipes and air shafts. From 600 acres we selected 8000 bushels of fine seed ears. When sold we quit, so order now. We handle no outside corn. Shipped in the ear (Bushel box crates) or shelled. All shelled corn nubbled at both ends and graded. Has highest germinating power, and stands cold spring rains better than common corn. Letters from Iowa, Missouri, Ohio and Illinois this year, state that our corn out-yielded all other, making from 85 to 125 bushels per acre. Send for catalog and read these letters signed by the parties raising the corn. The actual test is what talks. My seed corn may double your yield. Write for illustrated Seed Corn Book and samples. Free. Address: My ad will appear every other week. **C. D. SUTTON, Dept. D., Mason City, Ill.**

## FOUR EVERGREENS FREE

We grow our Hardy "Blizzard Belt" Evergreens in ten million lots. To prove they are healthy, well rooted and vigorous we offer to send Four Fine Sample Trees, 3 years old Free to a limited number of property owners. Mailing expense 5 cts which send or not as you please. A postal will bring them. Our Catalogue containing 64 colored plates of our Hardy "Blizzard Belt" Fruits, Evergreens, Ornamentals, etc., with a mine of valuable information for fruit growers, free for the asking. Write to-day.

**THE GARDNER NURSERY COMPANY, Box 702, Osage, Iowa.**

Your shipments to this market and orders for the purchase and sale of grain for future delivery solicited.

trunks, to be judged according to the necessities. Cherries are very much the same as plums, the sour kinds being of a spreading habit. Quince trees of all varieties that I know are prone to bend towards the ground, and need to be headed about two feet high, and then frequently pruned from below to keep the lower branches off the ground.—(H. E. Van Deman in Rural World.)

### HORTICULTURAL NOTES.

We have seen a man shooting woodpeckers because they made holes in his apple trees. The woodpeckers are his true friends. They would never make holes in his trees if there were no borers there.

He may be compared to our old neighbor who killed lady bugs under the supposition that they were the parents of potato beetles. The lady bug is the natural enemy of the potato beetle and destroys its eggs and young, thereby greatly decreasing the ravages of this pest.

The colder weather of the last few days will destroy a great many of the insects which are hibernating outdoors. Many insects are destroyed by cold ev-

ery year. A really mild winter would be followed by a great increase of various insects.

A thermometer on the porch is quite a convenience in cold weather. A thermometer in the cellar is much more practical, especially if it is consulted faithfully. Whenever the mercury approaches the danger mark artificial heat or added protection should be supplied. Guess-work is not safe here.

Now is the time to plan and prepare for the season's spraying. When the purchase of outfits, repairs and materials is put off until the last moment disappointment is liable to result, for the factories are usually overworked at that time. If the work is done a few days after the proper time it might as well not be done at all.

A neighbor had a Bokhara peach tree which bore over a bushel of fine peaches last year. The tree had been laid down during the previous winter. Another neighbor had a good many peaches without having protected the trees in any manner. Last year was an especially favorable one for peach trees in many parts of the corn belt. We are anxious to see whether laying down will save the trees when we have a severe winter again.

We have seen a number of lawns which were covered with a coat of fine manure last fall. We predict that these same lawns will be covered with a coat of fine grass next summer.

A friend of ours told us a few days ago that his county produced an abundance of apples last year, and that those who did not spray had almost as good apples as many of those who did. This does not speak well for some of those who sprayed. Those men with their hundred and two hundred-acre orchards go at their spraying with a whoop and hurrah and a "get done in a hurry." Such methods will not make spraying a success.

Early spring may not be theoretically the best time to prune fruit trees—in fact, many persons claim that June is the proper and only time. But we know that no busy farmer has time to prune trees in June. The fact is that the trees will be pruned before field work has begun or not at all. We have pruned in March for many years and the work has been very satisfactory. We have also pruned in June and July and the trees show no mark of injury. A man with age and experience once said: "The time to prune is when you can do the work and have a sharp saw." It seems that there is much truth in the statement.

### Preventing Destruction by Rabbits.

To the Editor of The Homestead: Thousands of apple trees are killed annually by rabbits, and there are so many ways to keep them from it. My way of protecting them suits me better than many ways I have tried, because I never have lost a tree since I commenced.

Here it is: Simply paint the trees or spray them with blood two or three times during the winter. If an open winter and lots of rain paint the trees oftener than this. One can go over 200 trees in thirty minutes. When the or-

## A COMPLETE HOME VINEYARD FOR \$2.48

We grow and sell good trees. You do not know this, and we cannot convince you unless we can get a trial order. In order to get started we will offer you 75 First Class Grape Vines of the following varieties: 50 Concord, the old reliable; 10 Moore's Early, large and early; 5 Agawam, the best red; 5 Niagara, the best white; 5 Catawba, old, but good. These vines are extra good, and it is because they are sure to please you that we want to put them in your hands. This selection will make you a nice home vineyard. The vines alone are well worth the price asked, but we will add free to you 24 Raspberries (12 Gregg, black; 12 Cuthbert, red) 24 Blackberries (12 Snyder, 12 Ancient Briton) 25 Asparagus, Conover's Colossal. We will deliver these free of all transportation charges if you live in Iowa, Nebraska, Kansas, Illinois, South Dakota, Wisconsin, Oklahoma, or Missouri. Persons living in other states should send fifty cents more.

**A PREMIUM FOR QUICK ACTION.** If the order is sent on or before Feb. 25 we will send you all the above vines and bushes and roots, and also free of cost to you the following line roses: 1 Crispin Rambler, finest climber; 1 Prairie Queen, an old favorite; 1 General Jacqueminot, nothing better; 1 Madam Plantier, large double white; 1 Black Prince, very dark red; 1 General Washington, very fine crimson. **BETTER STILL** if money is remitted on or before Feb. 15, we will send you all the above list of vines, bushes, and roses, and besides free of cost, 50 Strawberries, two good kinds. The strawberry plants will be sent you by mail. The other goods by express or freight.

**NOW REMEMBER**, the complete vineyard, the 100 Berry Bushes and Plants, the 25 Asparagus, and the 6 fine Roses all for \$2.48, all charges prepaid. A great and generous offer! Write quickly. **DO IT TODAY.** References: Iowa Trust and Savings or Capital City State Bank, both of this city.

**IOWA NURSERY CO., BOX 162, DES MOINES, IOWA**

### SORT YOUR SEED CORN.

Use Delany's Seed Corn Sorter and get a perfect stand. Hundreds have used it with remarkable results. It costs \$2.75, makes positive separation, is easy to operate and has large capacity. It increases the yield from 15 to 20% and lasts a lifetime. The increased yield from one acre will more than pay for it, not counting the time saved in planting. It not only grades the seed, but removes all dirt, chaff, butts and tips that clog the planter. Send for free Seed Corn Booklet C, showing our line of sorters. **Get your orders in early.**

**J. F. DELANY, COLONA, ILL.**

## We Breed 7 Varieties of SEED CORN

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties.

We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

**Box 16 W. W. VAN SANT & SONS Farragut, Iowa.**

chard is drifted full of snow put a little blood on parts not covered. Try it. Fayette county, Iowa. G. B. Darnell.

### Maintenance of Soil Fertility.

Mr. E. F. Ladd, of the North Dakota Experiment Station, reports experiments and observations which lead to the conclusion "that humus, at least in regions of low annual rainfall, like the Dakotas, plays a more important role in agriculture than has generally been ascribed to it." It may safely be said that this is generally true. Professor Ladd's investigations show that as humus decreases in soils they become less productive, less retentive of moisture and inferior in physical quality, while on the other hand it was found that an increase in the percentage of humus is accompanied not only with an increase in percentage of phosphoric acid extracted from the humus, but also with a greater productivity of the soil. As the humus increases it seems to cause portions of the phosphoric acid, till then existing in an insoluble form, to become transformed into a soluble form, and thus, presumably, to become more readily available as plant food. The same is true as regards the potash, lime, and other soil constituents. If more attention were given to maintaining an abundant supply of humus (partially decayed organic matter) in soils, they would be more productive, require less artificial fertilizing, and respond more

Founded 1825. Large NEW Fruit Book free. **STARK BROS., Louisiana, Mo.**

Valley soil, should, under a system of agriculture, as indicated above, yield good crops without the aid of commercial fertilizers for a thousand years. This assumes the proper use of all barn manures and the prevention of unnecessary loss from the soil. A proper system of crop rotation should result in enriching the surface soil with plant food rather than in depleting it, and especially should this be true for nitrogen and humus." On the other hand the continuous growing of wheat or other grains or cultivated crops rapidly diminishes the supply of organic matter and hence decreases the humus and nitrogen. The growing of leguminous plants—clover, peas, etc.—which are nitrogen accumulators, in a crop rotation causes a marked increase of humus and nitrogen in the soil. In North Dakota experiments the plowing under of green crops did not produce as beneficial results as came from the breaking of grass lands. "Plowing under a green crop leaves the organic matter in a mass and not uniformly distributed throughout the soil. Soils filled with a mass of grass roots furnish, in all parts of the soil, a uniform supply of organic matter, which by gradual decay furnishes the soil humus. This humus, reacting upon the mineral constituents of the soil, seems to aid in liberating and rendering available this plant food." Moreover, the newly broken soil being permeated by a mass of fine grass roots is thus protected from being drifted by the wind. The system of rotation recommended as most nearly ideal for the maintenance of the fertility of the soil is "two years in grass, followed by a cultivated crop, then two years in grain crops."

The continuous growing of wheat or other grain or of a cultivated crop not only rapidly depletes the soil of organic matter, but causes the rapid formation of nitrates, which are likely to be washed down in the soil below the reach of the roots of the plants. In Professor Ladd's experiments the largest amount of nitrates was found at a depth of three feet in bare fallow, while at a depth of seven feet the amount of nitrates was larger than at a depth of one foot. Since no nitrifying organisms were found in the soil at a greater depth than two feet, it is evident that the nitrates found at a greater depth than this were leached down from above. The importance of a proper rotation and of catch crops to take up and hold the nitrates is thus clearly shown.

### The Garrett Duroc Jersey Sale.

Some new history was made in Duroc Jersey circles last week at the sale of Mr. F. E. Garrett, of Lohrville, Iowa. On that date twenty-nine head sold for \$7,085, or an average of \$177.12. Ruberta, the winning junior yearling sow at Iowa State Fair in 1906, went to Mr. C. F. Kirk, of Ponca, Neb., at \$1,500. The following is a list of the purchasers and the prices paid:

Lot.	Price.
3. Dr. J. A. Downes, Glidden, Iowa.	\$107.50

Prof. R. J. Kinser of the Kansas Agricultural College will be one of the stock judges at the Denver Stock Show.

**Wanted:** Two married men for orchard and farm work. Separate house and garden for each. No house fighters or cigarette fiends need apply. Address, N. C. Dunlap, Manager Watson's Ranch, Kearney, Nebraska.

# Why Don't You Ride When You Harrow?

No Use Walking When You Can Buy a

## Rock Island Harrow Cart

Delivered at your R. R. Station For..... **\$8**

If Your Dealer Can't Supply You Send to Us.

## REAL HARROW COMFORT

Plowing is about the easiest work on the farm, but how many successful Farmers to-day use *Walking* plows? You don't—do you? No; horses are too cheap and life too short to wear your legs out following a plow all day.

You ride when you plow; you ride when you plant; you ride when you cultivate. Well, then, why don't you ride when you harrow?

Is there any reason on earth why you should continue to make this work the hardest kind of drudgery by *walking* over plowed ground?

Or riding one of those crude carts that twist and turn and jerk you about until you wish you *had* walked?

No, Sir,—there is no longer any excuse for saying that "harrowing is the hardest work on the farm."

The new Rock Island Two-Wheel Cart has changed all that.

It offers you a pleasure you never enjoyed before—a ride behind a drag harrow that is just as comfortable as a ride on your Sulky or Gang Plow or your Cultivator.

LOOK at the man in the picture above. He's riding a Rock Island Cart, and he doesn't look a bit more comfortable and easy than he feels.

The feature that adds most to his comfort is the fact that he always faces the horses, no matter which way the wheels may be angled. Think what *that* means!

The swinging back and forth of the axle doesn't affect the driver a bit.

This is why: The platform for the seat is made of two circular plates, lower plate being bolted solidly to the axle.

Seat and foot-rest are both fastened to the upper plate which can turn on the lower plate.

An automatic locking device, similar to that used on the rear wheel of a Sulky Plow, holds the parts in position while the cart is being drawn straight ahead.

But permits the wheels to angle either way while making a turn, or when either of them strikes an obstruction, without disturbing the driver in the least.

This feature is exclusive with the Rock Island Cart. No other harrow cart has it.

## AN IMPORTANT IMPROVEMENT

One serious trouble with two-wheel carts is that in striking an obstruction which throws one wheel behind the other, the wheels do not quickly return to their correct position, but frequently slide along for quite a distance. This is why nothing of this kind can possibly happen with the Rock Island Cart!

The draw-bars are crossed and pivoted at the axle. While the axle can swing freely when one wheel of the cart strikes an obstruction, or when making a short turn, the axle and wheels are always perfectly controlled by the draw-bars in the same manner as the front wheels of a wagon are controlled by the tongue.

## SAVES YOU HIRED HELP

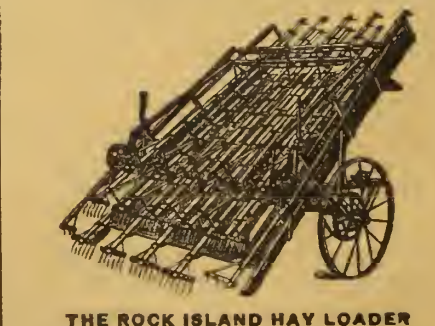

A boy at \$8.00 or \$10.00 a month with a Rock Island Two Wheel Cart will do as much harrowing as a man at \$25.00 or \$30.00 will do without the cart. You, therefore, actually save the price of this useful implement two or three times over in a single month.

And when you consider that the Rock Island Cart will last ten or fifteen years, you see that the price, \$8.00, means an investment of 50 to 75 cents a year. Can you point to any other labor saving implement on your farm that pays you as big a dividend as this? Think it over, Neighbor!

## WE'LL DO THIS FOR YOU

We are manufacturers of all kinds of Farm Implements, selling only through **Regular Implement Dealers.** But we want you to have a chance to buy this Harrow Cart, and if your dealer won't get one for you, just send us \$8.00 and we will ship you a cart. We will pay the freight on it to your nearest R. R. Station ourselves. Send the price, \$8.00 at once, or if you want to know more about the Rock Island Two-Wheel Harrow Cart, before you decide to buy, we will be glad to send to you a

## DESCRIPTIVE BOOKLET FREE

**THE ROCK ISLAND HAY LOADER**

A complete machine, raking hay from the swath with out the use of any other tools or appliances. Send for full description.

**BULLY BOY CULTIVATOR**

Frame all in one piece. Rigid or Pivot pole. Full description for the asking.

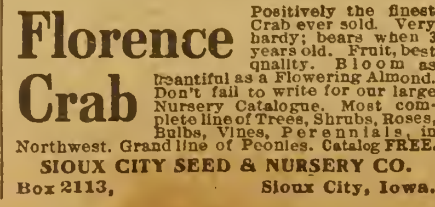

We are spending thousands of dollars telling the Farmers about the Rock Island Two-Wheel Cart, and we want every one of them to know just how good it is. Ask us questions. Let us hear from you. Write today, if your dealer can't show you the cart.

Full information about the cart is absolutely **FREE.** If, in addition to information about the cart, you would like to have a pretty watch charm, enclose 6 cents in stamps to pay postage and *always* mention this paper.

## ROCK ISLAND PLOW COMPANY, ROCK ISLAND, ILL.

MAKERS OF A GENERAL LINE OF FARM IMPLEMENTS.

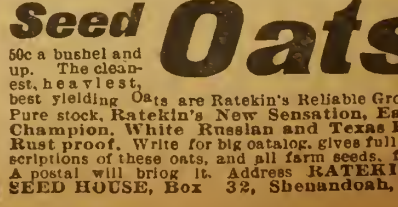

Including Plows, Disk Harrows, Planters, Cultivators, Hay-Loaders, Etc.

**Florence Crab**

Positively the finest Crab ever sold. Very hardy; bears when 3 years old. Fruit, best quality. Bloom as beautiful as a Flowering Almond. Don't fail to write for our large Nursery Catalogue. ## KEELEY CURE.

CURES LIQUOR, Neurasthenia, Drug and Tobacco habits. Send for free booklet. Address

**KEELEY INSTITUTE, INC.,**  
708 Fourth St., Des Moines, Iowa

## VETERINARY MATTERS.

PROFESSIONAL Veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of one dollar. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

**HORSES AND CATTLE.**  
Is it injurious to horses to stand in the same barn with cows when there is no partition between them?

As cows are kept for the production of milk, and milk should be protected against entrance of filth and germs, they should always be kept in a clean stable, absolutely separate from horses.

**CRAZY COW.**  
I had a red cow coming three years old running on the meadow and in a five-acre stalk field with the rest of the cattle (nine head). I have been feeding them a little hay and have watered them regularly and salted about twice a week. Last Sunday morning she would not eat and commenced showing all signs of being on a spree. She kept it up a day and a half. Then she commenced to run at everything that came near her, from a chicken up. She would run through any kind of a fence, slobbering all the time, but she never made fight at any person. She seemed to be afraid of a man. She got so vicious by Wednesday and fought the rest of the cattle so that I had to shoot her.

If there is no history of the cow having been bitten by a rabid dog so that she contracted rabies, we should call this a case of brain disease, associated with indigestion or corn-stalk disease. Keep the rest of the cattle out of the corn-stalk field.

**DEATH OF CHICKENS.**  
Can you tell me what ails my chickens? They seem to be healthy enough, but all at once they take sick and die. At first their eyes turn glassy, then they droop for a couple of days and finally fall as if in a fit, kicking around for half an hour and then die. From the time they begin to droop, their feathers seem to turn the wrong way. They have warm houses, get plenty of grit, fresh meat, corn, bone, etc. I thought they might have got some of the rat poison which I have placed about. Would it affect them so? Their combs are also affected during this ailment, and turn a sort of bluish white.

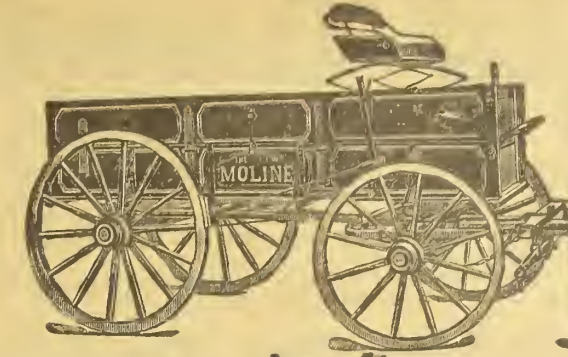

There is nothing in your statement to enable one to tell that disease is killing the chickens, and it is most probable that they have been poisoned by rat poison. Some light might be shed on the mystery by making a post mortem examination. Burn the dead fowls. Clean up, disinfect and whitewash the poultry houses. Keep poison out of the way of chickens.

**TAIL RUBBING.**  
Will you please tell me what is the trouble with my two-year-old horse? He is constantly rubbing his tail, has it stubby looking at his body, and is kicking day and night. When out of the barn loose we do not notice it so much. I cannot see anything wrong. It is not lice or mange. Have had him twice at a veterinary's and he has given him three different treatments for pin-worms, but there was no change. I then drenched him with turpentine and raw linseed oil for worms and am now giving him dram doses, in his oats, of powdered sulphate of iron. I have used a dip, also a strong solution made from home-made soft soap, but from all this I see no change and am about at the end of my row. He is in good flesh and otherwise apparently well. There are six other horses in the stable with him and they are all right. He has been this way all fall.

He has a parasitic disease of the roots of the hair of tail. Stop feeding grain and do not allow him to stand a single day idle in stable. Feed bran, carrots, hay and fodder. Wash tail thoroughly and when dry rub in iodine ointment and repeat this application once daily for four days; then wash again and afterward apply a lotion composed of two drams of ichthyol, one ounce oil of tar, two ounces flowers of sulphur and raw linseed oil to make one pint. Shake well and saturate parts. Repeat the application every three days as long as required. Give him half an ounce of Fowler's solution of arsenic night and morning.

**BYE DISEASE.**  
Can you tell me what is the trouble with my sheep? Their eyes swell and run water, and they get poor and die after lingering for a month or more. Some of them cannot see at times, as their eyelids are swollen and stuck together. They will eat, but never seem to recover from this sickness. Do sheep get the pink eyes the same as cattle?

Sheep get the same eye disease as cattle and it commonly is called "pink eye." The disease is contagious, hence the first step should be to isolate all of the affected animals. Then sponge eyes of unaffected sheep with a 10 per cent solution of boric acid two or three times in one week and watch carefully to see if any should become affected with the disease. Treat affected sheep by sponging eyes once daily with a saturated solution of boric acid; then puff between eyelids a little of a mixture of

## Do You Buy Kiln-Dried or MOLINE Wagons?

**TAKE** a long, slender piece of Hickory that has been air-seasoned from 3 to 5 years. Bring the two ends together—you can do it without breaking or cracking the stick. Then take a similar piece of kiln-dried Hickory and try it. **CRACK! You've broken it!** This simple test tells why we store millions of feet of Hickory and White Oak in our vast drying sheds for 3 to 5 years before making it up into Moline Wagons.

It tells why we are willing to have many thousands of dollars tied up in this reserve stock for years, paying taxes, insurance and other costs, until it becomes thoroughly weather seasoned, with the wear of iron in it. We have the largest stock of Hardwoods in the United States, yet today we're buying green timber right and left, for our 1911 output of Moline's.

If you know of any large tract of Oak or Hickory, we'll thank you for telling us. *We want it.*

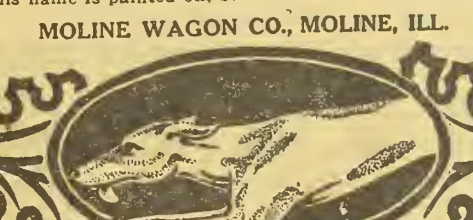

### Air-Seasoning vs. Kiln-Drying

Lumber preserves itself in its own sap, if you give it a few years time, out in the open air. Just let nature alone—that's all. The resinous portion of the sap does the work. It fills and toughens the fibers—makes lumber live, resilient, with practically no limit to its life.

Kiln-drying drives out all the resinous sap—leaves the fibers porous, dead, the prey of quick decay. Kiln-dried lumber absorbs moisture into the empty fiber-pores. *Paint can't prevent it!* Hence, a Kiln-Dried Wagon will warp, crack, shrink or swell. Just as a poor horse soon "eats its head off," so a Kiln-Dried Wagon eats up money in repairs.

There are many more wagon facts you ought to have before buying your new wagon. Get the whole story in our **FREE WAGON BOOK.** Write for it NOW. We pay postage. The Dealer who is particular about the kind of wagon his name is painted on, sells the Moline, the Ironclad.

**MOLINE WAGON CO., MOLINE, ILL.**

## 14 INCH DOUBLE SHIN STEEL BEAM PLOW \$8.65

equal parts finely powdered calomel and boracic acid. Feed the sheep generously upon a mixture of whole oats and bran, adding a little flaxseed meal or ground oil cake and, if possible, feed roots, cabbage or silage in addition to the best mixed hay or alfalfa, as it is important to maintain the strength of the sheep.

**The Wheeler Sale.**  
Mr. Wheeler's Duroc Jersey sale at Harlan, Iowa, January 16th, was a complete success from the word go. It was well attended both by local and foreign buyers and was a snappy sale from start to finish. The four high sows sold as follows: \$150, \$150, \$155 and \$185. The entire sale of forty-five head averaged \$56.12. The lowest gilt in the entire consignment sold for \$33. The list of the sale is as follows:

Average \$30.95 on twenty-seven head. Total, \$835.  
**Beware of Imitators.**  
The Combination Oil Cure for Cancer and Tumor has its imitators. The Original Oil Cure may be had of the Originator—Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind. Free books upon request.

# Old Trusty

Is the easiest to operate because it runs itself.

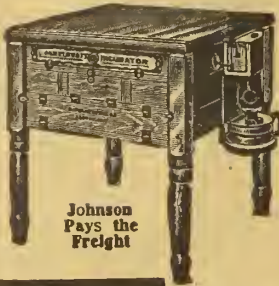

I HAVE a good many thousand poultry raisers to back me up on that statement. You know I sold more Old Trusty Incubators and Brooders than any other manufacturer last year. Yes, I've got them all going. Because I've got the machines; I sell on liberal terms; I aim to deal fair; I don't quibble on little things.

## Try 'Til You're Satisfied

Up to three months, if you want to. My guarantee's good for 5 years more; I can't be mistaken about what Old Trusty Incubators and Brooders will do for you—surest hatcher, biggest hatches, least trouble to run, safest brooding.

I'm willing to take all the chances while you are testing. Write for my 1907 catalog. My biggest, best book. I wrote it myself. Full of good poultry pictures and plain, straight talk about poultry raising. Free to everybody.

**M. M. JOHNSON COMPANY,**  
Clay Center, Neb.

Johnson  
Pays the  
Freight

## HATCH ALL Incubators Will Hatch Your Eggs

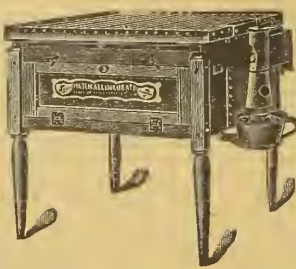

It beats the hen every time in any climate. No experience needed, because its regulator never fails to control the heat. One hatch of early chicks will pay for both incubator and brooder. Freight prepaid. Guaranteed to work.

### OUR HOT WATER, EASY TO CLEAN, BROODER

Is just the thing for the farmer's wife. It stays right out in the cold back yard and keeps warm, too. As easy to clean as the top of your table. That is why it saves and raises the chicks.

Don't buy anybody's machine until you have read our new catalog. It is full of pictures and poultry talk and free to you. The finest thing out. Write now.

**HEBRON INCUBATOR CO., BOX 8, HEBRON, NEB.**

# Success

You go straight to success if you hatch and brood right. Get machines that have proven worthy, not once but thousands of times.

## Successful Incubators and Brooders

are record makers. Nearest nature's own way. Self-operating in all things. Many thousands at work giving perfect satisfaction year after year. Get on the safe side. Incubator and Poultry Catalog Free. Booklet, "Proper Care and Feeding Small Chicks, Ducks and Turkeys." 10c. 50c poultry paper 1 year, 10c. Send for these to-day. **Des Moines Incubator Co., Dept 50 Des Moines, Iowa**  
We have a full line of poultry supplies, poultry and eggs.

## Save 2/3 Expense

More than 2/3 saved in oil and time by using the **X-Ray Incubator**. One filling of lamp makes the entire hatch. Egg tray not removed during the hatch. Glass top, and thermometer in plain sight. Lamp need not be removed during the hatch. Automatic wick trimmer, chimney need not be removed. Flame is turned down automatically when hot enough. Eggs aired and turned by simply lifting the lid. The X-Ray Incubator is entirely different from other incubators. You should know about this before buying. Catalogue free.

**THE X-RAY INCUBATOR CO.**  
28th St., Wayne, Nebraska

## 125 Egg Incubator and Brooder Both For \$10

If ordered together we send both for \$10 and pay freight. Hot water, copper tanks, double walls, double glass doors. Free catalog describes them.

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

### THE NARRAGANSETT TURKEY.

One of our subscribers, living at Promisecity, Iowa, asks the following questions:

I would like some information about a breed of turkeys. I believe they are known as the Narragansetts, but around here they are called the "blue" turkey. Now, are the Narragansetts blue, are they large and are they tame like the Mammoth Bronze? Also, could you tell me where I could get them?

The Narragansetts are not as truly a "blue" turkey as the "Slate" breed. But they are rapidly coming to the front as a market variety. They are nearly as large as the Bronze, and mature much more rapidly. Their plumage is striking, giving the effect of a black and white barring. It is claimed they lay more eggs than any other variety.

The slate turkeys have plumage of a slaty or ashy-blue, and the freer from dotting the better. Information regarding this breed is rather limited.

### Raise More Poultry.

To the Editor of The Homestead:

It seems that, according to statistics, the growth of the poultry industry is one of the wonders of the time. The rapid increase in the use of artificial methods has produced a large amount of fresh stock during the off season, so to speak; but the rapid increase in the population of the country, and especially the rapid growth of our large cities has so increased the consumption and the demand, that the increased production together with the large tonnage put in the freezers every fall and marketed during the winter has not decreased the price.

With the settling up of new lands and the cutting up of the large ranches, the possibility of low-priced beef and mutton has decreased, and there is little likelihood that we shall ever again see low-priced eggs and table poultry, or much change in the average run of prices for the different seasons of the year. People living in a village can materially add to their income by having a well-selected flock of chickens in their back yard. Whether to start with eggs or hens would depend upon circumstances and the season of the year. If the beginning is made in late summer or fall and the laying houses can be made available, I would recommend purchasing breeders. If no houses are available and the start is made during the winter there is little choice but to purchase eggs. If the start is made in the spring would purchase eggs from which to hatch the next year's layers and breeders and use colony brooders and small colony houses to rear the youngsters and do no building until the following fall.

There is but little difference in the expense if good stock is secured, but what advantage there is, is in favor of purchasing breeders.

In either case it will pay to get good representative stock of your chosen breed. If you already have some stock, that is not quite up to grade, the purchase of a good male bird will be found an economical way to quickly improve it.

To start with the best one can afford and then by selection and occasional purchase bring the flock up to an even grade of excellence is a good rule to follow.

In breeding for market poultry, when only general type and vigor is important, large numbers may be most profitably kept in the same enclosure. On general principles the larger the flocks that can be kept together the more profitably can the poultry business be carried on.

A hen as a unit is a small item. It is giving consideration to each fowl that makes for a petty business. Make the unit a flock of fifty, or a hundred, or more and the work begins to take on the dignity of a business. It is therefore a good plan to construct the house so that fowls in considerable numbers may be run together. Where the birds can get out on the ground much of the time during the winter months a house nine or ten feet deep is ample. Where the winters are severe and there is much snow it should be made at least fifteen or sixteen feet deep, and about eight

Our Book, "Poultry for Profit" showing 35 best paying varieties mailed for 10 cents.

**Delavan Poultry Farm, F. E. R. Goetz, Manager, Box 35, Delavan, Wis.**

feet wide, this being sufficient for about eighteen or twenty fowls.

For market eggs no cockerels should be kept with the layers. It is the fertile egg that stales quickly, especially during warm weather.

Place the water for the poultry on a hot brick to prevent freezing.

Suspend some cabbage with heads down where your hens can reach them.

**Mrs. A. F. S.**

## Catching Gobblers.

To the Editor of The Homestead:

In answer to your request as to how to catch young gobblers that have run wild all summer, will say that I have had very good luck by following these rules: As one generally knows a day or two beforehand that he will want to catch them, it generally is easy enough to catch two or three of the old ones on the evening before and to coop them up inside the barn. When you want to drive the gobblers in and if there is a large doorway, just set the old ones inside, near the door—ten or twelve feet inside, or it may be better to tie each of them by the leg with a stout cord or rope ten or twelve feet inside the door. These can remain as "stool pigeons," so to speak, and with several to help round the gobblers up with an old stick or brush in each hand they can be drifted, not driven, into the barn and easily caught. All large machinery

or animals should be kept away from inside near the door so as to give them plenty of space inside, and all glass windows should be covered so as to darken the room and prevent smashing the glass.

Ethan Akin.

Carroll county, Iowa.

### Getting Winter Eggs.

To the Editor of The Homestead:

This is the chief problem at this season. A flock of hens that lay only in spring and summer is not a profitable one. To be sure, the cost of an egg, both in money and labor, is more than in nature's own season for egg-laying, but the increased price makes it decidedly profitable. There are a few poultry folk that have mastered the art of getting eggs whenever they want them, and a leaf from their book of methods is of special value.

One of these men, quite widely known for his contributions to poultry literature, tells his story in a racy fashion that is very attractive. He begins by speaking of receiving a number of letters from farmers who, not getting any eggs, wanted to know from him where they could get a "laying strain." If

they could only secure a start from one of these "strains," they would be in the swim with himself and other successful egg-getters. But when he wrote them that his hens laid the year round, and that any variety would do the same if properly fed and cared for, they were both angry and incredulous, and concluded he was not the man they wanted to order from.

That his theory is the right one was illustrated as follows: He showed a poultry breeder a pen of twenty-one hens, telling him that every one was laying, yet if he wished he could stop them in a week by simply cutting down their supply of food. This was then the middle of June. The 1st of July, the hatching season being over, he cut down their supply of food over half, and exactly eight days later they ceased laying. He fed them very lightly all through the hot weather of July, August and most of September, and during that time they laid only two eggs. They moulted well. In the latter part of September he began feeding again, and in two weeks nearly all were laying, and were expected to lay all winter. While these birds were resting, eggs were six cents a dozen. (This was be-

fore the higher prices of recent years.) They were all ready to go to work with the season of greater profit.

How does this man feed his hens? Through the winter and until the end of the hatching season he gives them the following bill of fare: Oats, corn, dry bran, potato parings and scraps from the table, limestone grit, oyster shells, skim milk and water all winter, and clover, chickweed and grass added in spring and summer.

In feeding the above materials for thirty-four hens he kept oats and bran, water, grit and shells before them all the time, corn on the ear once a day, two quarts of skim milk a day, and in spring, grass, chickweed and clover once a day. The corn cannot be a hard and fast quantity. Observation must regulate the amount. If too much is fed, the birds get too fat; if too little, egg production is checked.

Note that this man fed no warm or cold mash, nor cut bone, and the only meat they received was the few scraps in the table waste, and about once in two weeks a rabbit.

The problem is to get as many eggs as possible as cheaply as we can. He

claims that we can get the eggs with a proper variety of the cheaper grains and feeds, if we supplement this with the proper care. But to attain the desired result, the fowls must be penned in winter. In cold weather they dearly love corn, and if at large where they can get it, will eat so much that no eggs will be laid. A roll of forty-eight-inch netting will pen twenty-five hens, and if well looked after a flock of twenty-five hens will lay a good many eggs. In this way the food can be properly balanced, the fowls protected in bad weather, and the whole matter be under control.

While this man has been successful, it is possible that others may vary this plan a little with equal or even greater success, though that would be difficult to do. Green bone is certainly a great egg stimulant, and all cannot get rabbits regularly for their poultry. More green food, such as beets, cabbage leaves, and the like, would seem to be desirable. But some plan like this, followed out with whatever modifications were made necessary by local conditions, would solve the problem in the majority of cases.

Mrs. S. B. Titterton.

Cairo, Neb.

### POULTRY.

## Barred P. Rocks

E. B. Thompson Strain.

LARGE, heavy boned birds for the farmer and fancier. Scored by Heimlich. Will sell at public sale, February 28th, Poland China bred sows and Shorthorn cattle. Farm joins Alta, Iowa. Telephone No. 87. Write for catalog.

## POINTERS.

—Mrs. S. E. Alley, of Greenfield, Iowa, has some fine White Wyandotte cockerels which she offers for sale cheap, to close out, in her advertisement that appears on this page.

—Mr. J. M. Cameron, of Oskaloosa, Iowa, has Black Langshan cockerels which he is offering for sale in his advertisement on this page. They are from stock scoring as high as 95 points.

—Mr. F. E. Wadsworth, of Alta, Iowa, breeder of Barred Plymouth Rocks, in ordering a continuance of his advertisement, writes: "I have fifty-five cockerels, twenty-five of which score above 90, and they are very nice ones." His advertisement appears on this page.

—Mrs. L. L. White, of Hartwick, Iowa, in furnishing copy for her advertisement which appears on page 13, writes: "I have some nice large Barred Plymouth Rocks that will suit anyone who wants good birds of large bone as well as high scores. They are of the Bradley strain."

—Mrs. Grant Davidson, of Manson, Iowa, in sending advertisement of her Rose Comb White Leghorns, writes: "Please tell your readers that I have only about twenty cockerels for sale. They are all strictly good and choice birds and will be sold at \$1 each or six for \$5 as long as they last." See advertisement on this page.

—Mr. Geo. Bonnewell, of Grinnell, Iowa, has sixty Barred Plymouth Rocks scoring 91½ points that he is offering for sale in his advertisement on this page. Mr. Bonnewell breeds this variety of chickens exclusively and he won first at the state fair on cock. The birds he is offering for sale are large boned, well barred, and Mr. Bonnewell considers them the best he has ever raised.

—Cora E. Berger, of Harlan, Iowa, whose advertisement appears on page 13, writes as follows in regard to her pure-bred Black Langshans: "In offering my cockerels I feel sure my customers will be well pleased. I have a fine bunch of White Plymouth Rocks left and a few Black Langshans and Silver Laced Wyandottes. My W. P. Rocks took two first and two second premiums at the Harlan fair, also my Wyandottes took two firsts. All correspondence answered promptly."

—Mr. Sterling Martin, of Melrose, Iowa, writing in regard to his Mammoth Bronze turkeys and White Plymouth Rock cockerels, as per advertisement on this page, says: "The Mammoth Bronze turkeys I am offering are large boned and well marked. At the Charleston, Iowa, poultry show, November, 1906, I took first on yearling tom, second on cock, first and second on hen, and second and third on pullet, and two specials on turkeys; first and special on cock and second on hen, with my White Plymouth Rocks."

—Mr. J. T. Prim, of New Providence, Iowa, is offering Mammoth Bronze turkeys and Barred Plymouth Rock cockerels for sale. He writes: "On cockerels I am offering to take the low price of \$1. In turkeys, I have the finest lot I have ever raised. In 1905 at the Union show I exhibited seven turkeys and won seven ribbons. They are direct descendants of the World's Fair prize tom, Columbus, as heavy a strain as can be found in the United States today. Write me today; all inquiries cheerfully answered." See advertisement on page 13.

About a year ago, a very interesting item went the rounds of the papers in regard to the egg industry about the town of Norfolk, Neb. Nine car loads of eggs were shipped from that city to Lowell, Mass., within a few months. Northern Nebraska was laid under tribute for this market, and the magnitude of the business may be realized when it is stated that in a single year cash between \$233,000 and \$234,000 was handled by one firm in transferring the eggs from their cold storage plant.

The single item of lumber that went into the crates ran up a bill of over \$9,000. In this section the returns from the chicken crop amounted to more than the corn crop, the wheat crop, or any agricultural product. No wonder that the farmers in that region are stocking up on hens!

Don't try for very early chicks unless you have an especially good place to brood them. A warm house is an absolute necessity for all chicks hatched before April 1st. The early spring weather is very trying, and out-door brooders will not answer in the extreme changes. It is no difficult matter to hatch early chicks, but a very hard matter to raise them. To hatch out a brood of early chicks, and then lose them means a loss of more than the eggs. There is the oil, your time, work, and, last, but not least, your own hopefulness. Don't lay yourself open to discouragement so soon in the year. For those who have every appliance for bidding defiance to nature and her rules it is all right to hatch and raise chicks out of season. But if you are just a small raiser, with limited appliances, don't!

Professor Gowell, of the Maine Experiment Station, has arrived at the conclusion that, as a rule, the earliest-maturing pullets make the most persistent layers. This conclusion was reached from

HERE'S THE GREATEST INCUBATOR BARGAIN.

**THIS 230 Egg Royal Incubator \$12.75**  
FREIGHT PREPAID ANYWHERE

East of the Rocky Mountains.

Quality and price—two things that "talk." You can't get a better incubator than the Royal at any price. It is built right, strong, substantial, will last a lifetime, and is guaranteed to hatch as large a percentage of fertile eggs as any incubator in the world. It is not a "cheap" incubator, but is strictly high-grade in every respect. Easy to operate; automatic control of heat; perfect ventilation. **ONE TRIAL HATCH FREE**, if you want it. Your money back if not satisfactory. Don't pay more for a smaller incubator; don't buy a poorly constructed, go-to-pieces incubator; don't buy any incubator until you have investigated our remarkable offer. Remember, **WE PAY THE FREIGHT**, (least of the Rockies). We guarantee the incubator under a bank bond; we give you a fair trial. We save you about half the cost and guarantee better results than incubators give costing twice as much. It will surely pay you to investigate. Write to-day for special offer:

**FREE** Handsome Catalogue of incubators, brooders, poultry supplies, poultry foods, eggs for hatching and standard bred poultry from our own farm.

Book on "Proper Care and Feeding of Young Chicks, Ducks and Turkeys," 10c, 60c Standard Poultry Paper 1 year, 10c.

**Drawer 755,**

**DES MOINES, IOWA.**

WRITE TODAY AND SEE FOR YOURSELF THE BARGAIN WE OFFER.

observations made at the station. In one instance twenty-five pullets that began laying in early August and September were selected from a large flock, the remainder of which did not begin to lay until much later in the season. The selected twenty-five pullets laid 180 eggs per head in 365 days, while the later ones averaged only 144 eggs per head.

"Of 50 chickens had with Roup, some blind, I never lost one after using Walker's Roup Cure. Given as a preventive I never had chickens do better,"—Mary Ann Orfield, Lamoni, 30c package for trial, prepaid, 25c. Walker Remedy Co., Lamoni, Ia.

## IRRIGATION AND THE SUGAR BEET.

"Where can I buy a farm?" is a question asked by thousands of young men now-a-days. Never has the desire for farm lands been so great. Thanks to the wisdom of the federal government and the enterprise of the railroads, hundreds of young farmers are being provided with farms at reasonable prices, where crops of large yield near good markets can be raised. An instance of this is the Garden City, Kan., lands. Every two weeks a crowd of excursionists visit this spot and the majority, impressed with the money being made there by those already established, buy from forty to 160 acres of these irrigated lands where sugar beets and alfalfa make fortunes for the farmer. Yet a dozen years ago this land was fit for grazing herds of long-horned cattle. To two factors, both due to the federal government's solicitude for the farmer, does this section of rich-soiled Arkansas valley owe its prosperity. The soil washed down from the mountains is one of the richest to be found on the American continent. It now grows everything from cereals and alfalfa to fruits and sugar beets. There was only one thing necessary to produce fine crops—water. A new theory of irrigation was advanced—that of pumping the water from the sheet water underlying the subsoil. Test wells were driven by the government, resulting in the most gratifying results. No longer was there any question of the water supply; the government tests proved the underflow to be inexhaustible. Now the great pumping system draws the water from this inexhaustible underground storehouse and sends it by the way of five great ditches to the farthest fields. Now the farmer does not have to depend upon the treacherous clouds, though the rainfall is not inconsiderable. An irrigation proposition is the surest farm investment to be made; failure of crops is impossible. All that a farmer has to do is to plant his crop, turn in the water, cultivate, turn in some more water, when needed, and at the proper time harvest the crop, the amount of which under these conditions can practically be told in advance. In addition to the ditches and pumping stations, the federal government is now contemplating at a cost of \$250,000 an immense storage reservoir, five miles long by two and one-half miles across. This irrigation is one of the factors of the prosperity of the Garden City spot; the other is the sugar beet. A few years ago the agricultural department of the federal government decided that there were several lands in the United States which would grow the sugar beet. This was determined by careful investigation. Prior to this time thousands of dollars' worth of sugar were imported to this country from Germany. The federal government encouraged the erection of beet sugar factories near these spots, and from that day the industry has thrived. The Garden City spot on account of its irrigation system is one of the most favored of the sugar beet producing districts. The beets grown here contain a very high percentage of sugar. A farmer does not need to know much about beet growing, as the factory furnishes the most explicit directions. In fact, the factory goes so far as to furnish labor at a definite rate of \$20 per acre for the hard work (most of the labor in connection with beet growing is thinning out the beets in the rows after the tops appear above the surface). It is possible for two men with two teams to do all but the hand labor on 160 acres of beets. The yield is usually twenty tons per acre at an average factory price of \$5 per ton. The tops of the beets are used for feed, as is also the pulp returned by the factory. The market at the local factory is not subject to fluctuation, as is the grain market. It is thus possible for the beet grower to average from \$75 to \$100 per acre. In conjunction with beet growing, most farmers near Garden City raise alfalfa. The alfalfa cuttings come just between the working periods in the beet fields. Alfalfa averages three cuttings per year. The yield per acre averages eight tons at from \$6 to \$10 per ton. This land is now selling for from \$40 to \$75 per acre, but will probably double in value in three or four years, as irrigated lands in Colorado readily sell for \$300 per acre, and yet are no more productive than these Kansas lands. The Great Western Land Company, of Kansas City, Mo., is offering 30,000 acres of this land at the

## POULTRY.

**WHITE Plymouth Rock** cockerels for sale. Fishel strain, good weight, healthy birds, pure white. C. J. Rose, Ogden, Iowa.

**WHITE WYANDOTTE** cockerels. Fishel strain for sale \$2.00, eggs \$2.00 for fifteen. C. W. H. Beyer, Grinnell, Iowa.

**WHITE Wyandotte** cockerels for sale, scoring from 91 to 94½. Mrs. J. G. Huffman, Addonon, Iowa. R. 6.

above prices. Their advertisement appears elsewhere in this edition. The company issues some very attractive literature upon their proposition and it can be had for the asking.

## POULTRY.

## Big Money in Poultry

STOCK, eggs and day-old chicks for sale. Write for my catalog.

**Mrs. B. F. Wilcoxon,**  
Fort Des Moines, Iowa.

**60 BARRED Plymouth Rocks**, exclusively. Are that from birds scoring 91½ points and cock that won 1st at the state fair. They are large bone, well barred, the best barred lot of birds we ever raised. Not a bad colored bird in our flock. Price \$1.50 to \$3.00 each. Address, George Bonnewell, Grinnell, Iowa.

## FOR SALE.

**MAMMOTH Bronze** turkeys. Fine young stock for sale. Sired by the 1st prize winner of the St. Louis poultry show. He is also a grandson of the World's Fair 1st prize winner, mated to hens scoring from 95 to 97 points.

**Jasper Lacy,** Neoga, Ill., R. F. D. 2.

**Mammoth Bronze Turkeys.** HIGH SCORING young stock for sale. Score cards furnished. Address, **GUY W. OFFILL,** Prairie City, Iowa.

**WHITE Wyandotte** cockerels, fine ones for sale cheap to close out, from stock scoring to 94. Three yearling cocks. Mrs. S. E. Alley, Greenfield, Ia.

**MAMMOTH Bronze** turkeys, large boned, well marked young toms \$5, hens \$3, pullets \$2.50, also W. P. R. cks., \$1 each. Sterling Martin, Melrose, Ia.

**Toulouse Geese** For Sale **ADA MADISON,** ANTHON, IOWA.

**BARRED Plymouth Rock** cockerels, \$1.50 each, and up. Scored by Helmrich. Eggs in season. Correspondence solicited. F. E. Wadsworth, Alta, Iowa.

**40 BREDS** hardy, thoroughbred turkeys, geese, ducks and chickens. Fowls and eggs. Prices low. Catalog free. R. R. Neubert, Mankato, Minn.

**FOR sale**, Black Langshan cockerels at \$1.00 and \$2.00 each. Parent stock scoring high as 95 pts. Address, J. M. Cameron, Oskaloosa, Iowa.

**MY ROSE COMBED WHITE LEGHORNS** are state fair prize winners. Cockerels \$1, six for \$5. Mrs. Grant Davidson, Manson, Iowa.

## DOGS.

## SCOTCH COLLIE DOGS

**FINE** puppies now for sale. Fine workers, handsome pets. Best pedigrees. Write for new illustrated catalog if interested. Several good studs at service.

**Geo. T. Underhill,** Knoxville, Iowa.

**THOROUGHbred** fox, wolf and coon hounds. Puppies to trained dogs for sale at all times. Low prices and guaranteed. S. A. Smith, Keosauqua, Ia.

## SHEEP MAN WANTED ON SHARES

**GOOD** 280 acre Iowa farm. Must deal at once. Only reliable men need apply. Send references, state amount of equipment. Capacity, honesty and experience wanted more than capital. Write at once to The Alien Land & Loan Co., Laurens, Iowa.

## DAY BY DAY

Agricola

Now is a good time of year for the young farmer, and none are too old for it, to consider what it costs us to maintain life as a Nation. In round numbers it is \$2,000,000 a day.

That our treasury department can collect and pay out two million dollars daily, and no discrepancy ever occur, is one of the marvels of business.

True, when Cleveland was inaugurated and "the books were opened" according to the campaign cry, and a different administration came into power, making an accounting necessary, there was reported a shortage of one cent, which was afterwards found behind a bureau where it had rolled unnoticed at the time.

Agricola does not vouch for this from personal knowledge, but this was the current news in the papers at the time. And no charge has been made that the government has ever lost a dollar in handling the enormous funds passing through the hands of the officials of any party.

Once more, young farmers and old farmers, remember that each second of working hours \$70 of the money of the realm has to be paid out to run this republican form of government, and all accounts kept straight, and it is seen that some one must have a head for figures and a hand for handling money with neatness and accuracy.

I notice a much increased interest in poultry raising for the last five years. It was formerly the custom to let the hens roost all winter in the door yard trees, the tool sheds, or wherever the benumbed things could hide themselves, and the farmer would wrathfully shoo them from his harvesters and cultivators, and speak things never found in the shorter catechism. But a change has come over the scene. Hens are housed, not always wisely, and they are fed, not always wisely, but an interest is taken with a marked improvement in results.

Tax receipts apply chiefly to local affairs. It has been more than thirty years since any one has paid a direct tax to the United States government. All the money needed comes through custom houses and the internal revenue branch, and more than one-third of the direct taxes stays right in the home school district. That two rural teachers have to teach a whole month for what the government collects in one

second only shows the vastness of our national affairs.

The editor of an eastern agricultural paper—and he is a good editor of a good paper—has been for several weeks telling his readers of the advantages and the disadvantages of corn belt farmers as compared with eastern farmers. He visited our agricultural college last December and talked with our people. He says that they of the east have a great advantage over the corn belt farmer in the matter of prices, that corn here is worth thirty cents and there it is sixty and up. But the wise farmer in the central West is getting sixty cents and up for his corn by the use of the animal which divides the hoof, but chews not the cud, and he has more money in the bank than has the eastern farmer, and his land will sell higher, too.

A fright, a chill, a sudden fall of temperature, will cause a milk shrinkage. All of these can be guarded against except the last, and that can be modified by good shelter so as to avoid loss of money. For should there be a slight shrinkage there are so many cows which will suffer more and shrink more because their owners are shiftless that the increased price of cold weather milk will offset the slightly smaller yield.

And the fright, chill or sudden fall of temperature cuts just the same caper with the hen. Singularly enough, while egg production and milk production, require so much in common, there is such a thing as too much sun in the hen house, but not in the cow barn. Sunshine, full and free upon the cow's back is grand, but a muslin window curtain for light to filter through may be better for a hen house.

The country merchants say that they have been handicapped in buying potatoes because the farmers grow different kinds, and a car load of mixed potatoes will not sell as well as a car lot of straight color and quality. A loss of three cents a bushel is quite a loss, but the dissatisfaction of getting less than the regular market, and the suspicion that the dealer is pocketing more than his share is something that lingers in memory as a nest egg for a grudge.

The use of tankage in fattening pigs may or may not make pork cheaper than to get along without it, but it surely pushes the pig faster and gets him to

# PILES NO MONEY TILL CURED.

**DRS. THORNTON & MINOR, 3639 Olive St., St. Louis, Mo., and 1010 Oak St., Kansas City, Mo.**

market earlier, and this may be what you are anxious to do.

Corn and cob meal, balanced with oil meal, is seemingly better for a milk ration this winter than to balance with bran. And this is because bran is unreasonably high in price.

I never yet saw a man or woman who was satisfied with an incubator which would not hatch eggs. The men or the machine which does things is the right kind regardless of looks, but appearances have a value when added to usefulness.

Secretary Wilson meant well in introducing the Guatemalan ant, the natural enemy of the cotton boll worm, but the ant dies out in our winter and so proves a failure. The strong thing about Wilson is that one failure or a dozen does not make his administration a failure, because it is so big and strong that successes are sure in some lines, and the successes stay right with us.

Of the 6,242 employees of the United States agricultural department, only 403 died within the last year. Pretty healthy work is agriculture, even for the professional workers.

There is one thing in which eastern farmers can beat us—that is the quality of sweet corn. Eastern canners pay twice as much as will the western canners, and they can do it because the eastern corn will outsell western corn. But at the price paid for western corn the farmers find growing it so profitable that factories have to refuse acreage rather than solicit it. Cash for the ears and a good crop of fodder which alone pays all expenses is an argument which is convincing.

One hundred years ago people said

that anthracite coal would not burn. They did not know how to burn it—that was all.

Chance is the common name for unfathomed depth of law.

The pig and the cow is sometimes a more profitable combination than the calf and the cow. But the calf must be in the game, even if he is made to die young.

Every rotation which does not include clover is defective for Iowa use.

Regardless of the date of birth, when a man begins to live in the past instead of the present he becomes a back number.

If your hogs are growing fine and small boned it is high time to get rid of that strain and commence anew.

At present there is no tree inspection law in Kansas, while most of the states have one. Kansas nurserymen can ship stock to very few states unless the shipment bears a tag that no fungous diseases or insects appear in the orchard or nursery. At a recent meeting of the State Horticultural Society it was planned to ask the legislature to create the office of tree inspector with an assistant or two and to have about \$3,000 a year appropriated for salaries and expenses. The fees which would be charged for inspecting Kansas nurseries would pay part of the salaries. In addition to inspecting the local orchards and nurseries, it would be the duty of the inspectors to examine trees brought in to the state and require a certificate that the trees were free from disease or insects before being allowed to be shipped to Kansas. Edwin Taylor, president of the society; Walter Wellhouse, secretary; E. E. Yaggy, W. H. Underwood and J. F. Cecil were appointed a legislative committee to draw up proposed bills and work for their adoption by the house and senate.

### HIGHLAND PARK COLLEGE, DES MOINES, IOWA.

The last half of the school year begins February 19, 1907. There are two full quarters of twelve weeks each yet in this school year. New classes will be organized in all preparatory, normal and college work, also in all departments of engineering, pharmacy, music, oratory, commercial, shorthand, pen art and telegraphic courses. Students can enter at this time quite as well as at the beginning of the school year.

### IS BOVINE TUBERCULOSIS CURABLE?

An interesting article on the question showing how it is claimed that the seed of a well-known wild flower is a positive germicide and not only cures in the earlier stages, but that a dollar's worth of the seed will render a whole herd actually immune for a long time. The importers of the remedy, the Mutual Mercantile Company, of Cleveland, Ohio, offer to send the leaflet free to any reader and will put out a remedy on a strict guarantee.

## Free Book For Men

**64 PAGE BOOK FREE**

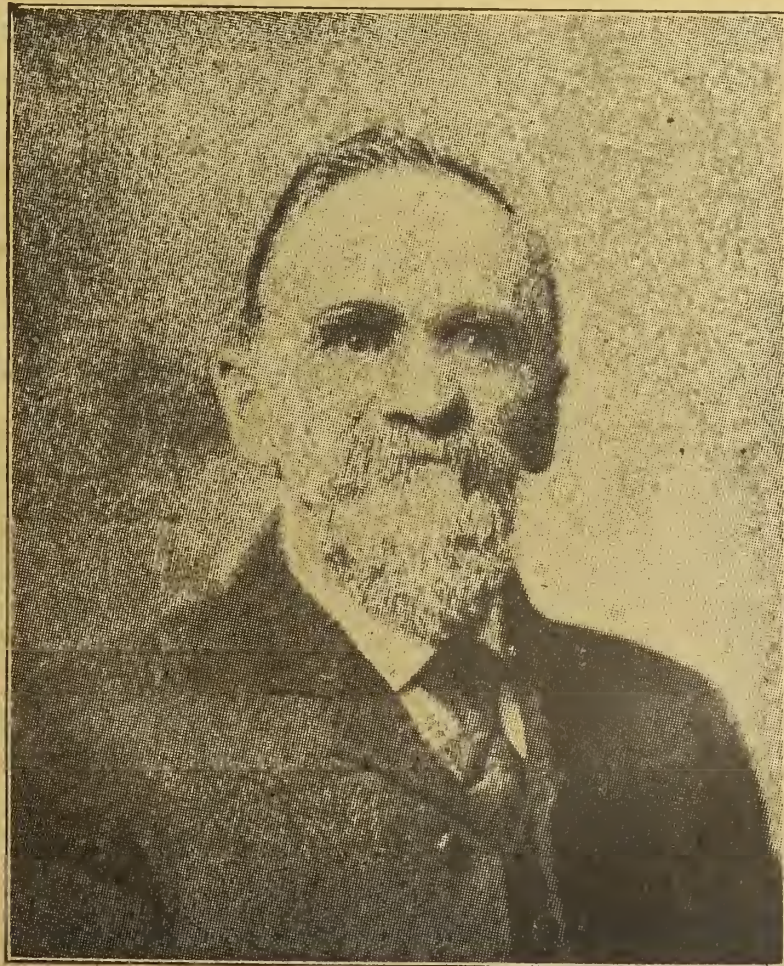

A handsome illustrated book which explains all about diseases of men such as **Nervous Disorders, Weaknesses, Blood Poison, Skin Diseases, Prostate, Pelvic and Urethral Disorders, Piles, Kidney and Bladder Troubles, Etc.**

This book tells the various stages of these diseases, at what stage they become incurable, and tells of a simple and effective treatment for the cure of the ordinary cases at home. This book tells how men who have broken nature's laws, become weak and run down can regain their strength and vigor and many other important facts which men should know. **Those interested should write for the book today.** Same will be sent free in plain sealed envelope. Address,

323 Rollins Bldg., Des Moines, Iowa

## Cancer Cured No Knife, No Pain

People I have cured of cancer prove the astonishing results of my treatment. Peter Keagan, Galesburg, Ill., writes: "It is only a question of time—I must die." Doctors said "no hope." My new method was used and to-day Mr. Keagan's cancer of the throat is healed, and he is well. I have made wonderful cures without pain, operations, sticky balms, oils or plasters. My treatment is clean and wholesome. It gives instant relief from the smarting, itching and terrible burning pain, destroys the offensive odor and has cured cases given up by the family physician and specialists. If you have cancer or have a friend who has cancer, write me to-day. Full information, proofs and advice given without charge. Address **DR. RUPERT WELLS, 2165 Kadol Bldg., St. Louis, Missouri.**

Mr. Fred Kraschel, of Macon, Ill., one of the Pioneer breeders of Duroc Jerseys. He is associated with his son, Mr. M. A. Kraschel, in the breeding of Durocs, and is universally respected by all those who have the pleasure of his acquaintance. These gentlemen extend an invitation to all readers interested in the Duroc to be present at their annual brood sow sale, on February 7th. See field notes.

OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

The Dairy Cow's Ration.

To the Editor of The Homestead:

We are living in a scientific age. The day of feeding promiscuously is passing and the man who feeds haphazardly is being forced to the background. The man who undertakes to feed dairy cows successfully enters a field of inexhaustible research. He not only has to do with the chemical analysis of the foods, but the amounts to be fed to each individual, the cost of the same, the effect they have upon the animals and the results at the pail.

The dairy cow is the most complex of all animals. By one system of feeding her master can stop the machinery of secretion and put her on the broad road to the slaughter house, or by another system he can awaken the dormant organs of secretion and develop them up to the limit of their natural possibilities.

It is not our purpose to leave the impression that all cows will be profitable under judicious feeding, for all cows do not inherit milking qualities; but, on the other hand, cows that are organized to yield great returns under wise feeding can be ruined under careless and ignorant methods of feeding.

The first thing necessary in the feeding of a dairy cow is to get something she likes. A feed may contain all the essential elements necessary to the production of milk—chemically. It may be a perfect balance and yet fail because the cow does not eat it with a relish. Then there must be a balance, and this phase of the question calls out too lengthily a discussion of this article. There must also be about a certain amount of digestible matter, neither too bulky nor too concentrated. All of these things and many others we wish to explain in future issues of this paper.

O. O. Brewbaker.

Polk county, Iowa.

The Silo—A Factor in Farm Dairying.

To the Editor of The Homestead:

At present the silo is one of the most economic factors in progressive dairying, and in the future it will be indispensable. In conversation it is common to hear the statement that land has reached its maximum value; nevertheless, it is steadily rising in price. This will continue as long as the productivity of the soil can be increased and as long as more economical uses can be made of its products.

In the United States there were raised in 1906, 2,881,000,000 bushels of corn. Unfortunately too many people regard the ear as the only real valuable part of the corn crop. It is the part which most readily can be exchanged for dollars and cents, but where live stock are kept the ear only represents two-thirds of the value of the corn crop. The stalks, if properly taken care of, are the other third.

A great deal of corn is cut and

shocked. The handling of this fodder is laborious and wasteful. The feeding of it means exposure to disagreeable winter weather. About thirty per cent of its feeding value is lost, and although it is green when fed, it lacks succulence and palatability.

The silo will reduce the present waste in our corn crop to a minimum and furnish a cheap, succulent and palatable feed. The silo is no new-fangled idea; it is an old established fact. The first silos were underground pits, in which green crops were stored for future use. The same principle was involved as in our round, modern silo. The essentials were to cut the crop at the proper time and to store it in such a way that air was excluded, preventing decay.

Since the introduction of the silo into America in 1876, it has steadily gained popularity, especially in dairy sections. In parts of Wisconsin it is as common as the corn crib in Iowa. By the use of the silo the greatest quality of feed can be stored in the smallest space. Three tons of silage can be stored in the same space as one ton of hay. Twelve tons of silage can be raised on an acre. Three tons of silage are equal in feeding value to one ton of hay. On an average, one and one-eighth tons of hay is raised per acre. Thus the food value of an acre of silage is two and one-fourth as great as that of an acre of hay. Besides,

the silage is a more succulent and palatable feed. It acts as a tonic, and keeps the animals in better health and thrift. It is more digestible. Dry corn fodder contains a large portion of the same constituents found in corn silage, but it is hard and dry, unpalatable and less digestible. Feeding ensilage increases the fertility of the soil as more stock can be kept per acre.

Much silage is fed in summer in order to save pasture. It is a safeguard in times of drouth, but it is especially valuable for making up a winter ration. In the late fall and winter, prices on dairy products are the highest. Large quantities of high-priced commercial feed are used. This can be avoided when good silage is at hand. It furnishes a cheaper, more succulent and better-relished ration. In a feeding test, where the supply of silage was exhausted, it was impossible by any soiling crop, or combinations of feeds, to prevent a decrease in the milk production.

Why are there not more silos in the corn belt? Some of the reasons are: first, the initial cost of the silo and the machinery necessary for filling. It should, however, be remembered that the silo is a permanent structure and like a corn crib, a granary or a barn, will last for many years. Second, people often come to wrong conclusions from very limited and narrow observations. Suppose

a silo is erected in a neighborhood. Some defects in the construction or some fault in filling causes a large part of the silage to spoil. The conclusion is that the silo is no good. But the failure occurred because the principles involved were not thoroughly understood. Third, many farmers are anxious to have money in the bank. Almost every bank holds large sums of farmers' money. If this is properly invested on the farm it would bring more profit. Fourth, the real value of the silo is only fully appreciated through experience.

In the future, high-priced land, intensive farming, dairying, and the silo, will go hand in hand. Fred Rasmussen.

Iowa Experiment Station.

The Balanced Ration.

To the Editor of The Homestead:

While compounding rations is usually considered a scientific process, we will endeavor to eliminate as much as possible everything of a technical nature and make as simple and practical as possible.

I believe the great drawback to the average dairyman or dairy farmer in feeding a balanced ration is three-fold, namely, expense, lack of interest and the apparent complication of the thing. As to expense, if a balanced ration is wisely chosen it is but very little more expensive, if any, than a heavy feed of carbohydrates and fat, while the one will have the tendency to increase and maintain a milk flow and the other to make fat on the animal's body, instead of putting milk in the pail.

For example, we will name two rations commonly used: Corn silage, thirty pounds; clover hay, ten pounds; bran, four pounds; corn-and-cob meal, four pounds; oil meal, three pounds. With corn at thirty cents, clover hay at \$3 per ton, bran \$20 per ton, silage \$1.50 per ton and old process oil meal at \$23 per ton, this would make a ration worth close to fifteen cents per day. If you do not have silage you will have to substitute fodder, which will not increase the cost any, but will not give quite as good a flow, nor is it nearly so convenient to feed. This ration will bring a cow to her maximum flow.

Now, the ration usually used is corn, broken, and clover hay, about twenty-five pounds of the former and fifteen pounds of the latter, which is a very

Make Dairying Pay

Just consider the part the cow takes as a producer for the farm. She not only furnishes in milk many times her own weight in a single year, but reproduces herself annually, and her off-spring is either sold to the butcher or raised to go through the same process of production for perhaps two or fifteen years to come. But to keep cows or run the dairy requires care. You can't have milk without furnishing its equivalent—feed. And the skillful dairyman will carefully increase the ration for his cows until he finds the limit of each animal's digestion. At this point is where the profit lies.

Difficulties, however, are often encountered in arriving at the digestive capacity of a dairy cow. Going off her feed, Indigestion, Milk Fever, Mammitis are the consequences, but where the proper tonics are administered the digestive organs are strengthened and improved and the largest possible amount of food is digested and converted into milk.

DR HESS STOCK FOOD

Is the medicinal stock tonic and prescription of Dr. Hess (M.D., D.V.S.). Is especially designed to make cows give more milk, market stock grow faster, horses do more work, and to relieve minor stock ailments. It is not a food in itself but makes all the food of the farm produce more milk, more meat and more work.

Professors Quimman, Winslow and Finlay Dun, the most noted medical writers of the age, tell us that bitter tonics improve digestion, iron makes blood and the nitrates assist nature in expelling poisonous material from the system. Such ingredients make up Dr. Hess Stock Food—Isn't this pretty strong proof? Sold on a written guarantee.

100 lbs. \$5.00; 25 lb. pail, \$1.60.

Smaller quantities at a slight advance.

Except in Canada and extreme West and South.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to be found. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic and this paper is back of the guarantee. Free from the 1st to the 10th of each month—Dr. Hess (M.D., D.V.S.) will prescribe for your ailing animals. You can have his 95 page Veterinary Book any time for the asking. Mention this paper.

DR. HESS & CLARK, Ashland, Ohio

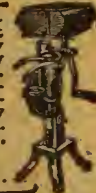

Also manufacturers of Dr. Hess Poultry Pan-a-cure and Instant Louse Killer. Instant Louse Killer Kills Lice.

A Davis.

Cream Separator direct from factory at factory prices, costs half as much as most others. No agents' fees to double prices. Investigate our liberal selling plan and the simple three-piece bowl machine. Gets every drop of cream. Tank 3 feet 7 inches high. Write for money saving catalog No. 118.

Davis Cream Separator Co. 541 North Clinton St., Chicago, Ill.

The Cream Separator You Use Is It Anything Like Ours?

Does it require a special kit of 14 or 15 tools or can you take care of it with only the bowl wrench?  
Does the bowl run "in the open" so that it may be stopped instantly, or do you have to wait for it to "run down"?  
Does it turn hard or easy?  
Does it give you constant trouble, necessitating numerous visits by an expert to make it "stick"?  
Does it satisfy you or not?

Does it have a bearing at the top of the bowl, as well as at the bottom, thus overcoming vibration?  
Does it deliver both skim milk and cream from the bottom of the bowl, so that the bowl drains itself?  
Can you stop the bowl, take it from the machine, clean it thoroughly and replace ready for work again, in three minutes?

The OMEGA CREAM SEPARATOR

is the only cream separator that really meets and fills all the requirements of the modern farmer who wants a modern machine. We want to show you why and prove our claims. That's all we ask. Don't you think it worth investigating?

Send today for catalogue, guaranty and our booklet, "More Milk Money."

The Omega Separator Company, 35 Concord St., Lansing, Michigan.

wide ration, besides lacking in variety. The result of such a ration is to increase fat and diminish the flow of milk, or at least to hold the milk flow down. The cost of this ration is sixteen cents per day at the prices named above.

The average farmer or dairyman does not stop to count the cost in feeding his cows. He argues that he has the clover and corn and he would have to buy by-products to feed a balanced ration. But, my dear farmer, would it not be good business sense to sell some of that corn and buy by-products to balance the rest of your corn and thus aid nature in accomplishing the very most for you?

But you ask, "What do you mean by a balanced ration?" Simply this: A combination of feeding stuffs containing the various nutrients in such proportions and such amounts as will nurture the animal for twenty-four hours with the least waste of nutrients.

In order that here should be little waste of nutrients, foods should be selected in making up the ration that are digestible. By the digestibility of a food, we mean that portion which the digestive juices of the animal can render soluble and thus bring into a condition which the system can make use of. The digestible portion of the various foods varies from about 40 to 96 per cent. The rest is simply ballast. The more ballast a food contains, the more the value of the digestible portion is reduced. So remember an animal lives on and produces, not from what she eats, but from what she digests.

O. O. Brewbaker.

THE USE OF WARM FEED.

The following communication has been received from one of our subscribers, Mr. Louis Stensland, of Story county, Iowa:

I will give my experience in warming swill for hogs. I built a shed on one end of my hog house 10x12. In this shed I put a steel tank nine feet long and thirty inches wide. This tank stands two feet inside of the shed and the rest outside. As I keep my calves in the hog pasture, they can drink out of the tank on the outside. I now put in a steam feed cooker, and around this cooker I put two barrels, or more if I need them. In this way I can warm the swill in the barrels and also the water in the tank. For slop, I have corn, oats and rye ground, equal parts. I take a bushel basket half full of this ground feed and the other half shorts and a half pail of oil meal and put in a barrel of water and steam it about an hour. What I cook today I feed tomorrow, as it will have to stand for a time to cool off.

Now don't undertake to do this unless you can do it every day. There is nothing that will make a runt quicker than to feed a warm slop one day and a cold one the next. Fall pigs do as well on this feed

in winter as spring pigs will in summer, if they have a dry place to sleep in. I feed this the year round. I market my hogs at eight or nine months of age at a weight from 250 to 300 pounds. The only trouble with this if fed to brood sows that have plenty of range is that they get too fat, but I have never lost a sow at farrowing time. I sow a patch of rye for pasture for my sows every fall, and they never have any trouble farrowing.

This, in our opinion, is an exceedingly good way to handle hogs in winter. We have said repeatedly that we did not believe in cooking all the feed that was used, but that one meal of warm slop fed in the winter is not only palatable, but it has the effect of keeping the digestive system in the very pink of condition, so that the greatest possible use is made of the dry foods fed.

One has to be a little careful not to feed slop that is scalding hot. However, by steaming a barrel of slop one day and feeding it twenty-four hours later there is no danger of doing harm in this way.

Hess Angus Sale.

If the initial Angus sale of 1907 is indicative of the trend of prices that will prevail, the Angus men will reap handsome profits. The offering of forty-seven head consigned by Mr. H. J. Hess in his first public sale and the first well-advertised Angus sale of the year sold for an average of \$150. There were no spectacular prices paid, the top figure being \$390, offered by Messrs. A. C. Binnie & Son for the yearling show heifer, Blackbird of Quietdale 4th. Sixty-five dollars was the low mark, showing a decided uniformity of prices. Mr. Matt Baker, of Manning, Iowa, paid the next highest price, \$310, for Blackbird of Quietdale 3d. The attendance was generous, including numerous Angus breeders from over Iowa and Minnesota. Mr. A. G. Messer, of Grundy Center, Iowa, was the most liberal purchaser, taking a dozen head, among them some of the most desirable in the offering. Mr. Fred J. Nelson, of Sheldon, Iowa, topped the bulls in the purchase of Birtley of Quietdale at \$205. The bidding was spirited from the outset and the prices were appropriate. Possibly the bulls could have sold a trifle higher, but the fact that a considerable number of young things of both sexes were listed renders the average a good one. The sale was held in the sale pavilion in Waterloo and was conducted by Auctioneers Igo and Holland, assisted by Messrs. Judy and Lynch. The list of those selling for \$100 or more follows:

COWS.

Ethel of Quietdale, two years, sire Baltimore of Glendale, T. E. Wagner, Mason City, Iowa ..... \$180

THE OLD PAN WAY

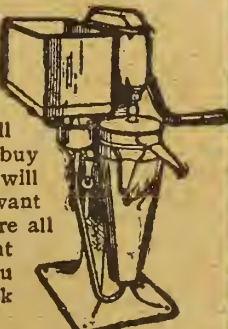

50%  
MORE  
CREAM

The old pan way of raising cream don't pay—it's too mussy and fussy—too much work for the women. And it don't pay in dollars and cents because you actually lose 50 per cent of the cream you ought to get. You can increase your cream product about 50 per cent over pan setting; 33 per cent over cans set in cold water; 25 per cent over patent creamers or dilution cans by using the

DON'T  
PAY

SHARPLES  
TUBULAR SEPARATOR

Besides you can skim the milk immediately after milking—save the handling and the expense of storage. A good milk-house costs more than a Tubular and isn't half so profitable—even if you already have the milk-house it will pay in labor saved, in crocks and pans saved, and the increase in cream will be all clear profit. Of course, when you buy a separator, you want the one that will get you the most profit—you'll want the Tubular—the reasons why are all given in a book which you will want and which we want to send to you free if you will only write for it, ask for book H. 121

Mr. Mac Tuttle, Danville, Ill., says "The first week we used the Tubular we made a gain of 12 lbs. of butter from five cows."

THE SHARPLES SEPARATOR CO.,  
Toronto, Can. WEST CHESTER, PA. Chicago, Ill.

WHO IS RIGHT  
ABOUT THE BEST  
CREAM SEPARATOR?

Every cream separator manufacturer, old and new alike, claims that his separator is better than any other. WHO IS RIGHT? Who can honestly make such a claim? We will leave the answer to you, but wish to submit a few facts for your consideration. The DE LAVAL machine was the original separator and it has been manufactured for twenty-eight years, twice as long as any other machine. The world's best inventors and mechanics have been constantly working and trying to better it and thousands of dollars have been spent annually in this effort. The DE LAVAL has for many years been thoroughly tested, tried and used in every civilized country in the world and under every conceivable condition. Over 800,000 have been sold to date, several times all other makes combined. From these tests and experiences the DE LAVAL experts have learned what a cream separator must be to be called BEST. The DE LAVAL machine of today represents this knowledge. Every feature of its construction is the result of years of study and practical experience and the expenditure of vast sums of money. Nothing has been left undone that would help to make and keep the DE LAVAL the BEST of all separators. No separator built today contains any feature whatever, not used in the DE LAVAL, which has not at some time or other been tried out by the DE LAVAL experts and cast aside for something better in the present DE LAVAL construction. Consider these facts well, consult every experienced separator user you can, learn all that is possible about cream separators and then tell us WHO you think is RIGHT. Meanwhile send for a DE LAVAL catalog of separator facts and reasons, to be had for the asking.

A Cream Separator  
Without Cost

That is What We Offer You in the

Iowa Dairy  
Separator

Repeated tests have demonstrated that the "IOWA" is the only Separator that takes out every particle of the cream. Therefore, given a certain amount of milk, for a specified length of time, and the additional amount of cream secured will pay for the machine.

Gold medals at World's Fair and Portland attest the superiority of the "IOWA" over all others.

Made in all sizes from 250 to 750 pounds. Your name and address on a postal card will bring you a handsomely illustrated booklet with full information, price list, etc. Write at once, for every day that finds you without an "IOWA" finds you losing money. Ask for catalog 25. Address,

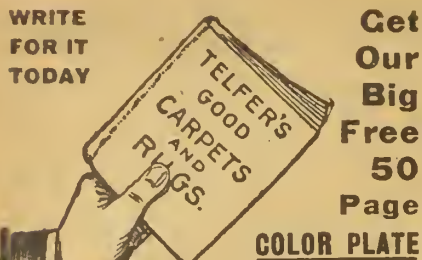

The Iowa Dairy Separator Co.,  
Waterloo, Iowa.

Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas, Louisiana, Alabama and Mississippi, etc.

The Iowa Central Railway will place on sale on the first and third Tuesdays of each month, January to March, inclusive, one-way tickets at the extremely low rate of only one fare plus \$2 for the benefit of homeseekers and settlers.

Don't fail to call on Iowa Central agents for full particulars, rates, etc., or address A. B. Cutts, G. P. T. A., Minneapolis, Minn.

### WITH THE EDITOR.

The daily papers which record such a multitude of uninteresting things occasionally contain an item which furnishes food for thought. The New York dailies in particular are worth watching. Lately among their news items was a modest notice to the effect that the Young Men's Christian Association which has classes in a great many branches, had added one offering, a course of instruction on the principles of investment. The great difficulty confronting the thrifty man whose income permits of laying a little aside for rainy days and old age is how best to invest his savings. On the face of it this proposition would seem a good thing, but mark what follows. Mr. J. G. Phelps Stokes, who is a socialist, though the possessor of wealth, objects to this new class opened by the Y. M. C. A. He reminds us that it is unchristian to make money through the ownership of capital; that riches should be the reward of social service.

In the millennium the services men render to the social body may receive adequate recognition, but the millennial dawn has not yet reddened the East. Whether socialism will hasten it is a question increasing numbers are considering. The New York Independent thinks "there may well be other and better ways of reducing the failures in the economic struggle," but it criticizes Professor Laughlin for a recent utterance in which he termed socialism "the philosophy of failure." The Independent says: "Professor Laughlin meant this description for condemnation. Inadvertently he has hit the nail squarely on the head and driven it in a good long ways; a nail in the hemlock sarcophagus of privilege."

Continuing its criticism of Professor Laughlin's remarks the Independent makes this noteworthy statement: "Failure in the economic struggle for existence is one of the great social phenomena of the age. It calls for explanation. Wealth is concentrating in vast fortunes owned by relatively few possessors. Thousands of once independent business men are passing into salaried positions and millions of wage earners in America fail through thrift and honesty to rise in the social economic scale. Individuals make their way up, but the chances of success for the many are not thought to be multiplying. Under these circumstances it is inevitable that we should have philosophies of failure and that they should command attention."

As there is a variety of ideas abroad as to what socialism is it may be well just here to quote a few lines to give a general idea of the term as understood in America: Separation of the capitalist from the capital, by transferring capital from private to public ownership, and the attempt to make services and rewards bear some just relation to each other is the socialist's interpretation of Christ's command to "sell all that thou hast and give to the poor."

Apropos of socialism if ever its tenets obtain there will be no need of old age pensions such as the state superintendent of schools in Kansas is advocating for teachers. Mr. Dayhoff finds that the teaching profession is not attracting, or holding when it does attract, the class needed to carry on the work of the schools successfully. He is doubtless correct in thinking there is some connection between this fact and some others he has discovered. For instance in Kansas, according to the report, men receive an average of \$48 a month and women an average of \$40 a month. His report goes on to show that a hired farm hand who receives \$20 a month and board is better paid financially than a man who teaches school. Is it any wonder that there is such a dearth of good teachers? Any wonder that so many teachers are ambitionless men of small attainments? For such pittance as are paid what quality of teachers has the public a right to expect? With such teachers as the public has a right to expect for such pittance what must be the future of education in the country? If the public will but think upon these things it will realize that while old age pensions are a move in the right direction, something much more far-reaching must be attempted if the teaching pro-

## A Tank It Pays to Buy

Don't confound the "Bushnell Pump Co.'s" tank with other tanks. The Bushnell is in a class by itself. Here are some of the reasons:

Big, thick staves that are made to fit from edge to edge all the way down. Machinery makes every joint perfect. Lumber especially selected for tank purposes, not cast-off pieces from furniture and other factories. Every Bushnell tank tongued and grooved. We're ready with the machinery to do it right. Other tank builders do it just occasionally "to meet Bushnell Pump Co. competition" doing it then as best they can. Strong, heavy steel hoops. We give them to you round or flat. Adjustable patent draw lugs; look at the picture and you'll see what we mean. You can always keep your tank hooped up snug and tight. Galvanized hoops when wanted. Tank lasts a lifetime.

We can give you any size you want—2 to 16 feet high, 4 to 16 feet in diameter. Capacity from 5 to 760 barrels.

Don't forget the long line of Bushnell Wood and Iron Pumps, Steel Tanks, Iron Pipe Fittings and general line of Steam and Well Supplies. Write for descriptive matter. If your dealer does not have our goods in stock, send us his name and address.

**THE BUSHNELL PUMP COMPANY, Dept. C, Bushnell, Ill.**

**The Acme Harrow**

Well pulverized soil is the most important requisite of a good seed bed. No field—no matter how rich—is well prepared for seed unless the ground has been thoroughly pulverized. Does the old fashioned spike or spring toothed harrow do that? It does not. It does tear up the grass, weeds and trash the plow buried, and which should stay buried. What you need is the **ACME All Steel Riding Harrow**—the only harrow built on scientific principles. Flat steel spurs go ahead of the Acme coulters or teeth, crushing and leveling every clod.

Then the coulters like long plowshares follow, turning the soil both ways and mixing it. When they get through with it the soil is as fine as a Harrow can make it and presents all its food to the seed. Think how much easier on the team the Acme Harrow is! The old harrow dragged bluntly against the soil. The Acme cuts smoothly through. Then the Acme is very convenient to move from one field to another, as a lever raises the coulters from the ground. One man can put the harrow in a wagon or sled with ease. The Acme is the lowest priced harrow made and is built to last. Write for free book, "A Perfect Seed Bed." Written by distinguished agriculturists. A postal to me and it will come.

**Try the Acme FREE.**

**DUANE H. NASH, Box 44, MILLINGTON, N. J.**

**LITTLE STAR Grain and Seed Cleaner**

A money-maker for the farm. Increases yield of every acre 5 to 15 bushels. Pays for itself every year with every 20 acres tilled. Has 7 complete riddles, 4 double wire screens, 11 in. all, and does the grain and seed work for a 160 acre farm perfectly. Has double the screen surface of any machine of its kind. Separates, cleans and grades all kinds of seed, performs all three processes at once and will perfectly clean, separate and grade any four similar seeds at the same time no matter what proportion the mixture. The cheapest, most efficient grader made. Our "Corn Grader" screens No. 8 and 9 provide an absolutely even "drop" from the "Corn Planter," edge drop or otherwise. You are sure of the exact number of grains in a hill. Removes all weeds and noxious seeds including thistles. No shifting riddles nor change of adjustment. Does work of three machines, sells for the price of one. Price complete, freight paid, \$19.98. Order today. Every machine guaranteed.

**Hall Grain Grader Co., 224 Locust St., Winfield, Ia.**

**SMOKE YOUR MEATS IN THE NEW WAY, USING WRIGHT'S CONDENSED SMOKE**

A liquid made from hickory wood. Imparts the delicate flavor that is peculiar to meats smoked with hickory wood. USED BY APPLYING THE CONDENSED SMOKE WITH A BRUSH. Send 10c and names of five who cure meat and we will mail you sample free. Sold only in square quart bottles with metal cap. Never in bulk. At drugists, 75c per bottle. Bottle smokes a barrel on curing meats. BE SURE TO GET Wright's Condensed Smoke. Made by THE E. H. WRIGHT CO., LTD., 109 W. FOURTH STREET, KANSAS CITY, MO.

fession is to attract—as the necessities of the situation demand it should—men and women of fine gifts, thorough training and high ideals.

#### LITTLE HELPS BY THE WAY.

Live in the sunshine; don't live in the gloom; Carry some gladness the world to illumine; Live in brightness, and take this to heart, The world will be gay if you'll do your part.

Live on the housetop, not down in the cell, Open-air Christians live nobly and well. Live where the joys are, scornful defeat; Have a good morrow for all whom you meet,

Live as the victor, and triumphing go Through this queer world, beating down every foe.

Live in the sunshine; God meant it for you! Live as the robins and sing the day through.

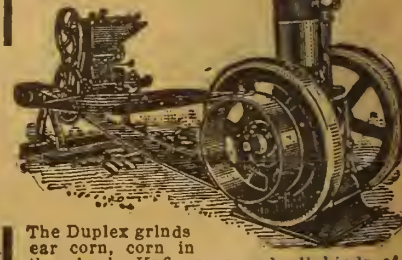

—Margaret E. Sangster.

#### VISIT THE SCHOOL.

Let me say to mothers, visit the schools oftener. Your children will not get the greatest good from the school unless you are interested in their work. Both teacher and children will welcome you and feel encouraged and strengthened to do better work because of your interest. And you will see for yourselves that the newer methods and devices for teaching the various subjects are not such folly as the stay-at-home mothers would have you believe. Read a teachers' magazine sometimes (you can borrow one if you can't afford to buy it) and you will find much in it that will be helpful as well as interesting to you. Teaching is a great work. Too often it is hindered through unjust criticism and condemnation arising from ignorance. Be sure you know the truth of a matter before you condemn the teacher.

## THE KELLY LINE

The Kelly Simplex Air and Water Cooled Engines and Kelly Duplex Grinders

The Duplex grinds ear corn, corn in the shuck, Kaffir corn and all kinds of small grain. Especially adapted for farmers and stock feeders' use. Write for free descriptive catalog, showing our full line of engines and seven different sizes of mills. The engines are shipped all set up and ready to run.

**The O. S. KELLY WESTERN MFG. CO.**  
DEPT. E, IOWA CITY, IOWA.

Most stories have more than one side, and what is only a misunderstanding may become much worse if we accept a half truth. Remember that the teacher can do much better work if you understand each other and are working in harmony for the good of each child.

**RURAL SOCIETIES.**  
The farmers' literary or reading circle can be made a useful source of information, and

these meetings may be successfully carried on, especially during winter months, when there is time for reading and writing. The members are invited to meet at different homes during the weeks of literary work to discuss topics of current interest. Papers should be prepared and read. To prepare a good paper will necessitate some diligent study, but if the farmer's table is filled with a goodly supply of agricultural papers and books of history, travel and various other good, wholesome literature, a wide range of thought is accessible and something appropriate for the club meeting can be easily and quickly selected.

Those not wishing a desultory method of reading may select a thorough course, such as the Chautauqua and Bay View Reading Circle.

Serving light refreshments to the guests present at the evening meeting may be made an enjoyable feature of the occasion.

**SMILES.**

An applicant for the post of mistress in a country school was asked: "What is your position with regard to the whipping of children?" She replied: "My usual position is on a chair with the child held firmly across my knees, face downward!"

The Married One—Oh, we settle our differences by arbitration.  
The Single One—And who arbitrates?  
The Married One—Oh, I do, of course.

"Dear me, Tommy, you eat a great deal for such a little fellow!" remarked Uncle John to his nephew.  
"I s'pect I aren't so little as I looks from the outside!" was the ingenuous explanation that Tommy made.

**CURING MEATS ON THE FARM.**

Meats cannot be long kept, even in moderate weather, but beef may be corned, or pork cured in the following way, and it will be sweet, and wholesome:

For 150 pounds of meat, take one pound of granulated sugar, one quart table sirup, three ounces of saltpeter, four ounces of sal soda and rock salt to make brine that will float an egg. Use water enough to cover the meat well. Boil and skim until it is white, then cool until milk-warm and pour over the meat. Change the position of the meat in the barrel each week.

In three weeks, take out the meat and boil the brine, and skim, add one-half of the above ingredients and when it is cool, pour back on the meat. If pork or dried beef, take out in two or three weeks and smoke with cobs or hardwood.

If you follow the directions exactly you will never lose any meat and will have as fine meat as you can find on the market

anywhere. You must not use barrel salt if it has lime in it; and you must be sure to take your meat out every week and change it around, so that the brine gets to every part of it.

After it is smoked, wrap it in heavy wrapping paper, sew up in a cloth and paint it thick with whitewash. The dry beef is made from the round divided in chunks, as the seam between the muscles will show you.—American Farming World.

**CHOICE RECIPES.**

**Apple Sauce Cake.**—Cream together one-fourth cupful shortening, lard or butter, one cupful sugar, one cupful apple sauce, one level teaspoonful soda dissolved in one-half cupful warm water, one teaspoonful each of cinnamon and cloves, a little salt and nutmeg, two-thirds cupful of raisins well floured and two cupfuls flour.

**Headcheese.**—Have a hog's head cut into four pieces, portions not used for food removed, and cut off all fat for lard; put the lean and bony parts to soak over night in cold water to extract the blood and dirt; then scrub and wash thoroughly; put over fire to boil in water to cover it, and boil until meat separates readily from bones; take from the stove, drain off the liquor, reserving a part for future use, and after removing bones, chop the meat fine with chopping knife; return to kettle, pour on enough of the liquor to cover the meat, and boil fifteen to thirty minutes; season well, to taste; turn into a pan or jar, cover with a piece of new cheesecloth, and put on a board, and weight to press it solid; serve cold, cut in thin slices.

**A Good Roly Poly.**—Here is one for roly poly pudding which will probably be new to some, and is always a nice change for desert: Make a light suet crust by taking a pound of flour, six ounces finely shredded beef suet, a tablespoonful sugar, a pinch of salt and half a pint of cold water; roll out to the thickness of about half an inch into an oblong shape; cover thickly with oranges which have been peeled, seeded and cut into small pieces; sprinkle with sugar; roll up closely, fastening ends securely by well pinching them; tie in well-floured cloth, tying each end, and plunge into boiling water; boil steadily for two hours, replenishing the water if necessary. It is well to leave a small margin of paste without orange where the pudding joins. Minced meat or jam of any kind may be substituted, and makes excellent puddings.

**AMONG OURSELVES.**

A fortnight ago when Miss De Vault entertained us so charmingly there was something I should have said and did not—a not infrequent happening, by the way. We not only welcome new ideas from members of this circle, but we must have them to keep it bright and attractive. Among Ourselves is like a body of water which is fed by many streams—if the inflowing streams fail it becomes stagnant. Latterly we have had unusually fine meetings, but I am like the loving woman who enthrones her husband upon a pedestal and then watches him with alternate joy and terror. Don't fail me, friends, whatever you do. If you have anything, a thought, suggestion or experience that might serve the circle, I pray you act in the spirit which brings Mrs. J. E. Grant before us today:

Today's sermon has spurred me up to write by making me desire to "pass on" some of the good things I have been hearing. I heard an earnest young minister say: "Too often our words are drowned by the rattle of our lives." True, isn't it? I heard a dear old lady say: "There is nothing so high or noble as the making of a home; to make it attractive and pleasant for those who toil for us." Surely that is within the reach of all of us. I heard the same lady say: "They censure me for being particular about my every-day dresses, but I tell them my home is where I spend most of my time and I want to look well there." Had you thought of that? I had not. I heard the thirteenth apostle (the apostle of sunshine) lecture recently and he told us, no matter how bad off we were, to always look ahead and we would see someone worse off than ourselves. That may seem hard to believe, but just try the truth of it. I've heard, oh, so many good things this last year, and so many useful things, too, that I want to tell young housekeepers about. What a help older housekeepers can be, if, like the lady mentioned above, they go about dropping words of help from their rich store of wisdom and experience.

While Mrs. Grant has been speaking, I have had an idea. Let us have a special meeting some time in March, when the program shall be made up of "Good Things I Have Heard and Good Things I Have Learned." All who are in favor of this suggestion will please prepare contributions and send them to me, marking the envelope in the lower left hand corner with the letters G. T.

And now we shall have a good thing passed on without suggestion—outside suggestion, that is, Aunt Belle, friends:

The day had been very gloomy, cool and cloudy, but just a few minutes before sunset what a transformation. The children playing in the yard left their sport to enjoy the beauty of a sunset that I have seldom seen rivaled. "Oh, mamma, mamma, come, quick!" And I left supper-getting and ran around to the west of the house to see the very zenith; such shades of red I never saw before. The trees and buildings took on a reflection of the glory, just as they used to at night when a prairie fire raged near. It lasted but a few minutes; then all was gray again, but no shades of night could steal away the memory of that sunset. This morning the sunrise came near being

as beautiful as that sunset, but in lighter shades, more silver than gold showing in the long shafts of light. Where are the other members of the Sunset club? Does our Mrs. Walker see these rare sights in the city? I fear not. Well, dear farmers' wives and daughters, tonight is the first number of our city's lecture course, and I am going to enjoy each number if health and weather permit. The good man purchased season tickets. Our club lesson or study yesterday was Bryant and there were several selections from his poems read, but my favorites were omitted, they being, "Thanatopsis" and "Forest Hymn." "The Planting of the Apple Tree" was voted the favorite. We study Sir Walter Scott at our next meeting and I anticipate an interesting program. Our membership numbers about twenty-six, I think; almost half of them are from the farm, or have been a few years ago.

Mrs. Walker is more fortunate than Aunt Belle supposes. The other evening about dinner time the Only Man called to me in an excited voice, "Come here, come quickly." I ran as fast as my feet could carry me in the direction of the voice, to find him—what do you think?—why, gazing at the western sky which was all aflame with the glory of one of the most extraordinary and magnificent sunsets I ever beheld in this land or any other. Next day I spoke of this sunset to several friends and found that a number of them had noticed it. I am hoping from this little experience that although we rarely have reports from our Sunset Club it is still alive and that other members could, if only they would occasionally bring us something along the line which Aunt Belle has given us today. We need both nature clubs and literature clubs. Let us hear from others who are watching and studying. Winter trees and winter birds are delightful objects of study. Can't we have a word about them from some one? Reports from club women have been so earnestly requested before that I shall say no further word about reports from them.

stand by their opinions and convictions? I am constantly asked by women not to use their names. Rarely does a woman request that her name and address shall be given, but here within a week are two men who crave the privilege of addressing the circle saying, "Please give my full name and address." Mr. Hirschel Short, Guildford,

Are men less afraid than women to

Kansas, asks for a discussion of the subject of dancing. We had a discussion regarding dancing and like amusements a few years ago, but perhaps it would be interesting to take it up again for a few meetings.

Mrs. B. J. submits the following communication:

I have just finished hutchering. Had to render lard and make sausage in the house, as it was disagreeable outdoors, and I would like to tell the sisters I had a lot of newspapers on hand and they were used freely to save the floors and table. By laying papers where you are liable to get grease and also using them to wipe grease off the stove, they saved so wonderfully I thought it might be a help to tell of it to our readers. We have hard water, and anyone who has used it knows how gummy the wash-dish will get. I put a spoonful or two of coal oil in the pan and took a cloth and rubbed it over the pan, and it cleaned it better than soap would. The cloth will then do to start the fire. I would like if some of the sisters could tell me how to join a quilt in what is called "slippers and garters." I had one long ago and cannot figure it out.

One of the most widely read home magazines in this country has among its departments one called "Discoveries." This department is made up of personal items contributed by readers; it is most interesting—men read it almost as eagerly as women—and it must be exceedingly helpful. If our readers would oftener do as Mrs. B. J. has done, pass on little housewifely wrinkles, we might close our meetings every now and then with a "Discovery."

#### Dressmaking and Millinery. No. 554.

Sylvia Silverthorne, Muscatine, Iowa. [All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

Some "requested" designs have been selected for this number, and as they are "staple" articles, not greatly varied as to shape or material from season to season, little space need be devoted to their description, but instead, an extra number may be added.

Perhaps the calls for the sleeping garment as shown in No. 5354 have preceded and outnumbered the others, so I will let it take first place. There are few children who do not prove restless in their sleep so that the problem of protecting them from the cold is a puzzling one to the solicitous mother. The night drawers that cover them literally from top to toe has become a favorite garment, but not always can one find just such a design as she desires. When making these it is well to remember that the feet are the first to wear out, and it will be found an advantage to cut two or three extra pairs of these when cutting the

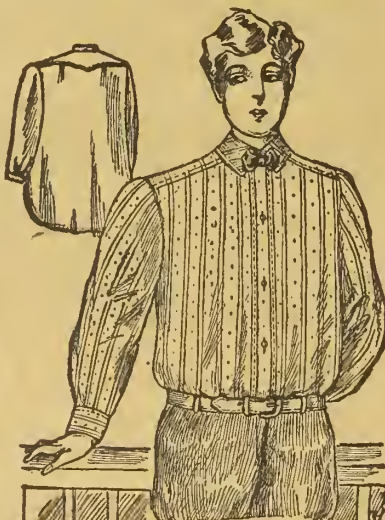

garment, then when those on the garment are worn they may be removed and others of the same material joined in their place. Another purpose for which this pattern may be used to advantage is for the union under-

[5354—Child's Night Drawers.]

suit for daytime wear. When used for this purpose the feet should be omitted, and the shaping at the ankle will adjust it a little more closely. Pattern No. 5354 as shown is cut in sizes for children of 2, 4, 6 and 8 years of age. Give age when ordering pattern.

No. 5484 pictures an outing shirt in the

[5484—Boy's Outing Shirt, 12 to 16 years.]

simplest possible design, and one that is a favorite for the every-day garment, as well as for those made for dressier wear. In the latter case the opening may be arranged to be made at the back, as it may also, if preferred, in the garment for general wear. The pattern provides also for separate or attached collar and cuffs. When

these are to be made separate, narrow hands finish neck and sleeves, these being included in the pattern. This pattern can be furnished in all sizes for men as well as for boys, and when ordering for boys give age, it being cut for 12, 14 and 16 years, and for men it is cut for 34, 36, 38, 40, 42 and 44 inches chest measure.

No. 5477 pictures a dainty corset cover that is very simple and easy to make. Tucks adjust it at the back and at the waistline at the front, while the neck is adjusted by means of beading, run with baby

[5477—Corset Cover, 32 to 40 bust.]

ribbon. The fancy hertha is cut from a handkerchief, and is itself joined to the waist by threading through the heading on it and on the waist at the same time. Being made separate it may be used or omitted at will. The hertha may, of course, be cut from any material and trimmed as liked. There is a basque portion that is joined at the lower edge. No. 5477 is cut in sizes for a 32, 34, 36, 38 and 40-inch bust measure.

Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

**2d PRIZE, IOWA STATE FAIR, 1906**

Manley Orion 30925, conceded one of the best representatives of his famous sire, old Orion, is now at the head of the herd of Mr. S. P. Freed, of Ames, Iowa. He has been right at the top of his class at the last two state fairs. As a breeder he has surpassed all expectations. There will be twenty-one gilts and nine yearlings by this sire, and a number of sows bred to him in Mr. Freed's sale on February 11, 1907. Here is a splendid opportunity to get some of the get of this great boar.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer, in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

TICKS.

The following inquiry has been received from one of our subscribers:

Do you know of any remedy to rid sheep of ticks? I would also like to know something of the general management of sheep in the winter time.

The most practical and only sure way of disposing of ticks on sheep is to dip them. Ticks are easily destroyed by any of the standard dip preparations on the market, or a strong tobacco ooze made by boiling tobacco stems will do the work quite effectively. Sheep should be dipped in the fall prior to cold weather and then they will be free from ticks, etc., during the winter. Dipping in the spring following shearing time, including the lambs too, is also beneficial and worth while. It not only destroys ticks, but other parasites also, and promotes the general health of the skin and the fleece. Dipping in the winter is rather inadvisable, but if the ticks are very numerous we would not hesitate to dip, choosing a mild day and then housing the sheep warmly until they were dry.

As to the general management of sheep during the winter, the following points should receive attention. Let the flock run out in the pasture during the day, as they will pick up considerable succulent feed about the pastures. For roughness, feed clover hay and corn stover. Alfalfa hay, if you happen to

The lamp is yet to be made for which I haven't made a chimney that fits.

MACBETH on lamp-chimneys means fit and freedom from all chimney troubles.

A MACBETH chimney doesn't break from heat.

My Index gives a fuller explanation of these things, and may be had for the asking.

Address, MACBETH, Pittsburgh.

have it, is a very superior feed for sheep, but feed as little timothy hay as possible to sheep, corn fodder being much more preferable. For the grain ration, oats and corn, one-third corn by weight, is good. For the ewes add a fourth of bran. If you have any roots they will be much relished and should be fed once per day. Salt regularly, or, better still, have salt at hand at all times. It is very essential, too, that sheep have pure, clean water. Quietness in handling, cleanliness in feeding and watering, and regularity of feeding are characteristics of the successful sheepman.

Remember that at this time of the year the ewe is maturing an unborn lamb and also producing a fleece of wool. Both of these functions call for a narrow or nitrogenous ration.

It is wrong to allow the sheep to run down. "An ounce of prevention is worth a pound of cure." Don't be too stingy with the grain ration.

Don't frighten and abuse the sheep. Go among them quietly, acting as if you were in their way rather than they in yours.

Modern Treatment FOR YOUR EYES?

Send me your name and address—a postal card will do—and I will send you my 80-page book, "Eye Diseases—Their Cure Without Surgery." It is illustrated in colors and tells you how defects of the eyes, even cross-eyes, are cured without the knife. It is free for the asking.

P. C. MADISON, M. D., Suite 308, - 80 Dearborn St., Chicago

Break Loose from the Creamery Trust ORGANIZE, CO-OPERATE AND CONTROL YOUR PRODUCT

Ship Us Your Next Can of Cream and Get Our Prices

You do the hard work of dairying and you ought to reap the profits. You won't get them so long as you are at the mercy of combinations and trusts. Join with 2000 Iowa Farmers to manufacture and market your own product. Cut out the gamblers and speculators who are standing between you and the consumer. Our association has already in eight months forced the distribution of at least \$300,000 in extra profits to the farmers of central Iowa. Membership growing rapidly and the trust is on the run. Won't you join us at once for fair treatment now and future protection? Write today for prospectus and full particulars. Ship us a can of cream and get our test and prices.

FARMERS' CO-OPERATIVE PRODUCE CO., DES MOINES, IOWA.

We save our members and patrons from 20 per cent to 50 per cent on farm supplies, by having for them direct from the factory at factory prices, cutting out all dealer's and middlemen's profit. For example the Farmer's Friend Separator Capacity 450 to 500 pounds, made for our members in the best factory in the world, fully guaranteed to excel any \$90 standard separator ever made, for only \$55. In efficiency of skimming, mechanical construction, easy running and durability, it has never been equaled. Send for our co-operative catalog of separators, washing machines, windmills, feed grinders, harrow carts, corn markers, corn shellers, etc. We give the best that money can buy direct to the user at factory prices.

SHEEP.

Clover Hill Shropshires

"LEADING FLOCK IN MIDDLE WEST." In favor everywhere because of their good size and mutton form, strong constitution, true type and richest breeding. We now offer a typical lot of growthy rams and ewe lambs. Also 150 beautiful yearling ewes bred to 265 to 305 lbs. champions of England and America. Grasp this opportunity to buy the best at prices others will ask for common sheep.

Chandler Bros., Kellerton, Ia.

Ewes for Sale

THE Iowa State College is offering twenty Shropshire, Oxford and Southdown ewes for sale at very moderate prices. Address,

DIVISION OF AGRICULTURE, AMES, IOWA.

Allen's Shropshire Rams and Short-horn Bulls

I HAVE a bunch of very fine rams for sale, suitable to head the choicest herds; also 15 young Scotch bulls from 10 to 15 months old.

GEORGE ALLEN, Lexington, Neb.

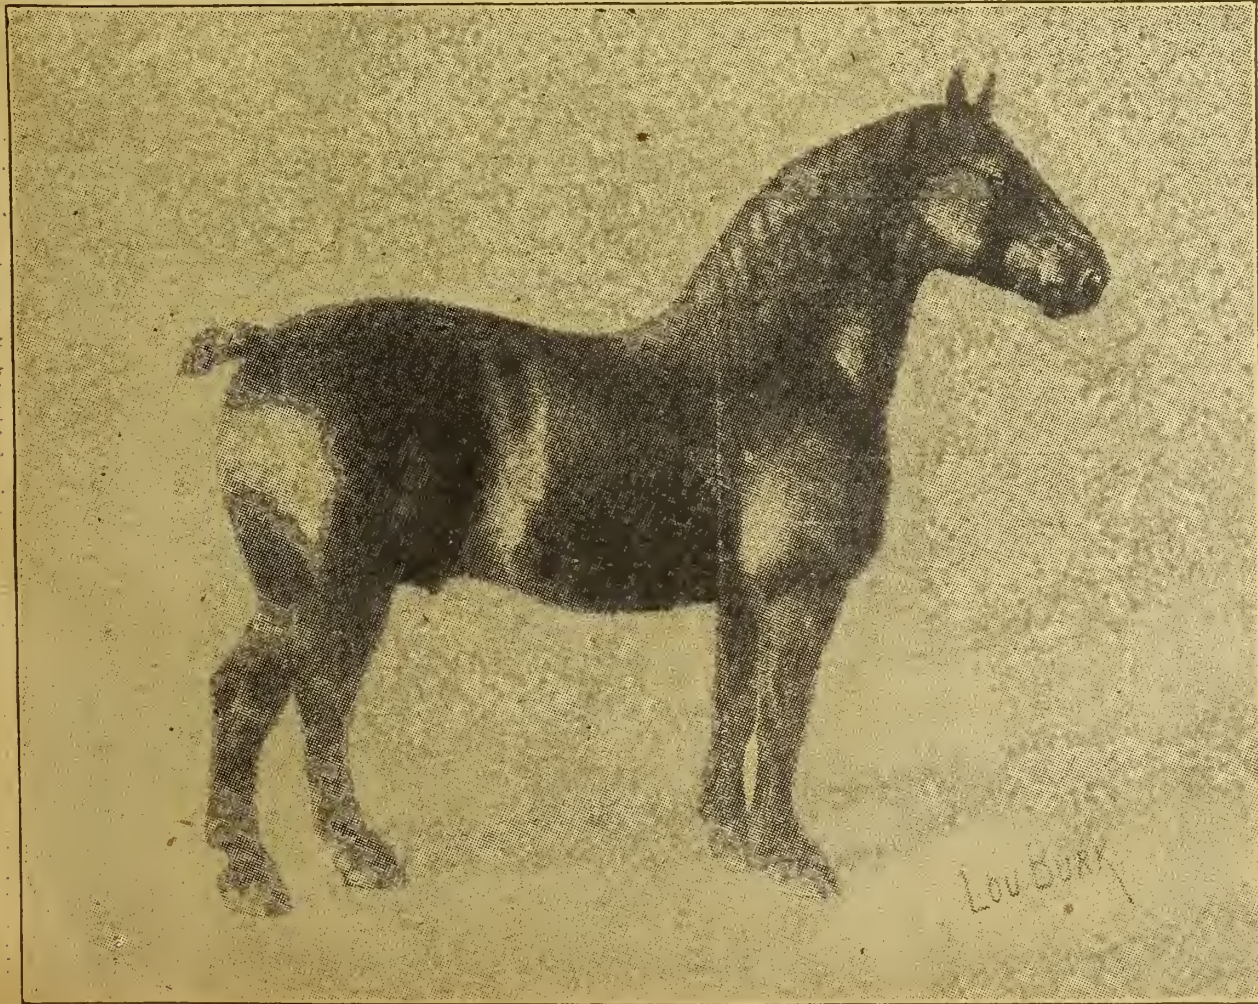

Registered Shropshire Rams and Ewes of the best breeding. Willard Miller, R. F. D. No. 2, Anita, Iowa.

15 Registered Shropshire ewes, bred to imported Minton ram. W. C. Frazier, Atlantic, Cass county, Iowa.

of our readers to some very good reading matter along this line on page 8. Mr. Henry Field, one of the most prominent Iowa seedsmen, is located at Shenandoah, Iowa. The reason for his notoriety is that he has made a business of selling "real" seed corn. He apparently has the whole business down to a fine point. We are certain that those interested in good seed will find some very timely hints in what Mr. Field has to say. Therefore we are going to ask those who read this to carefully consider the matter of where they are going to buy their seed the coming season. With good seed to start with, it is not such a difficult matter to grow a crop, but with poor stuff that will not germinate under any conditions it is next to impossible to raise crops. Mr. Field will make you a splendid seed corn proposition. Give him a chance to "show you" and we feel quite safe in saying that if you plant your crops with Field's seeds you will have more money in the bank next fall. See advertisement on page 8.

Seeds Guaranteed to Germinate.

The farmer who is buying clover seed cannot be too careful about its germinating qualities and its purity. A little care in this matter may save a great deal of future annoyance and loss. More of the success in crop growing depends on the kind of seed that is put into the soil, probably, than on any other step in the growing of seeds and grains. The only way to be sure of getting seed is to buy from the most reliable firms in the seed business. There is often a temptation to buy inferior seeds because they are a few cents cheaper than first-class seed. But just stop to think of it a minute. At the most, it is possible to save only a few dollars by buying cheap seeds. At the least, it is more than likely you can lose a hundred times as much as you gain. This is only one side of the seed question, but it is one you cannot consider too carefully. The Adams Seed Company, of Decorah, Iowa, is a firm that sells strictly reliable seed. They could not afford to sell anything else, for they are in the business to stay. Should any of our readers give them a trial order for seed corn, garden and flower seeds, we feel quite certain they will be satisfied. Send for their catalog at once if you have not yet secured it. When writing to this firm kindly mention The Homestead. See advertisement on page 10.

Champion Percheron Stallion, Kansas State Fair, 1906. See the advertisement of Messrs. Robert Burgess & Son, of Wernona, Ill., whose sale of Percherons, Belgians, Shires and Hackneys will be held at Wichita, Kansas, February 22, 1907.

## The Evolution of a Four-Tine Manure Fork.

Think of it! Twenty-five expert toolmakers and eighteen assistants are required to manufacture a four-tine Manure Fork that you can buy for about seventy-five cents. Thirty-three intricate machines, forges and devices of special invention, and worth thousands of dollars, are also employed in the making of this fork.

This interesting information is furnished by the American Fork & Hoe Company in its free book, "Tools and Their Uses," in connection with the establishment of its True Temper line of farm and garden hand-tools. This is one of the important steps of the year in the implement world, accounts of which are being widely published.

The evolution of the four-tine Manure Fork is fairly illustrative of the remarkable development of specialization in manufacture, not only in this kind of tools, but in all lines of high-grade products.

In the old days—days not so old, however, that they are beyond the memory of the active generation of today—the individual craftsman did all the work on an article from beginning to completion. He wrought in wood and iron.

With the vastly multiplied demands of the present, and the necessity of turning out a thousand tools to the old artisan's one, more than two score men have come to take his place at forge and bench.

The process of making each individual pattern of tool is necessarily different, but the four-tine Manure Fork gives a good idea of how much effort and expert ability is put into the best modern tool as exemplified by the True Temper line.

The first operation is that of "blanking." A large power machine operated by two men cuts the form shown by figure 1 from a steel bar which has been heated in a furnace.

The form is then "center headed" as shown in figure 2. This form is the result of heating the preceding form and subjecting it to the operations of another large special machine operated by one man.

The indentation on the underside produces the space between the two center tines, making the head the right size and injects the superfluous metal into the shank part.

In the third step the bar is "shank drawn." The last form is heated and a shank is drawn from the little keystone appendage, and pointed by means of a large machine hammer operated by one man.

The steel bar is then "split and spread." That is, the two ends of the bar are heated, cut and spread so as to form four projections as shown in figure 4. These projections are to provide the tines of the fork.

The tines are then "rolled." The four extending arms of each separately ended into the tines. One furnace machine operator is necessary at work is difficult more time and ship than one.

In the next step we see the piece beginning to take the form of a fork. It is now "shaped." The steel is heated again and subjected to the operation of two machines. The hammer and anvil are also brought into use by the expert operator who inspects and trues up the fork at this stage.

The fork is now ready to be "trimmed and pointed." The ends of the tines are cut off evenly and of the proper length by a machine with one operator. Then it passes to a special machine, where one man does nothing but put sharp, smooth points on forks.

The most important stage in the fork's production comes when it goes through the last actual forging shop operations, to be "dished, shaped and tempered."

The fork in its unfinished shape up to this stage is completely heated and placed in a machine former, which gives it the proper dish and final accurate shape.

**Famous "True Tempering Process."** It immediately goes through the famous secret "True Tempering Process," perfected by the American Fork & Hoe Company, after years of experience and obvious reasons, the process is claimed for it, however, that it brings the tool up to the highest degree of toughness, and gives the elastic "spring" so much sought after by toolmakers.

During the final operations, the fork is critically inspected and trued up on the anvil by hand and hammer.

The men who do this work are experts, skilled to the highest degree in tool making, and when they have tempered and passed a fork, it is indeed genuinely TRUE.

**Subjected To Severe Tests.** Three rigid tests are now applied to the fork to see that it has (1) the proper elasticity of

temper, (2) the required toughness of temper, (3) accurate dimensions.

These tests are intended to break or bend the fork in case there are any imperfections in the steel or temper. Only a most excellent fork will stand such severe tests and seldom will any fork receive such hard usage on the farm.

That is how "True Temper" tools are proved "highest grade by special test."

After the tempering and testing, the fork goes to the finishing shop, where it is subjected to the operations of three machines. It comes out with a bright, smooth, metal polish.

In the next step, the fork is treated to a special liquid solution, which prevents rusting or corroding. It is then stored away, preparatory to driving on the handle, ferrule-cap and ferrule.

### The Making of the Handle.

Second-growth ash timber suitable for handles is first selected in the tree. After it is cut and delivered to the mill, it is sawed into planks and then into squares of proper dimensions and lengths for handles.

Then the squares are "inspected and sorted" according to their fitness for Hoe, Fork or Rake handles. Every piece of timber is especially selected for a particular kind of tool for which it will make the best handle.

The gracefully shaped handle is "turned," or cut down from the rough-sawn square piece of timber, in an automatic machine.

The handles are now inspected and sorted again and those of highest grade are selected for True Temper tools.

Then the roughness is taken off by passing the handle through a large sanding machine.

Next, it is steamed and properly bent. Dried in this bent position, the shape is retained permanently. Great care must be exercised to bend the handles the way of the grain of the wood.

The bent end is then machine bored and shaped ready for the steel parts.

The ferrule and cap are next driven on, and the shank of the fork into the handle at one operation. One machine and two men are required.

Following this the handled fork is trued up and inspected by an expert with a practiced eye. The "bang" must be accurate to a dot, before he passes it as a correctly made tool.

At this point, the handle is treated to the operations of a coarse sand polishing machine. Then it is fine sanded, to give it a smooth finish.

And to give the handle a still better appearance and protect it against weather, it is subjected to a special waxing machine, which gives it a bright, glossy polish.

The fork now goes to the final finishing room, where part of the metal is enameled and bronzed, and the handle is labeled "True Temper."

A dozen forks are carefully hooded with cloth, the handles wrapped in paper, and they are stored ready for shipment.

Each operation on a tool is performed by a skilled toolmaker, who is an adept at that one particular kind of work. He is carefully trained to do just that one thing, and to do it perfectly.

The finished product is an article far superior to that of the old individual craftsman who did all the work, for the best knowledge of mechanical science is utilized. The expense of manufacture has been greatly increased, but the price has been kept down by the enormous number turned out, and the great amount of business done.

### ADVERTISING NOTES.

Mr. James E. Seaton, of Vernon, Kan., is offering a well-improved farm of 236 acres for sale or exchange in his advertisement that appears on page 24 of this issue of The Homestead.

Readers of The Homestead interested in sheep should read the advertisement of the Allen Land & Loan Co., of Laurens, Iowa, which appears on page 24 of this issue of The Homestead.

Messrs. Aye Bros., of Blair, Neb., are offering Kherson seed oats for sale in their advertisement that appears on page 15 of this issue of The Homestead. This variety of oats they say will not lodge or rust and is a big yielder.

A general merchandise stock of about \$7,000 is offered for sale or in exchange for a farm, by the owner, in an advertisement that appears on page 24 of this issue, the address of which is, Owner, C. H. M., care of The Homestead.

Mr. N. C. Dunlap, manager Watson's Ranch, of Kearney, Neb., is in need of help for orchard and farm work. The advertisement offering positions to two married men, to whom separate houses and garden patch will be furnished, appears on page 10 of this issue.

Mr. Charles Howell, of Rockford, Iowa, proprietor of the Howell Jersey Dairy, makes the announcement on page 15 of this issue that he desires a single man to work on his dairy farm. He must be a good milkman. He also wants a capable woman to do general housework.

Mr. B. F. Lepper, of Flatwillow, Mont., wants four first-class farm hands on his Montana ranch. He prefers them to be twenty-five years and older and no drinkers or gamblers need apply. The advertisement, giving the rate of wages per month, appears on page 15 of this issue.

Mr. H. F. Hand, one of the most solid and influential farmers of Colona, Henry county, Ill., says: "I used Delany's No. 2 seed corn sorter and have the best stand and the best seed corn in my eighteen years of experience in farming. I did not find the work of separating tedious. I used part of two half days." His address is R. F. D., Geneseo, Ill. See advertisement on page 9.

Record number 45610: Case of poli evil; hunch on head large as ten-quart pail; five large pipes and many small ones; discharge very profuse and foul; abandoned as incurable. Owner cured the case by using two bottles of Fleming's Fistula and Poli Evil Cure. Fleming's vest-pocket veterinary adviser free if you write to Messrs. Fleming Bros., 210 Union Stock Yards, Chicago.

### COAST COUNTRY LAND.

If you want to go where land is cheap and the crops are big, read the advertisement of the Alamo Beach Land Company, of Kansas City, Mo., on page 24. They guarantee that

# WHY SUFFER WITH Catarrh

When you have at your very doors a treatment of twenty-five years' successful curing of the most chronic cases—hundreds of my patients are willing testimonials to the success of my treatment. It is not what I say for my remedies, but what the cured ones say that should convince you of my reliability and ability to do as I tell you I can.

T. F. WILLIAMS, M. D.,  
Consulting Physician.

Rev. W. C. Turner, Columbus,  
Sabine Parish, La.,

Writes under date of Dec. 9, 1906: "I cannot tell you with pen and ink how much I thank you for your treatment. I feel like a new man, have gained eight pounds in twenty days. I feel as well as I did ten years ago. Can do more work and do not get as tired."

Fred Vogt, Elkader, Iowa,  
Says in a letter written Nov. 27, 1906: "I do not need further treatment for I am completely cured. I shall always thank you and your medicines for the good they have done me."

Cut out this Free Coupon and send to me TODAY.

one-half of one crop will pay for the land. Write them for particulars.

### GO TO TEXAS.

Readers of The Homestead that want to buy land in the great Panhandle country of Texas ought to read the advertisement of Messrs. Bayer & Peterson, Kansas City, Mo., in the Lands and Homes Department. This firm is offering land at away below regular prices, and the land is first class in every way. Write them for full information.

### MUSGRAVE FENCE COMPANY.

In any locality there are always a few concerns that seem to be a part of it; seem necessary to the community. This is the case with the Musgrave Fence Company. They have been in business in the city of Des Moines for years and are known as a perfectly reliable firm. They manufacture and carry on hand, ready for shipment at any time, a full line of fences and gates.

### ABOUT SCARS ON HORSES.

There are thousands of horses throughout the country with scars, and consequently thousands of horse owners that would like to rid their animals of these eyesores. It is not generally known that it is possible to remove an old scar tissue and heal with hair on and leave no blemish. W. F. Young, P. D. F., 40 Monmouth St., Springfield, Mass., has issued a small printed slip giving detailed instructions for removing scars with Absorbine that should be in the hands of every horse owner. It is free for the asking. A postal will bring it.

### BELLE CITY THRASHER FOR SALE.

Having rented the farm, Mr. N. A. Lind, of Rolfe, Iowa, has some special bargains to offer which include a twenty-four-inch thrashing machine mounted on trucks. It is complete in every way and includes a self-feeder, stacker, complete grain elevator and spout and an attachment for steam or gasoline engine. He also offers one twenty-horse power boiler and one fifteen horse power Frost engine, both in good condition. Besides this there is some creamery machinery, including a De Laval separator. Here is an opportunity to secure some good machinery at a bargain. Those of our readers who are in need of any of the above will find Mr. Lind a very fine gentleman to deal with. See the advertisement on this page.

### THE LITTLE STAR GRAIN AND SEED CLEANER.

Those who expect to buy a grain grader this year should look into the merits of the Little Star Grader and Cleaner. It is made by the Hall Grain Grader Company, of Winfield, Iowa, and is described in an advertisement on page 18. If all the small grain that is sown on the average quarter section farm in the corn belt were run through a Little Star Grader this spring it would increase the yield millions of bushels, and it would do more than that—it would greatly improve the quality. The Little Star gives you the heavy grain, and that is the kind of grain that gives the strong plants. In addition to the grading of small grain, screens Nos. 8 and 9 of the Little Star are adapted to the grading of corn. Indeed, corn run through this mill will give almost a perfect stand in an edge-drop planter. You therefore have two uses for this one machine, namely, the cleaning and grading of small

## FOR SALE

ONE 24 in. Belle City Thrashing Machine, mounted on trucks, (wood wheels), self feeder, 18 ft. folding stacker, grain elevator with long swinging spout, 8-H, triple geared "F" sweep power, attachment for steam or gasoline engine. All in good condition, nearly new. One 20-horse boiler in good condition. One 15-horse Frost engine in fine working order. One Alpha De Laval cream separator for creamery, in good running order. Having rented my farm the above is for sale at a bargain. Address, N. A. LIND, ROLFE, IOWA

## RAW FURS.

We pay higher prices on all furs, as we are manufacturers. A trial shipment will convince you. Catalog and shipping tags upon request. SEFRIN & GLICKMAN, Manufacturing Furriers, 508 Locust, Des Moines, Ia.

**Beery Bit Controls**  
any horse, any time, any place, sure. Your dealer should have them. If not write me for my trial offer. PROF. J. A. BEERY, PLEASANT HILL, OHIO.

**WANTED:** Men everywhere to tack advertising cards and distribute advertising material. Salary \$21 per week. \$3 a day expense allowance. Unity Supply Co., Desk 7, Chicago.

grain and the grading of corn. Its cost is \$19.98 with the freight prepaid. Remember that the Little Star is guaranteed. Send order at once to the Hall Grain Grader Company, 224 Locust St., Winfield, Iowa, or write for information, and please mention The Homestead when you write.

### THE UPS AND DOWNS OF AN INVENTOR.

"Was born and raised on the farm, was a boy behind the hoe, sure enough. At the age of twenty-one went into partnership with a farmer's daughter and together we started out for better or worse, as the case might be later on." So reads the opening paragraph of a very interesting and entertaining story in one of the nearest incubator catalogs that we have seen for some time. The M. M. Johnson Co., of Clay Center, Neb., is the donor of this catalog. Mr. Johnson is an old breeder in the poultry business, and those who have kept in touch with the best poultry journals of the day are very familiar with seeing his name attached to some of the best articles that have appeared in their columns. While Mr. Johnson feels that he is pretty well acquainted with the poultry raisers of the country, he still realizes the highness of the proposition of knowing them all and feels that he is a stranger to lots of poultry men and women. Accordingly the catalog has been issued so as to get further acquainted and to visit with old acquaintances. While the book deals to a slight extent with some interesting literature aside from incubators, it is not issued for that purpose, but rather to tell people more about the famous Old Trusty incubators and brooders. Nothing but the most practical ideas have been incorporated in the designing of the different poultry appliances that are set forth in this catalog. Each number is a leader in itself and is explained to the last detail so that readers will find the book a very satisfactory one when it comes to look-

**We Will Pay Men \$85 Per Month**  
to travel, collect names, advertise and give away samples. Expenses advanced. Write today. H. M. Rider Co., Chicago

ing over its pages. The poultry business is getting to be more of a specialty each year. People who would succeed in this profitable vocation must be every-day students of the many hundreds of problems that confront the successful poultry grower. An up-to-date poultryman cannot afford to be without the information that is contained in the above mentioned catalog. We know the catalog will be a great source of pleasure to those on whose desk it finds a place. This is why we recommend everyone who is interested in poultry matters to send for the booklet. On page 12 will be found more regarding the Old Trusty incubator and poultry appliances. Kindly mention this paper when correspond-

A BANKER'S TESTIMONY.

Probably no institution in the United States has such a wide reputation for successfully treating rectal diseases as the Drs. Thornton & Minor institution, at Kansas City. For thirty years these physicians have been treating such cases successfully. Mr. W. H. Allen, cashier Bank of Eldorado Springs, Mo., writes as follows: "It always gives me pleasure to recommend your treatment. It is now over twenty years since I was cured of piles, and I never fail to recommend your treatment to my friends." This statement, coming from a man of high character, only shows again the satisfactory and permanent treatment Drs. Thornton & Minor give patients. See their advertisement in this issue and write them for full information.

LEARN DRESSMAKING AT HOME.

How often one hears the expression, "I wish I could make my own clothes," and now we have found a way by which the women in the house can learn in a very short time how to make their own dresses and, in fact, all there is to learn about dressmaking. The National Correspondence School of Dressmaking, of Des Moines, Iowa, is conducting a most successful school in this line of teaching. All the teachings of this school are easily learned by mail. The terms of tuition are very reasonable, and any ambitious woman can improve her position quite materially by taking a course in this school. Write today for circulars and catalog of this school, and start in the new year with a determination to master the art of dressmaking, and thus improve your position in life. Dept. A.

TELFER'S NEW CATALOG.

On page 18 of this paper will be found the advertisement of the Telfer Carpet Company, in which they announce their new bargain catalog of carpets, rugs and curtains for this season—a catalog which is always in big demand with readers of this paper. The catalog is compiled by Mr. Telfer personally, who is a recognized authority on all matters pertaining to carpets. It not only quotes the very lowest prices on all grades of floor coverings and curtains, but gives besides information in regard to the different kinds of carpets and rugs that is of real value to the prospective purchaser. The book is a real work of art, the various patterns being shown in their actual colors and Mr. Telfer states that he is especially anxious to send a copy to every reader of this paper, as they have purchased thousands of dollars worth of Telfer's good carpets and rugs within the past five years and his business relations with them have been of the most pleasant nature. He also further states that they are an intelligent class of buyers who thoroughly appreciate good floor coverings. The writer personally cannot only vouch for the merits

of these high-grade carpets, but for the business integrity of the concern as well, and he advises every reader to write without delay for this, the handsomest carpet and rug book that will be issued this season.

THE ADVOCATES OF COTTONSEED MEAL

are growing in number in every community. Cottonseed meal is destined to become one of the principal feeds for the careful stock feeder. The reason for this fact is evident. Cottonseed meal supplies exactly the necessary protein to balance corn. Moreover, it supplies it very cheaply and in a very palatable form. We are expecting to see more cottonseed meal fed every year. The best way to buy this by-product is direct from the best commission firms in the South. One of these firms makes an announcement in this issue on page 15. We are very glad to introduce our readers to Messrs. Lampkin & Co., 54 De Manil Bldg., St. Louis, Mo., as being dealers in guaranteed quality of this valuable by-product. Kindly refer to their advertisement and mention The Homestead when writing to them.

THE TREATMENT OF CONTAGIOUS ANIMAL ABORTION

has met with failure at the hands of more breeders than any disease known that afflicts farm animals. The fact is, it is one of the most aggravating and perplexing maladies to be confronted with. Only by the most careful and persistent effort can the disease be checked and eventually prevented. When all known means fail there always remains one which perhaps has been untried. If your herd has ever had a case of abortion it is time to act. Do not wait until you have another case on hand to convince you that the first was not caused by accidental injury. Get right to work at once and secure a free book on abortion by sending to Mr. H. W. Kellogg, of St. Paul, Minn. It tells all about a most successful treatment for abortion in farm stock. This method is highly recommended by the best breeders. Don't delay, but send with the first mail man for this free book. See page 11.

DELAYS ARE DANGEROUS.

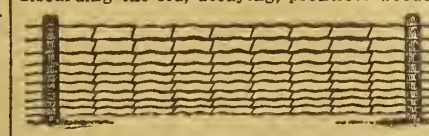

Many times the delay of one or two months will develop such a condition that sufferers from catarrhal troubles of the nose, throat, bronchial tubes, stomach and lungs find themselves beyond the power even of relief, to say nothing of a permanent cure, with the ordinary treatments. Dr. T. F. Williams, of Des Moines, Iowa, has successfully treated the most severe cases of catarrh and has testimonials from hundreds of cured patients. The terrible death rate due primarily to catarrh in some of its various forms has been due to the neglect of the sufferer and the lack of proper remedies for treating the disease. For more than a score of years Dr. Williams has given his personal attention and research to the cure of catarrh in its various forms and has succeeded in developing a treatment that is rapidly gaining national prominence. To give all, rich and poor, an opportunity to test the curative powers of this treatment the doctor will send free of charge a full month's treatment to every person who will fill out the coupon found on page 22.

THE 1907 GIRL YOURS FOR THE ASKING.

Have you made her acquaintance? Now is your only chance. After much trouble and expense the Sharples Separator Company, of West Chester, Pa., have succeeded beyond their hopes in reproducing from life, in the softest and faintest colors, the sweetest dairy maid that ever graced a cream separator calendar or was ever offered by any cream separator company as a free picture suitable for framing. This calendar and this free picture are like the Sharples Dairy Tubular Cream Separator—you can't appreciate either of them until you see them. Worthy a place in every home. The Sharples Separator Company will send the calendar with this picture on it to you, free, for the names of two neighbors who keep cows but have no tubular cream separator. Or they will send free the same picture, made larger for framing and without the calendar pad attached, for the names of five neighbors who keep cows but have no tubular cream separator. Calendar and picture both sent free for names of seven neighbors who keep cows but have no tubular. Write at once before the supply is gone, sending two names for the calendar with smaller picture on it, or five for the large picture without calendar pad attached, or seven for both. You must mention the name of this paper to get them. Address the Sharples Separator Company, West Chester, Pa., Chicago, Ill., Toronto, Can.

RICKETY FENCES DEPRECIATE FARM PROPERTY.

"The clothes don't make the man—but they help," says the old proverb. Good fences don't increase the fertility, but they make the market price higher. Take two farms—one properly fenced—the other with gaping holes for stock to rush through to the neighbors' fields; with tumble-down posts and dilapidated boards, half up-half down; which will you buy? Which will bring the most at a forced sale? Wise farmers are looking at all these outward appearances. They are discarding the old, decaying, profitless wooden

fence. They are replacing it with one that is strong and durable like the Brown fence. This is a fence that farmers say is at least one-fourth heavier than most woven-wire fences; that it doesn't get "haggy or saggy;" that it is easily put up. One of the best things about a Brown fence is that is seldom needs repairs. It is so heavily galvanized, the wires are so solid and strong—being made of high carbon, hard-coiled steel spring wire—that they cannot rust for years and will successfully resist all the varying changes of frost and Sunshine. The up-rights are the same size as the horizontals. When a Brown fence is up, it is up "to stay up." Two more good things that the Brown Fence and Wire Company, Cleveland, Ohio, do for the farmer: First, They send a free sample of the fence so that every man can examine it as his leisure. He can hammer it, file it, dip it in acid, heat it—test it any

# Purinton Steam Feed Cooker

Quick and Economical.

Oldest and most successful feed cooker on the market. Gets up steam quickly.

**Takes Little Fuel and is Absolutely Safe.**

Use wood, cobs, coal or anything burnable.

Provided with supply tank for refilling while steam is up, and double jointed cooking pipe which can be put into barrels around boiler without unscrewing.

We are so sure of the merits of our cooker that we send it out on

**A Week's Free Trial,**

without signing of notes or other obligations, to be paid for if it proves satisfactory.

If we hadn't the utmost confidence in our boiler we couldn't afford to do this.

Made in various capacities to suit all requirements.

Send for catalogue today.

**CRESCENT FURNACE & FOUNDRY CO.,** 604 Madison Street, Des Moines, Iowa.

way he chooses. The sample will be no better than the actual wire sent him when he pays his money. Second: They pay the freight on all orders of forty rods and over. This is a great convenience. A man knows exactly what his fence will cost laid down at his home station. Prepaid freight usually is delivered sooner than the "bill to follow" kind. A fifty-six-page catalog gives a detailed explanation of 138 different styles of fences for poultry, hogs, horses, bulls and stock of all kinds. It is sent free to anyone.

A "DOER OF THINGS."

Mr. S. K. Noland for years has been one of the leading live stock and real estate auctioneers of the middle West. He is characterized by a superabundance of the "push" which has made for him so wide a reputation

S. K. NOLAND.

as a "doer of things," and which enables him now to make a success of the real estate branch of his business which he is pushing. If you have a farm for sale or want to buy a farm, you cannot get in touch with a man more equal to any occasion than Mr. S. K. Noland. He can give as a reference any bank or any publishing house in the city of Des Moines.

Gaston & Son's Duroc Sale.

A large local crowd supplemented by a number of good breeders was present at the first annual bred sow sale held by Messrs. E. M. Castle & Son, of Joy, Ill., on Friday, January 18th. The stock was sent into the sale ring in nice shape, and those present were not slow to appreciate the offering. Messrs. Thomas & Hogsett, of Golden, Ill., topped the sale, paying \$75 for the yearling sow, Coral Queen 116828, a daughter of Parnell Banner. Mr. A. H. Prindle, of Oakville, Iowa, secured a good bargain in the two-year-old sow, Stoner's Girl, at \$70, and was a liberal bidder on the best lots. Among the other bidders who contributed much toward the success of the sale were Messrs. Stansell & Matern, of McNabb, Ill.; Fred Schweizer, of Elwood, Ill.; Frank M. Erschen, of Odell, Ill.; Fred Kraschel & Son, of Macon, Ill.; McNeil Bros., of Bowen, Ill.; and Geo. Seckman, of Ripley, Ill. Colonels Reppert and Keil conducted the sale in a satisfactory manner. A list of animals selling for \$25 or over is given below:

The Peek & Putman Sale.

One of the largest crowds of breeders and farmers yet seen at a Duroc Jersey bred sow sale this spring gathered at the sale of Messrs. Peek & Putman, of Tecumseh, Neb., January 23d. The offering was in prime condition and the good things of the sale were stubbornly fought for. The top price was \$520, paid for Lot 1 in catalog, a fine yearling sow by Tip Top Notcher and bred to the great \$2,500 Kan't Be Beat. Mr. W. H. Hays, of Vesta, Neb., was the purchaser. We predict a great future for this sow, as she is surely a good one. Below is a list of those selling for \$40 and over:

Lot.	Price.
1. W. H. Hays, Vesta, Neb.	\$520.00
2. John Hasenager, Tecumseh, Neb.	45.00
3. Paul Grupe, Tecumseh, Neb.	57.50
4. W. H. Hays	75.00
5. Russell Bros., Beatrice, Neb.	100.00
6. W. A. Peek, Tecumseh, Neb.	105.00
7. S. B. Cummings, Tecumseh, Neb.	61.00
8. J. C. Lamb, Tecumseh, Neb.	101.00
9. Gilbert Van Patten, Sutton, Neb.	125.00

The Wehr Sale.

On January 23d Mr. J. E. Wehr made his annual Duroc Jersey brood sow sale at Portsmouth, Iowa, and it proved the best sale he has ever held. He had an excellent attendance of both farmers and breeders and he put up a good offering. Forty head sold at an average of \$48, the top being a March gilt going to Mr. Lee Hopper, of Neola, Iowa, at \$145. Col. F. F. Luther cried the sale, assisted by Colonel Tupper, of Woodbine, Iowa. Below is a list of buyers:

Helena, Aug. Voge, Portsmouth, Iowa.	\$66.00
Orion Rose, R. J. Harding, Macedonia, Iowa	82.50
Perfection Belle, B. F. Roland, Portsmouth, Iowa	70.00
Miss Hacken, Henry Steffen, Portsmouth, Iowa	60.00
Ruth, Wellman Bros., Neola, Iowa	42.50
Rachel, E. B. Ryan, Neola, Iowa	39.00
Perfection Girl, P. H. Ronfeldt, Portsmouth, Iowa	62.00
Emma B., Walter Schuhunger, Harlan, Iowa	37.00
Anna W., James Lawrence, Portsmouth, Iowa	50.00

"Troubles and Repairs are Twin Brothers." So says this week's continued story on the Litchfield Manure Spreader on page 5. If we have farm owners who are not following this serial, they are missing interesting matter.

## FREE! My Book About Curing DEAFNESS AND EYE DISEASES AT HOME

I have published a new 128 page book which tells of a method by which people who are willing to devote fifteen minutes of their time each day for a month or two, following my instructions, can cure themselves without leaving home or visiting a doctor. of Deafness, Head Noises, Catarrh of the Nose, Throat and Head; Catarracts of the eyes, Granulated lids, Sore eyes, Pterygiums, Films, Wild Hairs, Eye Strains or any weakness or disease of the eye, ear, nose or throat. This book gives the causes and symptoms of each disease. It tells you not only how to cure these diseases, but how to prevent blindness and deafness.

I want to place one of these books in every home in the United States. Write me a letter or a postal card and tell me your disease and you will receive this grand book and my opinion free of charge, and learn how people from every state in the United States are restoring their sight and hearing at home by this new method.

I want no money for this neither does it place you under any obligations to me whatever. I simply desire to show and prove to you how easy it is to get perfect sight and hearing by my method. Write to me today. Address

Hanks & Bishop's Duroc Sale.

One of the very successful sales of the season was that of Messrs. Hanks & Bishop, of New London, Iowa, on Tuesday, January 22d. Breeders from Illinois and Iowa were present and took the offering at very satisfactory prices. Mr. J. G. Reil, of Ferris, Ill., topped the sale, securing a daughter of Proud Advance at \$160. Her litter sister went to Mr. N. B. Cutler, of Carthage, Ill., at \$125. These two gentlemen were liberal bidders on the best lots and secured several good gilts at reasonable prices. The contesting bidder was Mr. F. M. Erschen, of Odell, Ill., who secured two good gilts. Col. H. S. Duncan opened the sale with a strong plea for the improvement of stock and his remarks were well received. He was assisted in the selling by Colonels Reppert and McGowan. A list of sales is given below:

Lot.	Name	Price.
1	T. D. Coleman, Mt. Pleasant, Iowa	\$ 40.00

Reil & Cooner Duroc Sale.

A large number of farmers and breeders were present at the first annual brood sow sale of Messrs. Reil & Cooner, of Ferris, Ill. The stock was sent into the sale in fine breeding condition and the offering was appreciated by all present. Messrs. M. W. Greer & Son, of Rushville, Ill., secured the top of the offering in Lady Kruger, a daughter of Kruger, and winner of first ribbon in the under year class at the Illinois State Fair, 1906, and a litter mate to Kruger Lad, a first-prize winner at the Iowa State Fair, 1906. He was opposed in the bidding by Messrs. Manlove Bros. & Norris, of Bowen, Ill. Messrs. McNeil Bros., of Bowen, Ill., Thomas & Hogsett, of Golden, Ill., A. E. Poush, of Charleston, Iowa; Fagan, Browning & McCabe, of Hersman, Ill., and J. M. & W. T. Gatton, of Springfield, Ill. Mr. F. M. Erschen, of Odell, Ill., secured a bargain in a yearling sow bred to Hanley at \$75. Messrs. Geo. Tygret and J. L. Tygret, of Disco, Ill., were liberal purchasers. Colonel Reppert opened the sale and was assisted by Colonels Duncan and McGowan. A list of sales follows:

A Great Poland China Sale.

The closing out sale of Mr. Thos. F. Miller, at Fullerton, Neb., on January 25th, proved one of the greatest sales ever held in Nebraska. Forty head sold at an average of \$84.45. The prices were very even, the top being \$210 for Ramona, a sow that he purchased of Mr. Joe Young a year ago. She went to Mr. Carl Dietzsch, of Surprise, Neb. Breeders present remarked that there never was a better offering of Poland China sows sold in the state of Nebraska. Peter Sterling, the great son of Chief Tecumseh 3d, was purchased by Messrs. B. G. Wray &

The Outler Duroc Sale

Two sales in the same neighborhood divided the crowd in the vicinity of Carthage, Ill., on Friday, of last week, the day which Mr. N. B. Cutler held his annual brood sow sale. Breeders were inclined to secure breeding stock at prices below that which had been paid in previous sales, and the bidding was not as free as was expected. Messrs. McNeil Bros., of Bowen, Ill., topped the sale, securing the aged sow, Iowa Queen, a show winner at various state fairs during the past three years, at \$92.50. They were liberal bidders on some of the best lots. Messrs. Hanks & Bishop, of New London, Iowa, secured some of the best bargains in the sale. Colonel Duncan opened the sale and was assisted in the selling by Colonels Reppert & McGowan. Below we give a partial list of sales made:

Lot.	Name	Price.
1	McNeil Bros., Bowen, Ill.	\$ 92.50
2	Hanks & Bishop, New London, Iowa	65.00
3	Same	75.00
4	George Reil, Ferris, Ill.	72.50
5	Chas. Cooper, Ferris, Ill.	40.00
7	H. B. Griffiths, Bowen, Ill.	69.00
8	F. B. Whittaker, Hillsboro, Ia.	36.00
9	H. B. Griffiths	80.00
11	Thos. Shaw, Colusa, Ill.	27.00
12	Bert Galloway, Carthage, Ill.	30.00
27	W. S. Davis, Disco, Ill.	34.00
29	F. B. Whittaker	27.00
31	Thomas Shaw	31.00
32	Hanks & Bishop	26.00

J. A. Smith's Duroc Jersey Sale.

The continued had roads in the vicinity of Sciota, Ill., kept many farmers from delivering corn according to contract so that the day of Mr. J. A. Smith's sale at that place found many of his neighbors hauling corn. Not over thirty persons were present, but Mr. Smith sold his stock as advertised. Mr. N. B. Cutler, of Carthage, Ill., topped the sale, securing a good aged sow by Tip Top Notcher at \$100, the competing bidders being Messrs. Manlove Bros. & Norris, F. M. Erschen, Chas. Cooper and Fagan, Brownig & McCabe. Mr. Jas. J. McCabe secured a good yearling by Best of Top Notchers at \$50. Messrs. Manlove Bros. & Norris secured a good yearling sow by Major R. at \$49. Mr. Chas. Cooper, of Ferris, Ill., secured two very good bargains in yearling sows at \$35 and \$31 each. Messrs. E. M. Castle & Son, of Joy, Ill., and F. M. Erschen, of Odell, Ill., secured bargains and were liberal bidders on best lots. Colonels Reppert, McGowan and Duncan conducted the selling in a satisfactory manner.

The Homestead and The Homemaker \$1.25 per year.

New Wheat Lands In the Canadian West

160 ACRES  
FARMS IN  
WESTERN  
CANADA  
FREE

5,000 additional miles of railway this year have opened up a largely increased territory to the progressive farmers of Western Canada, and the government of the Dominion continues to give one hundred and sixty acres free to every settler.

**The Country Has No Superior**  
Coal, wood and water in abundance; churches and schools convenient; markets easy of access; taxes low; climate the best in the Northern temperate zone. Grain-growing, mixed farming and dairying are the great specialties.  
For literature and information address the Superintendent of Immigration, Ottawa, Canada, or the authorized Canadian Government Agent

**THE ALLEN LAND & LOAN COMPANY,**  
Laurens, Iowa

**LET ME SELL YOUR FARM, HOME OR BUSINESS**  
for cash in the shortest possible time. We absolutely guarantee to place the description of your property in the hands of 5,000 reliable hustling real estate men and bankers throughout the United States. Write us today.  
**THE REAL ESTATE SALESMAN**  
412 Brace Block. LINCOLN, NEB.

OLD MAN--MUST SELL.

380 ACRES--120 miles S. E. of Kansas City; 150 acres rich bottom land, no overflow. Good house, barn and orchard; 4 1/2 miles from good railroad town; one of the best hog farms in the country. Price for quick sale, \$16 per acre. **Howell Realty Co., 310 Shunkert Bldg., Kansas City, Mo.**

**FOR SALE OR EXCHANGE--** General merchandise stock in Iowa, about seven thousand. For sale or exchange for farm. Give full description first letter. Location, improvements and number of acres under cultivation last year. Address owner, C. H. M., care of Homestead.

**FOR SALE OR EXCHANGE:** 300 acres Mercer county, Missouri, improved, good land. 236 acres Henry county, Missouri, good new improvements, productive soil. Write for description and price. Box 151, Independence, Iowa.

**FOR SALE TO SETTLE AN ESTATE**  
The finest improved farm of 250 acres in southeastern Iowa. For full particulars write J. A. Mill, administrator, Stockport, Iowa.

**TO EXCHANGE:** Have a good improved farm, well located, to exchange for registered cattle or stallions. Write giving description and prices. Box 81, Independence, Iowa.

**WANTED** to sell or exchange, well improved, splendid 236 acre eastern Kansas farm that adjoins town with graded school, for a smaller farm in Iowa. Address, James K. Seaton, Vernon, Kan.

**3 REASONS**  
Why you should buy So. Dak. Lands  
1st. The south-eastern part of the state is in the great fertile Mississippi Valley. Soil is the same as that of Iowa and Illinois. We sell land in this section from \$25 to \$50 per acre, according to location and improvements. This land equals in every respect land which is selling for \$75 to \$125. in Iowa and Illinois.  
2d. We have the same climatic conditions and rain fall as in Northern Iowa and Illinois. Our average production of Corn equals the average in the above named states. Compare the difference in price of land.  
3d. Our Agency covers the 16 S. E. counties of the State; they produced 80 per cent. of the State's corn crop. We can show you actual production values; our lands are time-tested and crop-tested, proving its ability to produce abundantly: **Corn, Oats, Red Clover, Alfalfa, Blue Grass and Timothy.** All essential to mature the great American Steer.  
Write to-day for lists and literature.  
**BIG SIOUX VALLEY LAND CO. (Ltd.)**  
Ramsey Bldg., Sioux Falls, So. Dak

**LET ME SELL YOUR FARM, HOME OR BUSINESS.** No matter what it is worth or where located. If you want your property sold quickly send description and price. If you want to buy a property of any kind, tell us your requirements. We can save you money.  
**GLENN REALTY CO.**  
16 Gumbel Building, KANSAS CITY, MO.

**TO EXCHANGE:** Good 640 acre farm in Wilkin county, Minn.; 400 acres in Dunn county, Wis., both improved. Want smaller farm live-stock or city property. Box 151, Independence, Iowa.

# LANDS AND HOMES FOR SALE

## Raise Crops That Pay From \$35 to \$125 Per Acre on Land That Costs \$40 to \$75

This is what the farmers in the Great Arkansas Valley in Western Kansas are doing today in that wonderful Alfalfa and Sugar Beet Country, and you can do the same. But remember, this land will not sell at this price always. It's only a matter of a short time till it will be \$300 to \$500 per acre.

### Profitable Crops in the Arkansas Valley.

The rich alluvial soil of the Arkansas valley will raise many crops in abundance. Alfalfa is the best feed for stock that has ever been known. Farmers harvest four crops a year here to say nothing of seed. The usual yield is about 2½ tons per acre each cutting, and sells for \$4.50 to \$8.00 per ton. In addition to the hay the seed yields about seven bushels per acre and sells for \$6.00 to \$10 per bushel. This certainly beats raising corn or oats. Sugar beets are a very easy crop to handle and pay from \$40 to \$75 per acre on this irrigated land. Then there is no question about a market, as the million dollar Beet Sugar factory at Garden City, contracts to take all the beets farmers raise at \$5.00 per ton. You just know just what you will get for your crop. And you know you will have a crop on this irrigated land. There is no guess work about it. A crop of cantaloupes will bring from \$100 to \$125 per acre. Other crops which do well in the Arkansas valley are wheat, corn, barley, wild hay, sorghum, flax, oats, potatoes, watermelons, prunes and small fruits of all kinds.

### Buy Now—Prices Low—Terms Easy.

If you want to buy land while the price is low, come now. We make very easy terms. Some cash, balance in three to five years. This land is a bargain at the prices we offer it—\$40 to \$75 per acre—and will make money either for the farmer or investor. The raise in value alone will make you more than the crops on land in other sections.

Private Dining and Sleeping Cars operated by the Great Western Land Company, from Chicago, Kansas City and intermediate points to Garden City, Kansas.

### Facts About the Arkansas Valley.

Water:—The average rainfall in the Arkansas Valley for the past twenty years has been twenty inches and there is plenty of water for irrigating. Good, pure drinking water can be had at from 15 to 50 feet.

Climate:—The climate of the Arkansas Valley is very healthful. The air is dry and pure. The days are sometimes warm in summer, but the nights are always cool. The winter seasons are mild and usually there is very little snow, and owing to the even temperature there is very little sickness, such as pneumonia, etc.

Garden City:—This is one of the coming towns of the great Southwest. You will find here, as well as in the country adjacent, excellent schools and splendid churches. In fact, Garden City, has all the advantages that any Eastern town has, and in fact better, population considered.

A Stock Country:—We have one of the best stock countries in the West. The mild winters, abundance of cheap feeds, such as Alfalfa and best pulp makes this an ideal locality for the man who raises horses, mules, cattle or hogs.

Land Advancing:—We cannot lay too much stress on the fact that land in the Arkansas Valley is very cheap and is advancing in price. The Great Western Land Company controls all the land we are offering and as we bought months ago we are selling at bottom prices. This land will advance 50 per cent in six months.

Alfalfa pays from \$40 to \$75 per acre, and sugar beets from \$50 to \$90, cantaloupes about \$125. The Great Western Land Company has 30,000 acres of this RICH ARKANSAS VALLEY ALFALFA AND SUGAR BEET LAND to sell, and it's going fast. A FINE IRRIGATION SYSTEM with 5 GREAT DITCHES waters this land. Government tests prove the UNDERFLOW INEXHAUSTIBLE. A reservoir 5 miles by 2½ miles in dimension will soon complete the system. See the Million Dollar Beet Sugar Factory at Garden City. Our land is near there.

**The Same Land We Are Selling For \$40 to \$75 Sells From \$300 Up In Colorado.**

Get some land for the boys and girls where prices are low and crops pay big. Then they only need a small farm.

Write for State Map, Booklet and Weather Report. Sent Free. BAZEL J. NIKER, Chillicothe, Missouri.

## Gulf Coast Texas

Offers greater opportunities to the farmer, homeseeker and investor in land than any other place in the world today. We own and control 1,000,000 acres in the gulf coast country, which we will sell in tracts to suit everybody, from the fruit or truck farmer, who wants 5 to 10 acres or up, the home seeker, a quarter section or section, to the investor or syndicate, who wants up to 100,000 acres. Prices, \$1.50 to \$35 per acre, according to size of tract and location. This land is all fine, black loam, from 2 to 5 feet deep. Clay subsoil. No brush. Ample rainfall. No irrigation necessary. Fine water in wells, 25 to 250 feet deep. Sufficient elevation to assure a fine atmosphere, cool, refreshing breezes, all within one to ten miles of railroads, and within 30 to 100 miles of ocean transportation. Healthful climate and fine neighbors. Profits of \$50 to \$600 per acre annually can be made, according to crop grown. Corn, oats, alfalfa, rice, cotton, sugar cane, oranges, figs, all kinds of garden truck. Some crop every month in the year.

Call or write for our book, "Truth About Texas," and state map, free. Excursions from all points, first and third Tuesdays of each month. Come and see. Buy from owners and save commission. Easy terms.

PICKETT-HAMMOND LAND COMPANY,  
Opposite Grand Central Station,  
Houston, Texas.

### OWN A FARM IN CUBA.

## FIELD NOTES.

Mr. E. O. Wolcott, of Gilmore City, Iowa, is to hold a dispersion sale of his herd of Short-horn cattle on February 27, 1907.

A 600-pound Chester White herd boar will be sold in the W. H. Leslie sale at Auburn, Iowa, on February 9th. He is a good breeder and a good hog.

Mr. Laban Harrison, of Prescott, Iowa, has a choice thoroughbred three-year-old Clydesdale stallion which he is offering for sale at a reasonable price in his advertisement that appears on page 29 of this issue.

Mr. S. J. Philson, of Harlan, Iowa, breeder of Improved Chester White swine, writes: "I am all sold out of bred sows and gilts, excepting a few May gilts bred for May farrow. I have had a splendid trade, having sold over sixty head of bred sows and gilts and nearly all to Homestead readers. I am receiving orders every day from those want-

ing bred sows and gilts, saying they saw the advertisement in The Homestead." Mr. Philson's advertisement appears on page 42.

See Mr. Geo. T. Underhill's Collie dog advertisement on page 14. Mr. Underhill's Collies are well known. He has made some additions to his kennels and has just issued a fine illustrated catalog.

Mr. J. A. Dill, of Stockport, Iowa, is offering a 240-acre farm, located in southeastern Iowa, for sale to settle an estate. The advertisement appears on page 24 of this issue. Write him for description and price.

Mr. L. C. Barnett, of Indianola, Iowa, is offering ten Percheron and French draft stallions for sale at a sacrifice in order to clean up the estate of the late J. H. Barnett. The advertisement appears on page 29 of this issue.

Messrs. J. W. Troy & Bros., breeders of Chester White swine, of Rose Hill, Iowa, have a few tried sows and selected gilts for sale as per advertisement on page 42 of this issue. They have been bred for March and April farrow.

Mr. L. L. Gregg, of Lone Jack, Mo., offers some desirable Scotch-topped Short-horn bulls that have for their sire Lord Orange, a pure Cruickshank bull. These bulls carry from three to six Scotch tops and are being priced worth the money.

Mr. J. C. Hoag, of Manson, Iowa, reports that he has sold all of his Poland China pigs at prices satisfactory to himself, as well as the seller. He writes that he has one two-year-old Scotch and Scotch-topped Short-horn bull for sale which he will dispose of cheap to close out.

Mr. Clyde H. Smith, breeder of Duroc Jersey swine, Riceville, Iowa, writes: "I am all sold out of boars and gilts. I have bred a cracking good lot of sows and gilts for next season's trade, to an extra heavy-boned son of Iowa Notcher and expect to have something first class to offer my customers the coming season."

Mr. S. J. Butts, of Mason City, Iowa, writes: "I am all sold out of breeding stock and could have sold as many more from my advertisement in The Homestead. I will stay in the business another year at least. I will have stock as good as I can raise for old and new patrons." Mr. Butts' advertisement appears on page 29 of this issue.

Mr. W. W. Dyer, of Keosauqua, Iowa, has several head of native stockers and feeders for sale, consisting of Angus, Herefords and Short-horn yearlings. These cattle are all dehorned, are even in size, in good grass flesh, but have had no corn. Mr. Dyer will make the right price to a quick buyer. His advertisement appears on page 29 of this issue.

Mr. J. E. Guernsey, of Keosauqua, Iowa, has ten two-year-old Short-horn heifers and some extra fine young bulls, large-boned and growthy, all sired by an imported Cruickshank bull, which he will sell at bargain prices to close out. He also has a few tried Duroc Jersey brood sows and a choice lot of gilts for sale. His advertisement appears on page 33 of this issue.

Mr. A. A. Rogers, of Inwood, Iowa, has eight young Scotch and Scotch-topped Short-horn bulls, ranging in age from eight to eighteen months, which he is offering for sale in his advertisement that appears on page 43 of this issue. These bulls are representatives of such families as Imp. Generosity, Rosemary, Crocus, Strawberry and Charlotte. They are sired by the Cruickshank Victoria bull, Craven Archer 174012. He also has a few cows and heifers and he invites the readers of The Homestead to visit him and inspect the stock or write for descriptions and prices.

Mr. F. A. Trumbauer, of Patterson, Iowa, writing under recent date, reports that he is all sold out of Chester White hogs and that inquiries have been coming at the rate of two to fourteen a day. He adds: "I will say that The Homestead has sold more hogs for me than any paper I ever advertised in. Tell the readers of your paper that I will be on hand again next fall with some very blue blood, accompanied with plenty of size, bone and finish. Have fifty fall pigs that are doing nicely and they will be for sale next fall along with my spring crop of pigs. My hogs are the large, growthy kind, heavy breeders and have been bred for easy feeders."

We start an advertisement this week for Mr. G. A. Fewell, of Leeton, Johnson county, Mo., who has seventy-five big registered jacks, jennets and registered trotting, saddle and harness horses which he announces he is going to close out on February 22d, rain or shine. The Johnson County Jack Farm, of which Mr. Fewell is proprietor, was established in 1850 and particular interest has been given to the rearing and breeding of black Mammoth, Caledonian and others of best breeds of jacks, and also registered trotting and saddle horses. In the past, everything has been sold on their merit and guaranteed as represented and those of our readers who attend this sale will find something to their liking in both jacks and horses. See advertisement on page 45.

Messrs. Taylor & Jones, importers and breeders of Percheron, Shire, Belgian and coach horses and Short-horn cattle, of Williamsville, Ill., write: "We are pleased to report that during the past week we have sold an extra good two-year-old imported Percheron stallion to Mr. J. Young Caldwell, of Williamsville, Ill., making the third stallion we have sold right here at home. Mr. Caldwell knows a good horse when he sees it and has been in the breeding business for a long time. Yesterday we sold a two-year-old imported Shire stallion to Mr. E. G. Spense, of Assumption, Ill. Mr. Spense found just what he wanted in a draft horse and when he found him, he was not long in closing the deal. We congratulate Mr. Spense in his selection. A very fine American-bred Percheron stallion, two years old, was also sold yesterday to Mr. S. Luttrell, of Waverly, Ill. Mr. Luttrell is one of those sturdy farmers who knows it pays well to breed the best in everything. Mr. H. A. Briggs, of Elkhorn, Wis., who has imported some of the best horses that have ever been imported, has decided to quit the business and recently sold his horses to us, so we now have a fresh lot of good horses on hands and we are selling them worth the money. Come and see what we are doing and get our

proposition if you are in the market for a stallion of any of the draft breeds."

Messrs. Peter Hopley & Son, of Lewis, Iowa, report the sale of three Percheron stallions and one German coach horse to Mr. James Ray, of Salt Lake City, Utah, and on last Saturday a Suffolk Punch stallion that weighed 2,030 pounds and four mares to Messrs. Carpenter Bros., of Coon Rapids, Iowa. The mares were young, but one spau would weigh over a ton. The others were weanlings. They still have some good Percheron, Suffolk and German coach stallions on hand and a grand lot of Suffolk fillies. There is no more reliable firm than Messrs. Peter Hopley & Son, and they certainly have the horses. They do their own selling and their own buying and they keep their horses right on their farm. You can easily see how the buyer gets the benefit. Write them or go and see their horses.

Mr. M. P. Lydon, of Cresco, Iowa, is holding a brood sow sale on February 6th. The sale will include about fifty head in all. Six of these will be one and two-year-old sows, all bred for March, April and May farrow. Most of the offering is sired by his Iowa State Fair winner, Ideal Perfection 114975, and bred to Wanderer 77523. This hog weighed 835 pounds in fair condition at four years old. He has bone and quality to suit anyone, and is one of the most richly-bred hogs of his age. He is a grandson of old Chief Perfection II. His dam and granddam, Delightful Lady and Heart's Delight, were first-prize sows at the Missouri and Illinois State Fairs. Sale begins at 12:30 on the farm one mile east of town. A number of the April gilts have seven and one-half-inch bone and one of the yearling sows a nine-inch bone. Send for catalog and don't forget the date.

Mr. U. G. Davidson, of Manson, Iowa, in sending change for advertisement, writes: "I am about sold out of boars; have three or four left. I am also pretty well sold out of gilts, having just twelve left on the place. Eleven of these are sired by that old monarch, Crimson Wonder 1 Am, and the other one is bred to him. Any breeder wanting a show prospect for another year can find it here and if he wants something for the future, these gilts bred to American Lad ought surely to lay a good foundation. Iowa Wonder, the sire of American Lad, is a grandson of both Duroc Challenger and Crimson Wonder 26355; the dam of American Lad is a granddaughter of Tolstoi and has won a blue ribbon at our county fair. American Lad is one of the best young boars I have ever raised. He has great length, fancy head and ears, as great a spring of rib as I ever saw, and a pair of those great, full prominent hams that we so often read about, but seldom see. This young boar is for sale now and should be fitted for the shows next year. Parties desiring bred gilts should write or call at once, as I never have enough gilts to go round. In writing, mention The Homestead." See advertisement on page 44.

The Ardmore Stock Company, of Holstein, Iowa, have some choice Scotch and Scotch-topped bulls for sale as per advertisement found on page 29 of this issue. In furnishing copy for the advertisement they write: "Among the Scotch bulls mentioned in the advertisement is a very choice fellow by Imp. Lord Mount Stephen 206904, and out of a Duthie-bred Imp. Orange Blossom cow that is one of our best producers. Another choice Scotch bull is by Imp. Scottish Pride out of a good Scotch cow, Victoria of Meadowlawn 3d (Vol. 51). This young bull resembles his sire very much. Another exceptionally good bull is by Lord Mount Stephen out of Miss Ramsden of Ardmore, a grand young breeding cow sired by Duke of Oakland 2d and out of the cow, Nina Lass, sold by us in the International sale to Mr. Harding. The Scotch-topped bulls comprise a lot of good individuals, sired by Scottish Pride and by Lord Mount Stephen that will do good service in good, topy herds of grade cattle, and that are priced within the reach of farmers who raise good cattle. Several of them are individually good enough and well enough bred to do good service in pure-bred herds where a straight Scotch is not insisted on. We also have for sale some good cows and heifers in calf to the herd bulls and one or two to Superbus 224710, that are priced reasonably for quality."

**A THICK YOUNG BULL.**  
 Mr. Jas. Atkinson, of Des Moines, Iowa, is offering for sale an extra good Short-horn bull. At fourteen months he weighs 1,030 pounds; is a beautiful red and is a low, blocky fellow. He is out of Mary 3d (Vol. 45, page 937) and sired by the great Scotch bull, Duchess Baron (224429). He shows the making of a show bull.

**PETER STERLING GOES TO MISSOURI.**  
 At the closing out sale of Mr. Thos. F. Miller, at Fullerton, Neb., on January 25th, the well-known boar, Peter Sterling, was purchased by Messrs. B. T. Wray & Son, of Hopkins, Mo., and J. H. Harvey & Son, of Maryville, Mo. Nine head of Peter Sterling sows in the Miller sale averaged \$133 per head. He is today one of the greatest breeding boars ever sired by old Chief Tecumseh 3d.

**JAMES' BIG POLANDS.**  
 On February 23d Mr. J. O. James will make a public sale of forty head of big-boned Poland China sows, mostly sired by or bred to his famous old boar, Pawnee Lad. Those of our readers who want the large, big-boned sows will find the James offering strictly all right. Get your name down for a catalog at once. If you want big sows and from a reliable herd you will find them in the James sale. Write at once for his catalog.

**HARRISON BUYS ROYAL SULTAN 3D.**  
 In a recent letter from Mr. G. W. Harrison, the well-known Short-horn breeder at Washta, Iowa, he says: "I have just returned from Anoka Farm, where I bought of Mr. Frank Harding the great young bull, Sultan 3d, a son of White Hall Sultan and out of a Princess Royal dam. Mr. Harrison keeps him for a couple of weeks to show the recent buyers of White Hall Mar-shall, who goes to Kentucky. Then he will ship him to the Grand Meadow Brook herd where I expect him to grow into one of the best bulls in the state of Iowa." Mr. Harrison is out after the good things and when he sees what he wants he goes after it. This young bull will hold the well-known Scotch

bull, Scottish Knight, that has headed his herd for the past few years.

#### CHESTER WHITE SOWS.

In remitting for his advertisement, Mr. George H. Lawshe, the well-known Chester White breeder, of Harlan, Iowa, says: "I have a few choice bred sows left and anyone wanting one must send his order at once. I am breeding these to my new boar, Col. Sutton 12105, one of the best-backed, deepest-hammed and largest-boned boars I have ever used. Anyone buying a sow bred to this boar will never regret it, because he is one of the best hogs I have ever seen." If any of our readers want bred sows of the Chester White breed, write Mr. Lawshe, Harlan, Iowa.

#### CARL HANSEN'S SOW SALE.

On February 15th Mr. Carl Hansen, of Herman, Neb., one of the best young breeders in the state, will make a public sale of forty head of Duroc Jersey bred sows. There will be thirty-one head of spring gilts and nine fall yearlings. This offering will be sired by Bar None, Bar None 2d, Grant Hero and Critter's Echo. They are bred to Grant Hero, Grant Challenger and Grant Defender. Mr. Hansen is putting up a remarkable offering for strong feet, nice color, good heart girth and width of back and loin. They are out of daughters of Gold Dust Jim, Surprise and other good boars. Ask him to send you a catalog. Watch for more about his offering in our next issue.

#### POLAND CHINAS AT PRIVATE TREATY.

In this week's issue Mr. W. H. Jones, of Clemons, Iowa, has chosen to announce that he has a choice lot of spring gilts and mature sows to sell at private sale. This breeder has been in the business for sixteen years and says he is in it to stay. He is making a specialty of mail orders, where it is impossible for buyers to visit his herd. However, he is very glad to see visiting breeders and to have them inspect his collection. The gilts are sired by Standard Perfection 95601, Baraboo 108427 and B's Dude 91429. They are bred to a T. J. Perfection 114983, and should prove very good investments for those looking for some first-class Poland Chinas. See advertisement on page 29.

#### PERFECTION CHIEF STOCK COMPANY SALE DATE CHANGED.

Messrs. O. B. Kimmons and T. G. Nash, both of Pickering, Mo., and Geo. B. McMurray, of Maryville, Mo., members of the Perfection Chief Stock Company and owners of the great Duroc Jersey show and breeding boar, Perfection Chief, have changed the date for their sale of bred sows from February 27th to February 25th. These gentlemen are selling the tops of three good herds. There are daughters of many of the most noted boars in America listed for this sale. Several daughters of Proud Advance are sows of great individual merit. Watch for future announcements of this great sale or write either gentleman to put your name on his mailing list.

#### GOOD SHORT-HORN BULLS FOR SALE.

On page 43 of The Homestead will be found the announcement of Mr. J. H. Moyer, of Newton, Iowa. Mr. Moyer, while not one of the largest breeders of Short-horns in the state, has, however, some splendid Short-horn cattle, both Scotch and Scotch-topped. At this particular time Mr. Moyer has a few very choice bulls left that he is pricing right, and some most excellent females that are soon due to calve. Inasmuch as Mr. Moyer is desirous of closing these cattle out at an early date, he is making very attractive prices on them that should move them speedily. Homestead readers will find it to their interest to correspond with him at once, or, better still, visit him and inspect this offering. He is located but a short distance from that veteran breeder, Mr. H. D. Parsons, and has had access to the best herd bulls used by Mr. Parsons.

#### LAST CALL FOR HENRY BROS.' SOW SALE.

One of the best offerings of Poland China sows that is to be sold in northwest Iowa this spring is that of Messrs. Henry Bros., at Le Mars, Iowa, on February 8th. They are selling fifty head, ten head of matured sows, fifteen fall sows and twenty-five spring gilts. There are daughters of the noted boar, Corrector 2d, in this sale, also Matchless Perfection, the best son of Chief Perfection 2d, and Matchless Perfection Jr., their two-time sweepstakes boar at the Interstate Fair, and the first-prize boar at the Minnesota State Fair. They are also offering sows by Meddler Boy, a son of the champion, Meddler, and On Parade, a son of the noted boar, On and On. Besides these will be sows sired by Pilate's Chief, Dewey Corwin and Correct I Know. These sows are bred to Matchless Perfection, Matchless Perfection Jr., Meddler 2d, On Parade and Correct I Know. Messrs. Henry Bros. have never offered a better lot of sows. Write for their catalog and then go to the sale. Kindly mention The Homestead when writing.

#### BAXTER'S DISPERSION SALE.

A dispersion sale of any herd always gives an opportunity to the breeders interested in the stock to be sold to secure at their own figure valuable animals that would under no other circumstances be sold. So it is with Buddy K. IV., the noted boar in service at the head of the Duroc Jersey herd owned by Mr. Ed. A. Baxter, of Pawnee, Ill. This gentleman has been engaged in the breeding of thoroughbred Duroc Jerseys for fifteen years and has always been enthusiastic as to the outcome of the Duroc breed. He has firmly made up his mind to sell every Duroc he owns, not because the business has not been profitable to him, but on account of his health and the scarcity of help. The herd boar, Buddy K. IV., is to be sold at auction. He has been a very good breeding boar, and has been shown with success, winning first and champion at the Illinois State Fair in 1905, and second in aged boar class at the same fair in 1906, only being defeated by the noted Commodore. Twenty tried brood sows are included in this offering bred to this noted sire, and a number of his get will be found in the lot. The breeder who is in the market for a show and breeding boar will have an opportunity to secure this one at his own price. The sows in this sale are as good as can be found anywhere. A daughter of Proud Advance, litter sister to Minnie Advance, the sow that sold in Messrs. McNeil Bros.' sale at \$700, is included safe in pig to the champion boar, Tip Top Notcher. She is individually of show-yard merit and

her breeding cannot be excelled. What then are the prospects for her litter by Tip Top Notcher? A daughter of S. E.'s Model VIII, litter sister to S. E.'s Model IX., that sold in the Sheldon sale for \$1,060 last winter, will please the most discriminating breeder. She is safe in pig to Buddy K. IV.

#### THE PUCKETT AND GRINNELL DUROC JERSEY SALE.

On February 15th, the day following the Duroc Jersey sale of the Whitehall Combination Sale Company, at Yellow Springs, Ohio, Messrs. S. S. Puckett and M. R. Grinnell will sell fifty head of the tops of their two good herds of Durocs. These gentlemen have been among the good breeders of Duroc Jerseys in Ohio and have made several sales during the past few years. They have in service at the head of their herds boars of unequalled breeding and prize-winning merit. Such a boar is S. S.'s Success, a prize-winning son of Ohio Chief. We give a list of boars used in these herds and are pleased to recommend their produce to our readers. The get of S. S.'s Col., S. S. Success, Puckett's Chief, C. E.'s Col., Beat Him If You Can and others, bred to a grand collection of boars, the best of breeding, including S. S. Success, S. S.'s Col., Puckett's Chief, The Model, Ideal Success and others. We will give full particulars regarding this offering in our next issue. Kindly mention this paper when writing.

#### BURGESS & SON'S PUBLIC SALE OF STALLIONS AT WICHITA, KAN.

Every reader of this paper interested in securing Percheron, Belgian, Shire and Hackney stallions should plan to be present at

that are producing such herd bull material as merits the attention of breeders who are looking for something good. Messrs. Novinger hold annual sales and for their coming sale on March 1st they have listed a goodly number of Scotch females, as well as hulls. There is herd header material here. Watch for future announcements. The writer has just seen the cattle and will have more to say of the offering in future issues.

#### A FEW DUROC JERSEY BOARS LEFT.

For those who are still in the field for male pigs of this breed we would call their attention to the fact that Mr. J. C. Porter, of Ogden, Iowa, can probably supply their wants. He has a few young boars of May and June litters and he has been holding them until they attained a little more size before offering them to the public. These carry the blood of old Advance and Orion. He also has a few gilts of recognized breeding. They are in nice, thrifty condition, good bone and well grown. Mr. Porter's farm is right at the edge of town so that it will be a very handy place to call.

#### TOOP'S POLAND CHINA BROOD SOW SALE.

On Thursday, February 7th, at Auburn, Iowa, Mr. W. I. Toop will make his second annual sale of Poland China brood sows. His offering this year is a good one. His gilts are well developed; have plenty of size and lots of quality. His sows are the good, practical kind, having lots of length, good feet and ample bone. The boars now at the head of the Toop herd are Black Sensation's Rival, a son of young Black Chief's Rival, and a grand young boar. In

## All Saw the Advertisement in The Homestead

### IOWA SWINE BREEDER SELLS ANIMALS IN FOUR STATES, IN ONE WEEK, AS A RESULT OF HOMESTEAD ADVERTISING.

MR. J. M. JANSSEN, of Sibley, Iowa, finds that the 100,000 subscribers of The Homestead include numerous purchasers of pure bred swine. He writes: "My sales have been excellent during the past week. All my boars have been sold. I have shipped five boars and four gilts to points in Iowa, South Dakota, Nebraska and Missouri; and all the purchasers said they saw the advertisement in The Homestead."

Wichita, Kan., on Friday, February 22d, at which time Messrs. Robt. Burgess & Son, the well-known breeders and importers of horses, will offer for sale at public auction fifty head of imported and American-bred stallions of the breeds mentioned above. This firm have been successful exhibitors at all of the leading shows and fairs of 1906. We give below list of prizes won in 1906 by this firm: Champion Percheron stallion at the Kansas State Fair; champion Belgian stallion at the Kansas State Fair; champion Shire stallion at the Illinois State Fair; champion Shire stallion at the American Royal, Kansas City; champion American-bred Percheron stallion at the American Royal; champion Shire stallion at the International, Chicago; reserve champion Belgian stallion, International, Chicago; first best five Shire stallions, American Royal, Kansas City; first best five Percheron stallions, Kansas State Fair; first best five Belgian stallions, Kansas State Fair; first best five Shire stallions, Illinois State Fair; first best five Shire stallions, International, Chicago; second best five Belgian stallions, International, Chicago; second best five Belgian stallions, Illinois State Fair; second best five Belgian stallions, American Royal, Kansas City; second best five Percheron stallions, American Royal, Kansas City. The terms and guarantee relating to horses included in this sale will be found in the advertisement on page 45 of this issue. If interested in the purchase of a stallion, write Messrs. Robt. Burgess & Son for further information, kindly mentioning this paper.

#### ISAAC A. NOVINGER & SONS WILL SELL A GREAT LOT OF BULLS.

Messrs. Isaac A. Novinger & Sons, of Kirksville, Mo., the well-known breeders of Scotch and Scotch-topped Short-horns, have on hand twenty of the best Short-horn bulls they have ever raised. Mr. Novinger has been a careful and a persistent worker and the herd as it stands today shows what may be accomplished from a small beginning where the man behind the gun is persistent and energetic. Scotch blood has been introduced into the herd from time to time by the use of pure Scotch sires and the purchase of Scotch females, and today Messrs. Novinger & Sons have a fine string of Scotch cows

fact, he is one of the good young boars of the year. Pilate U. S. is a son of Pilate's Chief. Right Kind 2d is a son of Look Me Over Chief, and Perfection I Am is a son of Fancy Perfection. These four boars are now in use in the herd and are bred to most of the sows in the sale. Graceful Miss is a daughter of Black Sunshine and is a fine, large sow, always farrows a good litter and is bred to Right Kind 2d. She also has a daughter in the sale by Auburn Chief, a son of Chief Tecumseh 3d. There are three good sows in the sale, all daughters of Good U. S., one of the first sows Mr. Toop ever owned. Grace Sunshine is a daughter of Black Sunshine and a litter sister to No. 1. This sow is large and a splendid breeder. Another good sow is Perfect's Queen by Perfect Wonder. She is the dam of the gilt that topped his sale last year and her hoars were the first to go this fall. He will sell a good lot of granddaughters of old Chief Tecumseh 3d in this sale, and they are good. Among the best gilts is Lady Sensation, a daughter of young Black Chief, and a litter sister to Black Sensation's Rival, the young boar now at the head of the herd. She will bear the most critical inspection on sale day. If you are looking for a couple of gilts with plenty of stretch and lots of bone, then take notice of the two by John Chief. The Toop offering is a good one; the gilts are well grown out, the sows are tried and proven breeders, and the offering is first class in every way. His catalog is now ready for distribution. Write for it and mention The Homestead.

#### FOSTER'S DUROC JERSEY SOW SALE.

On February 15th, Mr. W. A. Foster, of Greenfield, Iowa, will make a public sale of Duroc Jersey sows, at which time he will sell forty head. Five of these are aged sows, the balance spring gilts. He is selling three daughters of the Iowa sweepstakes boar, Crimson Wonder I Am, bred to I Am Orion, a son of old Orion. One of these gilts is an extra good one and should go to some good herd. Mr. Foster also sells four granddaughters of Proud Advance, the balance by Bell Watts, a grandson of old Kan't Be Beat. These sows are all bred to Foster's Wonder by Crimson Wonder I Am, I

Am Orion by Orion and Bell Watts. Mr. Foster is not the oldest breeder in the land, but he is a young man that deserves to make a good sale. He is putting up a nice, useful offering of sows, and among these are some very toppy ones. He has purchased good herd boars, and consequently has some of the most up-to-date blood lines. Write for his catalog at once and kindly mention The Homestead.

#### DUROC JERSEY BRED SOW SALE.

We would very much like to call the attention of Duroc breeders to the sale of Messrs. G. C. Everts & Son, to be held at their Cloverdale Stock Farm four and one-half miles from Gray, Audubon county, Iowa. The date is February 15, 1907, and as this will be one of the good sales of the season we hope that breeders and farmers who are coming to appreciate this breed more fully will turn out in good numbers and partake of the generous hospitality of Messrs. Everts & Son, and at the same time secure some splendid individuals of first-class breeding. At the head of the herd stands Cloverdale King 44073 by Whitney King by Corn Cracker 14205. This sire has been a good investment for the farm and carries himself with a style and dignity that at once indicate his prepotency. His good bone and scale are well shown on his get, which numbers some twenty head of young sows. The older sows will be bred to him, while for the young sows a Crimson Wonder boar of good makeup and promise and a grandson of Crimson Wonder 26355 has been used. The advertisement appears on page 34 and when writing for a catalog kindly mention The Homestead.

#### S. J. MILLER'S IMPORTED PERCHERONS.

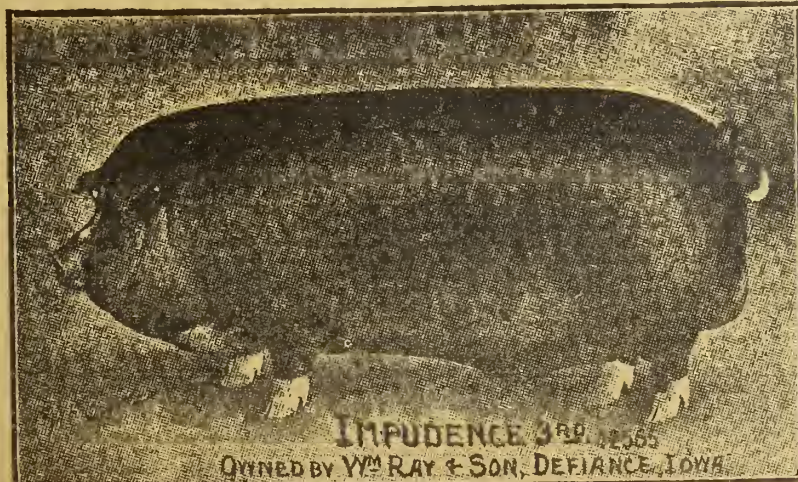

Mr. S. J. Miller, of Kirksville, Mo., importer of Percherons, is one of the men who believes in selling his stallions at live and let live prices, hence he does not work on the company plan. He invites those who want stallions to come to his barns at Kirksville, Mo., see the horses and select from the entire bunch. By following this plan he can sell his horses cheaper than where expensive salesmen are employed. Last year his entire importation was sold in this way and not a single horse was returned. This year Mr. Miller has by far a better class of horses than last year and the man who is hunting imported stallions that have size, bone and quality will find them at this sale. For \$1,000 he can furnish as good a stallion as was brought over this year—excepting one or two special show stallions brought by showmen. For \$800 to \$900 Mr. Miller will sell the stallion buyer as good a horse as is sold on the company plan for \$2,500 and often \$3,000. He says come and see these horses. He knows they will fill the bill, or if you will write him describing what you want he will tell you if he has such a horse. Another litter of those smooth-coated fox terrier puppies is old enough to ship. See page 38 for Mr. Miller's advertisement.

#### WILLIAM LENTZ SELLS POLANDS FEBRUARY 8TH.

Last week we told our readers that we thought one of the good Poland sow sales next week would be that of Mr. William Lentz. The selling will take place in the town of Ankeny, Iowa, on the North-Western Railroad—twelve miles north of Des Moines. After carefully looking over this herd we are frank to say that Mr. Lentz has achieved some very good results in his breeding work. From the start he has made there are good prospects for his future work since the foundation of his herd has been laid on good blood lines. Realizing that it is almost impossible to breed poor feet and limbs out of a herd, Mr. Lentz has selected his purchases with extra care and the result is that his herd is free from these defects. The five head of old sows are sold for no fault whatever, but rather to give balance to the sale. They will be excellent producers for several years to come and should be taken up without any hesitation. The gilts and yearlings are most excellent in bone and are very breedy and roomy as individuals. They have been fed right and will not owe their weight to fat, but to good, solid meat and strong frames. Reference to the advertisement on page 38 will tell more of their breeding. Turn out to this sale and welcome this breeder with his first sale. Catalogs will be sent for the asking. Kindly mention The Homestead.

#### THE DEFIANCE POLAND CHINA SALE.

What is considered the best offering of Poland China brood sows ever sold from the Evergreen Stock Farm, of Messrs. Wm. Ray & Son, will be sold at the new sale pavilion at Defiance, Iowa, on Saturday, February 9th. They are selling forty head and have selected their best brood sows and the tops of their spring gilts. These sows are bred to three boars now at the head of their herd. Impudence 3d is one of the greatest sons of the Iowa State Fair sweepstakes boar, Impudence, and a sow bred to him will be a great proposition for any man to put into his herd. Perfection L. & W. is a son of one of the world's greatest sires, L. & W. Perfection, and he is also bred to quite a number of the sows in the sale. Dude's Wonder is a son of Nemo L's Dude, and is one of the best breeding boars ever used in the Ray herd. The class of sows they are offering have plenty of size, and ample quality. The Meddler gilts are something real choice, and there are a number of others of their own breeding that are just as good. The entire offering is a good, practical lot of Poland China sows, bred along the most popular and up-to-date blood lines, and there is no more reliable firm than Messrs. Wm. Ray & Son. One of the largest sows in the sale is Loug Lady, and she is all that her name implies. She is in good flesh and will weigh 600 pounds. She is a line-bred Tecumseh sow and is bred to Dude's Wonder, a line-bred Tecumseh boar. She has been a great brood sow in the Ray herd. Another good, large sow is Miss Tecumseh. She is a little heavy in ear, but has plenty of size, and she is bred to the Dude hog, and he will correct the ears. She is a heavy-boned sow and always farrows large litters. Lady Make Peace is a granddaughter of old Mischief Maker, a sow of much quality, and the kind that always farrows show pigs. She is bred to Impudence 3d, and the man that wants a show litter should buy her. A number of Messrs. Ray's sows are sired by Dakota Chief 2d, a son of the great sweepstakes boar, Dakota Chief, considered one of the best

The great young boar, Impudence 3d, a son of the Iowa State Fair sweepstakes boar, Impudence; bred to a great number of the sows in the Wm. Ray & Son brood sow sale, February 9th, at Defiance, Iowa.

sons of old Chief Tecumseh 2d. This boar was formerly used in the herd and was the sire of sows with plenty of size and bone. Their catalog is ready for distribution and will be sent on application. Write for it and kindly mention The Homestead.

#### DEWITT'S BROOD SOW SALE.

On February 13th, at Russell, Iowa, Mr. A. W. DeWitt will make a public sale of twenty-eight head of Poland China brood sows. The two herd boars that these sows are bred to are Exception, a grandson of old Expansion and A. W. Standard, a son of Standard Chief. The sows that go into the sale are matured sows, yearlings and spring gilts. Mr. DeWitt is endeavoring to raise the big-boned kind, with lots of stretch to them, and a great deal of his herd is made up of these blood lines. He is putting in some good fall yearlings sired by Honest John, a boar that he used with much success in the herd. They are bred to Exception. There are a number sired by Young Jumbo 2d, and Buroak King. Mr. DeWitt is selling a good bunch of sows. The most of them carry the blood of the larger kind of Poland Chinas and are a most useful lot of practical, money-making sows. Bred to Exception and A. W. Standard they should produce the kind of pigs the people want. Write Mr. DeWitt for catalog. It is now ready for distribution. Kindly mention The Homestead when writing.

#### JOHN JUSTICE SELLS DUROCS FROM GREENWOOD HERD.

Buyers of red hogs this spring will find some very representative and deserving members of this popular breed at the sale of Mr. John Justice, to be held on his farm, Friday, February 15th. Those who go out from Des Moines should take the Des Moines, Iowa Falls and Northern train and stop at Quilhart crossing, which is only a few minutes' walk from the farm. Berwick lies one and one-half miles south and Ankeny six miles northwest of the farm. The offering will contain eight tried sows which have produced well and regularly. Two fall yearlings of attractive conformation and color are the only representatives of this class, but they are good ones and can stand a neat bid. The thirty gilts range from March to April and the early ones are well grown and large. Some of the sows are sired by Proud Lad by Field Marshall, also Billy K. Jr., Gilt Edge and others. The complete offering is bred to a good son of Keep On 2d, also to a half brother of Advance. Plan to get some of the numbers here offered. Send for catalog and kindly mention The Homestead.

#### BABCOCK'S BROOD SOW SALE.

On Saturday, February 2d, at Manning, Iowa, Mr. Ernest S. Babcock will sell fifty head of Poland China sows. Thirty head of these are yearlings or over and will weigh from 300 to 700 pounds. They are bred to Brookline's Express, an Illinois Interstate Fair prize winner, and to the massive hog, Long John. The latter boar is one of great size, plenty of length and a great big bone. Anyone wanting sows bred to a monster boar had better go after one bred to Long John. He has selected this offering of fifty sows from among 300 head, and he is putting in the very best he has. This is his first annual sale and he wants to make a good one. The sows that he sells will have plenty of quality and enough size to suit any of our breeders or farmers. Every sow that he sells is guaranteed a breeder, and every sow that goes into the ring will carry her own guarantee with her. We have seen his sale offering and would ask our readers who want Poland Chinas to come out and give the young man a lift. His catalog is ready for distribution. Write for it and please mention The Homestead.

#### MOATS' POLAND CHINA BROOD SOW SALE.

At Villisca, Iowa, on February 5th, Messrs. H. B. Moats & Son will make their annual brood sow sale, and they will sell about fifty head. It is a decidedly top quality offering from beginning to end, having more size than they have ever offered before and with all the quality that one could desire. Thirty-five are fall and spring yearlings and matured sows. A good daughter of Chief Perfection 2d bred to their noted boar, Shamrock, goes in this sale. They also sell a yearling daughter of Perfect Perfection, a litter brother to Perfect Perfection. They also sell some daughters of the noted boar, Big Perfection, and these are always good. There will be a number of daughters of old Shamrock in the sale, and he will also be bred to many of the sows in the sale. Another boar they are now using is Perfection Stamp, and he is a son of Big Perfection. He is a hog with great size and he gets that kind of pigs. Messrs. Moats & Son never offered a better class of sows than they will send through their sale ring on February 5th. Write at once for catalog and kindly mention The Homestead.

#### THE NOTED INDIANA AND OHIO DUROC JERSEY SALES.

The week commencing Monday, February 11th, will witness some of the most noted sales of the Duroc Jersey breed. Not for the prices that may be obtained, but on account of the noted stock listed from some of the greatest herds of the breed. On Monday, February 11th, Mr. J. A. Teter, of Remington, Ind., will sell forty head of richly-bred Durocs from his well-known Top Notch herd. Tuesday, February 12th, Messrs. Watt & Foust, of Cedarville and Xenia, Ohio, and Messrs. Mahan Bros., of Osborne, Ohio, will sell a draft from their noted herds of prize-winning Durocs at the Fair grounds in Dayton, Ohio. Wednesday, February 13th, Mr. Ira Jackson, of Tipppecanoe City, Ohio, will sell a select draft from his noted herd, at his farm, ten miles north of Dayton, on trolley line between Dayton and Troy. Thursday, February 14th, the Whitehall Combination Sale Company will hold their annual brood sow sale at Whitehall Farm, adjoining Yellow Springs, Ohio. This sale can be reached by traction car from the sale of the day previous. The consignors represent some of the best herds of the breed. Friday, February 15th, Messrs. M. R. Grinnell and S. S. Puckett will sell fifty head from their herds in Yellow Springs. For the benefit of those not acquainted with the location of the several sales we will say that they are all within reach of each other with the exception of the first day's sale, that of Mr. J. A. Teter, which can easily be made on the way to Ohio. Ample arrangements have been made to care for all breeders from a dis-

## THE CENTRAL IOWA DUROC JERSEY SALE CIRCUIT

Five grand sales of phenomenal producers, reliable breeding stock, prize winners and material for winners and valuable foundation timber is what the central Iowa circuit stands for. Six of Iowa's successful breeders with six prosperous, royally-bred herds are preparing to make this assertion a plain, absolute fact. Every detail of the march from the time Mr. Roy West, at Bondurant, opens the series, to the last hog that is sold at Mr. E. R. Wood's, at Jefferson, has been carefully worked out. All that is needed to see the five grand events is to get in the bandwagon with the crowd and enjoy the fun. It is yours if you will it, with all the good eating, visiting and jollity that can be crowded into that brief time. Here is an exceptional opportunity to make new acquaintances and renew old. To extend your influence as a breeder of the most popular hog in the corn belt. The catalog for each sale will tell the details of the story. Spend a nickel for postals and get the complete series. You can depend upon it that your attendance will be highly appreciated and the favor returned. Col. C. E. Luther cries each of the five sales. Bids sent to him or to Mr. L. E. Troeger, of The Homestead, in care of the respective consignors, will be courteously handled.

#### THE OPENING DAY AT BONDURANT, IOWA.

On February 4th, two miles from town, Mr. Roy West will start the bids with a grand assortment of breeding that will suit the most particular. Here it is: A litter sister to Ruberta, the sow that just sold - for \$1,500. Nine daughters of Matchless Challenger 37301, five daughters of Col. Newburn, four by King Perfection, a son of Banker Boy II.; four by Young Advance 44315, son of Proud Advance, and five by Onward, a son of Long John Son 26501. And for the Orion collection there are some sired by Manley Orion and Proud Orion; also by Billy K., Tientsin and others. The sows are bred to a splendid son of the St. Louis champion. The gilts are well along and bred to a son of Kan't Be Beat and one of old Orion. A strong line up to say the least. A chance for some good selections. Will you be there? It's the only thing to do if you're after some good hogs.

#### SUNDBURG AND OLSON, AT MADRID, TUESDAY.

February 5th, the following day, the above gentlemen will make their sale. The offering will represent the select of two herds. The numbers in this sale are worth careful attention, for both pedigree and animal are first class. Some of the numbers which deserve special mention are seven yearlings and tried sows sired by Madrid Perfection, King Perf., Nash's Model, Eclipse and Perfect Sunshine. One is a sow, Princess May, a daughter of King Perfection, sweepstakes Iowa State Fair hog in 1903. His get have been noted. Here is one worth owning and she has been a great producer and will have some gilts in the offering. She is bred to Gold Dust Pete 45323. Another is Miss Van 2d, a two-year-old sired by Nash's Model, which should make her worth a good bid if you cannot come to see her. The gilts will be a great bunch and well sired. Look up the advertisement on page 40 for more about their breeding if your catalog has not yet arrived.

#### W. E. BENNETHUM, ALSO AT MADRID.

The third day of the circuit will be spent with Mr. Bennethum at the Cedar Lawn Farm, and the welfare of visitors will be attended to in the best possible manner. Parties driving will find good stable room, as the farm is well equipped in every way. The offering is about evenly divided between the young and mature stuff and it will certainly be a collection not to be missed. Mr. Bennethum's herd is so well known that suffice it to say his offering will be fully as good as anyone can make it. His attractions will be two litter sisters sired by Proud Advance and out of an Orion Baby dam. This is a superb pair, great scale and quality. They were both bred early in December to Keep On 3d, second prize in senior pig class last fall at Des Moines. Another is Miss Rose by the great hog, Billy K. She is a winner herself and nothing less than three figures should take her. She has a show gilt in the sale. Another is Belle, sired by the sweepstakes hog, Gold Dust Jim 15169. Every number could stand mention, but we will merely give a sample here of the good things in store. Get supplied with a catalog.

#### WITH A. T. SUNDELL'S OFFERING, FEBRUARY 7TH.

Through a slight typographical error last week this sale was given the date of February 17th. The correct date for the fourth day's sale of the circuit is February 7th. On that day buyers will gather at the farm of the above breeder near Paton, Iowa. Mr. Sundell has produced some first-class hogs in his career as a breeder and as is generally known, secured the herd of Durocs of the late Wm. Roberts at their dispersion. In his hands this herd has continued to prosper and produce animals of note. Chief among his offerings is Miss Ruth, a yearling half-sister to the first prize in the eighteen months old class at Des Moines last fall. Miss R.'s sire is Tientsin, which makes her one of the important numbers. Another is Malinda Lady by Lord Roberts. She traces to Ohio Annie IV. on her dam's side and is a taking individual in herself. Among the gilts there will be seven litter sisters sired by Scratch 26159, one of the impressive sires of his day. This bunch is a choice one and should be taken quick, for they are the stretchy kind and right up on their toes. Everything is guaranteed to be right and a first-class representative of the breed. Place this sale on your list with the rest.

#### THE CONCLUSION AT E. R. WOOD'S, JEFFERSON.

The grand finale of the circuit will end with the offering of twenty-four gilts and sixteen old sows and yearlings on the farm of Mr. E. R. Wood, near Jefferson. The quality of this offering will be right in keeping with that of the others and the number of mature stuff included will make it an especially attractive sale for new breeders and those looking for some good, reliable foundation stock. One of the sows is Lady Top Notcher, a good sow as an individual and producer and one that should not go under three figures. Another, a proud Advance sow, and two by Long Enough 25579. Two yearlings are by Bristol Jumbo 33095 of that well-known Jumbo breeding. Still another is by Radiator 28865 and carries some of the blood of the noted Missouri hog, Corn Cracker. Among the younger stock will be gilts sired by Otto 17321, Top Notcher R., Clovercroft Orion. The old sows are bred to this latter boar, which is a son of old Orion, and the gilts have been mated to a splendid Crimson Wonder boar. Conveyances to the farm. A good, comfortable place for the sale. Remember to send for a catalog at once.

tance. Those who cannot be present should get catalogs at once. Bids sent to Mr. D. M. Pierce representing this paper will be properly handled. See field notes elsewhere in this issue.

#### HENRY DORR'S BROOD SOW SALE.

The ninth annual sale of Mr. Henry Dorr will be held at his farm near Remsen, Iowa, on February 7th, and this offering eclipses anything that he has heretofore offered. Just take a glance at some of the sows that go into this sale. Daughters of the great Mischief Maker, Nemo L's Dude, Columbia Chief, Perfect Chief, Pilate's Chief, Ohio Sunshine, Indiana King, the World's Fair boar, Meddler, Tecumseh Keep On and the only Dorr's Tecumseh. Where can you beat this offering? Mr. Dorr is selling twenty head of fall yearlings and matured sows and thirty-two spring gilts. The most of the spring gilts are sired by his great boar, Dorr's Tecumseh, and no man has offered a better lot this year. Lady Peerless 4th is No. 1 of catalog and she is a daughter of the great show hog, Perfect Chief, that sold last year for \$2,100. She raised one of the best litters he had last year to Dorr's Tecumseh and she is bred back to him again for early farrow. Miss Mischief is a daughter of the great boar, Mischief Maker, and is therefore a half-sister to the World's Fair boar, Meddler. She is also one of the best brood sows that will be sold in the sale and she goes in bred to Dorr's Tecumseh. Anna Belle is a daughter of Nemo L's Dude and Pilate's Ruth is a daughter of old Pilate's Chief, both good sows and both bred to Dorr's Tecumseh. He also sells a good Columbia Chief sow bred to Hands Down, one of the best young hogs now being used in the herd. There are several choice yearlings in the sale that are sired by Indiana King, Tecumseh Keep On and Ohio Sunshine. He is putting in a very fancy gilt by Meddler and she is bred to Dorr's Tecumseh for early farrow. The Dorr's Tecumseh gilts are about as good a bunch of gilts as has ever been offered in the state, and every lover of a good Poland China sow should come out and see them. Write to Mr. Henry Dorr, of Remsen, Iowa, for his catalog. It

is complete in every particular and tells the whole story in a most convincing manner. If you get it you will be sure to go to his sale. When writing for it kindly mention The Homestead.

#### TETER'S DUROC SALE.

On Monday, February 11th, Mr. J. A. Teter, of Remington, Ind., will offer for sale at public auction forty head of choicely-bred Durocs, the tops of his noted herd. Mr. Teter has been breeding Durocs for years and has been a prominent winner at many of the leading state fairs and the World's Fair in 1904. He has selected only the tops of his herd, believing that the breeders will appreciate the offering and give him prices which the stock deserves. We wish to call attention to the winnings which this herd has made during the past three years. In 1903 Mr. Teter won four firsts, one second and both championships at the Illinois State Fair. In 1904 he showed his herd at the Wisconsin and Indiana State Fairs and won five firsts, three seconds, one third and one fourth, and sweepstakes boar under six months. At the World's Fair the same year he won one first (that on Top Notcher Again), three seconds, one fifth and one sixth and junior champion and reserve grand champion. At the Indiana State Fair in 1905 he won six first premiums and one third. In 1906 he exhibited his herd at the Michigan State Fair, Indiana State Fair and Illinois State Fair, and won twenty-nine premiums, nine firsts, eight seconds, seven thirds, three championships and two grand championships. Many of the prize winners are included in this offering. Among the most noted of these is Clover Blossom 1st. This sow was grand champion at the Michigan State Fair, second at Indiana State Fair and third at the Illinois State Fair. She is safe in pig to Golden Chief, second-prize boar at the Indiana State Fair, 1905. Some breeder who wants to add a good sow to his herd should not overlook this one. She will raise a fine litter of pigs and go back in the show ring in good shape, for that she has already done. Mr. Teter's sale is the first of a series of notable sales in Indiana and Ohio and breeders can easily arrange

to be present at Remington on Monday and get to the sale in Dayton on Tuesday, with no extra expense. This offering is a good one, and should not be missed. The catalogs have been issued and will be sent to all who are interested in good Duroc Jerseys. In these columns next week we will have more to say regarding the offering individually and will be pleased to recommend this sale to our readers. Bids sent to Mr. D. M. Pierce will be carefully handled. Look up the advertisement on page 35 of this issue and plan to be present sale day. Kindly mention The Homestead when writing.

#### FRED STRONG'S SOW SALE.

One of the deservedly good Duroc Jersey sow sales of the season is that of Mr. F. A. Strong, at Orient, Iowa, on February 14th. He is selling thirty-five head, and nine of these are aged sows. Among them are Lucy Brooklyn 105834 by Top Notcher Chief, dam Lucy Advance, full sister to Proud Advance, a good sow and extra mother, bred to Crimson I Am; Missouri Girl by Tom Watson, dam Lady Chief by Ohio Banner by Ohio Chief, bred to Valley Chief; the 'Breeders' Bell 121738 by Proud Advance, dam Van's Queen by Van's Perfection, bred to Crimson I Am. One of the best gilts to be sold this year is Chief's Lady by Ohio Chief, dam Valley Lady. She is bred to Crimson I Am. A splendid gilt out of Lucy Brooklyn by Keep On is safe in pig to Valley Chief for early farrow. Another good gilt is Minnie S. by Stout's Advancer by Advancer, dam Minnie Watson by Tom Watson, bred to Valley Chief. A splendid granddaughter of Proud Advance is Harding's Pearl. She is bred to Valley Chief; one daughter of Proud Advance bred to Valley Chief. The Strong offering is in fine shape and it is a cracking good lot of Duroc Jersey brood sows and they represent the most popular blood of the breed. Write Mr. F. A. Strong, of Orient, Iowa, for catalog and mention The Homestead.

#### SEXSMITH'S DUROC JERSEY SOW SALE.

On February 13th Mr. H. A. Sexsmith, of Greenfield, Iowa, will sell forty head of decidedly high-class Duroc Jersey sows. Among these are five aged sows, including the great sow, Valley Lady by Reed's Banker, that cost Messrs. Sexsmith & Strong \$400 at the R. J. Harding sale last spring. She will have an early litter by Crimson I Am by the noted sweepstakes boar, Crimson Wonder I Am. This sow is an extra good mother and farrowed twelve pigs last spring and raised ten. Three of her daughters by Ohio Chief go into the sale and two of these are extra good. These will be bred to Crimson I Am. Mr. Sexsmith will also sell Lady Orion Dandelion by Proud Advance, dam the great sow, Nan Orion. She will weigh 350 pounds by sale day, and she is good. She is first choice of the litter that Mr. S. R. Manifold showed at Des Moines that won fourth. She is bred to Valley Chief. Another good gilt is Miss Mingo by Perfection Advance by Proud Advance. Dam of Miss Mingo, Lady Mingo by the Lad for Me, the sire of the dam of Helen Blazes. She is bred to Crimson I Am. There are three good daughters of Stout's Advancer out of Minnie Watson, one of the good sows in Iowa. Two of these gilts are bred to Valley Chief, the other to Crimson I Am. A yearling daughter of Proud Advance called Orient Maid will farrow early to Valley Chief. This offering is good and should demand respect. Write Mr. H. A. Sexsmith, of Greenfield, Iowa, at once for catalog and mention The Homestead.

#### THE FAGAN, BROWNING & McCABE SALE.

Every Duroc breeder should arrange to be present at the forthcoming brood sow sale of Messrs. Fagan, Browning & McCabe, of Hersman, Ill., which occurs on Tuesday, February 5th. Arrangements have been made to care for all those from a distance who come from the sale of Messrs. Thomas & Hogsett, at Golden, Ill., the Saturday of the preceding week, so that all should plan to make their arrangements to be present sale day. We wish to call the attention of our readers to an error made in these columns last week. It was stated in connection with the illustration of the champion boar, Tip Top Notcher, that he headed the herd of

E. H. BROWNING.

Messrs. Thomas & Hogsett, of Golden, Ill. He is owned by Messrs. Fagan, Browning & McCabe and Messrs. Thomas & Hogsett, each firm owning one-half interest, and the boar has been used as the principal breeding boar in both herds. We regret making this error and take this opportunity to correct same. In the offering which Messrs. Fagan, Browning & McCabe are making are included some of the richest bred sows that will be sold this season. They are also of show-yard individuality. We wish to direct the attention of our readers to the illustration on page 15 of Foust's Pride. This sow was first in class and champion at the Illinois State Fair in both 1905 and 1906. She is one of the best specimens of the breed that the writer has ever seen, and bred to that noted boar, Tip Top Notcher, she should attract the attention of every

breeder of Durocs throughout the entire country. Some breeder will have in this sow the foundation for a herd of prize winners, for she is the daughter of Kan't Be Beat, and her dam was Xenia Queen, the foundation sow of the noted herd of Mr. R. C. Watt, of Cedarville, Ohio. S. E.'s Model VIII., a daughter of Ohio Chief, litter sister to S. E.'s Model IX., that sold in the Sheldon sale last winter for \$1,060, is safe in pig to Tip Top Notcher. She will make a valuable addition to any herd. Lucy Wonder XXI., the only living daughter of Lucy Wonder, grand champion sow at the Chicago World's Fair, is safe in pig to Tip Top Notcher. We wish to urge those who are in the market for good stock to be present at this sale. We are sure that no one will be disappointed in the offering. Those who cannot be present sale day, send bids to Mr. D. M. Pierce, representing this paper, and same will be properly handled. Write for catalog at once, kindly mentioning this paper.

#### THE KIRKPATRICK-WILSON SALE.

On February 13th Mr. W. A. Kirkpatrick, of Lincoln, and Mr. A. A. Wilson, of Bethany, Neb., will hold their first combination brood sow sale. As you probably already know, these two firms have formed a partnership and if there is anything in the fact that two heads are better than one it should make a strong combination. They are offering thirty-five head, twenty-six of which are consigned by Mr. Kirkpatrick and the balance by Mr. Wilson. In the Kirkpatrick offering will be five matured sows, three fall and one spring yearling and seventeen spring gilts. The fall and spring yearlings are daughters of Crimson Wonder, the spring yearling being bred to the great Kan't Be Beat. Most of the offering is bred to Crimson Model, a son of Malcolm's Model, and out of Glendale-Maid, the first-prize sow in class at the Iowa and Nebraska State Fairs in 1905. Five of the Kirkpatrick offering will be bred to Lincoln Wonder, one of the very best sons of Ohio Chief. Mr. Wilson will consign nine head, consisting of one matured sow and eight spring gilts, most of them safe in pig to Lincoln Wonder. The matured sow is a daughter of Crimson Wonder out of Miss Bob, and is a litter sister to Morrison's Peach. She will be safe in pig to Crimson Model. The gilts represent the blood of prominent Duroc families and are bred to extra good boars. Write for a catalog and look over this breeding. When writing please mention The Homestead.

#### J. H. WATSON SELLS POLAND CHINA FEMALES.

At Madrid, Boone county, Iowa, Mr. J. H. Watson, one of the good breeders of Poland Chinas, will dispose of forty head of bred sows and gilts. The date is Tuesday, February 12th, and as Madrid is favorably situated with regard to railroad facilities we are looking for some good bidders at this sale. Everything will be done to make those from a distance wish to return next year. Mr. Watson believes in plenty of size and while he desires all the quality possible in his herd he still does not sacrifice that point for good strong bone. For a number of years his policy has been to breed along this line and it has resulted in a collection of individuals, from the oldest to the youngest, of most excellent pasterns and feet. From time to time valuable additions to the herd have been made and buyers will find in the catalog a very good assortment of blood lines to choose from. At the head of the herd stands Mischief's Model 98435, a grandson of Chief Perf. 2d. He is a long, low-down, heavy-boned hog of the mellow kind. He was pronounced the best boar in the record-breaking sale of Messrs. Winn & Mastin in August, 1905. All claims have been proved by his work on the herd, and buyers will find a very uniform bunch of young stock at the sale by this sire. There will be some special attractions in the aged sows and yearlings. Mr. E. M. Metzger, of Fairfield, will have in the sale several young boars sired by Winning Dude 26027 and some bred sows and gilts of similar breeding. Write at once for catalog to Mr. Watson and kindly mention The Homestead when so doing.

#### THE COUNCIL BLUFFS POLAND CHINA SALE.

On February 8th, Messrs. J. C. Hardman & Son, Brayton, Iowa, and Mr. L. W. Hamilton, Kearney, Neb., will sell fifty head of Poland China gilts and brood sows at the Kiehl barn, Council Bluffs, Iowa. Messrs. Hardman & Son are well-known breeders who have made a specialty of the big-boned kind, and the twenty-five head that they are selling are of this kind. At the head of their herd is Expansion King 32422, a son of old Expansion, and a boar of great size and wonderful bone. The greater part of their offering is sired by Expansion King and is a most useful lot of sows. He sells two fall sows, one an exceptionally large sow for her age, both by Expansion King. Both of these are good, one being very large and with a good ham. The other with plenty of size and excellent quality. Five of the Expansion King gilts are out of one of his best sows, called Beauty, that was sweepstakes sow at Harlan, besting the Iowa State Fair sweepstakes sow. Ten of these gilts are sired by Melville Chief and Shamrock Perfection, and are bred and safe in pig to Big Tecumseh 43342 and Expansion Chief. Melville Chief, the sire of a number of the gilts, is a son of Johnson's Chief, who was also the sire of Dor's Tecumseh; and Shamrock Perfection, also the sire of a few gilts in the sale is a son of Messrs. H. B. Moats & Son's noted boar, Shamrock. Messrs. Hardman & Son are offering a choice lot of big-boned, good-sized, lengthy and well-developed sows. Mr. Hamilton writes as follows about his offering: "I am putting in a first-class lot of sows bred to my great young boar, King Impudence 43332, a son of the Iowa State Fair boar, Impudence, and Keystone Chief 43333, a son of the \$3,000 boar Grand Chief. This grand boar has size and bone, the tippy ears and substance of his brother and sister. Two of his sisters reached the \$200 mark in Mr. F. A. Dawley's sale. Mr. Lail sold over \$4,300 worth of pigs from his dam. We think he has a great future and will make a fine cross on these Moss Chief sows and Impudence gilts—five tried brood sows, three yearlings, twelve fall yearlings and four March gilts—one by Impudence which, we think, is a killer, one we did not want to sell, but put her in for an attraction. You could scarcely picture a fancier gilt;

that blood, fancy head and tippy ear that we all admire, broad, even, arched back, smooth sides and strong, well-set legs and short pasterns that always look good. A good show sow, any time you fit her, is sired by the greatest breeding boar of the day. She has for her dam Louise Junction 3d, second dam Louise Junction, a sister to Louise of Oakland, the champion sow of Illinois in 1906, breaking the record on sows by selling for \$1,800. She is bred to Keystone Chief, one of the best sons of Grand Chief. Lady Sunshine has two choice fall sows by Moss Chief, and Midway has two choice sows. We think we could go through the whole herd and write a book, but we will show them on sale day. They will have to be seen to be appreciated."

#### LAST NOTICE OF DAN NEEDHAM'S POLAND SALE.

When it comes to size, bone and quality in black hogs Mr. Dan Needham can show visitors something that will be a surprise. Only those who attend the sale which will be made from this breeders herd at Woodward, Iowa, will be able to appreciate the full truth of that statement. If you are looking for some well-bred hogs that combine the above characteristic in their individual make-up, then don't miss this sale. Some of the numbers which struck a representative of this paper as being worthy of special mention are a Trade Mark sow which has been producing large litters regularly, never anything less than nine pigs, and she will have two March gilts in the sale to vindicate her ability along this line. Another is a grand-daughter of Johnson's Chief 62243. She is also a heavy breeder and cares for her litters well, so that she should prove an extra profitable investment. Another is a grand-daughter of Guy Wilkes 2d, one of the standard lines of foundation blood. The yearlings number six head and will bear a great deal of praise. As much and more can be said of the twenty-six head of gilts sired by the several boars, Mischief Model 98435, Hands Down 105713, One Spot 9201, Mainspring 102681 and Jumbo 91987. Take a look at the sale advertisement on page 37 and if you have not yet secured a catalog, why, there is one waiting to be sent you at your request. Remember the date, Monday, February 11th, at Woodward, Iowa, in comfortable quarters. A few extra good young boars for those who want them.

#### LAST CALL FOR THE LESLIE HEREFORD SALE.

Those of our readers who may be on the market for some good Hereford cattle will never do better than to attend the closing out sale of Mr. W. H. Leslie, at Auburn, Iowa, on Saturday, February 9th. Having sold his farm he is compelled to close out his entire herd of select Hereford cattle. There will be thirty-seven head in the sale. Eight of these will be bulls, including his herd bulls, Dale Lad 35th and Cyril 228436. The former bull is a grandson of the \$10,000 Dale and he has been used in the Leslie herd with much success. The most of the young heifers and the most of the young bulls in the sale are sired by him. Among the matured matrons that he offers in this sale are four daughters of his former herd bull, Jumbo. Daughters of this well-known bull were always in demand and his daughters go into this sale as good as he has to offer. These are cows of great scale and quality. There are several daughters of the bull, Masher, in the sale. He is a son of Pretty Wilton 2d and these are all bred to Dale Lad 35th. There are also several good Bellman cows in the offering and a daughter of old Ancient Briton, the noted World's Fair bull. Here is one of the last chances anyone will have to get a daughter of this famous old sire and she will have a calf at foot by Headlight Dale 4th. He will dispose of some good young heifers and some man can get enough of these to start a good herd. The young bulls are all about a year old or more and are a good lot, and a car load can be secured in this sale. He will also sell a good lot of Chester White hogs, including his old herd boar, Duke of Headlight 15866. This boar will weigh 600 pounds and is a good breeder. Send to Mr. W. H. Leslie, of Auburn, Iowa, at once for catalog and kindly mention The Homestead.

#### AN IMPORTANT POLAND CHINA SALE.

To the breeder and farmer who is in the market for good, profitable Poland Chinas we take pleasure in recommending the sale of Messrs. Bridgford & Nesbitt, of Alledo, Ill., which will take place at the farm adjoining the city limits on Thursday, February 7th. We called attention to the boars in use in this good herd last week, and wish to direct the attention of those interested in good Poland Chinas of the heavy-boned, growthy type, capable of growing good strong litters, to some of the females in the offering. Faultless Sunshine 243036 is a two-year-old sow that has produced some very good stock, and a few of her get are included in the auction. She was sired by Faultless Perfection 2d and her dam was Bettie Sunshine 3d by Perfect Sunshine. This sow farrowed a litter of eight pigs last spring and raised six, all good ones. She goes into this sale bred to Young Delight for an early litter. May Sunshine 2d by Perfect Sunshine is an aged sow with good length and good bone, and has always produced good litters. This sow is safe in pig to Young Delight for an early litter. Faultless Loraine by Faultless Perfection 2d and a full sister go into the sale. They have raised fall litters and are not in as high flesh as some of the others, but they are good producers, the kind that make men money. A daughter of this sow that will suit the most discriminating buyer goes into the sale. She is safe in pig to Young Delight. There are a number of good yearlings in the offering and the farmer or breeder who is in the market for good stock should not overlook this offering. We wish to call particular attention to the three-year-old sow, Tecumseh Model 232400. This sow is a regular breeder of good-sized litters, and her pigs have always sold the first of the season's crop. Several gilts out of her go into this sale sired by Young Delight. This sow will sell with litter at side and some breeder will find a bargain in her. A good gilt out of Faultless Loraine by Young Delight goes into this sale bred to On the Dot 2d for an early litter. This is a good lengthy, good-boned, nicely-marked gilt and is the making of a good brood sow. A gilt by On and On 2d and out of Miss Sensation

## DEWITT'S POLAND CHINA SOW SALE

TO BE HELD AT THE CLAMPITT BARN  
Russell, Iowa, February 13, 1907.

### 28 HEAD--Matured Sows, Yearlings and Spring Gilts.

The spring gilts are mostly sired by Honest John 99583, and Young Jumbo 2d 101305. I am offering some good yearlings and some good old sows. These are bred to Exception, a grandson of Expansion, and A. W. Standard, a son of Standard Chief. Write me for catalog. Address,

A. W. DEWITT,

RUSSELL, IOWA.

#### TOO LATE TO CLASSIFY.

### Lawshe's Chester White Sows and Gilts

100 HEAD of very choice matured and full yearling brood sows and some extra choice gilts, bred to my noted prize winning boars Monarch Jr. 13301, Captain 14119, Jerry S. 13167, Advance 2d 15431 and Look Out 2d 13911, some of the best boars living. Send your order at once and get the pick of this year's raising. Address, Geo. H. Lawshe, Rt. 3, Harlan, Ia.

is a good, growthy gilt that will please the breeder in search of good material to add to his herd. In this connection we wish to state that the gilts offered for sale are a very uniform lot with plenty of bone and stand on the best of feet and legs. They are of the sort which any young man would select if he were establishing a herd of Poland Chinas, and the breeder would add to his already good herd if he wished to add new blood. We are pleased to recommend this offering to our readers and urge them to be present sale day. Bids sent to Mr. D. M. Pierce, representing The Homestead, will be properly handled. See the announcement on page 38 of this issue and in writing for catalog kindly mention this paper.

#### HUFF'S DUROC JERSEY SOW SALE.

On February 13th, Mr. C. W. Huff, of Mondamin, Iowa, will make his second annual brood sow sale at his farm about four miles from town. Mr. Huff is one of Iowa's younger breeders, who has been breeding a very useful type of Durocs, and he is selling a class of sows that will do good for any man that buys them. He is offering about forty-four head in the sale—seven matured sows, ten fall yearlings and twenty-seven choice gilts. The old sows are bred to Iowa Challenger 37603. The fall sows, with two exceptions, are sired by him, and he is also the sire of a majority of the gilts. Two of these fall sows are sired by Rustler 17365 and out of Sioux Bess, and they are first class, too. A son of Orion's Profit is the sire of many of the sows in the sale; also a boar called Bonney, by Bon Bon, out of a daughter of Delay. Two other boars used in the herd are Royal H. 54823 and Ben Fay Yet 54817. These will be bred to many of the sows in the sale. Mr. Huff's sows are coming along in fine shape and he says he never had a bunch of gilts make a better growth. A boar that he calls D. O., a son of Orion's Profit, the boar that sired the Minnesota sweepstakes boar, is bred to quite a number of sows in the sale. A three-year-old sow called Ella M., by Red Freeman, is one of those wonderfully long sows, with a splendid ham, and she is a good brood sow. Little Doreus, a two-year-old daughter of Rustler, bred to Iowa Challenger, is a good proposition to buy. The gilts are an even bunch, with good color and very growthy. It is an offering that will appeal to anyone wanting good Duroc sows. (Write Mr. Huff at once for his catalog and kindly mention The Homestead.)

#### PETER MOUW'S TWO-DAY SALE.

On February 14th and 15th, that veteran breeder, Mr. Peter Mouw, will make a two-day sale of Hereford cattle and Poland China hogs at Orange City, Iowa. The Herefords will be sold the first day and there will be forty head in the sale, including his two herd bulls, Harvey 4th, the 2,800-pound bull, and Prince Donald, a three-year-old bull that won fifth prize at the International in a ring of thirty-seven when eight months old. Mr. Mouw's last Hereford sale at Omaha netted him \$9,700 on thirty-six head, and this is a superior lot to what he sold at that time. Prince Donald is a son of Prince Rupert, that won first at New York, West Virginia, Illinois and Indiana State Fairs and grand sweepstakes at Ohio State Fair. He was also a sweepstakes bull at the American Royal. Some of the cows are sired by Weston Briton 68121, a son of Ancient Briton, and Harvey 4th, his 2,800-pound herd bull. There will be a lot of good cows and heifers in this dispersion sale, as well as some splendid bulls. His brood sow sale is of world-wide interest on account of his acknowledged lead on size. This sale will be the greatest offering ever made from this herd. For the past twenty-five years Mr. Mouw has exhibited big Poland Chinas, including the two great world's fairs at Chicago and St. Louis, and he has won his way to the front as a breeder of the "big ones." He is selling fifty head of sows, all over a year old; all are the tops of his herd and are bred to the big boars in the herd. These sows are long-bodied, heavy-boned and the largest lot of sows ever sold from this well-known herd. A breeder who has recently seen them says they are the largest bunch of sows he has ever seen. Write at once for catalog and if you cannot attend the sale send your bids to Col. F. M. Woods in Mr. Mouw's care. Kindly mention The Homestead when writing for catalog.

#### THE WELCH-SKINNER DUROC JERSEY SALE.

On February 14th Messrs. J. Skinner & Son and I. C. Welch, both well-known Duroc Jersey breeding firms, will make a sow sale at the McMahill sale barn, Bedford, Iowa. Messrs. Skinner & Son are selling twenty-seven head, of which ten head are yearlings and matured sows and the rest spring gilts. These will be sired by Mogul's Best, Tip Top, Addy's Chief and Billy Golden. They have taken pains to select their best sows for this sale, and they are safe in pig to Billy Golden and I. C.'s Crimson Wonder. They are selling a well-made and practical Duroc Jersey sow without any frills on her. They are breeding a class of sows that raise pigs

### JOHN JUSTICE

Ankeny, Polk County, Iowa,

Will sell at farm, half mile from Quilhart Crossing, on D. M. I. F. & N. R. R., and one and one-half miles north of Berwick, FRIDAY, FEB. 15, 1907.

MIDLAND Duroc stock all sold but when in need of breeding stock write me at Mason City, Iowa. S. J. Butts.

and enough of them. The number in the litters has always been above the average, and they never fail to find buyers for their surplus stock. Mr. I. C. Welch, their neighbor and fellow breeders, sells thirty head, and he is offering a splendid lot of sows. There will be five aged sows in his offering, four of which are sired by old Mogul, a boar formerly used in his herd, and well and favorably known in southern Iowa. One of these aged sows is sired by Splendor, and she has been a most excellent brood sow. Mr. Welch also sells a daughter of Shadler's Top Notcher bred to Expansion, a son of Orion Chip, now in use in the herd. All the yearlings are sired by Tip Top, a former herd boar. Four of these are out of Lady Mogul and they are good enough to go into any herd. They are smooth, with a good bone and nice heads and ears. Eighteen of the gilts are sired by Tip Top and four of the best are out of Josephine 2d. He is also offering two nice gilts by a son of Proud Advance. All of his offering are bred to Expansion and Crimson Wonder III. We know of no sale where we think buyers can get more for their money than in the Skinner-Welch sale. If you want a good practical Duroc Jersey sow be sure you go to Bedford, Iowa, on February 14th. Write either breeder for catalog and kindly mention The Homestead.

### The Northeast Nebraska Duroc Jersey Sale Circuit.

#### RENSHAW'S DUROC JERSEY SOW SALE.

The opening of the northeast Nebraska Duroc Jersey sale circuit will begin at the farm of Mr. Austin Renshaw, at Blair, Neb., on February 14th, when he will sell forty-one head of brood sows. The offering as a whole is superior to anything that he has heretofore sold. Twenty-one head are sired by the great Junior Jim, and here will be an excellent place to get a Junior Jim gilt. The great sow, Ruberta, that sold in the Garret sale last week, was bred to him, and everything that was bred to him went sky high. Mr. Renshaw is putting in a grand lot of Jim gilts and they should be eagerly picked up at good prices. The rest of his offering will be sired by Golden Perfection, Alix Advance, Glendale Critic, Glendale Jim, Cole's Duroc and Long Alix, every one of which carries the blood of the most noted prize winners. These will be bred to his well-known prize-winning boar, Arion, Redwood Chief, a son of the great boar, Ohio Chief, and Long Alix. One of his best gilts is Lady Alix II., sired by the Iowa State Fair prize winning boar, Glendale Jim, and out of Lady Alix by Proud Advance. She is bred to Arion for early farrow. He also sells a nice gilt by the Nebraska State Fair boar, Cole's Duroc. One of the real topky gilts that he is offering is No. 20, a Long Alix gilt out of a Dandelion sow. She has both the size and the quality and she is a good one, and it will take a long price to get her. She is bred to Arion. Another very topky gilt is sired by Glendale Critic and out of a Chitwood sow, the latter hog being the sire of the great boar, Junior Jim. This gilt is bred to Redwood Chief. There are three of her litter sisters in the sale. There are several other decidedly good things in this sale and buyers should not forget the Junior Jim gilts. Write at once for catalog and then go to his sale.

#### MANLEY & CO'S GREAT BROOD SOW SALE.

The question now uppermost in the minds of Duroc Jersey breeders is how can they secure a sow bred to the great Junior Jim. Nine sows in the F. E. Garret sale last week bred to Junior Jim made an average of \$391, the great sow, Ruberta, bred to Jim, selling for \$1,500. In Messrs. Manley & Co.'s forthcoming sale about half of their offering will be bred to this great boar. They are selling about ten Orion sows, every one bred to Jim, and they are also selling ten head of Junior Jim gilts, thus making it one of the most attractive offerings of the year. Besides these they are also selling their entire show herd of 1906, including the great Young John sows, one of which was a winner at the Illinois State Fair. The best one of these Young John sows is bred to Junior Jim and she is one of the greatest sows that will be sold this year. They are also selling some grandly-bred Proud Advance sows in this sale. The most of their offering will be bred to Junior Jim and Advance Lad, the latter boar being a son of Advance and a litter brother to Proud Advance. Messrs. Manley & Co. have always put up good offerings, but never have they put up a more uniform lot of sows, and certainly never have they sold a bunch of sows bred to a boar that has made a greater reputation than the great Junior Jim. With Ruberta, bred to Jim, selling at \$1,500, has made a decided demand for sows bred to this great hog, and Messrs. Manley & Co. are putting them in this sale. There will also be some good sows in the sale sired by Belle's King, a son of the great Nebraska Belle. It is one of the last times that breeders will have an opportunity to buy an Orion sow bred to Junior Jim, and it is one of the last times an Orion sow will be sold in a Manley sale. The same is true of Proud Advance sows. Stop and think a minute. An Orion or a Proud Advance sow bred to the great Jim hog. What will it mean for your sale next year? A bunch of boars or a few good gilts will certainly make your offering very attractive. The way to get them is to go to the Manley & Co. sale and buy a sow. Nine sows bred to Jim in the Garret sale at an average of \$391 looks good, and it shows breeders what others think of the combination. The boys have issued a splendid catalog which tells it all. It will be sent on application, provided you mention The Homestead when writing.

#### RUSSELL'S SOW SALE.

On February 6th, at Blair, Neb., Mr. E. Z. Russell will entertain the Duroc Jersey breeders with an offering of forty head of brood sows. It is an offering that will please those who love a typical Duroc Jersey and it is an offering that will uphold the reputation of the herd and make money for the buyer. Twenty-six head that he sells will be yearlings and aged sows, the rest spring gilts, and it makes one of the very best bunches of sows on the circuit. The blood of old Gold Dust Jim, the Iowa State Fair sweepstakes boar, percolates through the herd, as does also the blood of Crimson Wonder, Malcolm's Model, old Surprise and Glendale Jim. It is a combination of blood lines that has been mortgage lifters, and every man that has bought here in years gone by comes back again. This year you will see them all there, besides the new ones. They will all want some of the daughters of Glendale Critic, Gold Dust Jim and Malcolm's Model, that Mr. Russell is putting in. An especially attractive lot of Malcolm's Model yearlings go in, and these Malcolm's Model sows have always been right at the top as brood sows. Some of the best herds in Minnesota and Iowa have won their way to the front on Malcolm's Model sows. There will be some choice gilts in the sale by this noted prize-winning boar, Glendale Critic, and there has always been a great come out to these sows. There will be a few good Gold Dust Jim sows in the sale and also some by Gold Dust Jim 2d. The latter hog was the sire of some of the best sows in Mr. Russell's last sale. The Malcolm's Model sows are mostly bred to Glendale Critic, and breeders will find here a great combination of blood lines. He is also using a boar called, Crimson's Choice and Jumbo Critic. He sells a litter sister to his prize-winning boar, Critic's Echo, in this sale, and she is all right. One of his most attractive aged sows is Eleanor R. IV., a daughter of old Glendale Prince, and she is one of the best brood sows Mr. Russell has ever had in his herd.

## 100 Richly Bred Duroc Jersey Sows at Auction

### FEBRUARY 11, 1907

Geo. Schwab, sale to be held at his farm.

35 HEAD—15 MATURED SOWS 20 SPRING GILTS.

Three daughters of Red Knight, first and sweepstakes boar at Nebraska State Fair, 1905, and bred to Jeffries, one of the best sons of Van's Perfection. Most of the offering are sired by Morton Prince. If you want prize winning blood, come to this sale. Write at once for catalog. Address

Geo. P. Schwab,  
CLAY CENTER, NEBRASKA.

### FEBRUARY 12, 1907

H. B. Loudon & Son, sale to be held at farm.

25 RICHLY BRED SHORT-HORNS, 15 CHOICE BROOD SOWS.

On the above date we will disperse our entire herd of Short-horn cattle. There are some choice animals in the bunch, of the most noted Scotch families. Our brood sow offering is not large, but we have the goods. Daughters of the great Hambletonian and bred to Jumbo's Perfection. Write for a catalog and look over the breeding of these cattle and hogs. Address

H. B. Loudon & Son,  
CLAY CENTER, NEBRASKA.

### FEBRUARY 13, 1907

Wm. J. East & Son, sale at farm.

35 head of richly bred Durocs representing the blood of most prominent strains.

Several daughters of Beydek, first-prize hog in class at Nebraska State Fair, and third at St. Louis. A number of the sows are mated to Kansas Banker, one of the best sons of Improver II. Each animal a useful one and many sows of rich breeding and show-yard individuality. Write for a catalog. Address

W. J. East & Son,  
CLAY CENTER, NEBRASKA.

Col. C. E. Luther will do the selling. Mail bids sent to Ray Page of this paper will be properly handled.

No man can go wrong who buys her. A sow bred to Glendale Critic has always been a winner for every breeder who has purchased them, and there never was a better opportunity to buy them than in this sale. Every breeder who knows Mr. Russell is figuring on being at this sale. Be sure you get there and see one of the best offerings of the year. Write him at once for catalog and kindly mention The Homestead when doing so. If you cannot be there in person send a bid to Mr. M. T. White, of The Homestead, in care of Mr. Russell, and it will be attended to.

#### SMITH BROWN'S SOW SALE.

The former home of the great Nebraska Belle will be alive with the best breeders of Duroc Jerseys when Mr. Smith Brown, of Waterloo, Neb., makes his annual sow sale on February 7th. This herd is filled with the blood of Crimson Wonder, Orion, Echo King, Red Chief I Am and other good boars, and his forthcoming sale will be made up of some of the best that the breed affords. He is selling seven granddaughters of the great Nebraska Belle in this sale, and they are bred to a son of the sweepstakes boar, Gold Dust Jim. Here is something that always breeds on, and breeders should go after them. Mr. Brown is selling one of the great sows of the year in Gold Dust Queen, a daughter of Gold Dust Jim. This sow topped the Russell sale last year, but she is even better now than when Mr. Brown bought her. She is bred to Belle's Model, considered one of the best sons of old Nebraska Belle. These sows are bred to Red Reuben, a son of Gold Dust Jim; Echo King, a state fair prize winner and a splendid sire; and Belle's Model. He is selling some good aged sows, a splendid lot of yearlings and some choice spring gilts. No breeder in the West has done more to advance the Duroc Jersey hog than Mr. Smith Brown. Years ago he was the one man that paved the way by buying the great Nebraska Belle at \$510, when that price startled the breeders of the red hog. He took care of her and her get and made good, and later sold her for \$600. In every instance he has bought the good ones, and no man living deserves a better sale than does this pioneer of the Duroc Jersey breed. We hope that every breeder will be with him on sale day. He has a good offering of sows. They are bred right and are in pig to noted boars. Write Mr. Brown at once for catalog and if you cannot attend the sale send your bid to Mr. M. T. White, Homestead representative, in his care, and it will be properly attended to.

#### ARCH BROWN'S SOW SALE.

On February 8th Messrs. Arch Brown & Sons will offer at Waterloo, Neb., the best lot of Duroc Jersey sows that they have ever sold, and that is saying a great deal. They have made special preparations for this sale and have selected the best lot of sows that have ever come from their herd. Some of the best daughters that old Echo King ever sired go in and they are always good. This year they are better than usual. Sure Winner 14843, another great boar in their herd, is the sire of some very topky gilts that are bred to Echo King. There are some corking good Royal Top Notcher gilts in the sale bred to Sure Winner. A number of their best sows are bred to Onward Duroc, a grandson of Nebraska Belle. They also sell one of the great sows of the year in Nebraska Queen. This great daughter of old Duroc Challenger is a wonderful brood sow. We knew her in the A. T. Cole herd and later in the Smith Brown herd, and she was always good. She cost Mr. Arch Brown \$300, but she is a better proposition today than she ever was. No man will go wrong in buying her or sending a long bid on her. She is bred along the most popular lines and is the dam of two gilts in the Harding sale that sold for over \$1,000. She is bred to the old noted boar, Kan't Be Beat, for early farrow. They also sell four red Knight gilts in this sale and two daughters of the great Junior Jim. Write for their interesting catalog and mention The Homestead. If you cannot be there send your bid to Mr. M. T. White, Homestead representative, in care of Messrs. Arch Brown & Son, and it will be honorably dealt with.

#### Miller's Short-horn Sale.

On Wednesday, February 6th, Mr. Geo. H. Miller will make a public sale of forty-two head of Short-horn cattle from his Pine

## Second Annual Brood Sow Sale

FROM

### MULBERRY GROVE HERD OF DUROCS

AT SPIKER'S SALE PAVILION

Chariton, Ia., Thursday, Feb. 7th

Daughters of champions, bred to champions. Forty head of sows and gilts—eighteen daughters of the champion, Top Notcher Again, four daughters of the great Proud Advance. All safe in pig to the sensational champion of 1906, Crimson Wonder Again. Three daughters of Crimson Wonder Again safe to one of the best sons of Proud Advance; two daughters of Nebraska's first-prize boar, Tom Davis. This sale will contain more champion blood than any offering inside the state this year. The individuals will back the breeding. Chariton is on main line of C. B. & Q. Free entertainment at Depot Hotel in Chariton. For catalog address

Cols. H. S. Duncan, Chas. Morehead, D. A. McMains, Auctioneers.

Send bids to auctioneers or L. E. Troeger, representing The Homestead, care H. S. Allen.

### WELCH-SKINNER

## Duroc-Jersey Sow Sale

Bedford, Ia., Feb. 14, 1907

Matured Sows, Yearlings and Spring Gilts

Sired by old Mogul, Mogul's Best, Tip Top, Shroder's Top Notcher and a son of the great Proud Advance. These are bred to Expansion, a son of Orion Chip, Billy Golden and I. C.'s Crimson Wonder. We are selling the very best sows that we could select out of our two herds. Write us for catalog at once and come to the sale. Address,

I. C. WELCH, J. SKINNER & SON,

BEDFORD, IOWA.

PIPER BROS. AND R. C. MICHAEL, AUCTIONEERS

### DUROCS

## Huff's Second Annual Sale

MONDAMIN, IOWA, FEBRUARY 13, 1907

44 HEAD OF CHOICE SOWS 44 HEAD  
7 Mature Sows, 10 Fall Yearlings, 27 Gilts

STRONG in the blood of Orion, Iowa Challenger, Onawa Orion by Orion's Profit; E. Z. by Sure prize; Rustler by Glendale Chief and other noted strains. Sale at farm, four miles north of town in heated and seated tent. Send for catalogs and plan to spend the day with us.

C. W. HUFF, MONDAMIN, IA.  
Tupper Bros., Auctioneers.

Center Stock Farm, the sale to be held at the pavilion in Harlan, Iowa. There will be twenty cows and heifers and about fifteen young bulls in the sale. The Miller offering is a good one individually and are excellent in color, nearly every one being a nice red. Many of the young bulls and heifers are sired by his Scotch bull, Gloster Bud 194649, and he is also bred to many of the cows in the sale. No. 1 of catalog is a Scotch-topped Waterloo Duchess, and a good cow. She also has a daughter in the sale sired by Merry Monarch, a grandson of Imp. Merry Hampton. He puts

in a good daughter of the Scotch bull, Captain Lovely, and several daughters of Lavender 2d. The cows and heifers have plenty of scale and are good individuals. He is selling as good a bunch of young bulls as has been sold this season. They are well developed, are nearly all sired by Gloster Bud and are strictly all right. Here would be a great place to secure a car load of young bulls. They are in nice condition and have been well grown out. There will be some decided bargains in this sale. Write at once for catalog and mention The Homestead.

# THREE SPLENDID DUROC JERSEY BROOD SOW SALES

**FEBRUARY 13, 1907,**

GREENFIELD, IOWA.

**40** Five aged sows balance spring gilts **40**

Among them Valley Lady by Reed's Banker. This sow cost \$400 at the Harding sale. Will also sell Lady Orion Dandelion by Proud Advance. Also daughters of Ohio Chief, Stout's Advancer and other great boars. The cream of my herd goes in this sale. Write me for catalog. Address,

**H. A. Sexsmith, Greenfield, Iowa.**
**FEBRUARY 14, 1907,**

ORIENT, IOWA.

**35** Nine aged sows balance spring gilts **35**

Including Lucy Brooklyn by Top Notcher Chief. Also daughters of Ohio Chief, Proud Advance, Stout's Advancer, Keep On and other good boars bred to Crimson I Am, Valley Chief and F. A.'s Choice. I am selling my tops. Send for catalog. Address,

**F. A. Strong, Orient, Iowa.**
**FEBRUARY 15, 1907,**

GREENFIELD, IOWA.

**40** Five aged sows balance spring gilts **40**

Daughters of Crimson Wonder I Am, granddaughters of Proud Advance; balance by Bell Watts and bred to Foster's Wonder by Crimson Wonder I Am and I Am Orion by old Orion. Write me for catalog. Address,

**W. A. Foster, Greenfield, Iowa.**

There are some grand Duroc Jersey sows in these sales. Write the above breeders for catalog. Cols. Duncan and A. C. Manifold will cry all three sales. If you can't come send your bids to them in care of the above breeders.

## The Whitehall Combination Sale Company's Sale.

On page 47 of this issue will be found the advertisement of the Whitehall Combination Sale Company, composed of some of the leading breeders of Ohio, who annually hold public sales at Whitehall Farm, at Yellow Springs, Ohio. Those composing the company are Messrs. S. E. Morton, of Camden, Ohio; E. S. Kelley, of Yellow Springs, Ohio; C. E. Speaks, of Yellow Springs, Ohio; Fred Bauer, of Eastwood, Ohio; Geo. D. Black and G. H. Fogg, of Yellow Springs. These breeders have each selected the tops of their herds for this event. They represent some of the best herds of the country, and it is a source of much pleasure to them to know that in many western herds boars of their breeding are being used. Mr. S. E. Morton needs no introduction to western breeders. He bred, used, showed and sold Ohio Chief, one of the greatest Duroc Jersey boars ever produced. He has also produced many others of equal merit, and it should be said to his credit that he has been one of the foremost breeders of Duroc Jerseys in America. Mr. E. S. Kelley is among the younger breeders of Durocs, but through his manager, Mr. J. E. Drake, he has selected his foundation stock from the best breeders and by the use of excellent males he has built up one of the good herds of the country. Mr. C. E. Speaks has been breeding Durocs for several years and puts in this sale nothing but the tops of his herd. Mr. Fred Bauer is another

buying at the various public sales and we want to say that we never saw him buy a poor sow. His herd is rich in the blood of Proud Advance, Orion, Improver II. and Ohio Chief. The three herd boars in service are Savannah Belle's Chief by Ohio Chief, dam Savannah Belle, the \$730 Nebraska Belle gilt. Daisy's Advance, the greatest son of Proud Advance, dam Daisy Orion, the greatest yearling sold last year in Iowa, Orion's Advance by Orion, dam Proud Lady, the \$1,275 sow. These boars are mated to such sows as Lady Pride, she by Improver King by Improver II, dam Lady D., she by Supply, bred by Mr. S. E. Morton. This certainly is one of the very best yearlings to be sold this season. She is a very large, massive sow, with great length and bone and up on her feet like a pig, and as smooth as they can be made and as fine, red hair as you wish to see. She is O. K. Madrid Belle, the old sow that has produced so many good ones, goes too. A fine yearling, Lady Crimson, by Orion Chip, dam Daisy Girl, a litter sister to Crimson Wonder, goes in this offering and here comes as fine a bunch of Proud Advance gilts weighing 300 pounds and better as Mr. Poush could gather together. Five of them are dammed by Daisy Advance, that great brood sow, and they certainly are peaches, and every one of them bred to that great Ohio Chief boar. Then there is the fine Proud Advance gilt that topped the J. A. Russell sale last October, and she is a corker. Another one by Nan Orion, that sow that has made Mr.

Col. Advance, litter brother to Proud Lady, that sold in Messrs. Manley & Co.'s sale last winter at the record-breaking price of \$1,275. This boar is one of the principal boars used in the herds of Messrs. T. W. Stoner & Son, of Henry, Ill. A number of the best females in their forthcoming brood sow sale are safe in pig to this boar. See field notes.

of the good breeders of Ohio. In the Dayton sale last year his consignment made next to the top average. A western breeder in talking to the writer the past week remarked that the gilt purchased from this consignment last year was the best sow in his herd and that he would keep her as long as she produced such litters as she did last season. Mr. Bauer always sends his stock forward in the pink of condition. Mr. Geo. Black sends forward a good lot and Mr. G. H. Fogg has selected his tops for this occasion. The blood of such noted boars as Ohio Chief, C. E.'s Col., King of Cols., White Hall King, White Hall Model, Fogg's Col., Chic's Chief, Ira Wonder, The Chief, Advancer II, Model Chief Again, Morton's King, Beat Him If You Can by Kan't Be Beat, and others of equal merit is found in the offering. In our issue of next week we will give full particulars regarding the stock to be sold and would urge our readers to plan to be present sale day. This sale follows that of Mr. Ira Jackson, and can easily be reached by traction car. The catalogs are now ready and will be sent to all who write as per the advertisement on page 47. Bids sent to Mr. D. M. Pierce in care of White Hall Farm will be properly handled. Kindly mention this paper when writing.

## Poush's Great Sale.

The opening sale of the southwest Iowa and northern Missouri sale circuit will begin at Charlton, Iowa, when Mr. A. E. Poush will sell forty head of the best sows ever sold in the state. We have known Mr. Poush for the past five years and have seen him

Manifold famous, two by Queen's Choice that are dandies, and still another by that great brood sow, Madrid Belle. And there is a fine bunch of March gilts by Ben Davis, the junior yearling first prize at Des Moines, 1904, and sire of the second-prize yearling at same show, 1906. These gilts are half sisters to this hog and they are put up about right. February 19th is the date. If you cannot be present send your bids to Mr. M. T. White, Homestead representative, in care of Mr. Poush.

## Registered Percheron Mares and Stallions at Auction.

This is our last opportunity to direct attention to the splendid lot of registered Percheron stallions and mares are offered for sale by Messrs. E. F. Rogers, F. A. Frost and others, at Union, Iowa, February 6th, at which time and place the above-named gentlemen will sell twenty-three registered Percheron stallions and mares and three German coach stallions. The above offering will be sold in Mr. A. E. Mason's new pavilion. It seldom occurs that breeders of Percheron stallions and mares that have been raised by the smaller breeders have associated themselves together for the purpose of disposing of their stock. This experiment will be tried out by the above-named gentlemen. As has been previously stated, these horses have been reared in the plain, practical farmer manner that is commonly practiced on every Iowa farm. Hence the danger of these horses going back on their new purchasers is entirely eliminated.

## COMBINATION

### Poland China Bred Sow Sale

at the Keil Barn, Council Bluffs, Iowa.

**FEBRUARY, 8th, 1907**
**50 Head Gilts and Matured Sows of Rich Breeding**  
**J. C. Hardman & Son, Brayton, Ia., 25. L. W. Hamilton, Kearney, Neb., 25.**

This is the sale that offers you the big-boned type combined with plenty of quality. Fifteen gilts by Expansion King 32422, reputed to be the largest boned hog in Iowa and Nebraska. He transmits this to his get and these gilts are of his type, big with plenty of finish and quality. Ten gilts sired by Melville Chief and Shamrock. Five of these are out of Beauty, who won at Harlan over sow that won first and sweepstakes at Des Moines. This is Mr. Hardman's offering and all are bred to Big Tecumseh, by Contractor, winner of first at Nebraska State Fair, 1906.

Mr. Hamilton consigns gilts and matured sows by Moss Chief 19808, Grand Chief Tecumseh 2d 2555, and two sows by Chief Perfection 2d 42559, and one by Impudence 97557. They are bred to King Impudence by Impudence and Key Stone Chief by Grand Chief 29740, a \$3,000 boar. Combined this is an offering that merits your attention. If you want show stuff, that's got bone, size, finish, breeding and quality, this is the sale to attend. For catalog, address,

**L. W. Hamilton, Kearney, Neb.**
**J. WEST JONES, Auctioneer, assisted by others and fieldmen.**

## Ruebel Bros. Third Annual Sale of POLAND CHINA BRED SOWS

TO BE HELD AT FARM FIVE MILES EAST OF ROCKWELL CITY, IA., ON

**TUESDAY, FEBRUARY 12, 1907**

Twenty tried brood sows, seven fall yearlings, 38 spring gilts. There will be sows in this offering sired by Chief Perf. 2d, Keep On, Mischief Maker, Chief Tec. 3d, Palatis Chief, R's Keep On and Iowa Chief, and bred to R's Keep On, Iowa Chief and Moderator, the great young boar we purchased of John Blain. This will be one of the best lots of large, prolific, heavy boned Poland Chinas that will go through a sale ring this winter. Our hogs are all healthy, and in fine condition. Our entire lot of sows farrowed an average of over nine pigs to the litter last spring. Having sold our farm and our new location not being properly arranged for the hog business compels us to put in some of our very best brood sows that could not be bought under any other circumstances. Do not miss this opportunity to secure some of these choice animals at your own price. We are also offering a number of good Short-horn bulls at private sale. Send for catalog. Lunch at 11:30; sale at 12:30.

**Col. F. M. Woods and Assts., Auctioneers**
**RUEBEL BROS., Rockwell City, Iowa.**

## Peter Mouw's

—TWO DAY SALE—

**40 Head Hereford Cattle 40**
**50 Big Poland China Sows 50**
**ORANGE CITY, IOWA,**
**February 14-15, 1907.**

The cattle will be sold on Feb. 14.—Nine bulls, including my two herd bulls. 31 cows, 10 with calf at foot, remainder bred to Harvey 4th, and Prince Donald. The Poland Chinas will be sold Feb. 15, and are the largest, heaviest boned and lengthiest lot ever seen together, some will weigh 700 and 800 lbs. Write me at once for catalogs. Address,

**PETER MOUW,**
**Orange City, Iowa**
**COL. F. M. WOODS, Auctioneer.**

When writing please mention this paper.

**W. L. Addy & Son's Duroc Jersey Bred Sow Sale.**

On Friday, February 22d, at Parnell, Mo., Messrs. W. L. Addy & Son, of that place, will sell thirty-five head of Duroc Jersey bred sows. These are tops of their richly-bred herd and have mostly been bred to W. L. A.'s Choice Goods, one of, if not the most richly-bred boars known to the breed—his litter brothers excepted. To trace out through both sire and dam all the great ancestors of this great boar would consume too much space, but for the benefit of those who have never traced out the pedigree of this animal we wish to call attention to the leading strains of blood that have contributed to the individual excellence and the breeding qualities of this great young boar, conceded the most richly bred and possibly as great a sire as is found in the breed. You will note that his sire, Lafollette, was got by Belle's Chief that sold for \$205 at public auction when less than nine months of age. Belle's Chief was got by Red Chief I Am, sire of the great Red Lady that won over Iowa and Nebraska in 1903. Red Chief I Am was got by Protection, sire of the great Jumbo Red and possibly the sire of more foundation stock some few years ago than any boar of the breed. Belle's Chief had for his dam that great championship winner, Nebraska Belle, conceded one of the greatest show and breeding sows in the world. She was got by Higgins' Model, a brood sow sire that has no superior. Going back to Lafollette we find that he had for his dam Bishop's Choice, the dam of that great Challenger litter, Cole's Duroc, Larchwood and Challenger Jack, three litter brothers that stood one, two, three in the greatest show of yearling Duroc Jersey boars ever shown. The sire of Bishop's Choice was Duroc King, sire of that great championship winner, Improver II, that in turn has sired many winners. W. L. A.'s Choice Goods' dam, S. E.'s Model IX, was got by Ohio Chief (and we find here that grand old sire, Protection, playing an important part) he being the sire of Ohio Chief. The dam of Ohio Chief was Duchess 40th, dam of the great Top Notcher. C. E.'s Model IX, was out of S. E.'s Model by Col. M., another of Mr. S. E. Morton's great breeding boars. We might carry this history further, giving all the high prices these sires and dams and their descendants have sold for, but we believe more in the individual excellence of pure-bred live stock than any prices the sires, dams or their descendants may, or have, sold for. In conclusion the writer wishes to say that in W. L. A.'s Choice Goods Messrs. Addy & Son have a breeding boar that is the product of stock which has been noted for transmitting their good qualities to their offspring, and in this hog these gentlemen have a breeding boar such as is seldom found. They have for their sale on the 23d of February, selected a strong line of sows bred to this boar. This will be the second opportunity to get litters by him. There will also be four of his daughters in the sale, the first to leave the herd, except a few sold in dam last winter. They are the kind so much in demand: In future issues mention will be made of the sows bred to S. E.'s Model. In the meantime write Messrs. Addy & Son for a catalog and kindly mention this paper when doing so. See page 35 for advertisement.

**Allen's Great Sow Sale.**

An offering of Duroc Jerseys that is commanding considerable attention is that of Mr. H. S. Allen, of Russell, Iowa, on February 7th. From the Mulberry Grove herd have come some good things before, but never has Mr. Allen offered a better lot of sows than he will send through the ring on this occasion. There are eight fall yearlings sired by Top Notcher Again, and all are bred to the Iowa State Fair sweepstakes boar, Crimson Wonder Again. No. 2 is the dam of Mulberry Queen, the sow that produced his prize litter in 1905. Gilts out of this litter topped both his fall and spring sale last year. Her name is Mary Notcher, and she will make a show yearling. She is bred to Crimson Wonder Again. Her litter sister, June Top Notcher, is a right good one, very deep in body, fine color, nice head and ear, and an all-round good sow. She is bred to Crimson Wonder Again for early farrow. The dam of these gilts also goes in, bred to the same hog. There are two other corksing good yearlings in the sale, daughters of Top Notcher Again, out of a Patsy Bolivar sow. These are Nos. 7 and 8. They have good backs, good heads and ears, heavy bone and stand on good feet, and are bred to Crimson Wonder Again. There are some good fall yearlings by Top Notcher Again and out of Patsy Bolivar sows. There are three of these, and they will make the big kind; one will easily make a 700-pound sow when matured. Among the spring gilts are ten good daughters of the old champion, Top Notcher Again. One of these that deserves especial mention is No. 11 of the catalog. She was farrowed March 2d; eleven in the litter. She is massive in size, with lots of quality; would not be a bad proposition for a show yearling. She is bred to the sweepstakes boar. There are four daughters of Crimson Wonder I Am in the sale out of a Top Notcher Again dam. We are keeping a litter sister of these for our show herd next year. Two of these, Nos. 17 and 18, are very good. They are good all over and are safe in pig to one of the best sons of old Proud Advance. Any man who buys Nos. 17 or 18 on mail order and is not satisfied, can ship her back at Mr. Allen's expense. He also sells three spring gilts, all daughters of Proud Advance and bred to Crimson Wonder Again. They ought to go some because they are good. Also two daughters of Tom Davis, the first-prize Nebraska State Fair boar. One of these is safe in pig to Top Notcher Again, the other to Crimson Wonder Again. They are selling a good daughter of old Advance; also three of her daughters go in. In no sale this season will there be more of the blood of noted champions than will be found in the Allen offering and in no other sale will there be more size and quality. There are eighteen daughters of the old champion, Top Notcher Again in this sale, and they are bred to the sweepstakes boar, Crimson Wonder Again. Thirty-four sows in the offering are safe in pig to Crimson Wonder Again. Who offers a better lot of sows? Get a catalog and go to the sale.

**Stoner & Remley's Duroc Sale.**

No better-bred lot of Duroc Jerseys will go through the auction ring this year than the offerings of Messrs. T. W. Stoner & Son, of Henry, Ill., and J. W. Remley, of Lacon, Ill., which will be sold at Henry, Ill., Friday, February 8th. Forty-five head have been selected from these two good herds, thirty-five from the Stoner herd and ten head from the Remley herd. Messrs. Stoner have at the head of their herd one of the good boars of the breed in Stoner's Improver. He is a son of the noted Echo King, the boar that did such good service in the herd of Messrs. Smith and Arch Brown, of Waterloo, Neb., and his dam was by Corrector, a boar which did much good in the herd of Mr. J. D. Nidlinger, of Decatur, Ind. This boar has turned out much good stuff and the sows which have been included in the sale bred to him will make valuable additions to any herd. Another boar which this firm have been using to good advantage is Advance Col. This yearling boar was sired by Proud Advance and is out of Mady Orion by Orion. Such breeding as this is hard to find, and few better sons of Proud Advance are to be found anywhere. He is a full brother, litter mate, to Proud Lady, the sow which sold at the record-breaking price of \$1,275 in Messrs. Manley & Co.'s sale last year. Several of the best gilts in the sale are bred to this boar, and those of our readers who wish to improve their herds will do well to secure a sow bred to this noted boar. Mr. Remley has consigned ten head to the sale and they are bred to J. I. C., one of the best sons of Kan't Be Beat the writer has ever seen. His dam is Cedarville Queen VIII., first in class and junior champion sow at the World's Fair, 1904. Another boar which Mr. Remley used with good results in his herd was Choice Goods, he by Echo King, and his dam by Corrector. This boar is the sire of several of the good ones in the offering, and crossed with J. I. C. should produce something that would benefit any man's herd. Messrs. Stoner last year secured from Mr. Ira Jackson a boar, litter brother to the first and second prize junior yearling sows at the Illinois State Fair. He named him Ohio Ben. He was sired by Chief Surprise, he by Chief of Ohio, litter brother to Ohio Chief, and was out of Stubb's Perfection by Longfellow. This boar has sired much good stock in this herd and bred to such noted boars as Messrs. Stoner own and have used will produce something good. The females in the sales are choicely bred and will suit the most discriminating buyer who is in search of good stock. The catalogs are ready and will be sent to all who write for one. Bids sent to Mr. D. M. Pierce, representing this paper, will be properly handled. Kindly mention this paper when writing, and plan to be present sale day.

**O. Osborn's Duroc's Sell Next Week.**

At the farm, one-half mile from Farrar, on the Newton and Northwestern, and south of Maxwell six miles, Mr. Osborn will sell thirty-five head of choicely-bred and carefully-grown Duroc sows and gilts. Among the good things which he will bring out at that time, which will be Friday, February 8th, will be Farrar Belle, a four-year-old sow sired by Carlin 14037. She has proved one of the best breeders in the herd and has the right color and conformation to make a splendid start for some new breeder or for that matter would be a valuable addition to any herd. Empress 71768 is another by this sire and is one of the best in conformation of any of the mature sows in the sale. Coming to the yearlings, of which there will be eight, we will say that they are a choice bunch and five of them are sired by Reed's Cashier 25675, a grandson of Advance. These and the sows are bred to Perfection King 41711 by Noble King 35041. Of the gilts much can be said in praise of their uniformity and evident thrift. There will be twenty-six to pick from, and representing such sires as Perf. King, Manley Orion and Long Tom. They are bred to two grandsons of Crimson Wonder and will be one of the choice bunches of gilts in spring sales. The catalog will tell more of them. Come to this sale and your presence will be greatly appreciated. The favor will be returned. Remember the sale of Mr. W. J. Hartung the day following. Send for catalog and when doing so kindly mention The Homestead.

**Edmonds, Shade & Co.'s Great Brood Sow Sale.**

The question that is now agitating the minds of every Duroc Jersey breeder is what will the great sow, Royal Blossom V., sell for? This great Iowa and Minnesota sweepstakes sow will be sold in the sale of Messrs. Edmonds, Shade & Co. at Kingsley, Iowa, on February 7th, together with an offering that is strictly high class. Royal Blossom V. is one of the greatest sows that will be sold this year, and she is bred to the splendid young boar, Masterpiece, a winner at the American Royal. This sow is sufficiently well known to Homestead readers that further comment is unnecessary. The thing now is, who will get her and what will he have to pay. Proud Maid, is a daughter of the noted boar, Proud Advance, and out of Royal Blossom V., the sow referred to above, and she is also bred to Masterpiece. She is bred right, and is right, and is one of the good sows in the sale. There will be a number of good American Royal fall sows in the sale, and many of these are bred to Masterpiece and Tokio, the latter being a son of Oom Paul. There are also some good spring gilts by American Royal in the sale, also some by John Orion and Tokio. There are three Top Pride gilts out of an American Royal dam that should attract breeders on sale day. Kruger Maid 2d is one of the richly-bred sows in the sale. She is a daughter of the great Orion and her dam is Kruger Maid by Long John, the same combination of blood lines that has produced so many of the leading show winners of later years. There is a daughter of Tolstoy in the sale and a spring gilt by Scarlet Wonder. Lady Roberts goes in, a sow bred by Messrs. Wm. Roberts & Son. She is a daughter of Owen by Duroc King, and she is bred to Masterpiece. Rose Advance is a daughter of old Advance, the sire of Advancer, Proud Advance and others, and she is also bred to Masterpiece. Lena Advance is her half sister, and is bred

# The Ames, Boone, Polk City Sale Circuit.

Four days' sales, February 11 to 14, inclusive.

## 160 Duroc Jersey Bred Sows and Gilts 160

Champions of the Breed. Show Material. Foundation Stock.

**February 11, Ames, Iowa.**

I will sell on my farm, four miles southwest of town, 35 HEAD, consisting of fourteen tried sows and yearlings and twenty-one gilts. The mature sows include some very attractive numbers. Five are sired by Iowa Thomas, a Des Moines prize winner; another is Ruth G. 2d, the dam of Ruberta, the prize-winning yearling at Des Moines, 1906. There are five of her gilts in the sale. Gilts are sired by Manly Orion, one of the good boars of the day, others by Keep On 2d, Malcolm's Model 2d. Here is a chance to secure some of the best blood with individuals of superior excellence. Send for catalog. Sale under cover.

**S. P. Freed.****February 12, Boone, Iowa.**

For my offering I have selected and am preparing 45 HEAD of my best breeding and young stock. Among the seventeen yearlings and tried sows will be daughters of Old Brilliant, Young Pilot, King West, Belle's Perf. King, Teddy R. and others. Among them will be producers of prize winners and all are reliable regular breeders. Violet Blossom, dam of champion sow at Sioux City, 1906, is included. The gilts are sired by Ohio Chief, Proud Advance and Arion's Type, also to Advance Dandelion. They are bred to several boars, among which is Nash's Model 21395 and a Crimson Wonder and Tip Top Notcher boar. Write for catalog. We welcome you to Pine Hedge Farm.

**A. P. Alsln.****February 13, Polk City, Iowa.**

On the above date I will offer for sale on my farm near town as growthy and well-bred a bunch of sows, yearlings and gilts as will be sold this spring. There will be 40 HEAD in all and will include nine yearlings and thirty-one gilts sired by Top Notcher Chief, Joe Patten, Model Chief, Keep On, Manly Orion and others. I have mated the offering to the best blood I could secure, such as Ohio Chief, Keep On 2d and a Crimson Wonder boar. Size and bone with the best breeding is my hobby. Send for my catalog.

**B. C. Martz.****February 14, Polk City, Iowa.**

Our sale will be held on the farm near that of Mr. B. C. Martz and for our offering we will have 45 HEAD which will be made up of fifteen mature sows of recognized breeding, representing the blood of Orion, Reed's Banker, Tientzin and others. They are good producers, having raised us two litters regularly each year. The fifteen head of fall yearlings are sired by Challenger II. and as many gilts sired by Orion's Rival and Model Jim. We have bred the offering to three good boars, a grandson of Billy K. and one of Malcolm's Model and Councillor 57237. We want you to have our catalog.

**Shotwell & Menefee.**

Col. F. F. Luther conducts the selling.

## Great Short-Horn Dispersion Sale.

—TO BE HELD AT—

**LOOMIS, NEB., FEBRUARY 15, 1907.**

### 24 Cows and Heifers 24

**4 Aged Bulls, 10 Yearling Bulls, Including the Great Scotch Bull, Goldie 152298**

There will be some excellent Scotch and Scotch-topped cows and helpers in this sale; also a fine bunch of young bulls. The great young bull, Prince Volomia 223588, by Orange Viceroy 164269 is also to be sold. I will offer my entire lot of breeding cows, some with calves at foot by above named bulls. The breeder and farmer will find what they are looking for here. They are the dual purpose Short-horn. Write for catalog. When writing please mention this paper. Address,

## Rosenfeld and Siverly

KELLEY, IOWA.

Col. Igo, Auctioneer.

Send for Catalog

to American Royal, Messrs. Edmonds, Shade & Co. are offering a grand lot of Duroc Jersey sow and they are good individually and their breeding is all that can be desired. If any of our readers want good sows they won't make any mistake in attending this sale. In fact, it will do you good to go

and see them sell. Write Messrs. Edmonds, Shade & Co. for catalog and kindly mention The Homestead when doing so. If you cannot attend in person send a bid to Mr. E. Z. Russell, in care of the above firm and he will carry out your instructions to the letter.

## Kraschel's Duroc Jersey Sale.

On another page of this issue we present a good likeness of Mr. Fred Kraschel, of the firm of Messrs. Fred Kraschel & Son, of Macon, Ill., breeders of Duroc Jerseys. This gentleman has been breeding Duroc Jerseys for a number of years and has one of the best herds to be found anywhere. This herd combines the blood lines of many of the best and most profitable families. It has not been done easily, but after much work and by the exercise of good judgment, and the assistance of his sons, Melvin and Nelson, he has gathered together and bred some of as good ones as can be found anywhere, and which gives the breeder a feeling of satisfaction when he enters such stock in the show ring or invites his brother breeders to come and buy them at their own figures. Messrs. Kraschel are liberal in their bidding and quick to appreciate the efforts of a fellow breeder to become successful. The offering which they have selected for their annual brood sow sale to be held at their farm, one mile east of Macon, Ill., on Thursday, February 7th, is one of the best the writer has seen this year. Individual merit, breeding and the excellent condition of the stock make this day an unexcelled opportunity to secure good breeding stock. They have concluded to sell one of their young herd boars, Gold Standard, an April yearling, sired by the champion boar at the Illinois State Fair in 1904, Gold Cloud, and out of Prosperity Belle, one of the best producing sows in the herd. Gold Standard stood third in the yearling class at the Illinois State Fair this year in one of the strongest Duroc classes ever on that ground. He is a hog of unusual length, with very good back and loin, wide ham and stands on the best of feet and legs. A limited number of sows that go in the sale are bred to him, and a litter of fall pigs sired by him will give the breeders present a good idea of the kind of stock he produces. The breeder who is in need of a good herd boar will do well to be present sale day. We wish to call attention to some of the females in the offering. Perfection Maid 96244 by Allison Jr. Perfection by Allison Jr. and out of Owaneco Belle, one of the best sows Messrs. Kraschel ever owned, is included in the offering. She has been shown ever since she was a gilt, winning second in class and was one of the litter that won first; also one of the second-prize young herd in 1905, then in 1906 she and one of her daughters were in the second-prize aged herd well and she should go into some good herd. She is safe in pig to Mayor Jr., first prize boar Illinois State Fair, 1904, and first prize boar Illinois State Fair, 1905. Buddy T's Belle is a yearling sow of more than usual merit. She is a half sister to Buddy K. IV., the champion at 1905 Illinois State Fair. As a producer she could not be excelled, as she raises two litters a year, and just weaned a litter of fall pigs, so she will not be very fat, but will do well for her owners. As a show sow she was third-prize gilt and one of the third-prize litters; also in third-prize young herd. She is safe in pig to Mayor Jr. Jay's Model is one of the attractions of the sale. She was sired by Model Chief, sire of the first-prize boar pig at Des Moines, 1906, he by Ohio Chief, and her dam was Lady Fancy by Proprietor F. She is safe in pig to High Notcher, he by Top Notcher and out of Xenia Queen, and the sire of the noted boar, Red Express. Violet A. by Prairie Chief, he by Ohio Chief, is one of the good sows in the offering. She was bred by Messrs. T. W. Stoner & Son and topped their brood sow last year. She is bred to Mayor Jr. There are a number of other good sows, but lack of space forbids their mention. We wish, however, to make clear that this is one of the best sales of the year and that there is not a cull in the sale. The gilts are the best lot Messrs. Kraschel have ever raised and that means much to the breeder who is familiar with this good herd. Parties attending the Baxter sale can easily reach this sale with very little expense, and we urge our readers to be present sale day. Bids sent to Mr. D. M. Pierce will be properly handled. Kindly mention The Homestead

## Reubel Bros. Great Poland China Sale.

Every lover of a good Poland China sow, one that possesses plenty of size and lots of quality, should not fail to read the sale advertisement of Messrs. Reubel Bros., of Rockwell City, Iowa. They are selling sixty-five head of brood sows at their farm, on February 12th, and very few sows that will be offered in the state of Iowa are the equal of what Messrs. Reubel will put into this sale. It certainly is the best offering they have ever sold, and there are sows in this sale that are fit to go into any herd in the United States. Messrs. Reubel have sold their farm and are moving to northwestern Iowa, and not wishing to move a great many hogs, have decided to put the most of them in this sale. They are offering twenty-four old sows and fall yearlings, and the rest are spring gilts. Just look at some of the good things they are offering in this sale. Ida Tecumseh is a two-year-old daughter of Chief Tecumseh 3d, out of Queen Wilkes by Marcus Hadley. Without doubt this is one of the best living daughters of Chief Tecumseh 3d. She is a splendid individual and will weigh 600 pounds. This sow is a rare bargain at any price and any man can afford to own her at any price. She is bred to their great young boar, Moderator 42814, a boar purchased of Mr. John Blain, and he had bought him to use in the Blain herd, and besides, Mr. Blain had visited thirty herds in search of a boar before he bought this one. Cora Tecumseh is a litter sister to Ida Tecumseh, and she is wonderfully long, with high bone, and always farrows large litters. She is bred to Iowa Chief, the best son of old Thickett, that has ever been seen in the West. Both of the Tecumseh 3d sows are worth going after. Messrs. Reubel also sell a two-year-old daughter of Keep On in this sale. She is a litter sister to the pig that Mr. W. Z. Swallow won first on at the Iowa State Fair in 1904. She is bred to Iowa Chief, and anyone wanting a Keep On sow should go after her. They are selling two good Chief Perfection 2d sows. One is Twilight, the other Breakfast 2d. Twilight is an ex-

## .... Northeast Nebraska Duroc Jersey Sale Circuit....

THE GREATEST LOT OF DUROC JERSEY BROOD SOWS THAT HAVE EVER BEEN SOLD IN NEBRASKA.

205 DAUGHTERS OF LEADING WINNERS AND BRED TO THE MOST NOTED 205 Boars in the West. The following boars are represented in the Circuit of sales

GLENDALE CRITIC, JUNIOR JIM, ECHO KING, ORION, ARION, RED CHIEF I AM, GOLD DUST JIM, ROYAL TOP NOTCHER AND BELLE'S MODEL, A SON OF NEBRASKA BELLE AND SURE WINNER.

MONDAY, FEB. 4TH.

AUSTIN RENSHAW, BLAIR, NEB.

Four yearlings, one by Alex Advance, litter brother to Alix II, four by Golden Perfection, one by Cole's Duroc, others by Glendale Jim, out of Lady Alix, the \$425 sow, and twenty-five choice gilts by Junior Jim, the \$5,000 boar. These are bred to the great prize-winning boar Arion, Long Alix and Redwood Chief, a son of Ohio Chief. One of the best gilts that will be sold is sired by Long Alix, and she is a good one. Write me at once for catalog. Cols. Callahan & Luther, Aucts.

40 HEAD

TUESDAY, FEB. 5TH.

MANLEY &amp; CO., LYONS, NEB.

We will sell ten Orion sows, ten Junior Jim gilts, nine young John sows, several by Proud Advance, Belle's King, Arion and other noted sires. We will also sell our entire show herd, 1906. These sows are mostly bred to the \$5,000 boar, Junior Jim and Advance Lad, a full brother to Proud Advance. Write at once for catalog. Colonel Luther, Auctioneer.

40 HEAD

WEDNESDAY, FEBRUARY 6TH.

E. Z. RUSSELL,

BLAIR, NEBRASKA.

I am offering for sale twenty-six yearlings and aged sows, balance spring gilts. I am also selling a litter sister to Critic's Echo and she is hard to beat; is bred to Crimson Choice, a grandson of Crimson Wonder. There will be a splendid lot of Malcolm's Model sows in my sale. Some choice gilts in my sale are sired by Glendale Critic and Gold Dust Jim 2d. Write at once for my catalog. Cols. Luther and Callahan, auctioneers.

40 HEAD

THURSDAY, FEB. 7TH.

SMITH BROWN, WATERLOO, NEB.

I will sell twenty choice gilts and twenty fall yearlings and aged sows. These will be sired by Crimson Wonder 2d, Glendale Critic, Echo King and the great Orion. Seven of these gilts are granddaughters of the noted sow, Nebraska Belle, and are bred to a son of Gold Dust Jim. I am selling my great sow, Gold Dust Queen, bred to Belle's Model, and she is a show sow for next year. I also sell a daughter of Nebraska Belle. Write at once for catalog. Col. T. C. Callahan, Auct.

40 HEAD

Friday, February 8th.

Arch Brown &amp; Sons, Waterloo, Neb.

Just look at our list: Twelve head by Echo King, twenty head by Royal Top Notcher, three by Sure Winner, four by Red Knight, two by the \$5,000 boar, Junior Jim, two by Red Chief I Am, one by Alex Advance, a full brother to the great sow Alix, and we are going to sell our great brood sow, Beatrice Queen, a daughter of Duroc Challenger, and she will be bred to Kan't Be Beat. Others will be bred to Echo King, Sure Winner and ward Duroc, our three herd boars. Write us for catalog. Col. T. C. Callahan, Auct.

45 Head

Everyone interested in Durocs should send for a catalog of these great sales, and mention The Homestead when writing. Bids sent to M. T. White, Homestead representative, in care of any of the above will be properly attended to.

tremely fancy sow, with a good hack, feet and legs, and is bred to R's Keep On, a son of the great Keep On, and one of the best breeders ever used in the Reubel herd. Breakfast 2d is another valuable daughter of old Chief Perfection 2d, a little straight in the ear, but otherwise an excellent sow, and she is also bred to R's Keep On. Mischief Model is a three-year-old and a daughter of the great Mischief Maker. She is a half sister to the World's Fair boar, Meddler, and she is bred to R's Keep On. She is a low-down, fancy in head and ear and a wide, hulging ham. These gentlemen also sell War's Darkness, a sow purchased of Mr. Ed Ware. She is sired by Perfect Darkness out of old Darkness, one of the greatest sows of the breed. She is bred to Iowa Chief for early farrow. They also sell a good daughter of Pilate's Chief, Proud Perfection Jr., Country Gentleman and other well-known boars. The gilts are largely sired by R's Keep On, Iowa Chief, Robert J., a son of Prince Alert; Perfection E. L., Iowa Sunshine and a few litters are sired by other boars. It is a decidedly good offering of Poland China sows and represents the labor of years in arriving at the high standard now maintained in the Reubel herd. Write them at once for catalog and mention The Homestead.

## Isaac's Big Duroc Sow Sale.

On Friday, February 8th, Mr. T. H. Isaac will make his annual Duroc Jersey brood sow sale at Red Oak, Iowa, and we predict a good one because he always puts up a good offering. No breeder in Iowa raises a more practical Duroc Jersey sow than does Mr. Isaac. He is a man with an ideal, and he sticks to it, thereby winning out. He believes in a good, lengthy, high-boned sow and has that kind to offer. While believing in a good pedigree, he also wants the hog to accompany it. His fall boar sale was one of the best of the year, which shows what the people think of his kind of hogs. Sixty head of boars at an average of about \$30 is not bad, and he got the money. The hog is the big proposition in the mind of Mr. Isaac, and the class of sows that go into this sale are especially good and are bred along the most popular blood lines. First in service is the fine boar, Belle's Red Chief, by the noted Red Chief I Am. Another good one is Educator, by Indicator, of prize-winning fame; Royal Knight is yet another, sired by the Nebraska champion, Red Knight. He is also using a fine young Ohio Chief boar. The sows and gilts are all bred to these boars, and they should prove one of the most useful lots to go under the hammer. They are the get of such sires as Robert H., by Pilot J. (a hog that has made a fine reputation as a sire in the Isaac herd); Hardy's Improver, by Improver 2d; Brighton Wonder, by Tolstoi (owned by R. J. Harding); Belle's Red Chief; Educator; Royal Grand, and Red Rustler. It is, in short, a splendid offering of high, well-developed sows and gilts that are tried in the best Duroc lines of the present day. They are to be presented in ideal business condition, and should prove a most satisfactory investment for buyers who want the right thing in red hogs. Mr. Isaac has arranged to hold the sale at Stover's feed yard in Red Oak, where all are made comfortable, with every convenience for inspecting the offering. Write for his catalog and be ready for sale day, and kindly mention The Homestead when doing so.

## Last Call for the Dispersion of the O. L. Kerr Herd of O. I. C. Hogs.

On next Wednesday and Thursday, February 6th and 7th, at Independence, Mo., under the direction of Mr. Llewellyn Jones, administrator of the estate of the late O. L. Kerr, of Independence, Mo., the herd of O. I. C. hogs that have attracted the attention of the breeding fraternity of America will be dispersed. Never before in the history of the breed has such a lot been exposed to sale either at private or public treaty. The great line of herd boars, Kerr Dick, Kerr Rex, Kerr Dexter and Kerr Paul, are boars that should not be overlooked by breeders, as

## KIRKPATRICK-WILSON

Bids sent in care of above will be properly handled by Col. H. S. Duncan, Auctioneer, or L. E. Troeger, Homestead representative.

they are the kind that any breeder can use. There will also be sons and daughters of these great hogs in the sale. In all there will be upwards of 180 head to be sold. Fifty-five or sixty are bred sows, twenty-five or thirty of these being bred to the great Kerr Dick. Those sows which Mr. Kerr had always refused to price must now be sold to the highest bidder. Big Mary, the sow which every breeder mentions if he has a son, a grandson or a descendant in his herd. Silver, the greatest brood sow of them all; Nancy, and the almost perfect sow, Sally, that was the undefeated champion in 1906, all go and at your price. There is much material throughout the herd that is classed as absolute top stuff of the breed. As this is an administrator's sale everything must go, no matter what the price, and it will pay breeders to be on hand. Colonels Sparks and Zaun will do the selling and bids may be sent to them or to Mr. C. J. Hiles, secretary of the O. I. C. Association, care Mr. Llewellyn Jones, administrator of Independence, Mo.

## SPECIAL BARGAIN SALE.

10 Two-year-old Short-Horn Heifers

Bred to an imported Cruickshank bull; also some extra fine young bulls, large boned and growthy, sired by an imported Cruickshank bull.

Also a few tried Duroc Jersey brood sows and a choice lot of gilts—the blood of Billy K. 20313, St. Paul, Manly Orion 3709, Cantine Boy 16319, King Perfection, Brilliant and Model Chief 11159 (A.). Prices from \$20 to \$50.

Wanted a good, fine stockman to buy a part interest and take management of farm. A good chance for a hustler. Reasonable terms.

J. E. GUERNSEY, Keosauqua, Iowa

When writing to advertisers please mention this paper.

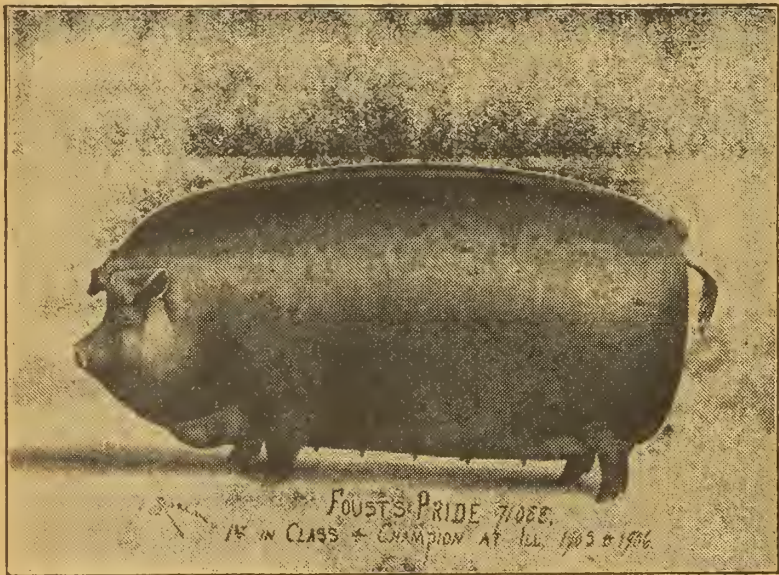

**Watt & Foust and Mahan Bros.' Duroc Sale.**

There are men who from year to year breed stock that goes out to the fairs and wins, and when sold does equally well for the new owners. To this class belong Messrs. Watt & Foust, of Cedarville and Xenia, Ohio, and Messrs. Mahan Bros., of Osbourne, Ohio. These two firms have selected the tops of their herds for the combination sale at Dayton, Ohio, February 12th, at the fair grounds. The writer, representing this paper, has carefully inspected the offerings and is pleased to recommend it to readers of this paper. From the herds of Messrs. Watt & Foust come such noted boars as Tip Top Notcher, Kan't Be Beat, Top Notcher 10th and others of equal note. They breed this kind and have in their herd at the present time the dams of these noted boars. Many of the females consigned to this sale will be from sows which have produced the winners at the great state fairs of the East and West and the World's Fair. Daughters of Kan't Be Beat, Top Notcher, King to Be (the sire of the noted show and breeding boar, King's Pal, that now stands at the head of Mr. Thomas Johnson's good herd at Columbus, Ohio), Golden Rule, Veribest and other noted sires are bred to boars that have been noted winners. This is a sale of strictly top stock. There are no culls listed. These gentlemen realize that the western breeder is pleased to pay good prices for good stock and we are sure that no one will be disappointed in the offering. We wish to call the attention of our readers to some of the boars which are either the sires of, or to which many of the females are bred. Golden Rule is a son of Choice Goods, he by Chief of Ohio, a litter brother to Ohio Chief, and his dam is Mayflower, one of the greatest breeding sows in Ohio, a granddaughter of Longfellow. Many of the gilts in Messrs. Watt & Foust's consignment are sired by Golden Rule, while others are safe in pig to him. King's Victor is one of the good herd boars used by Messrs. Mahan Bros. He is a son of the famous sire, King to Be,

**Ira Jackson's Duroc Sale.**

Western breeders in need of good breeding stock of prize-winning merit and ancestry cannot afford to be absent on February 13th, the date on which Mr. Ira Jackson, of Tippecanoe City, Ohio, will offer for sale at public auction fifty head of richly-bred sows. Mr. Jackson has been one of the most successful breeders the Duroc fraternity has known in recent years. At the World's Fair in St. Louis, 1904, Mr. Jackson won more first-prize ribbons than any other breeder. He did equally as well this past season at the Iowa and Illinois State Fairs. Boars of his breeding are at the head of some of the very best herds. Messrs. Sonneland and Voge, of Harlan and Portsmouth, Iowa, are using Kruger Lad, the first-prize under year boar at the Iowa State Fair, at the head of their herd. Mr. John W. Jones, of Concordia, Kan., is using Shorty Orion, another prize-winning boar, at the head of his herd, and Mr. Geo. W. Seckman has one of the prize-winning sons of Orion Chief in use in his herd. The breeders who are using the boars from this herd find that they are good producers. The blood lines to be found in the offering which will be sold on February 13th cannot be excelled. They represent the families which have made the breed famous both in the show ring and in the sale ring. On Thursday of the past week Lady Kruger, a daughter of the World's Fair winner, Kruger, and litter mate to Kruger Lad, the boar owned by Messrs. Sonneland and Voge, sold for \$500 at public auction. The best breeders present at the Reil & Cooper sale were bidding on this sow, realizing that she would produce good litters for them of show-yard merit, and go back into the show ring this fall and repeat the winnings of 1906. Twenty yearling sows, among the number a full sister to Lady Kruger, and others of equal merit, have been selected for this occasion by Mr. Jackson. Daughters of Orion Chief have been bred to Kruger and daughters of Kruger have been bred to Orion Chief. This lot of yearling sows contains many show-yard prospects, and breeders may obtain

We present to our readers this week a very good likeness of the champion Duroc Jersey sow at the Illinois State Fair, 1905-6, Foust's Pride. This sow is safe in pig to the service of Tip Top Notcher, and is included in the sale of Messrs. Fagan, Browning & McCabe, at Hersman, Ill., on Tuesday, February 5th. See field notes.

which is also the sire of King's Pal, the \$2,000 boar at the head of the good herd owned by Mr. Thos. Johnson, of Columbus, Ohio. Messrs. Mahan Bros. believe that in this boar they have one of the great boars found in the offering, while others are safe in pig to him. The writer was especially attracted by the yearling boar, Dread Naught. He is a son of Kan't Be Beat and his dam is Rubertha, a sow which has produced many of the breed, as he has already won numerous winners and is producing winning stock for them. Several of his get are to be winners for Messrs. Watt & Foust. This boar won second at Ohio, first at New York, first at Kentucky and headed the young herds that won first and he was a favorite with the breeders wherever shown. Rubertha, his dam, was one of the best daughters of Top Notcher, and if this hog is carried along in proper shape Messrs. Watt & Foust will have a boar worthy to follow the noted Kan't Be Beat. Grand Success, owned by Messrs. Mahan Bros., is another of the good boars which are represented in this auction. He is good enough individually to meet the requirements of this firm, and was bought to cross on the King to Be sows, several of which have been cataloged. Wilda's Corrector is one of the last sons of Corrector. His dam was Wilda, the top sow in the J. D. Nidlinger sale of 1905, selling for \$385 to Mr. Thos. Johnson, from whom Messrs. Watt & Foust secured him. A limited number of gilts are bred to him. W. & F.'s Col. is a son of C. E.'s Col. and out of Dew Drop Maid, one of the best producing sows to be found anywhere. He has been bred to some of the females which go into the sale. Corrector's Hero by old Corrector is a boar of much promise and could easily be made to weigh \$1,000 pounds. Several of the top sows of the auction are bred to him, including daughters of Kan't Be Beat. We have briefly mentioned these herd boars and will, in our next issue, give full particulars regarding the females which go into the offering. We wish, however, to urge upon Duroc breeders of the West the fact that this offering is one which any breeder will find profitable. The best of three herds have produced is to be sold, and no one should miss being present or represented at this time. Bids sent to Mr. D. M. Pierce, representing this paper, care the Phillips House, Dayton, Ohio, will be properly handled. Write for catalog at once as per the advertisement on page 47 of this issue, kindly mentioning this paper.

them at their own figures. Thirty spring gilts have been listed, representing the get of such noted sires as Kruger and Orion Chief, Ohio Chief, High Chief (a son of Ohio Chief), Kan't Be Beat and other leading prize winners. There is not a cull in the lot and the offering will be in good breeding condition. If the readers of this paper wish to add individuals of prize-winning ancestry, in fact bred the same way that the winners have been at the World's Fair, Iowa and Illinois State Fairs, no other opportunity can be given better than this one. Plant the good seed in your herd and reap the harvest of ribbons at the fall shows. Mr. Jackson's sale follows that of Messrs. Watt & Foust, at Dayton, and can easily be reached by traction, being only ten miles from Dayton. Write for catalogs at once and watch these columns for further particulars next week. Write for catalog at once, kindly mentioning this paper as per the announcement on page 47 of this issue. Bids sent to Mr. D. M. Pierce in care of Mr. Jackson will be properly handled.

**Harris & Son's Noted Duroc Sale.**

We wish to call the attention of our readers to the forthcoming Duroc Jersey sale of Messrs. Amos W. Harris & Son, of Waverly, Ky., which will be held at Louisville, Ky., on February 22, 1907. This gives the breeders better railroad accommodations and shipping from Louisville will be at less cost than from Waverly. The writer has carefully inspected this offering and is more than pleased to recommend it to our readers. At the head of this noted herd stands the champion boar, Commodore, first and champion at the Illinois, Kentucky and Tennessee State Fairs in 1906, and pronounced by many of the best breeders to be the greatest Duroc boar they have seen in years. He traces three times to Lucy Wonder, the champion sow at the Chicago World's Fair, twice to Hero, the champion boar at the same show, and combines the blood lines that have made the breed famous. His sons are used in the herds of such noted breeders as Messrs. Geo. W. Seckman, of Ripley, Ill.; J. Coy Roach, of Girard, Ill., and others. Many of his get are to be found in this offering, while others are bred to him. Sows sired by Orion, Junior Jim, Top Notcher, Ed's Col., Sure Winner, Sensation, Kan't Be Beat, Kentucky Colonel II., Top Notcher 10th, are bred to the noted

**Great Kant-Be-Beat Sale**

**I-2 Interest in the Sensational King of Prize Getters, Kant-Be-Beat 10239a and 41 tried sows, yearlings and gilts at Public Auction**

Cracker 14205 and to Grimson Wonder Choice,  
a Splendid Grandson of Crimson Wonder 26355**

**40  
HEAD**

AMONG the twenty head of yearlings and two-year-olds will be many sired by Orion's Ideal 44314, others by Young Advance 44315 and Top Notcher King 28578. These are bred to the splendid herd boar, Cloverdale King. The younger sows are sired by the same boar and bred to Crimson Wonder Choice. Our stock is selected from large litters and we are here offering some of our best. Sale is at farm 4½ miles south of Gray. We extend a hearty welcome to our brother breeders to attend the sale and accept of our entertainment. Send for catalog. Address,

Sows with size, quality and bone, bred to noted prize-winning boars. Catalogs now ready explaining breeding of each and every animal in the sale. Write for one and arrange to attend these sales.

**J. B. DAVIS.**

**GEO. KERR.**

Commodore. Several are bred to Kentucky Colonel II. and Top Notcher 10th, an unusually good boar; in fact, one of the best sons of old Top Notcher, and a few to Ed's Col. This array of breeding coupled with the individual merit to be found in the offering make it one of the best and strongest

of the year. The catalogs are now ready and will be sent free to all who write. Those who cannot be present sale day may send bids to Mr. D. M. Pierce, representing this paper, in care of Messrs. Harris, and same will be honorably treated. Kindly mention this paper when writing.

# PRIZE WINNING DUROC JERSEYS AT AUCTION

**In Heated Pavilion at Remington, Ind.,  
ON MONDAY, FEBRUARY 11, 1907.**

**FORTY HEAD--THE PROPERTY OF MR. JOHN A. TETER, OF REMINGTON, INDIANA.**

In 1906 herd was shown at Michigan, Indiana and Illinois State Fairs and won 29 prizes, including two grand championships, three championships, ten firsts, nine seconds and six thirds. Many of these prize winners are included in the offering. Special Attraction--Clover Blossom 1st 39900 (A.) by Crimson Top 12501, dam Clover Blossom 28828 by Kan't Be Beat, champion and grand champion sow Michigan State Fair, Detroit, 1906; second at Indiana State Fair and third Illinois State Fair, 1906, goes into sale bred to Golden Chief. No better sow of her age will go through the auction ring this winter. Four other state fair prize winners included in the offering. This sale can easily be made on the way to the noted Ohio circuit without any additional expense. Write for catalogs, mentioning The Homestead.

**COLS. KEIL, HARMON & KENYON, AUCTIONEERS.**

**J. A. TETER, REMINGTON, IND.**

Send bids to Mr. D. M. Pierce, representing the Homestead, in care of Mr. Teter, and they will be properly handled.

Third prize boar Indiana State Fair, 1906, also sire of 1st prize male pig, 1st prize sow pig, 1st prize young herd, 1st prize get of boar, 2 fr. on herd bred by Exhibitor.

OHIO CHIEF AGAIN, that great son of Ohio Chief and out of Savannah Belle, has been used on a goodly number. OHIO BELLE has litter sister bred to Crimson Wonder I Am, the 1906 champion at Iowa State Fair, should prove a great attraction. See the Proud Advance gilts bred to Ohio Chief Again; others by Perfection Chief, Radiant, Tip Top Notcher, Hanley and Sir Thomas are good. I Am Crimson Wonder has been used on some. Sale at farm in city limits. Write for catalog.

**LUTHER & MCGOWAN, AUCTS. S. R. MURPHY, SAVANNAH, MISSOURI.**

Attention is called to the sales of A. E. Poush, Chariton, Iowa, February 18th; Sheldon Bros., Shannon City, Iowa, February 19th; White & Dewey, Shannon City, Iowa, February 20th; A. L. & U. G. Lynch, Mt. Ayr, Iowa, February 21st.

### S. R. Murphy's Sale of Duroc Bred Sows.

On Saturday, February 23d, at his farm joining the city limits of Savannah, Mo., Mr. S. R. Murphy will sell forty head of bred sows and gilts. Mr. Murphy is best known as the man who paid \$730 for Savannah Belle, that daughter of the great Nebraska Belle, bred to Ohio Chief. While the price may have seemed long, Mr. Murphy has proven that the price is hardly a consideration if the animal in question is bred right and has the ability to produce. Many do not note the recollection of Mr. Murphy back further than this, as a breeder, but it was Mr. Murphy who bred the great Missouri Girl from which Mr. J. O. Hunt has produced so much of his show and sale stuff. He has not been as prominent as many, but has nevertheless been doing business, as will be seen by those who spend the day with him on February 23d. That grand little brood sow, Savannah Belle, has furnished four herd boars, viz.: The second choice boar pig went to Messrs. Maupin & Applegate, of Shelbina, Mo., at \$300; the third choice went to Mr. A. E. Poush, of Chariton, Iowa, at \$250, and the fourth choice went to Mr. J. Coy Roach, of Girard, Ill., at \$300. The first choice, Ohio Chief Again, remains in Mr. Murphy's herd as leading herd boar. One gilt also remains and is to sell in Mr. Murphy's sale. She is safe in pig to Crimson Wonder I Am, first prize and sweepstakes boar at Iowa State Fair in 1906, for April 1st farrow. This litter will carry as much of the blood of great winners and high-selling Durocs as has ever been found in a litter. Savannah Belle, the dam of this litter, was by Red Chief I Am, he by Protection. Her dam, Nebraska Belle, that great championship winner and brood sow, was by Higgins' Model. The litter was by Ohio Chief, which makes them line-bred Protection hogs. They all have the desired conformation, strong bone and it has been a task for anyone to select the pig that will be the absolute top at two years of age. Ohio Chief Again, the boar Mr. Murphy reserved and to which so many of the sows are bred, is a strong-constituted pig, with a strong back, a well-sprung rib, hams that are well jointed perfect and a set of feet and legs that are extremely good. His fine, wide head indicates a breeder, and sows bred to him should be in demand. He is assisted in the herd by I Am Crimson Wonder, a son of Crimson Wonder I Am and a half-brother to Crimson Wonder Again, sweepstakes boar at Iowa State Fair in 1906. Several gilts in the sale are bred to Belle's Chief I Am, the pig that went to Mr. Roach, of Girard, Ill. Mr. Murphy will also sell four Proud Advance gilts bred to Ohio Chief

Again. Stick a pin here, breeders; we will have something to say of them next week. There will also be daughters of Radiant in the sale that should please the critical buyer, also several others of which we shall have more to say. Mr. Murphy also sells eleven yearling sows, among which are some grand-daughters of Kansas Wonder, that great breeding boar to which so many Kansas breeders look for brood sows. Mr. Murphy's sale is the last of the southwestern Iowa and northern Missouri sale circuit. See page 35 for his advertisement and write today for a catalog. Kindly mention this paper when so doing.

### Annual Horse Sale at Wichita, Kan.

Messrs. Robert Burgess & Son, of Wenona, Ill., write: "We take pleasure in announcing to the public that hereafter we shall hold an annual sale at Wichita, Kan., our first being held there on the 22d day of February, which sale will consist of the grandest lot of good young stallions ever placed at auction of the following breeds: Percheron, Belgian, Shire and Hackney stallions. Our aim in this sale is to surprise the public with horses of good color, size, bone and of such quality as is rarely if ever seen at a stud, and we further wish to inform the public through the columns of your valuable paper of the magnitude of our business of this last year, as we have now sold more horses at our stables this fall and winter up to the present time than we have done in three years previous. Selling at the barns without a doubt is not only the proper way, but is the most satisfactory to both the seller and the buyer, as it gives both the opportunity to become personally acquainted with each other and eliminating all the ifs and ands which are always placed in every deal by the salesman. As we have sold over fifty head since the International Exposition and our horses which have the great weight and size are very fit and have done remarkably well. We now have close to 100 head of black and black-gray Percherons, some coming three-year-olds that will weigh over a ton, with more bone and lower to the ground than any of any importation we ever made. Some coming four-year-olds and five-year-olds that are in the best of condition and are the wide-as-a-wagon sort. All we ask is for anyone wishing a stallion to come and see our horses at the different stables where we have over 300 head to select from, as we know that we can please them as to individual merit. We are now going to offer fifty head of the very best to the public at auction at Wichita, and as we have established a stable at the above place, we intend holding an annual sale there to give the

breeders of Kansas and the great Southwest an opportunity to improve their stock at their own price. All horses will be sold with our guarantee of 60 per cent and giving the purchasers a credit of one year and six months, which gives the purchasers of all horses an opportunity to make two seasons and one collection before payment is due, thus allowing the investment to be self-paying. The greater majority of the fifty head to be sold at this sale will weigh over a ton and the fact that we won every first and second prize in every stallion class at the great Kansas State Fair is proof to the public of the quality of the stallions that will be sold at this sale. We will also have on exhibition at this sale the exhibit of stallions which we purchased from His Majesty King Edward VII. of England and Lord Rothschild at the great International Exposition at Chicago. Prem Victor and Girton Charmer, the two aged stallions of this exhibit, are worth going thousands of miles to see, as they are the highest-priced draft stallions ever imported to this country. This sale will not interfere with our regular barn trade whatever, as we have over 250 head to select from at our different barns for our spring trade, not including our new importation which will arrive soon, consisting of Percheron, Belgian and Shire stallions. Sale starts sharply at 8:30 a. m." See advertisement on page 45.

### Last Call for the Aldritt Sale.

We wish to call the attention for the last time to the sale of Duroc Jersey bred sows to be sold at Friend, Neb., on February 5th, by Mr. Frank Aldritt. A representative of this paper after carefully inspecting the offering pronounced it one of the very best offerings of bred sows to be sold this winter. Buyers who attend this sale will not be disappointed when they see the sows he is offering. There will be about forty-five head in the sale, of which about half are yearlings and aged sows and the balance spring gilts. The yearling and aged sows are especially attractive, as some of these have been and others will be good show sows. Mr. Aldritt is offering as a special attraction the great show sow, Glendale Maid by Glendale Critic, second-prize sow at the Nebraska State Fair last fall. This great sow won first at Nebraska and Iowa State Fairs and as a brood sow has proven one of the best of the breed. She is bred for early farrow and we can recommend her to anyone wishing a brood sow of show-yard type that has proven a good breeder. Another of the good sows is Banker Maid by Reed's Banker out of Pansy Maid. This is one of his best brood sows and is safe in pig to Royal Prince. Improver II,

Bell by Improver II, dam Enterprise Queen by Higgins' Model, will be sold, and is safe in pig to Adams' Express, a full brother to Crimson Wonder. Crimson Bessie by Crimson Wonder is another attractive sow and is safe in pig to a son of Ohio Chief. The gilts to be sold are of the very best blood and are a very even, smooth bunch. His herd boars are good individuals and are producing some extra good stuff. Write for catalog explaining the breeding of every animal to be sold and then arrange to attend this sale. Mr. Weber sells the day before and you can attend both sales at practically one expense. Col. T. C. Callahan will do the selling and mail bids sent to him or to Mr. Ray Page, of this paper, will be properly handled. Mention this paper when writing.

### Last Call for W. J. Hartung's Sale.

Those who have not yet received a catalog of this grand red hog sale should by all means secure one at the first opportunity, as it is replete with good bargains and contains some very good reading for those looking for some real good toppy Duroc sows and gilts. Maxwell, Iowa, is the chosen place and the date is Saturday, February 9th. Col. F. F. Luther will conduct the sale and among the many good animals that will be brought out for the delectation of the crowd will be Zula Queen 49966, a granddaughter of old Orion himself, and out of a Bracelet dam. She was bred December 18th to Malcolm's Model II. and with this kind of a sire her litter should prove a valuable one. It might be well to say that vigor and prolificacy are two points that are prominent in the offering and the health of this herd has always been the very best. Miss Dale, second in the catalog, has for sire the noted Billy K., and is bred the same as the former sow. In fact, a good part of the offering is noted to Malcolm's Model II., a hog bred by Mr. E. Z. Russell, of Nebraska. A sow bred to M. Model should make a most profitable investment, as he is not only a particularly strong and impressive sire, but is a son of the noted Top Notcher. There will be more sows just as good and of the kind of breeding that everyone wants. If this part of the offering does not bring out a choice for you, the young part should, as they are a select bunch, well grown, in nice condition and bred to such splendid boars as Teddy Orion 51695, a son of Manley Orion, and Tom Wonder 51699, a son of the champion Crimson Wonder Again. Take a day off for this sale, neighbor and breeder, and pick out a good red hog for your future success and prosperity. Catalogs are ready. Kindly mention The Homestead when writing Mr. Hartung.

**Hamilton & Son's Polands.**

We wish to call particular attention of our readers to the sale of Poland China bred sows to be held at Guide Rock, Neb., February 16, 1907. This great herd has been established for years and during that period have bred and shown some of the most noted prize winners of the breed. The three herd boars now doing service in this herd need no introduction to Poland China breeders. Mogul, the first and sweepstakes boar at the Nebraska State Fair two years ago, will have several daughters in this sale. Mogul is a son of Grand Chief. His dam was Mat, a litter sister to Corrector and by L's Perfection. This great hog is not only a show hog, but is a sire of many prize winners, and you will see a fine bunch of his get in this coming sale. Most of the Mogul gilts are bred to I Am Allerton, a yearling by I Am Sunshine, and having for their dam Miss Allerton, a litter sister to Blain's Tecumseh and sired by Allerton Tec. This hog is not only richly bred, but is one of the most promising young boars we have seen this year. He is extra large for his age, stands on good feet, has a great, broad back well arched, well-sprung ribs and a good head and ear. When you see this hog you will surely want a sow bred to him. He was purchased by Messrs. Hamilton & Son at the W. T. Garrett & Son sale at Maryville, Mo., and was the top boar in this sale. The litter sold in same sale for \$742.50 and their dam sold at \$150 at six years of age. We will have more to say as to the females individually in our next issue. At this sale Messrs. Hamilton & Son will sell seven head of richly-bred Scotch-topped Short-horns, three good bulls and four heifers. One of these bulls is a crackerjack and we think should demand a place in some good herd. He is a grandson of Imp. Prince Oederic and as an individual is hard to beat. Write for a catalog at once and if you are in the market for a Short-horn bull or some good sows you can't afford to miss this sale. Those who cannot attend may send bids to Mr. Ray Page, of this paper, in care of Messrs. Hamilton & Son. When writing mention this paper.

**Last Call for the Weber Sale.**

We wish to call attention for the last time to the Duroc Jersey bred sow sale to be held at Friend, Neb., on February 4th, in which Mr. Henry Weber will offer some very choice animals. He is offering thirty head of strictly high-class sows bred to two extra good boars. As a special attraction for this sale Mr. Weber will offer the great sow, Paragon, a daughter of the sweepstakes boar, Red Knight, and having for her dam Bouquet by Royal Darkey. This is a wonderful brood sow of the right type and has proven herself so by producing some very topsty stuff. She is bred to his 700-pound boar, Improver III, which the writer considers one of the best sons of Improver II in service today. He also has a daughter of Orion that is a good one, and she is also bred to Improver III. Most of the gilts are daughters of Improver III, and will be bred to Gold Finder, a son of Hambletonian that is surely a good one. There are two daughters of Van's Perfection, the sweepstakes boar of three state fairs and was a winner for three years in succession at the leading state fairs. In this sale will be included sows of the most noted strains and bred to extra good boars. Parties may reach Friend from the east and west at noon the day of sale and will be able to attend the sale of Mr. Frank Aldritt, at Friend, Neb., and Mr. J. H. Husman, of Exeter, Neb., on the two days following, at practically one expense. Catalogs are now ready and can be had by dropping a card to Mr. Henry Weber, of Friend, Neb. Look up the announcement on page 38 and write for further particulars, kindly mentioning this paper. Those who cannot be present sale day can send bids to Mr. Ray Page, of this paper, and they will be properly handled. Plan to attend this sale and the whole circuit.

**Last Call Husmann Dispersion Sale.**

With this issue we wish to call the attention for the last time to the dispersion sale of Duroc Jersey bred sows at Exeter, Neb., February 6th, in which Mr. Husmann will sell his entire herd, including his two herd boars, twelve tried brood sows and twenty-two good, growthy spring gilts, of early farrow. Most of the tried sows are bred to Von Billie K., a son of Billy K., the boar Mr. Van Patten, of Sutton, Neb., showed quite successfully for two years. His dam was Betsy Maid by St. Elmo. This hog is a large, heavy-boned fellow. The balance of the sows are bred to Fashion's profit, a son of Fashion's Improver, dam Briggs' Profit by Look Me Over. The blood lines of the sows included in this herd are extra good, there being granddaughters of Billy K., Improver II, Jumbo Red and several other prize-winning boars. If you are looking for foundation stock don't overlook this sale, as everything will be offered and it is seldom that one gets a chance to buy those sows that could not be bought other than in a closing out sale. Exeter is an easy place to reach, being on the main line of the B. & M. railroad, forty-five miles west of Lincoln. Trains from either way reach there at noon in plenty of time to get dinner and reach the sale. Mr. Ray Page will do the selling and mail bids sent to him in care of Mr. Husmann will be properly handled. Catalogs are now ready and can be had by dropping a card to Mr. J. H. Husmann of Exeter, Neb. When writing please mention this paper. Don't forget the date, February 6th.

**Louden & Son Sell Short-Horns and Duroc Jerseys February 12th.**

We take great pleasure in announcing to the readers of this paper that Messrs. H. B. Louden & Son, of Clay Center, Neb., will hold their annual sale on February 12th. In this sale they will disperse their entire herd of Short-horn cattle. Many of the cows will weigh from 1,200 to 1,500 pounds, and as the entire herd will be dispersed there will be some good bargains offered. There will be some of the cows in the sale with calf at foot got by Duke of Bonniebrae 183477, a son of Victor Baron 127266, a choicely-bred Scotch bull of Mr. Cruickshank's Victoria family which has been used very successfully in the herds of Messrs. Parsons and J. R. Crawford & Son, of Newton, Iowa. He was

got by Baron Cruickshank 106297 out of Victoria of Hill Farm 4th by Royal Duke of Lancaster 110015, tracing to Imp. Victoria 51st. You can plainly see by looking over the breeding of this animal that some of the very best Scotch families are represented there. This great bull will be sold and should go to some good herd. No. 2 in the catalog is considered one of the best and largest cows in the sale. She was got by Lord Washington 121755, he by Airdrie Duke of Hazelhurst 117846, of the noted Duchess family that have sold for higher prices than any cattle of the breed, fourteen head selling at the New York Mills sale Sept. 10, 1873, for \$262,400, an average of \$18,742 per head. In No. 3 we have what Messrs. Louden consider the best cow in the sale, and has a fine hull calf at foot. She was got by Knight of Elgin 2d 134314, a 2,300-pound bull in breeding condition. Lots 9, 12 and 13 are extra good heifers got by Duke of Bonniebrae and are all safe in calf. There are several individuals in this offering that are very choice. As to the brood sow offering, it is not large, but is the best lot of good individuals they have ever had for one sale. There will be two fall yearlings, daughters of Hambletonian, first-prize yearling at Nebraska in 1904, and having for their dam Louden's Beauty, also a state fair winner. These sows are an extra choice pair and are bred for early farrow to Jumbo's Perfection. Several of the gilts in the sale are bred to Lad's Top Notcher, one of the best sons of Tip Top Notcher brought to the West this year. One of the good things of the sale is a gilt by Jumbo's Perfection, dam Royal Beauty by American Royal, that was pronounced by those who have seen her the best gilt seen this year. As a whole the sows are a very choice lot and it will pay anyone who is looking for something good to write for a catalog and then arrange to attend the sale. Those who cannot attend can send bids to Mr. Ray Page in care of Messrs. H. B. Louden & Son. When writing please mention this paper.

**Schwabs Sell Bred Sows February 11th.**

On February 11th, Messrs. Geo. P. & Geo. W. Schwab, of Clay Center, Neb., will offer a draft of Duroc Jersey sows which they consider the best lot of hogs they have ever sold. They have cataloged thirty-five head, of which twelve are matured sows and the balance spring gilts of March and April farrow. They represent the most fashionable blood lines, some of them tracing closely to very prominent prize-winning sires. The offering is mostly sired by Morton Prince 16797, a hog that has produced some very good show animals. They are mostly bred to Jeffries 20701, a son of old Van's Perfection, the sweepstakes boar of three state fairs and a winner of the ribbons three years in succession. Others are bred to Long Knight 56915, a son of Red Knight 25199, the first and sweepstakes boar at the Nebraska State Fair in 1905. There will be three daughters of Red Knight included in this sale that Messrs. Schwab consider extra good, and they are safe in pig to Jeffries. This will be the first sale of the Clay county circuit and parties coming by the way of Harvard or Fairfield will be conveyed to and from the sale free of charge. You can attend this whole week of sales at practically one expense. Free hotel accommodations at the Clay Center hotels. Catalogs now ready and will be mailed to anyone who will drop these gentlemen a card. Arrange to attend this sale and the rest of the circuit, as you will be well treated while in the town. Those who cannot attend the sale may send bids to Mr. Ray Page, of this paper, and they will be properly handled. Mention this paper when writing.

**D. H. Needham's Poland China Sow Sale at Madrid, Iowa.**

Last week we wrote at some length of the good points of the offering of Poland China sows and gilts which Mr. Needham would make at Woodward, February 11th. Suffice it to say that a representative of The Homestead found the offering as good in size and bone as any to be sold this spring. Among the tried sows will be one by a Trade Mark dam out of Proud Perf. 2d. She had seven boar pigs last March which were the first to be picked out of the thirty that were sold from this herd the last few months. She is a long, breedy sow, a good producer and has two March gilts in the sale. Another is a granddaughter of Johnson's Chief 62243, more of a blocky-made sow, nevertheless a sure and prolific producer. Another traces to the Wilkes family. The yearlings are large and strong boned and are sired by One Spot, one of the good hogs at the Iowa State Fair in 1904. The gilts are a smooth, even hunch and will be just the right kind of stuff to put some vigorous blood into your herd if you are looking for that. There will be four of these from a daughter of Jumbo that are great big ones, also three from Blooming Lady, one of the best sows in the herd. All the gilts are bred to a Chief Perf. 2d boar. There will be a few March boars included, should any wish males. Send for the catalog at once and plan to be there. A good time assured.

**East & Son Sell Bred Sows February 13th.**

On the third day of the Clay county circuit, February 13th, Messrs. W. J. East & Son will hold their annual brood sow sale and will offer a very choice lot of sows. In this sale will be offered a type of good, useful Durocs that should be sought for by leading breeders. Several of the tried and yearling sows are included, as Messrs. East's home trade is very valuable to them, and as they sell every year to the same men it is necessary that they keep putting new blood into their herd. Thirty-five head comprise the amount of the offering and nothing but the very best has been selected for this sale. Messrs. East have quite a hobby for putting the poor ones into the fattening pen, a thing that every breeder and especially those who hold public sales should do. At the head of this good herd, and the hog that has sired a greater part of the good things in this sale, is Bezdek 29413, first-prize hog in class at Nebraska in 1904 and also winning third at the St. Louis exposition. He is not only a show animal, but breeds a type of show hogs that with proper care would be heard from in the hottest com-

# BIG SALE

OF

## Registered Percheron Mares and Stallions Wednesday, Feb. 6th, Union, Ia.

### 23 Percheron Stallions and Mares and 3 German Coach Stallions.

Mr. Rogers himself contributes thirteen head, including five splendid Percheron mares, all in foal; the remainder being fillies and stallions. Included in the number is one imported mare. Mr. F. A. Frost, of Grundy Center, Iowa, is the next largest contributor and sells five Percherons and three German coachers. There will be eleven stallions in the offering. This offering of twenty-six head will certainly afford the farmers of Iowa the best opportunity to secure registered Percherons stallions and mares at their own prices. The town of Union is located about eighteen miles north of Marshalltown on the Iowa Central railroad. In addition to the principal part of the offering made by the two gentlemen named, there will be four or five other stallions contributed by breeders of central Iowa. All of the mares of breeding age are bred either to good imported stallions or to the best home-bred ones in the community. All mares three years old and over are thoroughly broken to work. Inasmuch as these contributors are comparatively new to our readers and new to the fraternity aside from their immediate community, it may be possible that this is a splendid opportunity for farmers and breeders to secure high-class stallions and mares at a lesser price than is ordinarily paid for the same at the more important sale centers or in sales where the consignors have national or state wide reputation. Application for the catalogs should be made at once to

## E. F. ROGERS, UNION, IOWA

## VAN PATTEN'S DUROCS AT AUCTION

**AT SUTTON, NEB., THURSDAY, FEB. 14, 1907.**

THIRTY HEAD, including the great show sow, Model C., first-prize sow over twelve months at Nebraska State Fair, 1906; Model B., third-prize sow same class. Other sows of equal show-yard merit and good breeding. SIXTEEN SOWS BRED TO THE GREAT TOM DAVIS, first-prize hog at Nebraska State Fair, 1906, and second at Iowa in over twelve months class. Several daughters of Billy K. in this sale. Catalogs now ready. If you cannot be present send a bid to Ray Page, of The Homestead.

### GILBERT VAN PATTEN, SUTTON, NEB.

COL. T. C. CALLAHAN, AUCTIONEER.

## BABCOCK'S FIRST ANNUAL POLAND CHINA SALE.

**MANNING, IOWA, SATURDAY, FEBRUARY 2, 1907.****50  
HEAD**

40 Big Sows safe in pig to Brookline's Express, Illinois Interstate prizewinner, and the massive boar Long John, not a show hog, but a wonder.

**50  
HEAD**

THESE sows are the best I have ever owned or seen put in one sale. Thirty head are yearlings or past and will weigh from 300 to 700 lbs. All are to be sold with a guarantee that will be absolute. Ten head are gilts with plenty of bone and quality; 10 head fall pigs, 5 boars, 5 gilts, the cream of the bunch of 80 head. Plan to come and I will make the day a pleasant one. Send for catalog.

**MANNING, IOWA**

## RUEBEL BROS.' THIRD ANNUAL SALE

**FEBRUARY 12, 1907.****60 POLAND CHINA BRED SOWS.**

Consisting of matured sows, fall gilts and spring gilts. Bred to R.'s Keep On, one of the great sons of the noted Keep On 61015, and Iowa Chief, by Ed. Klever's Thickset. Iowa Chief is the best Thickset boar in Iowa—twenty are bred to Moderator, the great young boar we purchased of John Blain, Pawnee City, Nebraska. This was the best extra large smooth pig that Mr. Blain was able to find after visiting twenty-five or thirty of the best herds in Nebraska and Iowa. There will be sows in this sale sired by Chief Perfection 2d, Keep On, Mischief Maker, Chief Tecumseh 3d and other noted boars. If you want size, breeding and quality you can get it here. Get your name on our mailing list for a catalog.

**RUEBEL BROS.****ROCKWELL CITY, IA.**

petition. These sows represent the blood of the most noted strains of the breed. Those not related are bred to this great hog, Bezdek; others are bred to Kansas Banker, a son of Improver 2d; dam Countess, the highest priced sow ever sold in Kansas. This pig Messrs. East consider one of the most prospective youngsters they have ever owned, and if nothing serious happens to him he

will make a creditable showing another year. It might prove profitable for those looking for good gilts to buy one bred to this young boar. Do not overlook this sale and if you have not received a catalog, write for one at once and mention this paper. If you cannot attend send a bid to Mr. Ray Page, in care of Messrs. East & Son and it will be properly handled.

# Dispersion Sale of the Famous Herd of O. I. C. Swine Owned by the Late O. L. Kerr, of Independence, Mo., Wednesday and Thursday, February 6 and 7, at Independence, Mo.

ONE HUNDRED AND EIGHTY HEAD

Fifty-five bred sows—twenty-five bred to the great Kerr Dick, three, including Sally, the 1906 champion, are bred to Kerr Shelton, the \$625 champion; others are bred to the remaining herd boars. Thirty boars ready for service. Fall and summer pigs compose the balance of the offering. This will be a golden opportunity for O. I. C. breeders to secure the cream, as there has not been an animal sold from the herd since the death of Mr. Kerr. Every animal sells to the highest bidder for cash, as Mr. Kerr's estate must be settled. Write me for catalog. See field notes. Bids may be sent to auctioneers or C. J. Hiles, secretary O. I. C. Association.

## Van Patten's Annual Brood Sow Sale, February 14th.

On February 14th the veteran breeder, Mr. Gilbert Van Patten, of Sutton, Neb., will hold his annual brood sow sale, in which he will offer some very choice individuals. All who are personally acquainted with this gentleman will agree with us that he has been one of the mainstays in building up the Duroc Jersey hog to its present standard of excellence. He has bred and exhibited some of the best animals of the breed, made good sales, and, above all, has stood behind every statement he has made on the animals sold. The leading attraction of his coming brood sow sale is the fact that there are sixteen of these grandly-bred sows bred to the great Tom Davis. This great hog is a son of Ben Davis, having for his dam Orange Blossom by Orion Chip. He was good enough to win second prize in the over twelve months class at Iowa this last fall and then go to Nebraska and win first, being in the hottest competition in both places. This great hog crossed on the produce of Billy K. we feel confident will produce something extra good. Many of the good sows in this sale are bred to Medco, the hog Mr. Van Patten has used with much success in his herd for three years. Another great attraction will be the great sow, Model C., first-prize sow in class at Nebraska last year and bred to the great Tom Davis. This sow is a daughter of Billy K., dam Rose Bud Lady by Van's Perfection, the great show boar showed with success three years in succession, making a show record that has few equals in the Duroc breed. This sow is a show animal in every respect and has two full sisters in the sale of equal show-yard merit. These three sows won first as produce of sow, first as get of boar and won second as a herd with Tom Davis at the head. He is also offering Red Bud 1st and Red Bud 2d, the third and fourth prize sows under one year at Nebraska, also winning third as young herd and third as produce of sow. The great sow, Rose Bud Lady, will be sold and we consider her one of the greatest producers of the breed. She is the dam of all of Mr. Van Patten's this year's show herd and will be sold safe in pig to Medco. A nice catalog has been prepared and will be sent to anyone on application. Write for one and mention The Homestead.

## Combination Poland Bred Sow Sale.

At Maxwell, Iowa, Tuesday, February 19th, will be held a sale of choice Poland China bred sows and gilts from the herds of Messrs. J. E. Hull and J. O. Thompson. This sale will contain some very exceptional numbers to say the least. The first thing that a visitor at these two breeding farms is impressed with is the very frank and cordial manner in which he is shown through the herds, which in both cases have been founded along the right lines. My this we mean that the working members are notably free from some of the deficiencies of the breed. Plenty of scale has been secured through purchases from time to time of representatives of Nemo L's Dude and Tecumseh sires. One of the mature sows is Tec. Whiteface, a great, wide-backed individual with two gilts, a yearling and a two-year-old sows in the sale. Right here is a group worth your investigation. An offer of an even \$100 on the old sow has already been refused. Four sows are sired by Regardless 93337 by Orr's Tec., dam Rosegay 213004. This quartet should draw much admiration, as well as money. Johnson's Chief is also represented in the sow offering. At one time this boar was at the head of the herd of Mr. J. Blain, of Pawnee City, Neb., and was the Nebraska State Fair sweepstakes hog in 1902. The gilts will make a grand display, as they are bred right and grown right. Among them are a few with excellent prospects for making show material. They are of the Perfection breeding. The offering has been mated with some splendid males, chief among which is Dude Pedrick, a son of All Dude 106413, an 800 pound yearling, and a state fair winner. Also to Perfection H. 106471, a half-brother to Perf. E. L., and another is Keep On Again 116719. This kind of breeding should bring some good bids to the sale. Everything is guaranteed to be right and if you cannot come, send a bid to the auctioneer or to Mr. L. E. Troeger, of this paper, in care of the sale consignors. Remember that this is a sale of valuable producers, show material and unexcelled foundation stock. Kindly mention The Homestead when writing.

## Morrison's Great Kan't Be Beat Sale.

On the 12th day of February, 1907, Messrs. John M. Morrison & Sons, of College View, Neb., will hold their annual brood sow sale in which they are offering the best lot of sows they have ever been able to put before the public. A representative of The Homestead after carefully inspecting their offerings says unhesitatingly that it is one of the good Duroc Jersey offerings of the year. Buyers who attend this sale are not going to be disappointed when they see the offering. They are putting forty-five head in the sale, including seven tried sows, six fall yearlings and thirty-two spring gilts, the entire lot bred to the great show boar, Kan't Be Beat. It takes quite a bit of nerve to pay \$2,500 for a boar. This is what Mr.

John Morrison did when he purchased Kan't Be Beat, conceded the winner of more first and sweepstakes ribbons than any hog living, having won fifty-seven first and sweepstakes ribbons out of fifty-eight times shown. A half interest in this great hog will be sold in this sale, and we consider it an opportunity of a life time to secure an interest in one of the greatest breeding boars of the day. The get of this great boar have proven winners and are worthy of a place in any good herd. It is useless to say more of this great hog, as every breeder who is familiar with the history of prize-winning Durocs knows that this great hog has been an outstanding winner and sire of prize winners. Forty-five head have been cataloged. They represent the blood of many prize-winning families and crossed with such a sire should produce something good for the purchaser. There will be twelve daughters of the great Ohio Chief included in this sale, some of them from prize-winning dams. The tried sows are some of the best producers in the Morrison herd and could not be bought other than the fact that Mr. Morrison is omitting nothing that would make this sale attractive to the most discriminating buyers. In our next issue we will have more to say regarding this offering individually and we would advise our readers to write for a catalog at once and look over the breeding of every animal and see what Mr. Morrison has to say about them. Messrs. Morrison & Sons invite every breeder to come and attend this sale and will assure you the best of treatment from the time you get off the cars until the following sale, that of Messrs. Kirkpatrick & Wilson, on February 13th. Every breeder will be cared for at their expense. Plan to be present at College View on this date and look over a great offering of Durocs. You will be more than pleased with them when you see them. Those who cannot be present on sale day can send bids to Col. T. C. Callahan, who will do the selling, and they will be properly handled. When writing for catalog please mention The Homestead.

## Mattson's Dispersion Sale, Feb. 15th.

February 15th Mr. A. H. Mattson, Loomis, Neb., will disperse his entire herd of Short-horns. This sale will be a great opportunity to secure a good herd bull or some good cows that are tried and proven breeders. In this sale will be sold the great herd bull, Goldie 152298, considered a straight Scotch animal of great scale and breeding qualities. He is by Sir Charming 2d 123972, dam by Red Victor 113467. This bull weighs over a ton in breeding condition and is the sire of some of the best stuff in this sale. While it is not expected that this will be a record-breaking sale, it is a sale of good, useful dual-purpose cattle whose breeding is extra good and from and individual standpoint Mr. Mattson considers these cattle good enough to be of service in any herd in the state. Prince Volomia 223588, got by Orange Viceroy 164269, is a bull that deserves much credit, and we think if he were properly fitted would make a creditable show. He comes from the best Scotch families, is a good individual and should be sought for by leading breeders. In the great cow, Arletta, Mr. Mattson believes that he is selling the best Short-horn cow he has ever owned. She is a very deep, thick-fleshed cow, of great scale, got by Prince Lee, dam Ailama 21st by Red Ravenwood 113444. She will have a calf at foot on sale day by Goldie. Several other cows in this sale are very much the same type as the cow just mentioned, being very low-down, thick-fleshed animals that have both beef and good milking qualities. There will be ten good young bulls included, mostly the get of the great bull, Goldie. Come and look them over if you are in the market for some good Short-horn cattle. Catalogs now ready and will be mailed to anyone who will drop them a card. When writing please mention The Homestead.

## Hess & Sons Sell Short-horns Feb. 12th.

On Tuesday, February 12th, at Surprise, Neb., will be held the Hess & Sons' Short-horn sale, in which will be sold some straight Scotch females. Many of the cows in this herd weigh from 1,200 to 1,500 pounds and the herd is noted for its great scale and quality, also the blocky, low-down type of useful cattle they are producing. The bull now at the head of this herd and the sire of most of the young stuff in this sale, is Golden Victor 131686, a massive, low-down, blocky fellow that these gentlemen have thought good enough to keep at the head of their herd for several years. This great bull is sired by Luverne, a Cookson-bred bull. His dam is Emma 17th by Victor of Homewood, tracing to Imp. Emma 3d by Young Englishman. There are several of the most noted Scotch animals whose blood is very prominent in this herd and some of the best individuals will be offered. Among the noted Scotch families represented is the Rose Strathallen tribe. Among the best sires are Secret Valentine, Prince Ramsden, Imp. Cupbearer and many others of equal breeding merit. Among the most noted American families are the Rose of Sharon, Young Mary, Miss Hopper, Lady Jane and Ruby. Write for catalog and look over their breeding. When writing please mention The Homestead.

## Geo. H. Miller's Short-horn Sale

IN THE HEATED SALE PAVILION

Harlan, Iowa, Wednesday, February 6, 1907

45 HEAD, 30 Females, 8 with Calves at foot 12 to 15 bulls from 9 to 24 months of age 45

Few sales will be able to show as uniform and as beefy a lot of cattle as I will sell in this sale. They will all have from one to five Scotch tops, and the greater number of my foundation stock was purchased from the late T. R. Westrope. I have used two half-brothers of the great cow, Sweet Violet 2d, at the head of my herd. Some of the heifers and all the bulls in the sale are sired by my pure Scotch bull, GLOSTER BUD 194649, which good judges pronounce one of the good Scotch bulls in the state of Iowa. The heifer stuff is bred to Idiewild Favorite 200411, an extra fine Scotch bull, the sire of two steers and one young bull now being used by the Nebraska Experiment Station, the steers for feeding experiments, the bull for breeding. All cattle guaranteed to be breeders. Write me for catalog. Address,

COL. GEO. P. BELLOWES,  
Auctioneer.

GEO. H. MILLER, HARLAN, IA.

## 50 HEAD DUROC JERSEY BRED SOWS 50

"Big Bone, Good Size, Plenty of Length," My Motto.

RED OAK, IOWA, FEBRUARY 8, 1907.

I am selling a splendid lot of yearling and matured sows and spring gilts, the best ever. There will be fourteen granddaughters of Red Chief I Am and the great Nebraska Belle. Others sired by Brighton Wonder (a full brother to Crimson Wonder) Higgins Jr., Jim's Gold Dust, Miss Bob's Wonder, Educator and Hardy's Improver. They will be bred to Peerless Chief, a son of Ohio Chief; Belle's Red Chief (a son of Nebraska Belle), Educator and Royal Knight. My fall sale of sixty head of boars averaged me \$28, the best sale of the season. Write me at once for catalog and come to my sale. Address,

T. H. ISAAC,

RED OAK, IOWA  
Col. Bob Adkins, Auctioneer.

## ATTENTION! POLAND CHINA BREEDERS. AT WOODWARD, DALLAS CO., IOWA,

I Will Offer on February 11, 1907,

8 Tried Sows Valuable producers, in the best of condition, with produce among the gilts. Sired by Proud Perf. 2d and a son of Johnson's Chief 62243.

6 Yearlings Sired by One Spot 90201, one of the good hogs at Des Moines in 1904. These are big ones and breedy, with every indication of prolific producers.

26 Gilts Sired by Mischief's Model 98435, Hands Down 105713, One Spot, Jumbo 91987 and Mainspring 102681. They are as large and as well formed as are to be sold this spring. Bred to Perf. King, a hog of wonderful bone, back and ham. Size and bone are my hobby. Remember the date, Monday, February 11th.

D. S. NEEDHAM, Prop.

COL. H. S. DUNCAN, Auctioneer.

WOODWARD, IOWA

## REMEMBER MY FIFTH ANNUAL SALE 40 Poland China Bred Sows and Gilts

MADRID, BOONE COUNTY, IOWA,

FEBRUARY 12, 1907.

I HAVE selected for this sale five attractions in as many tried sows. They represent some of my best and are sired by Johnson's Chief 62243, a champion at Nebraska, 1902; also by Chief Perfection 2d, Keep On, Looks Choice and Mondamin Sunshine. Fifteen fall yearlings, beauties well grown and showing every indication of making valuable individuals. Sired by Trade Mark 65313, a hog of unusual strong bone and smooth body, and a sire of my best young stock. A score of gilts completes my offering. They are as big as you will find; mostly of early litters and sired by Mischief's Model, also by Handspring 87701, a St. Louis prize hog, and Sunburst, a second prize at Illinois State Fair. I can show you as good combination of bone, quality and size as any. My young stock is bred to J. H.'s Dude. I want you to have my catalog. It will include beside my offering several young boars and sows, sired by a son of Nemo L's Dude. We shall look for you on sale day.

J. H. WATSON, Prop.

COL. H. S. DUNCAN, Auctioneer.

MADRID, IOWA

## TOOP'S ANNUAL POLAND CHINA SALE. AUBURN, IOWA, FEBRUARY 7, 1907.

51 HEAD 14 Fall Yearlings 2 Matured Brood Sows 23 Spring Gilts 51 HEAD

I HAVE selected the very tops of my herd for this sale. A good many of the gilts are sired by Auburn Chief, a son of Chief Tecumseh 3rd and Perfection I Am, a son of Fancy Perfection. Bred to Black Sensation, a son of Black Chief's Rival, and one of the best young boars in the state; also to Pilatus U. S., a son of Pilatus Chief. The yearlings are a superior lot in every way. The aged sows have been great brood sows. Write me at once for catalog.

W. I. TOOP,

AUBURN, IOWA

The Ames-Boone-Polk City Sale Circuit.

This grand Duroc Jersey circuit in central Iowa opens its first sale at Ames, February 11th, where at the farm of Mr. S. P. Freed thirty-five head of choice sows and gilts will be sold. Many of the mature sows are of select breeding and being bred to Manley Orion, whose illustration appears on page 20, makes them especially attractive numbers of the sale. There will be five gilts out of Ruth G. II. that are full sisters to Ruberta, the sows that sold last week at Mr. F. E. Garrett's for \$1,500. Her dam, Ruth G. II., bred to Manley Orion, sold for \$540. Right here is a quintet of gilts that are worth seeing and any one of them will be a valuable addition to any herd. If impossible to come yourself, send a good bid. Start the circuit here and stay by it. Send for catalogs for each of the four sales. Free entertainment for all. Col. F. F. Luther conducts the sales on each day and bids sent to him in care of the respective consignors will be courteously handled.

THE SECOND DAY AT A. P. ALSIN'S.

At Pine Hedge Farm, two miles out from Boone, will be held the second sale of the circuit. There has been selected for the offering seventeen yearling and tried sows and twenty-eight gilts. The mature stock shows quite a variety of breeding and numbers some individuals that should make the average a good one. One sow that deserves special mention is Violet Blossom 51236, dam of the sweepstakes sow at Sioux City last fall, Royal Blossom. Violet Blossom raised a good litter last summer sired by Proud Advance. She has two splendid gilts in the sale and is rebred to Advance Dandelion, the third-prize senior yearling at Des Moines last fall. Another is Lady Wonder 100908 that is similarly bred. Pilot's Nancy is a fine yearling of the famous family that have proven such money makers. She was purchased at a good price last spring and is a splendid individual. As she is bred to a son of Tip Top Notcher, the St. Louis champion, a good bid on her will not be made amiss. Bess Brilliant by old Brilliant 9265 is another special number. Her record as a prize winner is an enviable one, and she is bred to Nash's Model for an early litter. This is a combination of prize-winning blood and should result in something worth owning. Among the gilts are three trim Ohio Chief-bred individuals. There will also be some Kruger Maid gilts, half-sisters to Ben Orion, the second-prize pig in 1905. Here is a choice offering. Line up for one of the catalogs. Kindly mention The Homestead. Place and date is Boone, Iowa, February 12th.

THE THIRD DAY AT B. C. MARTZ.

Mr. Martz will keep up his end of the circuit with a most excellent bunch which will consist of eight yearlings that are about as growthy and deep bodied as any that will be seen at spring sales. One is sired by Top Notcher Chief and out of an advance dam that was sweepstakes at Des Moines in 1903. Others are by Joe Patten out of Challenger dams. These yearlings must be seen to be fully appreciated. Their individual merit is as good as their breeding and if something real good in the line of yearlings is what you want, they should be kept in mind. The gilt offering includes thirty-one head. Two are sired by Model Chief and they were in the first-prize litter in Des Moines and were litter sisters to the first-prize six-months-old boar. Another was in the third-prize litter, while four are by Keep On; others by Manley Orion and other sires. The young stock is bred to an Ohio Chief boar and to Keep On 2d, the first-prize boar at the Iowa State Fair at Des Moines last fall. A few are bred to a Crimson Wonder boar, a half-brother to the noted sweepstakes boar. This offering merits your careful attention. Send for catalog and plan to be on hand at the sale Wednesday, February 13th.

THE CONCLUSION AT SHOTWELL & MENEFEES.

The last sale of the Ames-Boone-Polk City circuit will be concluded with the offering of forty-five head of sows and gilts at the farm of the above gentlemen near that of Mr. B. C. Martz. In the sale there will be fifteen mature sows sired by Orion, Reed's Banker, Tientsin and others. Among this number will be found a granddaughter of old Orion out of Mollie 3d. She has proved one of the good members of the herd and goes to make up an attractive offering. She is bred to Councilor by Model Chief. The fifteen fall yearlings are sired by Challenger II., while as many gilts are sired by Orion's Rival and Model Jim. The younger stock has been bred to three good boars, sons of Billy K., Malcolm's Model and to Councilor. The offering will contain something for everyone. Send for catalog and remember the sale is Thursday, February 14th. Mention The Homestead.

Announcement of the Rosenfeld and Siverly Angus Sale.

Admirers and supporters of this breed, which is becoming more popular each year, due to their beauty, their remarkable feeding and finishing qualities and early maturity, will undoubtedly be interested in a sale of sows and bulls which is to be held at Kelly, Iowa, Friday, February 15, 1907. Kelly is on the C. & N. W. railroad between Ames and Des Moines, and may be reached on the N. & N. W. railroad also. These facts combined with the assurance that the best of preparations are being made at the farm, a half mile out, for the comfort of visitors sale day, should cause prospective buyers and breeders to have no hesitation in lending their support to the event. We can say from personal inspection that the offering is a first-class one in every respect. This firm of breeders have, by good business management, developed a splendid trade for their stock through central Iowa. Until a year ago they have been able to dispose of their surplus at private treaty, but since the addition to their herd, made by the purchase of the entire breeding herd of Mr. John L. Gaiser, of Charleston, Ill., they have chosen to enter the sale arena with their produce. That the breeding of this herd has proven highly profitable and successful is indicated by the excellent class of young stock on the place. The members of the firm have had unusual success in this respect and can

# 3 GOOD DUROC JERSEY 3 BRED SOW SALES

MONDAY, FEB. 4th

Henry Weber,  
Friend, - Nebraska.

35 HEAD of richly-bred sows, bred to such boars as Improver III., he by Improver II., Gold Finder, one of the best sons of Hambletonian. My sows represent leading strains of the breed. Write for catalog. Send bids to Ray Page in care of proprietor.

AUCTIONEERS.

Ray Page, J. L. McLeese.

TUESDAY, Feb. 5th

Frank Aldritt,  
Friend, - Nebraska.

45 HEAD. I have the get of 10 leading sires to offer, including daughters of the great Ohio Chief, Higgins' Model and others. They are bred to such boars as Royal Prince, Adams' Express, a full brother to Crimson Wonder, and a good son of Ohio Chief. Write for catalog. Send bids to Ray Page of this paper.

AUCTIONEERS.

T. C. Callahan, Ray Page.

WED., FEB. 6th

J. H. Husmann,  
Exeter, - Nebraska.

36 HEAD. This will be a dispersion sale. I will sell my entire lot of tried brood sows. They are bred to such boars as Von Billie K. Lankage, a son of Belle's Echo, and Fashion's Profit, by Fashion's Improver. Catalog now ready. Send bids to Ray Page in my care.

AUCTIONEERS.

Ray Page, J. L. McLeese.

point out some cows that have raised three calves in two years. In this connection it might be of interest to state that one of the cows, a Georgiana, No. 16 in the catalog, is phenomenal along this line and has always grown a valuable calf on her own milk. She has a young heifer calf at foot now. In fact, there are no nurse cows used at all in this herd and the two points that buyers can feel absolutely certain of in this offering is that every one of the twenty-nine head of cows is a good mother and a sure breeder. A glance at the sale advertisement will indicate something of their breeding, which we will enlarge on next week. The young bulls range in age from nine to eighteen months, including one, Inland Dandy, coming three years in March and one of the bulls to which a few of the cows have been bred. Among them will be found some prospective show material. This will be one of the best chances to secure first-class Angus at sale that we know of in central Iowa. Come out and look over the offering. Catalogs ready for mailing, and includes the purebred horse sale in the forenoon held by Mr. F. W. Penfield, of Ames, Iowa. Kindly mention The Homestead when writing for catalog.

J. H. Watson Sells Poland China Females.

At Madrid, Boone county, Iowa, Mr. J. H. Watson, one of the good breeders of Poland Chinas, will dispose of forty head of bred sows and gilts. The date is Tuesday, February 12th, and as Madrid is favorably situated with regard to railroad facilities we are looking for some good bidders at this sale. Everything will be done to make those from a distance feel that they will wish to return next year. Mr. Watson believes in plenty of size in his hogs and while he desires all the quality possible in his herd, he still does not sacrifice that point for good, strong bone. For a number of years the policy has been to breed along this line and it has resulted in a collection of individuals from the oldest to the youngest, of most excellent pasterns and feet. From time to time valuable additions to the herd have been made and buyers will find in the catalog a very good assortment of blood lines to choose from. At the head of the herd stands Mischiefs Model 98435, a grandson of Chief Perf. 2d. He is a long, low-down, heavy-boned hog of the mellow kind. He was pronounced the best boar in the record-breaking sale of Messrs. Winn & Mastin's in August, 1905. All claims have been proved by his work on the herd and buyers will find a very uniform bunch of young stock at the sale by this sire. There will be some special attractions in the aged sows and yearlings. Mr. E. M. Metzger, of Fairfield, will have in the sale several young boars sired by Winning Dude 26027 and some bred sows and gilts of similar breeding. Mr. W. A. Jones will include three excellent sows. They are prize winners and related to winners at the state fair. Send for a catalog of this splendid offering which will be a select one, indeed. Kindly mention The Homestead.

Last Call for Poland Sale, Ankeny, Ia.

Mr. William Lentz has chosen Friday, February 8th, for his first annual sale of Poland China sows and gilts to be held at Ankeny, Polk county, Iowa, and conducted by Col. H. S. Duncan. In this, his first offering, Mr. Lentz has been exceedingly careful to select the very best of his herd, as it is his ambition to please the buying public, as he is in the hog breeding business to stay. Like a great many of the most successful breeders, he believes that straight, strong limbs and pasterns can just as well be secured with proper conformation as not, and he prefers not to have anything in the line of poor bone in his herd. The strains of blood which his offering represents will be seen by readers to be especially noted for individuals of first-class conformation and vigor. Some of the foundation sows are by Johnson's Chief 62243, a sweepstakes Nebraska State Fair boar in 1902. Others are by Chief Perfection 2d and Nemo L's Dude, both boars of noted individuality and as sires of good stock. The gilts will be a most attractive bunch and are sired by Tec. Longfellow 87375, bred to two very excellent young boars, sons of Top Chief 118063 and Blain's Tec. The old sows have been rebred

## POLAND CHINA BROOD SOW SALE

At Aledo, Ill., Thursday, February 7, 1907

### 40 Head of Aged Sows and Gilts

Twelve aged and yearling sows, twenty-eight March and April gilts. A choice lot of matured sows and gilts of choicest breeding and individuality. They are mostly the get of Faultless Perfection 2d 70889, Perfect Sunshine 71895, Rising Sun 2d 92463, Perfection E. L. 71635, Young Delight 104551, On and On 2d. These sows are bred to Young Delight 104551, On the Dot 2d 117431, Young On and On 2d 116061 and Young America 117429.

This is a good, useful lot of heavy-boned, growthy sows, and they are the money making sort. They have been fed for usefulness, and not for show, thus insuring buyers success with pigs. Write for catalog, kindly mentioning The Homestead. Bids sent to Mr. D. M. Pierce, representing this paper, in our care, will be properly handled. Auctions, W. D. Lester, of Kewanee, Ill., and E. Bowlinghouse, of Aledo, Ill.

Bridgford & Nesbitt, Aledo, Ill.

## MILLER'S IMP. PERCHERONS AND FRENCH COACHERS.

Among the Percherons are coming three and four-year-olds that weigh 1,900 pounds. They have the quality and bone; all dark colors. I am selling these stallions at the barn door at from \$700 to \$1,200. Nothing better brought over this year. I also have some first-class Mammoth jacks. Come to my barns and let me show you, or write me describing what you want. If I cannot fill the description I will say so.

Also fine litter of smooth-coated fox terrier puppies \$3 to \$7.50 each.

S. J. MILLER, KIRKSVILLE, MO.

## High Class Poland China Sows FROM THE HERD OF H. B. MOATS & SON, VILLISCA, IOWA. FEBRUARY 5, 1907.

45 HEAD HEAD GO THROUGH OUR SALE RING ON THE ABOVE DATE, and they are a high-class lot of sows, with plenty of size and they certainly have the finish. Twenty large sows, a year old last spring, fifteen head a year old last fall, and twelve spring gilts. The bulk of the offering is sired by our great boar, SHAMROCK. We are including a very fine Chief Perfection sow now two years old, and bred to Shamrock. Another great yearling we are offering is sired by Perfect Tecumseh, a litter brother to Perfect Perfection. We think we never sold a better bunch of sows than will be offered in this sale. Write for catalog at once. Address,

H. B. MOATS & SON, VILLISCA, IOWA  
Col. H. S. Duncan, Auctioneer.

## 45 Growthy Poland China Sows and Gilts 45 —AT PUBLIC SALE— FEBRUARY 8, 1907, ANKENY IOWA.

FOR a number of years I have been building up a herd of Poland Chinas. From time to time, I have added good individuals to my collection. My work has been well spoken of by breeders and swine men. In this, my first sale, I have taken special pains to select my best and have them be a credit to myself and the breed. Ten yearlings and tried sows sired by Johnson's Chief, Nemo L's Dude and Chief Perfection 2d. Thirty-five March gilts sired by Tecumseh Longfellow. I have the long, deep-bodied, strong-boned type. Send for my catalog. Mention this paper.

WILLIAM LENTZ, ANKENY, IOWA  
COL. H. S. DUNCAN, Auctioneer.

to the sire of the gilts and buyers can see on sale day the results of this kind of breeding by the quality of the gilt offering. Here is a sale of some choice individuals of excellent bone and body. Sale to be held in town. Send for my catalog and look over what I have to offer you. Kindly mention The Homestead.

**TUESDAY, FEBRUARY 12, 1906**

IN HEATED SALE PAVILION, AT

**PETERSBURG, ILLINOIS**

We will sell forty head of sows and gilts, the tops of two herds—twenty yearlings and twenty spring gilts. Gold Finch, first in class at Chicago in 1903; Chicago Lad, champion at the same show; Uncle Fred, a son of Helen Blazes IV., and Proud Wonder, a son of Crimson Wonder, are the principal sires, and the boars to which the sows are bred. We also sell daughters of Proud Advance, and close descendants of Ohio Chief, Top Notcher, Improver II., Orion, and other great sires. If you want good ones, well bred, arrange to be with us sale day. Write either of us for catalog.

**WEDNESDAY, FEBRUARY 13, 1907**

AT MY FARM NEAR

**JACKSONVILLE, ILLINOIS**

I will sell twenty yearlings and twenty-five spring gilts got by some of the best boars known to the breed and bred to boars of national reputation. Here are a few of them: Corrine Laurie, in second-prize aged herd at Springfield, bred to Tip Top Notcher; Annie Laurie, a daughter of Buddy K. IV., bred to Proud Advance; Golden Girl, by Buddy K. IV., bred to Tip Top Notcher; a spring gilt by Buddy K. IV., bred to Proud Advance, and a spring gilt got by Top Notcher Chief, bred to Mayor Jr., first in class at Illinois State Fair in 1905. I also sell a great lot that were got by my two herd boars, He's Our Pride, a Kan't Be Beat-Top Notcher boar, and Buddy K., a litter brother to Buddy K. IV. Arrange to be my guest sale day, as I think the hogs will please you. Write me for catalog.

**THURSDAY, FEBRUARY 14, 1907**

AT MY FARM NEAR

**LADDONIA, MISSOURI**

I am including in this—my first sale—twenty aged and yearling sows and twenty spring gilts as good as I own. Among the attractions are Perfect Gold Dust 33d, four granddaughters of Best of Top Notchers, and three Top Notcher gilts, an A. F. Russell gilt got by the great Iowa King, and two Gen. Cronje gilts; also daughters of my herd boars, Champ Clark by Tip Top Notcher and out of Gold Dust Rose, dam of Helen Blazes, and Chief Paul Finch, a son of King Morton and out of a daughter of Gold Finch. I believe the class of stock I am offering merits the attention of the breeding fraternity and you are cordially invited. Write for catalog.

**FRIDAY, FEBRUARY 15, 1907**

IN HARRISON'S BARN AT

**SHELBYNA, MISSOURI**

We offer twenty-two aged and yearling sows, ten fall and winter gilts and twenty-eight spring gilts. We have this past year bought such great boars as Belle's Chief 51323, a son of the great Ohio Chief and Savannah Belle, the \$750 Murphy gilt; Buddy O. 2d, a son of the champion, Buddy K. IV., and Tip Top Notcher's Baby, and Queen's Advance, a son of Proud Advance, and have used them on our sale stuff, along with Paul Kruger, a grandson of Gold Finch. We are offering some great attractions in Helen's Sister, bred to Belle's Chief; Rose and Rosebud, litter sisters, some show material here; Maud and seven sisters, by Missouri Chief; Helena 8th by Oom Paul, and her two daughters. Our entire offering consists of tops of two good herds. Send for catalog and try to be our guests sale day.

**Maupin & Applegate, Shelbyna, Mo.**

**For Catalogs Address Each Breeding Firm and Kindly Mention This Paper.**

**Riggin and Rogers Sell Duroc Bred Sows, Tuesday, February 12th.**

The first day of the Illinois and Missouri Duroc Jersey bred sow sale circuit will be at Petersburg, Ill., at which time Messrs. Harry Riggin and C. T. Rogers, of Petersburg, Ill., will sell forty head. These gentlemen maintain separate herds and have selected twenty of the tops from their respective herds for this sale. They own the herd boars, Gold Finch, Chicago Lad, Uncle Fred and Proud Wonder, in partnership, but all sows are owned separately. In Mr. Riggin's consignment there will be twenty head, twelve yearlings and eight spring gilts. There is not a poor animal in the offering, but as attractions Mr. Riggin is selling sows that he would much prefer to keep. They are not so much better than others, but are sows he has become attached to on account of knowing absolutely how they produce when mated with his herd boars. Among these is Pride of Rosemary, a granddaughter of old Orion 5293. Her dam, Ethel W., was by Allison J. Perfection by old Allison. Orion and Allison were the boars in service in Messrs. Wm. Roberts & Son's herd when they made such a record with their Durocs, Orion siring the show pigs and Allison the brood sows that produced them. Pride of Rosemary is bred to Gold Finch. She is a large sow, remarkably well proportioned, with a fine arched back, well-sprung ribs and set on best of feet and legs. A great brood sow will be found in Phyllis, a daughter of the 1903 sweepstakes boar at the International. Larger sows are found, but more breedily-looking sows are seldom found. She is safe in pig to Gold Finch. The man who gets her gets a money maker. Two litter sisters, Betty and Rosemary Belle 2d, got by Gold Finch, will add to most any herd they may enter. Betty is bred to Uncle Fred; her sister is bred to Proud Wonder, a son of Crimson Wonder, sire of the 1905 champion at Iowa State Fair and grandsire of the 1906 champion. These are but a few of the good things Mr. Riggin sells. The spring gilts are the get of that grand old show boar and sire, Gold Finch. The blood of such sires as Ohio Chief, Top Notcher, Improver II. and Orion will be found close up in all. Mr. Rogers sells seven sows, yearlings past, and thirteen spring gilts. The show boar, Chicago Lad, plays an important part here, as several are his get. Among the yearlings will be found Dew Drop 2d and Lucinda, litter sisters, got by Garnett, he by Waverly Lad. One is bred to Chicago Lad; the other to Gold Finch. They are extra good sows and will produce good stuff by these boars. Lizzie D., got by Chicago Lad and bred to Uncle Fred, should please some critical buyer who is looking for a sow to produce a good litter. Among the gilts in Mr. Rogers' offering are three Proud Advance gilts, the kind that are now in such demand. One has been bred to Gold Finch, one to Chicago Lad and one to Uncle Fred, the Kraschel pig. This will give buyers an opportunity to select a Proud Advance bred to one of the three top herd boars. Both Mr. Riggin and Mr. Rogers feel that their respective offerings merit the attention of breeders, and the writer who has bred and mixed with the Duroc for upwards of fifteen

years, does not hesitate to say that the boys are putting up the goods. They hold their sale in town in heated sale pavilion where all can be comfortable. Petersburg is on the C. & A. and C. P. & St. L. railways, which affords the best of train service. Mr. T. E. Laurie sells on Wednesday, the day following, and buyers will find this an easy trip. Colonels Reppert and McDowell will do the selling and all bids sent to them will be handled with care. See this page for advertisement and write either gentleman for catalog. Kindly mention this paper when doing so.

**T. E. Laurie Sells Bred Duroc Sows Wednesday, February 13th.**

On Wednesday, February 13th, the second day of the Illinois and Missouri Duroc Jersey bred sow sale circuit, Mr. T. E. Laurie, of Jacksonville, Ill., will sell forty head, among which are sows and gilts of great merit. Some have made a reputation by topping sales and all are bogs that can be relied on to improve or to add to the better herds in the corn belt, or wherever the Duroc is raised. Mr. Laurie is going to put in this sale the greatest lot he has ever sold or owned. They are bred to boars of national reputation and to mention the special drawing cards would be mentioning over one-half of the entire offering. One of the outstanding things in Mr. Laurie's sale is the \$270 gilt, Corrine Laurie, a half-sister to the great Buddy K. 4th, she being by Buddy T., sire of Buddy K. 4th. The dam of this gilt is a granddaughter of that grand old boar, Allison. Mr. Laurie has gone to the expense of having this gilt bred to Tip Top Notcher for an early litter. Breeders, look to her if you want the blood that is in demand. The fall yearling, Annie Laurie, should be a great card, as she was got by Buddy K. 4th and is safe in pig to that great sire, Proud Advance. Breeders will, in this yearling, find a great young brood sow, and all know what a litter of Proud Advance pigs out of a daughter of Buddy K. 4th will bring. A spring gilt got by Buddy K. 4th has also been bred to Proud Advance. Thus buyers will be given two opportunities to get in on this cross. Nothing better is found in blood lines. Then the man who prefers the reverse cross will be accommodated, as Mr. Laurie has a Proud Advance gilt bred to Buddy K. 4th. Look out for these, breeders. One Proud Advance has been bred to Gold Finch. Here, too, is something good and right up among the tops of the country. Another Proud Advance gilt is bred to Tip Top Notcher. If as many Proud Advance gilts have been mated with such an array of breeding boars the writer does not know of them, and this will be an opportunity unparalleled. This is not all, for there is a Buddy K. 4th gilt in the sale that is safe in pig to Tip Top Notcher. A spring gilt got by Tip Top Notcher Chief and out of Queen Advancer has been bred to Mayo Jr., winner of first in class at the Illinois State Fair in 1905. Another is a daughter of Mayo Jr. and out of a daughter of Buddy T. She is bred to High Notcher. Among the yearling sows are two daughters of Van's Top Notcher by Top Notcher. These are

bred to Mr. Laurie's great boar, He's Our Pride. They are the kind breeders who want top stuff look to. To fault either is a hard proposition. There are a number in the sale bred to He's Our Pride. Breeders can well afford to look to these, as He's Our Pride is a breeding boar second to none. In all, Mr. Laurie sells forty-five head, twenty yearlings and twenty-five spring gilts. Parties coming to the sale will find free hotel accommodations at Jacksonville hotels. The sale will be held at Mr. Laurie's farm. Breeders can go from Jacksonville to Savage on the C. & A. which is but a mile from the farm. Colonels Reppert and Cox & Son will do the selling and all bids in their care will receive honorable treatment. See this page for Mr. Laurie's advertisement and write today for a catalog.

**Maupin & Applegate Sell Duroc Bred Sows February 15th.**

On Friday, February 15th, at Shelbyna, Mo., Messrs. Maupin & Applegate, of that place, will hold the closing sale of the Illinois and Missouri Duroc sale circuit. These gentlemen are breeders who have gone out after herd boars and have bought them regardless of the price if the individual suited and the pedigree was good. It was Messrs. Maupin & Applegate who paid Mr. Sam Murphy, of Savannah, Mo., \$300 for one of those Ohio Chief-Savannah Belle boar pigs. That they have made no mistake is conceded by all who see the boar. They also bought a son of the great Buddy K. 4th, a son of Proud Advance, and owned and have used a son of Kruger. Thus it will be seen that they have a fine array of herd boars to use on their sows. They have listed twenty-two prove sows (mostly yearlings), ten fall and winter gilts and twenty-eight spring gilts. Among the sows is Helen's Sister 64504, a sister to the great Helen Blazes. She is a fine specimen of a brood sow and is bred to Belle's Chief, the \$300 pig. Two fall sows of December farrow are perhaps the showiest of the yearlings or fall gilts. They were got by Red Duke by Dictator and are bred to Belle's Chief for middle of March litters. One of these would have made a wonderful show last season and will make a yearling fit to enter any company. Both are cherry red. They have the fine-arched backs, two good ends and the legs to carry them. A whole litter best designated as Maud and her seven sisters, will please the critical buyers and the men who like the prolific sort, the kind that pay the rent. They were got by Mo. Chief, he by Corrector 2d, and were out of a daughter of Prince Dandy. Maud is bred to Queen's Advance, the others to Buddy O. 2d. Two gilts by the same sire will be found attractive. Helena 8th, a proven sow that was by Oom Paul and out of a daughter of Gold Finch, will be found a sow fit to go into any herd. She is safe in pig to Belle's Chief. Two of her spring gilts got by Bowman's Top Notcher, the sire of so much of Mr. F. L. Bowman's show stuff, will be found good gilts to take home. There are four other gilts in the sale that were got by Goldie's Top Notcher that should please the critical buyers. One by Nelson's Model,

the first-prize boar pig at the Nebraska State Fair in 1903, is cataloged. She is bred to Belle's Chief. Messrs. Maupin & Applegate have cataloged hogs that they know will do well in the hands of their future owners and they invite all who can to spend the day with them at Shelbyna, Mo. They sell in town in comfortable quarters and as Shelbyna is on the main line of the C., B. & Q., everybody can get out either east or west immediately after the sale. Colonels Reppert and McCowan will conduct the sale and all bids to them will be treated honorably. See this page for their advertising and write today for a catalog.

**Stallions at Auction.**

We want to especially call the attention of our readers to Watson, Woods Bros. & Kelly Co.'s annual sale of imported stallions. This firm inaugurated the selling of strictly first-class imported stallions at auction one year ago. While the prices realized at that time only averaged \$1,150, still the firm were satisfied and believed that a little education would convince the people that this was the way to buy them and that in the future where sales were conducted, as their sale was conducted last year, strictly on the square, the prices would be a little bit stronger for a good horse. They are offering this year on February 26th and 27th, sixty head, comprising thirty-five Percherons, twenty English Shires, five Royal Belgians and one Oldenburg coach stallion. The Percherons all run black but six. There are five yearlings, fifteen two-year-olds, and the balance three and four-year-olds. From a personal inspection of these horses we are free to say that they are certainly a very superior lot. They have many coming three-year-olds that will walk on the scales today in ordinary flesh and weigh from 1,800 to 1,900 pounds. They have one four-year-old that will weigh 2,200 pounds and quite a number of strong ton horses. This is equally true of the Shires, and also the Belgians. In fact, we think there is no question but what this will be the grandest offering of imported stallions ever put under the hammer in the United States. It will be well for those contemplating purchasing a stallion to remember the date, February 26th and 27th, and be on hand. The sale will be held in the new live stock pavilion at the state fair grounds, which will be nicely heated. Cars will run from Lincoln to the fair grounds on both days. If you will write to the Watson, Woods Bros. & Kelly Co., of Lincoln, Neb., they will send you their beautifully-illustrated catalog, showing the pictures of nearly half the horses to be sold. They will also offer at the same time four imported mares, three of them with filly colts at foot, and one pair of home-bred mares. Two of these imported mares weigh a ton and over today. The other two are a matched pair of blacks, weighing 3,600 pounds. All four of them are heavy in foal to a good strong, ton stallion. This will be a great opportunity to buy good mares at reasonable prices. There being so few in the sale, it will not attract a large mare crowd and those who come will certainly derive the benefit. See advertisement on page 46.

#### FEBRUARY 4, 1907, ROY WEST, - BONDURANT, IOWA

Will sell forty head of tried sows, yearlings and gilts from the Polk county herd, two miles from town. There are nine daughters of Matchless Challenger 37301, five daughters of Col. Newburn, four by King Perfection, a son of Banker Boy II.; four daughters of Young Advance 44315, a good son of Proud Advance, and five of Onward 36683, by Long John Son 26501. Others are sired by two noted sons of Old Orion, namely Manly Orion 30925, and Proud Orion 31337. Also by Billy K. 20373, Tientsin 17261 and others. The sows are bred to the herd boar, Goldie O.'s Top Notcher 52647, a son of the St. Louis Champion. The gilts are bred to Kan't Be Beat I Know 52645, by Kan't Be Beat and Orion Chief I Am 52125, by "Old Orion." Here is some of the best blood of the breed. It will be in fine condition sale day. Write for catalog at once. Col. C. E. Luther, Auct.

#### FEBRUARY 6, 1907, W. E. Bennethum, Madrid, Boone Co.

Sells FORTY HEAD of bred sows and gilts that are O. K. in every respect. The seventeen head of tried sows will include such attractions as Miss Advance 126766 and May Advance 136992, litter sisters as good as any sired by Proud Advance. Another is Miss Rose 93806 by Billy K. This sow won second at Des Moines in 1904, second in young herd and third in get of sire. She has a show gilt in sale, and is bred to Keep On 3d. Belle 94612 is one of the good ones and a great producer, sired by the sweepstakes Des Moines Fair hog, Gold Dust Jim. There will be others as good, besides seven fall yearlings, all large and growthy and bred to Keep On 3d for early litters. The twenty-three head of gilts are as even a bunch as will be seen at any sale this year. They are from early litters, and for size and quality are hard to beat. Three are sired by Advancer 28773 out of a Top Notcher Chief sow. Others by Keep On 3d, Buddle R. 104778 and Malcolm's Model II. 42735. Many are bred to Ohio. What do you think of such a collection, combining breeding with high merit? Sale in heated building. Come to Cedar Lawn Farm and get your eye full of good hogs. Send for catalog at once. C. E. Luther, Auct.

#### FEBRUARY 5, 1907, SAM. SUNDBURG AND O. A. OLSON, MADRID, BOONE COUNTY

Offer, at the farm of the former two miles north of town, forty head, consisting of ten yearlings and tried sows which have proved first-class producers and are sired by Madrid Perfection 30223, Nash's Model 21395, Perfect Sunshine 38483, Red Dick 53243, King Perfection and Eclipse. These sows are bred to Gold Dust Pete 45323, a grandson of Hugh Tucker 8963, also to Golden Model 53675, and Advancer Boy 53869, a grandson of Advance. There will be thirty gilts of choice breeding, some of early litters, and sired by Duroc Wonder 32009, by Crimson Wonder 26355; also by Madrid Perfection, Gold Dust Pete and two good sons of Proud Advance. The gilts are mated to Advancer Boy 53869, a heavy-boned, smooth-bodied son of Advance; also to Ohio 56105, a son of Ohio Chief, and to Golden Model by Golden Hero 12505 (a.) Prolificacy and scale with plenty of quality are well represented in this offering. Kindly mention The Homestead when sending for catalog. A good dinner on the side. C. E. Luther, Auct.

#### FEBRUARY 7, 1907, A. T. SUNDELL, PATON, GREENE CO.

Will offer at his farm six miles east of town forty head of bred sows, yearlings and gilts. Some of the best sows are Miss Ruth, sired by Tientsin 17261, a sire of prize winners. Another is Malinda Lady by Lord Roberts 17329 and a granddaughter of Ohio Annie IV. Also Ellen V. 122940 by the same sire and out of Ellen Roberts 22460. The sows are bred to the several sires, Lord Roberts, King West 26163, Admiral 43273, Sundell's Advance, and Sundell's King. Of the twenty-eight gilts, there are seven sisters sired by Scratch 26159 and others related to him. Most of this breeding is mated with Sundell's Advance. Others are by Sundell's Choice, Jerrie Roberts and others. Part are bred to Sundell's Top Notcher and Sundell's King. The individuality here is as good as the breeding. A good chance to select some show stock as well as good valuable producers. Drop a postal for catalog. The best treatment assured. C. E. Luther, Auct.

#### February 8, 1907, E. R. Wood, Jefferson, Greene Co.

Forty head, including sixteen aged sows and yearlings and twenty-four gilts. The blood of Proud Advance, Orion, Crimson Wonder I Am, Jumbo Red, Corn Cracker, Top Notcher Chief, Perfect Chief, Top Notcher R., American Royal, Cantine Boy, Linwood Cashier and others. Sale to be held in heated tent on farm six miles northwest of Jefferson. Some of the sow attractions are: Lady Top Notcher, a splendid individual as a producer, and is a hundred dollar sow, sired by Top Notcher Chief 29247; another is Linwood Cashier, a four-year-old; also two two-year-olds by Long Enough 25579, two by Bristol Jumbo 33095, and one by Radiator 28866, tracing to Corn Cracker 14205. The sows are bred to Clovercroft Orion 37515, a son of old Orion out of Peerless Beauty 71360. The gilts are a nice growthy lot with plenty of size and are sired by Otto 17321, Top Notcher R. 40457, and Clovercroft Orion. The gilts are mated principally with Crimson Wonder You are. All parties will stop at Jefferson, where conveyances will take them to the farm. There should be something here to please everyone. Kindly mention The Homestead when writing for catalog, and be sure to attend. C. E. Luther, Auct.

# Two Grand Sales

**70 HEAD DUROC JERSEY BRED SOWS**  
**MAXWELL, STORY COUNTY, IOWA** **70**

**Friday, February 8, 1907**

On my farm seven miles south of Maxwell and one-half mile from Farrar, I will sell THIRTY-FIVE HEAD choice sows and gilts. Offering will contain two aged sows sired by Carlin 14037, a hog bred by Mr. N. P. Clarke. They have regularly produced large litters and are safe in pig to Perfection King 41711. There will be eight fall yearlings sired by Reed's Cashier 25675, a grandson of Advance, and also by Gold Standard 33231. This part of the offering is bred to Perfection King, one of the well-bred red boars of the day, and a very prepotent sire. The twenty-six head of gilts are sired by Perf. King, Manly Orion and Long Tom. As smooth and growthy a bunch as you will find this spring. Bred to grandsons of Crimson Wonder. A choice collection bred right and fed right. Send for catalog.

**O. Osborn, Prop.**

**Saturday, Feb. 9, 1907**

At Shyrock's sale pavilion in Maxwell on the above date I will offer at my third annual sale THIRTY-FIVE HEAD, consisting of mature sows and yearlings which represent the blood of Orion, Duroc Challenger, Proud Advance, Billy K., Top Notcher and others. Many of these I reluctantly put in the sale. You will find every one of them O. K. They have demonstrated their ability to produce prize winners by the ribbons their progeny have taken. Among the gilts are many of their produce sired by Malcolm's Model II., Manly Orion, the sire noted for bone, build and prepotency, also by Keep On 2d and 3d. My gilts are well grown and in prime condition. I have mated the individuals in the offering with Malcolm's Model and Tom Wonder 51699, a son of Crimson Wonder Again, the champion. Be with us and we will return the favor. Catalogs now ready for mailing.

**W. J. HARTUNG**

COL. F. LUTHER CONDUCTS BOTH SALES and will give bids sent him in care of consignor the best attention. Mention The Homestead when sending for catalog.

## THE GREATEST SALE OF DUROC JERSEY PRIZE WINNING SOWS

## CLOSING OUT SALE OF HEREFORD CATTLE AND CHESTER WHITE SWINE

**Auburn, Ia., Saturday, Feb. 9, 1907**

**37 HEAD 29 Cows and Heifers 8 Bulls.**

Including my herd bull, DALE LAD 35TH 158312, a grandson of old Dale and Star Grove 15th, together with a lot of his get. All the young bulls except one will be sired by him, and the most of the young heifers. The blood of old ANCIENT BRITON, ANXIETY 4TH, THE GROVE 3D, COLUMBUS and LORD WILTON predominates in my herd, and I believe I am offering as good a bunch of cows and heifers as has ever been sold of late years. Ella Briton, a daughter of Ancient Briton, out of a Cherry Boy cow, goes in, also a grand lot of Masher and Jumbo cows in my sale. The most of the cows will weigh from 1,300 to 1,800 pounds, and are good breeders. For the size of my herd no man has a better one. There are some particularly choice heifers in my sale.

CHESTER WHITES—I will also close out all my Chester Whites, including my splendid herd boar, Duke of Headlight 15866. Will also sell my horses, fancy poultry and farm machinery. Write at once for catalog. Address,

**COL. C. M. JONES W. H. Leslie, Auburn, Ia.**  
Auctioneer

## GREAT OFFERING OF POLAND CHINA BROOD SOWS LeMars, Ia., February 8, 1907

We will sell fifty head—ten head of matured sows, fifteen fall gilts and twenty-five head spring gilts. These are daughters of such noted boars as

Corrector 2d (the sire of Louis of Oakwood, that sold for \$2,000 a short time ago), Matchless Perfection by Chief Perfection 2d, and Matchless Perfection Jr. (the sweepstakes boar at the interstate fair, 1905-6, and first-prize boar at Minnesota State Fair, 1906; he also sired more first-prize boars at the interstate fair than all other boars combined), Meddler Boy by the champion Meddler, On Parade by the champion On and On, Pilate's Chief, Dewey Corwin and Correct I Know. These sows are bred to Matchless Perfection, Matchless Perfection Jr., Meddler 2d, On Parade and Correct I know. This bunch of sows is as good as we have ever sold. The mature sows are large and useful, and the gilts are large and roomy, and are all safe in pig. Catalog is ready and will be sent on application. Address

Col. J. A. Benson, Auctioneer. HENRY BROS., LeMars, Ia.  
BOX 1102. TELEPHONE TO FARM

## HEREFORD CATTLE.

.....9 CHOICE YEARLING HEREFORD BULLS 9.....  
FOR SALE.

I HAVE for sale the choicest lot of yearling Hereford bulls that I have ever had. They are sired mostly by Beau Donald 4th 121465 and out of cows of the richest Hereford breeding known to the breed, such as Anxlety, Lord Wilton, The Grove 3d, and others of like breeding. A visit to my farm, two miles west of Mechanicsville, Iowa, will prove that the bulls I am offering at from \$100 to \$125 are the equal of those usually sold at twice this sum. I have no females to spare at this time. Have been breeding Herefords seventeen years and have fifty breeding cows in the herd. For particulars, address.

JOHN SECOR, - Mechanicsville Iowa

## Rhea Bros., Arlington, Neb.

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pampered with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

## Registered Percheron Stallions For Sale

GOOD colors, large size, three and four-year-olds. Priced so they will pay for themselves the first season. Also several span high-grade Percheron and Shire mares in foal to registered horses, ages five to nine years old. Address, M. D. WOLCOTT, Gilmore City, Iowa.

## HORSES.

## Public Sale

The Largest Sale of Draft Stallions Ever Held in the West will be at Wichita, Kansas, Friday, February 22d, Starting at 8:30 A. M. Sharp

## 50 Head Percherons, Belgians, 50 Head Shires and Hackneys.

This sale will consist of some of the choicest stallions of our stud, both imported and American bred. As we won every prize in the stallion class at the great State Fair of Kansas, it gives the public the grandest opportunity to purchase a prize winner at their own prices.

## PRIZES WON IN 1906

Champion Percheron stallion at the Kansas State Fair.	First—Best five Percheron stallions, Kansas State Fair.
Champion Belgian stallion at the Kansas State Fair.	First—Best five Belgian stallions, Kansas State Fair.
Champion Shire stallion at the Illinois State Fair.	First—Best five Shire stallions, Illinois State Fair.
Champion Shire stallion at the American Royal, Kansas City.	First—Best five Shire stallions, International, Chicago.
Champion American-bred Percheron stallion at the American Royal.	Second—Best five Belgian stallions, International, Chicago.
Champion Shire stallion at International, Chicago.	Second—Best five Belgian stallions, Illinois State Fair.
Reserve champion Belgian stallion, International, Chicago.	Second—Best five Belgian stallions, American Royal, Kansas City.
First—Best five Shire stallions, American Royal, Kansas City.	Second—Best five Percheron stallions, American Royal, Kansas City.

His Majesty King Edward VII. of England and Lord Rothschild's exhibit of stallions were purchased by us at the Great International Exposition at Chicago, 1906. These Grand Stallions, Girtan Charmer and Premvictor, will be on exhibition at this sale. Do not fail to see the Highest Priced Draft Stallions ever imported to this country.

As we are now located at Wichita, we intend holding an annual sale in this city, this being our first. Our AIM is to surprise the PUBLIC with such Stallions as were never before placed at auction. All Stallions will be sold with our regular guarantee of 60 per cent and will be sold so that all payments will not become due until you have made two seasons and one collection from your HORSE.

This sale will not affect our business in any way, as we will have over 250 head left after the sale for our Spring trade, not including our New Importation which will arrive soon.

TERMS—Will be one year and six months from date with interest at 6 per cent from date, or six per cent discount for cash. All credit must be bankable. Send for catalog and calendar.

## Robt. Burgess &amp; Son, - Wenona, Ill.

## OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

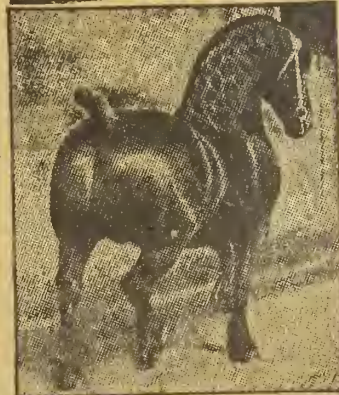

This individuality given each one of our animals places them in a class by themselves. In our breeding stables, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percherons and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landschaftsrat O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best of the country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

OLTMANN'S BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.

## THE LAFAYETTE STOCK FARM

J. CROUCH & SONS, Props. Lafayette, Ind.

Our sweeping victories at all the leading live stock shows in the United States is evidence of the class of horses that we handle. At the late International, the greatest live stock show in the world, we won 21 first prizes and 12 seconds, including 3 champion-ships. Our horses are all fresh imported, on which we will put a gilt-edged guarantee that they must be good breeders. All stallions are personally selected by one of the members of our firm and are purchased direct from the breeders in Europe. Our facilities for purchasing and handling stallions are equaled by no other importer and thus we are enabled to handle higher-class horses at less money than our competitors. Our terms are liberal. Importations arrive frequently, insuring buyers a large selection from which to select a stallion.

J. CROUCH & SON.

## HORSES.

# FRANK IAM'S

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND," Iams' "HORSE SHOW" at Nebraska, Iowa and Illinois State Fairs WAS the "TALK" of the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER," "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE," "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

## 168 Percherons, Belgians and Coachers 168

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." ALL REGISTERED and APPROVED. Mamma, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES;" they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He buys, owns and sells more stallions than any man in United States; saves THOUSANDS of DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 Insurance.

## \$1,000 SAVED AT IAM'S \$1,000

KEY! What a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$3,000. Iams sells "TOP NOTCHERS" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "huts in," sells more stallions each year. He makes every statement good. George, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. REFERENCES: St. Paul State Bank and Citizen's National Bank.

By such sires as S. S.'s Col., S. S. Success, Puckett's Chief of Ohio, C. E.'s Col., Beat Him if You Can, and others, bred to a grand collection of boars, the best breeding, including S. S. Success, S. S.'s Col., Puckett's Chief, The Model, Ideal Success and others. For catalogs address M. R. Grinnell, Yellow Springs, or S. S. Puckett, Lynchburg, Ohio. Sale follows Whitehall Combination Sale. Bids should be sent to Mr. Dante M. Pierce, care M. R. Grinnell. Cols. Iglehart, Isenhower and Vinnedge, auctioneers.

## EVERYONE WANTING THE BLOOD WHICH HAS PRODUCED

the winners at the World's Fair and leading State Fairs should get catalogs of the noted sales. All of them can be reached from Dayton at a very small expense. Ample accommodations for all. Send bids to Mr. D. M. Pierce, representing this paper, who will carefully handle all bids entrusted to his care.

# Let Me Send You a "KNODIG" Pitless Scale on 30 Days Trial.

H. C. GUMBEL

The man who stands back of the  
"KNODIG" PITLESS SCALE.

## My New Direct-From-Factory Selling Plan

### Saves You All Jobber's and Dealer's Profits

No Deposit—No Notes to Sign—No Obligations of Any Kind

### You Have Nothing to Pay Until Satisfied

The Only Scale  
Guaranteed by  
the Maker  
for 10  
Years

your own premises before you pay me one penny. It isn't one of those sham "free offers," where you pay first and then take your chances on getting your money back, if the article you buy is not satisfactory.

No, sir! I mean just what I say. My "KNODIG" Pitless Scale, with the Protected Bearings, is the best scale ever put on the market. I know all about it because I make the "Knodig," and I know it is good enough to put out on a genuine free basis.

I will send a set to you or any other honest man on 30 days' trial. You have nothing to pay me, no notes to sign, nothing to do but make a fair test of the "KNODIG," entirely at my risk. If it fails to satisfy you, return it at my expense, and I will pay freight both ways.

You can't afford to buy one of those inaccurate, cheaply constructed Pitless Scales which will do poor work and get out of whack in a month or two,—nor a high-priced, old style Pit Scale which runs up big repair bills and cannot be moved about on your place.

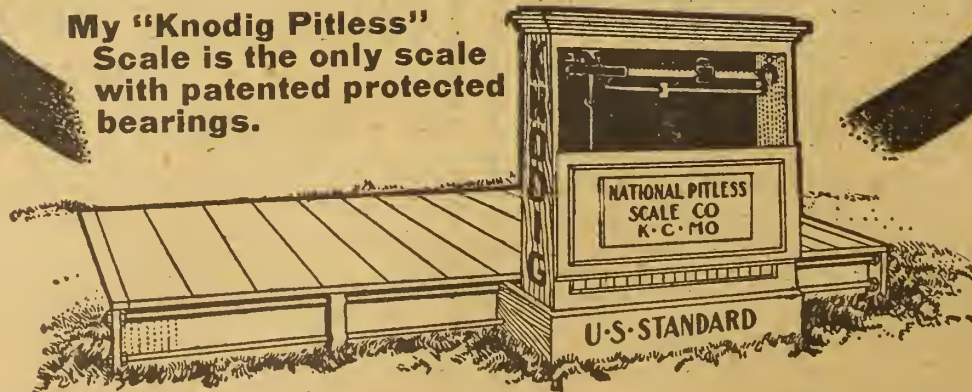

What you need is a KNODIG PITLESS SCALE which costs you a little more at the start than the "cheap" scales sold by the mail-order houses, but is the best investment in the long run, because it lasts a lifetime. The "KNODIG" costs you from \$30 to \$50 less than a Pit Scale, and is as good as any scale made at any price. It is the only scale backed by an unlimited iron-clad 10-year guarantee.

As a matter of fact, you positively can't afford to buy any scale until you have seen my big, illustrated catalog showing the new models A and B "KNODIG" PITLESS with Protected Bearings. They are the only scales ready for instant use when you want them. No ice nor snow to cut away from the bearings in winter—no dirt nor dust to clean out in milder weather. Nothing to interfere at any time with the absolutely accurate and sensitive weighing feature of the "KNODIG" PROTECTED BEARINGS.

Fully covered by patents. Sold only direct from factory at lowest wholesale factory prices. Cost about half the price of a Pit Scale and have no expensive pit with rotting timbers, rusting parts and big repair bills.

The KNODIG PITLESS can be removed anywhere on your land, wherever the work happens to be. It is personal property. Should

My "Knodig Pitless" Scale is the only scale with patented protected bearings.

At the  
Royal  
American  
Live Stock Show,  
Kansas City,  
"Knodig" was se-  
lected as the offi-  
cial scale.

This  
Scale  
is Used  
and Ap-  
proved by  
the U. S. Gov-  
ernment, which  
proves that it must  
be right.

## Send for My Big Free Scale Book

The "KNODIG" must satisfy you, or no sale, remember! No buying a "pig in a poke" when you deal with me. You try BEFORE you buy my scale. The new "KNODIG" Scale Catalog gives full details of my wonderfully liberal Free Trial Plan and Guarantee. You ought to see this book whether you expect to buy a scale now or not. It contains over forty fine pictures, illustrating scenes from farm life and is chock-full of sound scale sense from cover to cover. Cost me a big lot of money to get up, but I'll be glad to send you a copy—FREE—if you say so. Just address me personally, and write today, before the books are all gone, for I want you to have one.

VOL. LII. NO. 6.

DES MOINES, IOWA, FEBRUARY 7, 1907.

WHOLE NO. 2586

#### KEROSENE AS A LICE-KILLER

The following communications have been received from three of our subscribers:

I see one of your subscribers wants to know if kerosene will hurt hogs or brood sows. I have used it more or less for five years and had no bad results. I bought a thoroughbred boar this year and when I got him home I found him to be lousy, so I used Carbolineum, but without effect. I then took a corn cob and dipped it in raw kerosene and rubbed him all over. This put an end to the lice and nits. Do not use too much, but just enough to do the work.

Ida County, Iowa.

Hy. E. Penrod.

In looking over the columns of your paper the other evening I noticed a communication from Mr. D. C. Bowman asking advice on using kerosene on brood sows. I have had some experience in this line and for the benefit of others am glad to relate it. Several years ago we had quite a number of sows for April farrow which became lousy in the winter. We used kerosene and machine oil on them with good results, but before the time was up every sow had lost her pigs. We failed to raise a single pig that spring. I am not confident that this was the direct cause, but we have never used kerosene on brood sows since.

Linn County, Iowa.

Robt. A. Mathews.

I notice the question asked by Mr. D. C. Bowman as to whether kerosene sprinkled on brood sows will cause them to abort or not, which I can surely answer. In 1895 I had thirteen young sows and two old ones bred and when they were six weeks to two months along I sprinkled them with kerosene and the young ones all slunk their pigs, but the old ones raised good litters. I bred these sows again and they raised good litters.

Wm. M. Whiteman

Henderson County, Ill.

This clearly shows that there is a little risk in using kerosene too freely on the skin of a hog, because in this case Mr. Mathews and Mr. Whiteman suffered a severe loss on account of all their sows aborting. This is by no means the first time that such an experience has been called to our attention, and for that reason this discussion has been prolonged.

We appreciate the fact that the lice question is a very important one to

swine breeders, and especially so in the winter when it is too cold to dip or spray. As explained in a recent issue of this paper, if the application of kerosene should blister the skin there is some danger that it will cause abortion. An instance was cited where a sow that had been badly blistered by running in rape lost her pigs, and it is just possible that blistering the skin badly from any cause might result in the same thing.

#### A BREEDER'S OBLIGATION TO HIS PATRONS.

The Homestead receives from time to time complaints arising from tardiness on the part of men who sell pure-bred stock in furnishing pedigree. One subscriber recently asked for an expression of opinion as to the way in which this matter is handled by up-to-date breeders. The inquiry was submitted to a few prominent breeders, and the following reply was received from Mr. S. E. Freed, of Story county, Iowa:

Regarding a breeder's obligation to his patrons in regard to sending pedigrees of stock bought, will say that it has been quite a general practice with breeders of pure-bred swine to delay recording the sow until after her first litter has been farrowed and in many cases until we began to sell the males in the fall. Then it would suddenly dawn on us that we hadn't recorded the young sow; hence the necessity of sending her pedigree in for registry before we could make out the pedigree for the young male just sold. Occasionally the buyer would get nervous and would write concerning same.

Now in order to avoid this in the future we have firmly resolved to adopt the practice of having all sows that have raised litters recorded before state fair time, so that we can have pedigrees all made out, with the exception of filling in the name of the purchaser, for stock that we intend selling at the fair and deliver same to buyer as soon as purchase is made.

I believe this is the proper thing to do, for where a breeder makes several fairs his

time and attention is so taken up that if he is compelled to send in pedigree of dam for record before he can make out pedigrees for stuff he has sold at fairs, it is often weeks before they get around to the purchaser. We also propose to adopt the same plan in regard to the sows and gilts that we shall sell at our February sale. It is our intention to have pedigrees made out and deliver same to purchaser before he leaves the premises or mail to him shortly after.

As to the extent of recording males and females under one year old before selling, will just say that I have never been able to buy one under that age that was recorded, except in the case of a young male where the seller had been using him some in his own herd.

Mr. G. P. Tyrrell, of Jones county, Iowa, on the same subject says:

I confess that I have not always sent pedigrees as soon as an animal was sold, but this fall I told my customers that pedigrees for pigs under two years old would not be sent until January, 1907, as we wanted to see what needed to be recorded after we were through selling males and had a chance to sort out our gilts. This plan does away with recording everything, good or poor, just because you can. Every hog on my place is pure bred, though of course all the younger ones are not recorded.

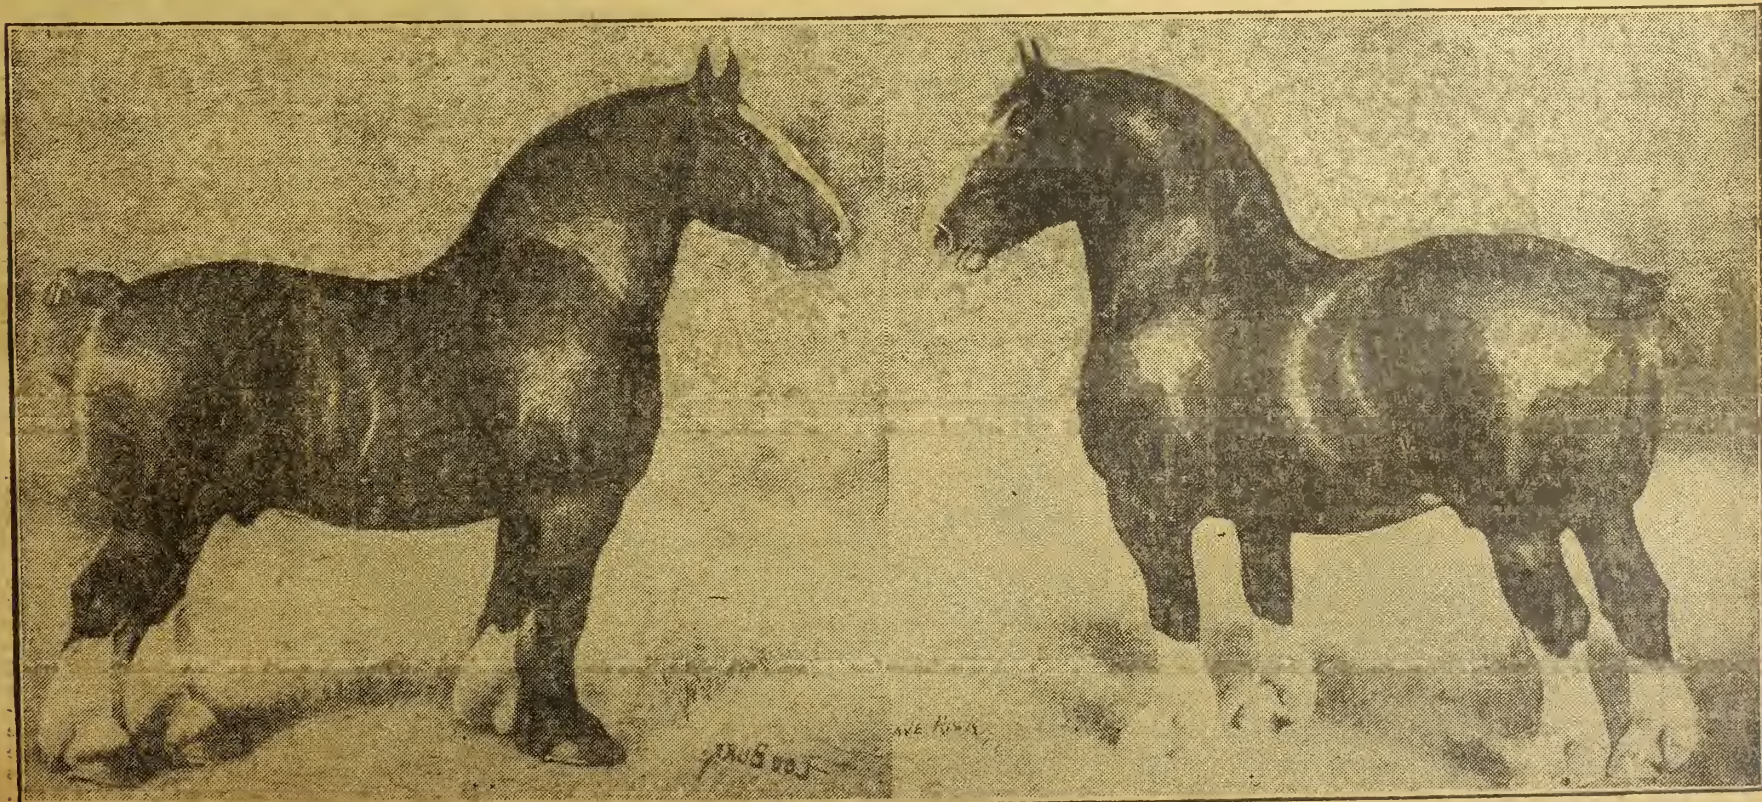

I would say that we mark every litter when born and have a book in which we keep the mark of dam, then mark the pigs right under, with number and sex. Then when a pig is sold, either male or female, we write the purchaser's name, sex of hog and price right under. Thus, when we go to make out the pedigree it is easy. We think where the sows are recorded and also the male, that it is best to send pedigree as soon as convenient to avoid the necessity of writing and asking for the papers on the part of the buyer. I know from experience that the sooner the pedigree is delivered the better in both cattle and hogs. We think it best for both breeder and buyer, even if it does cause a little exertion on the part of the breeder.

It will be seen from the above communications that it is not always practicable, nor is it necessary, to furnish pedigrees at the time an animal is sold, or even to furnish one within a few weeks afterwards.

Let us suppose a case for illustrating

purposes. Here is a gilt from a registered sire and dam that will farrow, say, in March. She has a litter of eight pigs. Next August or September you sell a male pig from this sow to go to a registered herd. At the time of selling the male you possibly do not know how her gilts are going to come out and you wait and see how they develop. It may be that you will afterwards dispose of three or four of her sow pigs. As soon as this is done you are then of course obliged to have her recorded. You can then sit down and write out in a few minutes the pedigree of all of her pigs that you have sold. Of course it might be better if she were recorded just as soon as possible after you sold the first male from her, because it is apparent there and then that she will have to be recorded in order to make the young male eligible. Indeed, this is what Mr. Freed advises in the case of those who sell at fair time.

There is no justification whatever for a man allowing the matter to go by default for several months, because it stands to reason that a buyer should be anxious to have his papers and to be assured as early as possible as to the blood lines of the stock he has purchased. There is always one advantage in being prompt in this matter, and that is that it may prevent mistakes. You may sell only one pig out of a litter and when the litter has been raised pork out the sow. Matters might drift on for several months or even for a year, and then the buyer of the pig demand the pedigree. In such cases it might be almost impossible to figure out just which sow was the dam of this pig and in turn just what her sire and dam were. Men who have made the best record along this line furnish pedigrees promptly. It tends to satisfy the customer, than which there is no better advertisement for one's herd.

Premvictor and Girton Charmer, the two aged stallions purchased by Robert Burgess & Son, of Wenona, Ill., from His Majesty, King Edward VII of England and Lord Rothschild at the International, Chicago, and will be on exhibition at their sale at WICHITA, KAN., FEB. 22, 1907. Do not fail to see the highest priced stallions ever imported to this country.

# MAINTAIN THE FERTILITY IN THE GREAT WESTERN TERRITORY

## BY THE USE OF BARNYARD MANURE AND THE MANURE SPREADER

### SAVING AND HANDLING FARM-YARD MANURE.

BY A. M. TEN EYCK, KANSAS AGRICULTURAL COLLEGE.

**T**HERE is no more wanton waste on the farm than the too common waste of barnyard manure. The common practice of throwing the manure from the stables out under the eaves of the barn and leaving it for a long interval in the yards exposed to the leaching of rains or to decomposition by drying and heating, results in a great loss of plant-food elements.

An experiment to determine the loss of manure by exposure was carried on at the Cornell Experiment Station, in 1890, as reported in Roberts' "Fertility of the Land." In this experiment horse manure in a loose pile, valued at the beginning at \$2.30 per ton, lost 42.6 per cent in value. Cow manure, valued at \$2.29 per ton, lost 30 per cent in value. In another experiment a ton of fresh manure, valued at \$2.30, lost 42 per cent in value by an exposure of six months in an open yard.

In comparison with this, manure which had been kept in a covered yard, when analyzed was found to be richer in nitrogen, phosphoric acid and potash than fresh manure, and was valued at \$3.61 per ton. It is a good plan to feed cattle and other stock under sheds, simply for the purpose of better preserving the manure.

The value of barnyard manure may vary somewhat according to the kind of animals from which the manure is made, the quality, composition, quantity of feeds fed, and the method of preserving or handling the manure previous to spreading it upon the fields. Manure from animals which are being fed with highly nutritious feeds will be richer in the plant-food elements than manure made by animals which are being fed on less nutritious feeds or which are being fed merely a maintenance ration. I have computed the relative value of manure made by different animals, as published in Roberts' "Fertility of the Land," as follows:

Horse manure .....	\$2.45 per ton.
Cow manure .....	2.20 per ton.
Sheep manure .....	4.20 per ton.
Pig manure .....	3.20 per ton.
Air-dry, hen manure .....	8.50 per ton.

The value of mixed barnyard manure varies greatly according to the different analyses made of the different samples of manure at different experiment stations. As an average for many samples, barnyard manure partly rotted contains, in a thousand pounds of manure, 720 pounds of water, 58 pounds of ash, 5 pounds of nitrogen, 2.6 pounds of phosphoric acid, and 6.3 pounds of potash. As chemical fertilizers are sold on the market, the essential plant-food elements may be valued as follows: Nitrogen, 15 cents; phosphoric acid, 7 cents; potash, 4.5 cents per pound, respectively. At this rate a ton of barnyard manure having the composition given above will have a value of \$2.42.

Prof. Snyder, of the Minnesota Experiment Station, in discussing this subject has estimated the value of eight tons of farm manure, when applied to land deficient in fertility, at \$25.00. He makes the estimate in this way: The increase in yield of corn the first year after manuring will be twenty to twenty-five bushels per acre, or an increase of \$7.00 in the value of the crop. The second year after manuring

the land will produce, according to his figures, six bushels more wheat per acre, valued at \$4.50. The third year, provided clover is seeded, the land will yield at least a ton more hay per acre, valued at \$5.00. Wheat following clover should give an increased yield of eight bushels per acre, worth \$6.00. The fifth year the estimated effect of the combined manure and clover treatment should increase the yield of oats twelve to fifteen bushels per acre, worth \$2.50, making a total increase of \$25.00 in the value of crops for five years.

Probably the most economical way to handle manure when live stock are kept in stables is to haul directly from the stables to the field, spreading the manure at once, preferably on grass or alfalfa land, although the manure may be hauled onto any land which is in condition to receive it.

It may not be practicable to recommend the use of covered barnyards in the West, but it is practicable to furnish abundant shed room for sheltering stock during the winter feeding season. It is also essential in order to save the manure, especially the liquid manure, to give a liberal supply of bedding for the stock. Usually farmers in the West have plenty of straw and roughage which may be profitably used for bedding in the stables, sheds, and yards. The barn-yard should be well-drained; however, there is apt to be a great loss of the soluble elements of plant-food where the drainage water is allowed to run away through natural drainage channels. If possible, such drainage should be turned over grass meadows or pastures, in order that the most available part of the plant-food in manure may not be entirely lost.

It is not possible to haul manure daily from the yards and sheds, but the farmer should have a regular time for hauling out the manure and cleaning up the yards; preferably this work should be done two or three times during the year in order not to allow too great an accumulation and the waste which is sure to take place by decomposition and leaching.

A convenient and desirable time to manure land is while it is being used as a meadow or pasture. If the manure is applied a year or so before breaking, it will stimulate the growth of the grass and cause a greater production of hay or pasture. Meanwhile the soil is enriched by an increased root growth and the for-

mation of more humus. Besides these beneficial results, some plant-food will be supplied by manuring for the use of the first crop which is grown on the breaking, at a time when available plant-food is much needed, because the larger part of the fertility in new breaking is in an unavailable condition and cannot readily be used by the new crop.

Manure applied to grass land benefits the crop in several ways. If applied in the fall and winter, the manure gives protection to the grass roots from frost and the injurious effects of sudden changes of temperature. Again, as spring passes and summer advances the covering of manure acts as a mulch to conserve the moisture in the soil.

Meanwhile the plant-food elements are being leached into the soil by the rains and are taken up by the roots of the grass plants, causing increased growth and a larger yield of hay or more pasturage. Finally, as the organic matter in the manure decays it becomes a part

of the soil, increasing the supply of humus and not only giving more fertility, but better and greater capacity of the soil to absorb and hold water. In the great wheat growing districts of the West, little or no stock is kept and the supply of manure is very limited, and usually that little is not used. No quick and economical way has been found yet to convert straw-stacks into humus on farms where stock is not kept. Thus the straw is usually burned, a destructive process so far as the wasting of the soil

fertility is concerned. Yet this is perhaps often necessary in a wheat-growing country.

Also, wheat is not a very desirable crop to manure, especially on the yet fertile lands of the West. A heavy application of manure on wheat land, plowed under, is likely to injure the succeeding crop of wheat. As a rule, however, light surface dressings upon wheat in the fall or early in the spring are safest and give the best results.

In fact, I believe this rule can be laid down for applying manure on western lands, that whatever the crop, manure is most safely applied as a top dressing. Of all crops, grass is best adapted to this method of manuring, and no crop will respond quicker or give more favorable returns for the manure applied.

Continuous wheat growing is recognized as a wasteful method of cropping upon the fertility of the soil, and the rotation of crops has been urged and has been put into practice by many

farmers in the wheat-growing belt and wherever rotation of crops has been introduced, manure may be used to the best advantage. For corn, kafir corn, and sorghum, manure may be plowed under, although for these crops a top dressing worked into the soil by cultivation previous to planting is preferable to plowing under, since by the surface application the fertility of the soil is not only increased, but the manure has a direct beneficial effect as a mulch to conserve the soil moisture as described above.

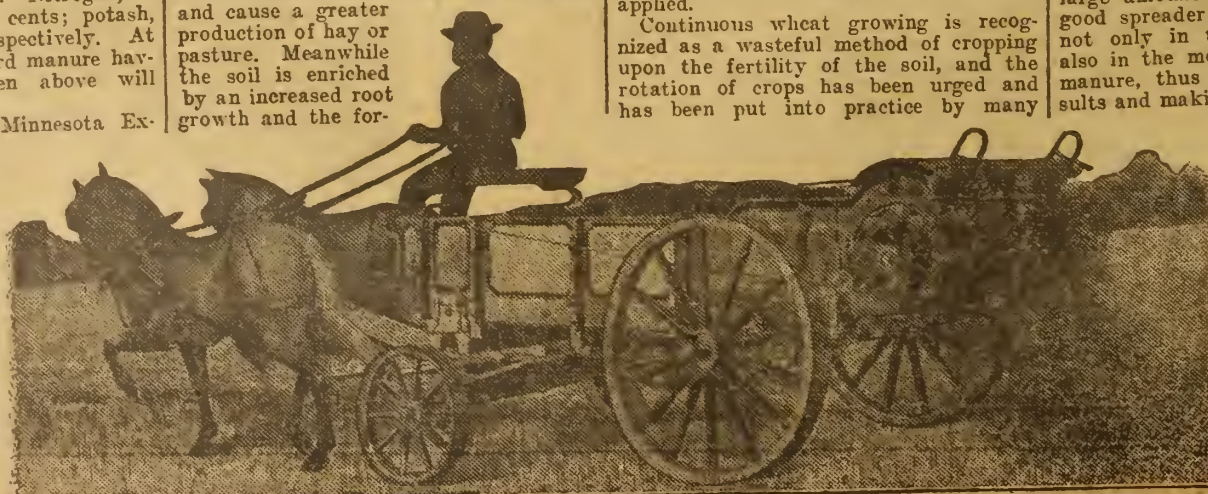

Throughout the West, alfalfa is beginning to be extensively grown, and although this crop is in itself a fertilizer and renewer of the soil humus and nitrogen, yet it has been found that alfalfa responds well to manure applied as a surface dressing in the fall or winter, and the alfalfa field, like the grass meadow or pasture, offers a convenient place to haul and spread manure during the season of the year when there is little farm work to do.

So far as the general principles of applying manure are concerned, they are the same for the West as for the East, with perhaps this exception, that the danger of injury to the crop by plowing the manure under is greater in the West than in the East, or in regions of greater rainfall, and thus top-dressing is to be especially recommended for the western regions.

Manure should be spread thinly, the purpose being to cover a large area of land with a relatively small quantity of manure, rather than to give a heavy dressing of manure to a small area of land.

When manure is spread thinly over a large area, the crop grown on the land may get all the value of the manure and the manure can do no harm to the crops, but with a heavy coat of manure, especially when the manure is plowed under, the crops may not make full use of the manure, and there is often danger, especially in dry seasons, that the manure may injure or destroy the crop by "burning out" the soil, which merely means that the heavy coat of manure breaks the capillary connection between the soil and sub-soil and in a period of drouth the crop suffers for want of water because the supply of water in the sub-soil is largely cut off for the direct use of the crop.

The manure spreader is a useful implement, and when the manure is handled regularly as made and spread in the fields, the spreader may be very profitable, used on the farm which carries much live stock. There is little question but that in the spreading of large amounts of manure each year, a good spreader will soon pay for itself, not only in the saving of labor, but also in the more even spreading of the manure, thus giving more uniform results and making the manure cover more land. When the manure can be handled daily or can be hauled from the stables as made and spread on meadow or pasture land, it is very handy and almost necessary to use a manure spreader. The use of the manure spreader is not so practical, however, when the manure is hauled out only once or twice a year, as is the common practice. It is usual in such a case to turn all hands

and teams to the work of hauling manure, thus making it impracticable to use a single spreader, and several manure spreaders could not be profitably owned and operated except on very large farms.

It would be possible, however, for farmers in a neighborhood, by exchanging work, to co-operate in the hauling of manure, when several manure spreaders might be economically owned and operated in a single neighborhood.

Farm-yard manure is not usually a complete fertilizer, and this is especially true when care has not been taken to preserve the liquids, since it is in the liquid evacuations of the animals that the mineral elements of plant food are found, especially the potash. Even where plenty of bedding is used and the manure is carefully saved, it is apt to be largely nitrogenous in character, and it may be advisable, in order to balance the manure and make it a more complete and valuable food ration for plants to mix pulverized rock phosphate and some crude potash salt, such as kainit, with the manure by applying small quantities of these salts as absorbents in the stable under the animals and in the gutters, thus not only increasing the supply of mineral elements in the manure, but also preventing, to some extent, the loss of nitrogen, the ammonia being absorbed by the fertilizer salts.

In the eastern states the practice is to supplement manure by the use of commercial fertilizers, applied in the field. I do not encourage the general use of commercial fertilizers in the growing of ordinary farm crops throughout the great central and western farming areas of the United States. On the vast farming lands of the West, excessively rich in the mineral elements of plant-food, a simple rotation of crops, including grasses and perennial legumes, in which the roughage and part of the grain is fed to live stock on the farm with the return of the manure to the soil, will not only maintain the soil in its present state of fertility, but a large part of this land may be made even more fertile after fifty or one hundred years of such management than it is at present, after one-fourth to one-half of a century of more or less continuous cropping with fertility-exhausting crops.

#### The Evolution of the Manure Spreader.

(By Otto E. Henry.)

When the manure spreader made its appearance about thirty years ago it was made in the style of a cart with two wheels, made to hitch to the rear of a wagon. This was a crude construction, and sufficed for the small eastern farmer, but as the spreader came into use more, it was found advisable to put a set of trucks under the front end of the machine and to make a complete wagon out of it and to make a movable bottom, and from the way this style of machine was made I am under the impression that it was not intended that the front wheels should bear much of the load, as they were set too far forward, throwing practically all of the load on the rear wheels. This construction was not followed out in farm wagons, nor was this construction found satisfactory in manure spreaders.

The machines were first made very light, the fifty-bushel machines weighing about 1,500 pounds, and they were satisfactory in handling light barn-yard manure, but when the western farmer took up the manure spreader proposition he found that these light machines were wanting; they were not of sufficient strength, and the result is that the weight of the machines has been increased. At first thought this might indicate that they would pull harder, but every farmer knows that a heavy load will pull easier in a heavy wagon than it will on a light wagon, and the same holds good of the manure spreader.

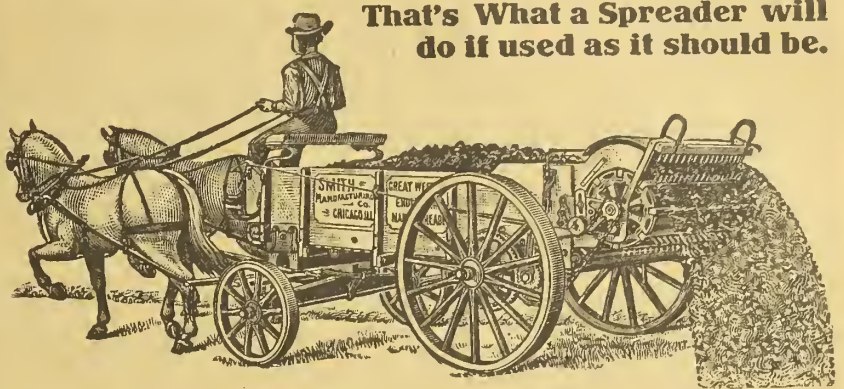

There is probably no machine made that is put under a greater strain than a spreader, as it has the hard lumps of manure to break to pieces before spreading them. The light machines would soon give way; would get out of shape and cause friction and binding. The result is that the machines at the present time are made heavier and stronger than they were.

The first thing to take into consideration in buying any machine is the strength and construction, and this holds good in the manure spreader more than any other farm implement. There were many things that the manufacturers in the early days had to contend with which they could not foresee. The wheels must be heavy enough to carry the load

## \$4.00 to \$8.00 Gain Per Acre.

**\$2,352,700,000.00**

Is the value of Manure in the U. S. per year. That's what United States Bulletin No. 192 says; also that a conservative estimate of loss by handling is about  $\frac{1}{3}$ —\$784,233,000.00—per Annum.  
We publish a book telling you how to stop the loss.

**That's What a Spreader will do if used as it should be.**

If you have 125 loads of manure to spread and you are going to plant twenty-five acres of corn or wheat, or have a twenty-five acre meadow we will tell you how you can increase the value of your crop this year from \$4.00 to \$8.00 per acre, or more than enough to pay for a spreader. We issue a sixty-four page booklet entitled "Practical Experience with Barnyard Manures" which explains the whole situation.

Our plan is not a theory. It is an actual fact, backed up by actual experiments extending over a period of eighteen years. To give you an idea of what this book contains, we show results of experiments made with various crops where five loads of manure were spread per acre by the old method, and five loads by the new method on corn ground. The latter shows a gain of \$4.80 per acre. On another field and

in another state, it shows a gain of \$5.60 per acre, and on a clover and timothy meadow, a gain of \$8.00 per acre.

This book will be sent free to anyone writing us. It is worth \$100.00 to you but it won't cost you a cent. Fill out the coupon below at once and let us mail this book to you. It is brimful of valuable information.

## The Smith GREAT WESTERN Endless Apron Manure Spreader

Spreads all kinds of manure. Makes the same amount of manure go three times as far and produces better results than hand spreading. Has a graduating lever and can be regulated while in motion to spread thick or thin.  
Hood and End Gate keeps the manure away from the beater while loading. Prevents choking and throwing out bunches when starting. Acts as a wind shield when spreading. The rake forms a hopper. Holds all hard chunks in

contact with beater until more thoroughly pulverized.

Endless Apron is one continuous apron (not a half apron). Therefore, always ready to load. It has no reverse gears, springs, catches or contraptions to break or get out of order. Spreads even from start to finish.

Light Draft because the load is nearly equally balanced on front and rear axles. The team is as near the load as it can be worked. Wheels track.

Beater shaft runs on ball and socket bearings; therefore, no friction. Beater is twenty-three inches in diameter. Seat turns over out of the way when loading. Machine turns in its own length.

Simplicity. There are only two levers on the machine. One raises the hood, locks it, and throws the machine into gear at the same time. The other changes the feed to spread thick or thin. Makes it so simple that a boy who can drive a team can handle it.

### HOW IT'S MADE AND WHAT IT'S MADE OF

**Main Frame.** Every stick of timber that goes into the main frame is oak. The main sills are oak, 2x6 inches. The two center strips that carry the center row of rollers are oak, 1½x3 inches. The four oak cross sills are 3x3½ inches, mortised into the side sills.

**Steel Truss Rods.** In addition there are two steel truss and brace rods, one running diagonally from the left front corner of the frame to the right rear corner, and the other from the right front corner to the left rear corner. They are provided with draw bolts so the frame is absolutely rigid.

**The Side Boards** are one inch thick and are supported on the outside by six upright oak stakes, so there is no spreading of the body.

You know that a frame made of oak is better and stronger than one made of pine. You know that a frame having truss and brace rods is better than a frame without them. You know that oak costs more than pine. When buying ask your knife and cut into the main sills and find out what they are made of, whether pine or oak, and find out whether the frame is supported with truss and brace rods. Don't let a dealer or canvasser make you think that pine is as good as oak, for you know it is not.

**The Front Axle** is cold rolled steel with an oak axle cap 3x6 inches running the full length of the axle. Bolted to the oak axle is a big heavy 16-inch malleable iron fifth wheel, braced both front and rear to the lower part of the wood axle cap and to the steel axle. The fifth wheel is oscillating so that if one wheel drops into a rut the body is carried level, and the machine is not twisted out of shape.

**Double Bolster.** Above the fifth wheel we place a double oak bolster, each 3x5 inches. They carry the front end of the machine. This strong construction allows us to set the front axle back under the body of the spreader so the load is nearly equally balanced on the front and rear axles.

We Guarantee that we can carry 1,000 pounds more over our front axle than any machine with an arched axle will stand. The front axle is the same length as the rear axle so the wheels track. In this respect it is just like your farm wagon. With this machine you can top-dress corn and other crops planted in rows.

You know that a wide front axle with a big heavy oak axle cap costs more to make and is better than a narrow arched front axle without any axle cap. You know that a big heavy malleable iron fifth wheel and double bolster cost more

and are stronger than a little light cast iron fifth wheel and a single or no bolster. You know it's better to have a machine with a strong front end capable of carrying the load close to the team than it is to put all of the load back of the front axle.

Our front wheels, wide front axle, big malleable fifth wheel and double bolster cost from \$2.00 to \$3.00 more than the cheap kind, and it adds at least \$10.00 to the value of the machine.

#### THE WHEELS.

Our front wheels have 2½ inch oak spokes; the rear wheels, 2½ inch. The rims are oak, extra heavy. Tires are full ¾ inch thick. A set of our 4 inch wheels weigh 500 pounds. A set of most other 4 inch wheels weigh 375 to 450 pounds.

You know that 2½ and 2½ inch spokes cost more than 1½ and 2 inch spokes. You know a big heavy strong set of wheels that weigh 500 pounds cost more and are better than a light set. Remember, the rear wheels must carry their share of the load and drive the machinery; thus, they must be extra strong. We drive the apron and cylinder from both rear wheels.

**THE POLE IS OAK—NOT PINE.** Our pole is made of tough oak. The single-trees and double-trees are made of hickory. The single-trees are turned round, regular farm wagon style.

You would not think of buying a farm wagon with a pine pole. Don't you know that it is just as necessary to have a good pole on a spreader? You know that pine does not make as good a pole as oak. Then insist on having oak. You know that elm single-trees sawed out like cultivator single-trees are not as good as turned wagon style hickory single-trees.

#### THE WEIGHT.

Of the GREAT WESTERN seventy-bushel spreader is 2,250 pounds. You know that a big load will pull easier on a heavy wagon than it will on a light wagon. It is just so with a spreader, only more so because a spreader has more to do. A light spreader will soon twist out of shape and cause binding and cramping, and when the main frame commences to twist it throws every part of the machine out of alignment. You will see a difference in the draught. You will have trouble and breakage.

Most other seventy-bushel spreaders weigh from 1,800 to 1,900 pounds. You know that a machine weighing 1,800 or 1,900 pounds costs less to build than a great big heavy machine that weighs 2,250 pounds.

Write us at any address given below.

#### If You Want to Know

all about spreaders, the value of manure, how, when and where to spread, fill out the coupon below and send it to us and we will mail you free a book that will be worth \$100 to you and a catalogue of the GREAT WESTERN Spreader.

Name.....

P. O.....

County..... State.....

Have you a manure spreader? Ans.....

4374

on a wagon. The rear wheels of the manure spreader must be heavy enough to carry the load and drive the machinery—that is, the apron and cylinder. It is estimated that one-third of the strength of the wheels is used for

the traction and the other two-thirds for carrying the load. The up-to-date manufacturers of manure spreaders are now using much heavier wheels than they were, and heavier parts all the way through. The front axles are set back

under the load so that the load is practically equally balanced, thus bringing the horses close to the load. The front and rear wheels track so that when spreading over plowed ground or over meadows you make two tracks instead

of four, as the original machines did. If we are to encourage the manufacturers in making good machines we should take into consideration when buying a machine, the weight, the kind of material, the workmanship and the lasting qualities of the machine. There is no question but that it is better to put a few more dollars into a well-constructed manure spreader or any other farm implement than to buy the cheapest thing that can be had.

#### Use of Manure.

(By Mr. Voorhees, Director of the New Jersey Agricultural Station.)

Manure is one of the most important and valuable assets of the farm. In it is contained part of the fertility that has been removed in crops, and in the form of manure may be returned to the soil for the use of future crops. It is to be expected that farmers and others would not agree as to the value of a given quantity of manure, because it is variable in its composition, and because the returns derived from it are also influenced by kind of soil, kind of crop, and the character of the season; hence manure will vary in its value, dependent upon these various conditions. The fact remains, however, that it is a valuable product, and that which has been learned in reference to its value as a source of plant-food, the losses that may occur in handling, and the improvement that it gives to soils, in addition to supplying the essential constituent elements is of very great service.

Manures, like all vegetable organic materials, are subject to change, and changes generally result in a loss; however good, therefore, the management may be, there is likely to be some loss. For example, fermentation begins immediately the manure is dropped, and unless it is properly regulated, losses of ammonia will occur, and it is important that means should be used to absorb this valuable product at the earliest possible moment and prevent its evaporation. It is for this reason that recommendations are made to use plaster and other "ammonia fixers" in the stables, though the advantage of adding these materials is not confined to the fixing of ammonia, since it also results in improving sanitary conditions. It is recommended that

## A Common-Sense Talk On Manure Spreaders

L. H. C. Corn King and  
Cloverleaf Spreaders

**T**HERE'S no doubt that the right kind of manure spreader is a good thing for you to have. It is probably true that there is no other farm machine that, if rightly chosen, is as valuable to the farmer. If manure is spread properly and at the right time, its money value far exceeds what you're apt to think.

But when you buy a manure spreader have a care. There are many of them on the market, and many with various "special features"—fancy affairs that do them more harm than good.

When you buy a spreader look out for these things—and avoid them. What is chiefly to be desired is *strength and simplicity of construction*.

Strength is essential because a manure spreader has to carry a heavy load and the rear end—the machine end—has hard work to do.

Simplicity of construction lessens the chance of the machine getting out of order and gives *light draft*. You know there are a good many manure spreaders that don't get out of the shed after the first year. They make too much trouble and cause too much delay.

are strong and simple. The frame is carefully-selected, well-seasoned lumber, and is strengthened by heavy cross sills and truss rods. They have steel wheels with staggered spokes, and both hind wheels have clutches. The box is made of selected stock and is securely fastened to the frame by heavy steel cleats. Corners are re-enforced with steel plates. Everything is of the very best.

Both of the rear wheels are drivers, and insure plenty of power. A large sprocket with heavy chain drive transmits the power to the cylinder. The cylinder is large and strong, and the square teeth (extra long) are made of the best high carbon steel.

The power for driving the apron is applied on both sides, giving an even movement and making binding impossible. The rollers are attached to the under side of the slats instead of to the frame.

The vibrating rake is a most important feature, and is found only on Corn King and Cloverleaf spreaders. It levels the load and brings the manure squarely up to the cylinder—a thing which is absolutely essential to

proper spreading. The teeth on the vibrating rake are held in place by coiled steel springs so they never break but adjust themselves to the size of the load.

And as a result of simple construction, the operation is simple. Any one who can drive a wagon can operate an I. H. C. spreader, for one lever does it all. There are ten feeds, ranging from ten to thirty loads per acre. The apron stops of its own accord when the load is all fed out. By reversing the lever it returns and again stops when back in position. No need to watch it at all.

These are some of the reasons why you should investigate I. H. C. Corn King and Cloverleaf spreaders before you buy. There are many other good points about them that are explained in our catalogues. There are two kinds—Cloverleaf, an Endless Apron machine, and Corn King, a Return Apron machine; each made in three sizes.

Call on the Local Agent or write for catalogues.

**INTERNATIONAL HARVESTER COMPANY OF AMERICA, Chicago, U. S. A.**  
(INCORPORATED)

where cattle and horses are stabled that, at least, one pound daily of land plaster or two pounds of acid phosphate be applied in the gutters for every three to five full-grown animals. It is, also, a well-known fact that manure lying in heaps is liable to loss because the tendency of the manure is to ferment, become hot, not only causing a loss of ammonia direct, but a reduced value of the nitrogen, because of the burning or "fire-fanging" of the manure. It is for this reason that many recommend that manure be applied to the land as rapidly as it is made, whenever it is convenient to do so. This is, no doubt, the best plan from the standpoint of securing the greatest return, and in the long run, the most satisfactory method for general farming. If the manure is thrown out in the open yard and subjected to a direct rainfall, as well as to the additional rainfall accumulated on roofs of buildings, and which pours into the yard, there is a loss not only of the nitrogen, but also considerable portions of phosphoric acid and potash.

Experiments have shown that manure subjected to this treatment for 100 days will lose from 25 to 50 per cent, or more, of all of its fertilizer constituents, the amount depending somewhat upon the proportion of litter mixed with the manure. The smaller the quantity of litter, the greater will be the loss. If the manure has been carted and spread upon the land immediately after it is made, the spreading will cause the manure to cool and thus stop fermentation; besides the rainfall would carry the soluble constituents into the soil, where they are needed for the use of the plants. It does not follow that even though these statements are true, that farmers should not be careful as to how, when and where the applications are made. If applied on steep hillsides, and upon frozen land in winter, the loss is likely to be much greater than if applied upon reasonably level land and when it is not frozen. Nevertheless, even here the losses are not likely to be as great as if left in the open yard.

It must be remembered, too, that the value of farm manure is not measured entirely by its content of the fertilizing elements—nitrogen, phosphoric acid, and potash—which directly increase the yield of crop, but it is also valuable because it contains vegetable matter which, when applied to soil, improves its physical character, making it more absorbent, more retentive of moisture and heat, and increases the tendency to decay of soil substance because of harboring more comfortably those organisms which assist in making inert plant-food available. It is for this reason, too, that in general farming, particularly, it is much better to apply six to eight tons per acre over a large area than fifteen to twenty tons per acre over a small area, because beyond a certain point the indirect benefits derived from the application of vegetable matter are relatively less. In other words, by distributing the manure over a reasonably large area the indirect benefits of the organic matter in the manure are increased. It is also an important matter to have the manure evenly distributed rather than thrown in

## Break Loose from the Creamery Trust

ORGANIZE, CO-OPERATE AND CONTROL YOUR PRODUCT

You do the hard work of dairying and you ought to reap the profits.

You won't get them so long as you are at the mercy of combinations and trusts.

Join with 2000 Iowa Farmers to manufacture and market your own product.

Cut out the gamblers and speculators who are standing between you and the consumer.

Our association has already in eight months forced the distribution of at least \$300,000 in extra profits to the farmers of central Iowa.

Membership growing rapidly and the trust is on the run. Won't you join us at once for fair treatment now and future protection? Write today for prospectus and full particulars. Slip us a can of cream and get our test and prices.

large chunks or small heaps over the land, for by the latter method the benefits are uneven and irregular, many plants being overfed and others underfed, and besides the indirect benefits are very materially reduced. In the case of market gardening or other lines of "intensive" practice, where the purpose is to force a rapid growth, as well as to improve the physical character of the soil, and encourage warmth in the early season, manures may be applied in the row, or in the hill, with very great advantage, as, for example, in the growing of sweet potatoes, white potatoes, and other crops upon light soils, where it is desirable to concentrate the supplies of food, not only, but to provide a more favorable condition for the development of the crop. Under these conditions, too, if the crops are of high commercial value, the extra labor required in handling the manure—that is, in composting and reducing its bulk, while at the same time increasing the availability of the constituents may be more profitable than to use the fresh or coarser products. Another instance of the fact that the values of manures are dependent upon the kind and character of crop grown, as well as the kind of soil.

Farmers should also remember that

their straw stacks to rot down, when if the straw was cut up and used as an absorbent in the stables, it would add materially to the value of the manures from this standpoint, as well as preventing losses which now occur.

#### Value of the Manure Spreader.

Subscriber, Lee County, Illinois.

I think there is no question regarding the value of the spreader over the old way of handling manure, provided one has enough manure to pay to keep one. I have used one for three years and started in on the theory that it would be better to go over the land with a light coat and repeat oftener, rather than to spread on thick. Up to date I have manured about sixty acres, and will say here that one cannot spread the manure so light as not to be able to see the benefit on the next crop.

I would offer a suggestion here to men about to build barns. Behind the stock always build wide enough for the spreader to go through, so that the manure can be taken from the barn to the field. This winter we are keeping fifty head of cattle in the barn at night. The barn must be cleaned out every day. Our spreader was too large to go in the alley-way, so to use it would mean that we would have to haul the manure out to the yard, pitch off there and then reload onto the spreader. This was too much work for yours truly, so I took the trucks from a corn shredder, cut the axles down five inches, put an old wagon box on and haul direct to the field and pitch off by hand.

I do this work myself and try to make the manure go as far as possible, but am sure that one load put in spreader would cover a half more land. However, this is the best that I can do, as I must consider the expense for labor. To the man who keeps ten head or so of stock I don't believe it would pay to buy a spreader. The cost would be greater than the benefits.

Now, as to the proper place for manure, I think I should spread on grass land. But on this farm the meadow has been covered, so I am putting on corn land that has been in corn about eight years. We had about two or three inches of snow here a few weeks ago and then a hard freeze, followed by a heavy rain, which lasted for twenty-four hours. The land is very nearly level and everything was afloat. But the question came up in my mind, how much of the seventy loads of manure that I had hauled out this winter had been lost over the old way of putting in the yard and hauling out next summer? Taking into consideration that I am a tenant and do not know how long I will stay on this farm, manure applied this winter will be of benefit to me in the coming crop.

#### The Manure Spreader.

Alex. A. Arnold, Trempealeau County, Wis.

In a recent issue of your paper I find a suggestion that readers who have had experience with the manure spreader kindly give same for the benefit of others. In response to this invitation I will say that I have used a manure spreader for some time and only wish I had two. I have no objections to

them in any regard, except we cannot use them when there is snow on the ground, as the wheels will slip and the machine will not work. The machine works best during the summer when there is little mud and with fairly well decayed manure. However, we can use it with all kinds of manure if it is properly loaded.

I have a farm of 320 acres and want to spread the manure over as large an area as I can, for in this way we get the best and greatest returns, and to this end the spreader does better work than we could with a fork, and in a shorter time. On a large farm employing three men a farmer should have two spreaders. Then he can have one man to each spreader and one or two in the yard and the manure can be easily and quickly handled. With the modern machine there is no stopping the team every few minutes as the manure is being unloaded. It is a good machine for a lazy man who likes to ride and is anxious to get on his load so he can be off for another ride. It is also a great labor-saving machine.

I like to put the manure on the land when it is not frozen, as the soil then absorbs the fertility right away. My preference is to put the manure on meadows and pastures and in this way enrich the land so that it is not necessary to add more manure to insure a fair crop of corn and potatoes. The manure being spread evenly does not interfere with the hay as would be the case if it were spread with the fork. There is little land that is not benefited by the proper application of manure of the right quality, which it will be if the liquid manure is saved and mixed with the solids.

#### CHARACTER OF MANURE FROM DIFFERENT ANIMALS.

There was a time in the history of corn-belt agriculture when it was highly unpopular to write on problems relating to farmyard manure. The unpopularity of the subject was due mainly to the fact that soils were so rich that the chief aim was to reduce the raging fertility. Ten, twenty, thirty or forty years of cropping, however, changes men's views on a subject of this kind and today the majority of farmers are endeavoring to handle their farmyard manure so as to get out of it the largest possible percentage of fertilizing elements.

In a bulletin on the subject of farmyard manure, prepared some time ago by the Department of Agriculture, Washington, some little attention is given to a description of the various kinds of manures made on the farm. Summarized, these are as follows:

Sheep manure contains a small amount of water and is, weight for weight, the richest manure produced by any of the common farm animals. It is what is called a hot manure, fermenting rapidly with the development of heat. Like horse manure, it is especially likely to lose ammonia.

Horse manure is very dry, and is, therefore, difficult to thoroughly mix with litter. It is a hot manure, undergoing fermentation rapidly and generating a high heat on account of its loose texture. It is likely to lose ammonia even more rapidly than sheep manure, and requires careful management from the moment it is voided. The composition of horse manure is more uniform than that of any other farm animal, chiefly because the food of horses is more uniform. The urine is especially rich.

Hog manure is very variable in composition, owing to the variable nature of the food supplied to this animal, but is generally rich, although containing a high percentage of water. It generates little heat in decomposing.

The manure of cattle, like that of hogs and for the same reason, is variable in character, but is generally poorer than that of other farm animals on account of its large percentage of water. It decomposes slowly and develops little heat.

Poultry manure is very rich in all the fertilizing elements, but especially so in nitrogen, owing to the fact that the urinary secretions, which contain large amounts of nitrogen as well as potash in readily available form, are voided with the solid excrement. It quickly loses nitrogen, however, by fermentation, if not properly mixed with absorbents or preservatives. In no case should alkaline substances like lime, wood ashes, etc., be mixed with poultry manure.

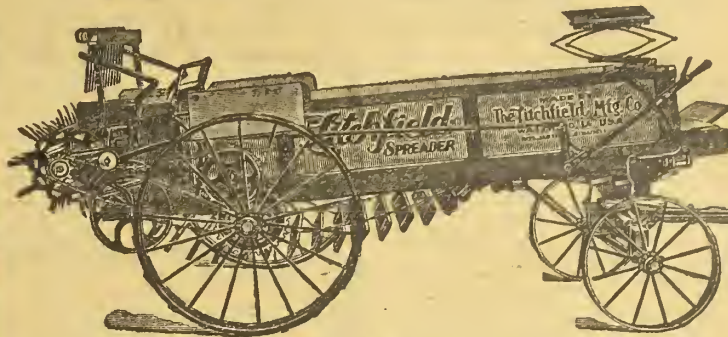

Considering the varying character of the different manures found on the average farm must lead one naturally to conclude that there would be much advantage under ordinary circumstances if these manures could be mixed when they are taken from the stables and stalls. This is especially true if the manure cannot be taken directly to the fields. The mixing of the cow manure with horse manure, for example, tends to keep down the temperature, and it will, therefore, prevent losses of fertilizing material that would take place when horse manure gets very hot.

The use of litter or manure carriers in modern times makes it much more practicable to mix the manure than was formerly the case and it is not an uncommon sight to see men placing in the same pile, by the use of these carriers, the manure from both the cow stable and the horse stable, and even in some instances from hog sheds.

The main thing after all in the great central West is to realize that only by taking good care of farmyard manure is it possible for us to keep our soils up to their present productive capacity. When the decision is made to handle manures wisely it will only be a short time until the best way to do things will develop.

A subscriber, Mr. Frank Lane, responds to the inquiry of another subscriber who desires to remove blood warts from the skin of young mules. He says to rub the warts twice daily until the blood almost starts and then use dry soda freely. He says that this will do the work every time.

## HOW IT IS BUILT

THE LITCHFIELD ENDLESS CONVEYOR.

OURS is not an imitation Manure Spreader. We hope our readers will kindly bear this in mind. Our aim is to set the pace which others may follow (if they can) and imitate if they care to. Money makes a hard fight commercially, and as there is no money in something they are not permitted to build, our competitors, of course, relentlessly fight the self-cleaning conveyor, which is fast making an everlasting reputation for the Litchfield Spreader.

The Litchfield endless conveyor is constructed of forty-nine sections. These sections are made out of selected material, lumber that is light and still tough and strong. Each section is bound by two steel hinge plates, extending across it and riveted firmly to the section. These hinged plates prevent it warping or splitting. Each section is fastened to the conveyor chains by solid, riveted hinges, which cannot get loose, and when the conveyor chains are coupled, the whole conveyor becomes one moving unit.

The conveyor chains travel in hard steel channel tracks and the oiling of these tracks keeps the hinges thoroughly oiled and the chain links also, thus giving long life and great endurance to the moving parts of this conveyor. Each section is so hinged that as the conveyor comes up at the front of the machine it automatically adjusts itself, forming a solid floor as it moves along. When it passes over the rear of the machine, each section automatically changes its position, hanging down edgewise until it reaches the front of the machine again.

It will thus be seen that no machinery whatever is necessary to make this conveyor automatic in its action. It simply assumes its proper position by gravity means. All material falling through from the spreader box is not obstructed by the returning or under conveyor, but passes right on through to the ground. When the beater wheel "kicks" the material in on top of the under conveyor as it invariably does on all machines, nothing stops, but it goes right on through to the ground.

Our endless conveyor is "Exhibit A" in our case against competition. All we ask is that our trade take pains to search out the quality in the Litchfield Spreader and in others. In this one feature alone we are offering our trade an idea "hatched out" a few years ahead of the regulation time. Excuse us if we ask you to read our next issue.

Des Moines, Iowa.

## WHERE TO PUT FARMYARD MANURE.

The following communication has been received from one of our subscribers, Mr. B. Ellsworth, of Reno county, Kan.:

I recently purchased a manure spreader and I am now spreading manure on my wheat ground at the rate of about six loads per acre. I am hauling old straw stacks and straw stack bottoms and will have enough to cover about forty acres. The soil is light and sandy and has been farmed about twenty-five years without anything to enrich it. Do you think it is a paying investment to put manure on the soil in this way?

Manure applied with a spreader in this way will benefit any soil. In the case of wheat, when put on at the rate of six loads per acre on a light soil, it will act as a mulch during the winter yet the covering will not be sufficient in any case to smother out patches of the wheat. In the spring the wheat will come up through this light covering of manure, and the covering will tend to prevent the free evaporation of moisture. It would not be surprising if under these circumstances this light application increased the yield anywhere from five to ten bushels per acre. Indeed, this is a conservative estimate considering the fact that the land is thin and has been cropped heavily for some time.

## ANOTHER SUBJECT FOR DISCUSSION

One of our subscribers asks for data relating to the actual loss that occurs annually that is traceable to such pests as rats and mice. This subscriber states that he has written to the department of agricultural at Washington and to several experiment stations, but up to date has failed to secure any satisfactory answer.

He is of the opinion that a general estimate given by practical men would be the most accurate way of getting at

# Let Me Quote You A Price ON (We Pay the Freight) On The AMERICAN Manure Spreader

We will send you the famous American Manure Spreader direct from our factory, because we've stopped selling this celebrated machine through jobbers and dealers. You save their profits now. You get the wholesale factory price on the best Spreader made—not a "cheap" Spreader, but the best one in the market.

## I Don't ASK You to Send Cash

as we send you the American and you pay us on easy, liberal terms—letting the Spreader really pay for itself as it earns for you—after you've tried it free. You now get the American, recognized as by far the best Spreader, for no more than you must pay for an ordinary Spreader. It is the

## Lightest Draft Spreader Made

That saves your horses. The machinery works only when you start it in your fields—in at rest as you drive out. That saves wear and tear on the Spreader. And you ought to use a Manure Spreader. An American Manure Spreader will make your manure cover more ground, your ground grow more crops, your crops bring more money, and it will make your land worth more dollars per acre. The American has 40 per cent more exclusive features than any other Spreader. I want to tell you about

these practical exclusive features which make the American the only Spreader for you to buy at any price. The American is the Standard of the world. We allow

## 30 Days' FREE Trial

on every American Spreader made. We want every customer to see and try an American Spreader. We want every customer satisfied and to prove that our spreader is just as represented, therefore we say

## Test It in Your Own Fields

If it is not just as represented you can return it. We pay all freight—BOTH ways—trial being FREE. My low price is for the American Manure Spreader delivered at your station—freight paid—including free trial—giving you the dealer's and jobber's profits, and—

## If Satisfied—Take Your Time Paying

for your American Manure Spreader. Now, I want you to know my new low price and I want you to know all about the American Spreader.

## Write Today for My Price

and I'll send it promptly. Also my free catalogue and booklet, which tell you all about the American Spreader, and Fertilizing. You'll be interested in both. You'll be glad you wrote. A postal will do. Don't buy until you investigate this. Take your time investigating, but—WRITE TODAY.

**W. W. Collier, Gen. Manager**  
**American Harrow Co., 145 Hastings St., Detroit, Mich.**

this subject and we submit the matter for discussion. Of course mice and rats live principally on grain, but there are instances when rats especially do a good deal of damage in the chicken yards.

We solicit a few short articles on this topic from our readers. In order to make the answers harmonize so far as possible, it might be wise to give an estimate as to the amount of grain consumed by these pests per quarter section farm, and also an estimate of the loss of young chicks on account of the presence of rats.

## STANDARD POLAND CHINA RECORD ASSOCIATION MEETING.

The annual meeting of the stockholders of the Poland China Record Association of Maryville, Mo., will be held at Live Stock Exchange building, Stock Yards, South St. Joseph, Mo., on Wednesday, February 13th, at 9 o'clock. At that meeting there will be the election of president and one vice president from each state and also seven directors. The president of the association, Mr. A. B. Garrison, and the secretary, Mr. Geo. F. Woodworth, are both anxious that this meeting be well attended.

## THE PERCHERON REGISTRY COMPANY.

The annual meeting of the Percheron Registry Company was held in January. After the reading and approval of the minutes of the previous meeting the reports of the secretary and treasurer were read.

These reports showed the company to be in the very best of condition and that the business for the year 1906 had more than met expectations.

The registrations for the year in-

creased about 300 over the previous year and with a good increase in membership.

The balance in the treasury was \$3,127.68, which is an increase of \$1,016.10 over the previous year. This balance is net, there being no debts on hand of any nature whatever.

The usual liberal prizes will be offered for the fairs and expositions of 1907 as were offered in 1906.

A resolution was adopted recommending the passage of a law by each state, similar to that of the states of Iowa and Wisconsin, concerning the standing for service and sale of stallions, whereby such stallions are required to be registered with the state before being allowed to be sold or to stand for such service.

The matter of holding a meeting in Chicago during the International Exposition was left to a committee for decision and action will soon be taken, at which time due notice will be given each member.

The secretary was instructed to start work immediately on the preparation of volume No. 3 of the Percheron register for the year 1906 and the work has progressed so far that bids will be received for its publication within the next three weeks.

We believe that each member will be more than pleased with the condition of the company's affairs and the manner in which it is conducting its business.

The same officers were elected to serve the ensuing year.

## WHEN ARE HOGS IMMUNE FROM DISEASE?

The following communication has been received from an Iowa subscriber, Mr. A. H. Gerrard:

I would like to have the opinion of some of your readers as to how long a person must

## Every Farmer and Stockman

Should have a good fur coat and robe. Send us your horse and cattle hides and we will make you a coat or robe that will always be soft, pliable, wind, water and moth proof. Quality of work considered our prices are the lowest. We guarantee satisfaction. FILL in booklet on hides, also shipping tags and prices. Write today.

**IOWA TANNING CO.**

wait after he has had cholera on his farm before it is safe to buy other brood sows. Is a brood sow safe to breed after she has passed through hog cholera? How long would it be before you could put hogs that have passed through cholera on full feed?

These are inquiries that we submit to those of our readers who have had experience with this disease. We do not expect that all will express the same opinion, but much light will be shed on the subject even though a variety of views are expressed.

## BABY COVERED WITH SORES.

Would Scratch and Tear the Flesh Unless Hands Were Tied—"Would Have Died But for Cuticura."

"My little son, when about a year and a half old, began to have sores come out on his face. I had a physician treat him, but the sores grew worse. Then they began to come on his arms, then on other parts of his body, and then one came on his chest, worse than the others. Then I called another physician. Still he grew worse. At the end of about a year and a half of suffering he grew so bad I had to tie his hands in cloths at night to keep him from scratching the sores and tearing the flesh. He got to be a mere skeleton, and was hardly able to walk. My aunt advised me to try Cuticura Soap and Ointment. I sent to the drug store and got a cake of the Soap and a box of the Ointment, and at the end of about two months the sores were all well. He has never had any sores of any kind since. He is now strong and healthy, and I can sincerely say that only for your most wonderful remedies my precious child would have died from those terrible sores. Mrs. Egbert Sheldon, R. F. D. No. 1, Woodville, Conn., April 22, 1905."

Someone asked if a hen should be set solid or leaded, or whether she should have ground wires or fuse links as a protection against lightning or not. The only thing we know about it is that she should be set at least three weeks.

No. 656. Combination Top Buggy and Driving Wagon with Stanhope Style Buggy Seat and Bike Gear. Also Extra Seat for Open Wagon. Price complete, \$61.50. As good as sells for \$25.00 more.

## 34 Years Selling Direct

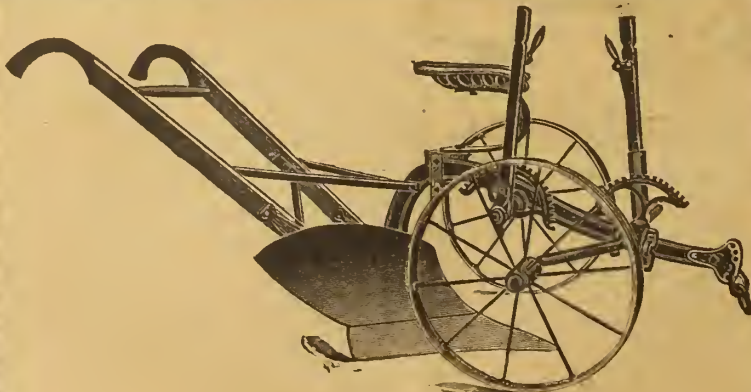

Our vehicles and harness have been sold direct from our factory to user for a third of a century. We ship for examination and approval and guarantee safe delivery. You are out nothing if not satisfied as to style, quality, price.

We Are The Largest Manufacturers In The World selling to the consumer exclusively. We make 200 styles of Vehicles, 65 styles of Harness. Send for large, free catalogue.

Elkhart Carriage & Harness Mfg. Co., Elkhart, Ind.

No. 315. Light Extension Top Buggy. Price complete, \$73.50. As good as sells for \$25.00 more.

## The Banner Riding Attachment.

The illustration shown above represents a walking plow with banner riding attachment, which is manufactured by the Banner Plow Company, of Coffeyville, Kan. This company guarantee for the Banner Riding Attachment that when properly attached to a good walking plow or lister it will cause them to run at a more uniform depth, turn a smoother furrow and work in harder ground than without the attachment. It is constructed by skilled workmen on scientific principles, of the very best material. Every casting on the attachment is malleable and will bend without breaking. Your implement dealer will allow you to try one. If he has none in stock ask him to order one for you or write them for circulars and full description. The price is \$15 for your dealer. Every one guaranteed. If they have no agent in your locality write them—they have a proposition to make regarding agency which will interest you. See further particulars on page 10. When writing please mention this paper.

## Farm Furrows

Turned by a Practical Farmer.

If there is anything we enjoy these winter evenings 'tis a half hour with Ben Davis before retiring.

We think one of the best by-products of butchering is head cheese. It is easily made and certainly makes fine eating.

Don't put off breaking the corn stalks too long or spring may catch you napping. This is a job that can only be done in clear, cold weather.

They say that digester tankage is good for cows, but how about the milk? We would rather have ours made of clover hay and good corn and oats.

A little pig makes a fairly good thermometer. In real cold weather a little pig can get in about the smallest space of anything I have ever read about.

Whenever I see the mercury creeping down toward the bulb of the thermometer, I always think that there is this compensating factor—it is hard on disease germs.

Since putting in a furnace I have often wondered how we got along without it. I would advise all brother farmers who are now using stoves to lay their plans to install a furnace.

Keeping a set of books on the farm does not bring in any more money, but it will make anyone do some serious thinking before moving to town, with a family, to get a job at \$50 or \$60 a month.

The time for breaking the three-year-olds will soon be at hand. Don't wait until you are ready to slap the harness on them and introduce them to a taste of work before you get them accustomed to the halter and the barn.

A subscriber, Mr. T. P. Pigg, says that if you will scatter a little lime or ashes among your ear corn you will never be troubled with rats or mice. It seems that the lime ruins their eyes and they never pay the crib the second visit.

I have always claimed that such labor as carrying wood, coal, water and the milking of cows is not suited to the average woman's ability. Man's muscle is built for these things and a woman's strength should be saved for the higher duties of the home.

A careful reader of the Furrows says

he has a cistern twelve feet deep curbed with wood. The top is rotting off and it is filling in from the bottom with quicksand. He desires to know, from some other reader, how is the best way to handle this cistern.

We are coming to believe more and more that the work of the road drag is a lasting benefit. Our roads have been in the finest kind of shape this winter, and we believe it is just because the boys got out at different times late in the fall and planed down some of the ridges in the highway.

A Connecticut dairy farmer recently engaged a foreigner by the name of Ole Ogliguski. The employer handed him a three-legged stool and pail and introduced him to his favorite cow, a good, easy milker. Ogliguski placed the stool upside down under the cow, put the pail between the legs of the stool and stood waiting for results.

We still have a few fall vegetables in the cellar, such as squashes, pumpkins, cabbages and beets, and we cannot help but feel that every meal we have of one of these vegetables has fully paid for the time that we took in laying them by last fall. This is one of the advantages of farm life and one that so many people fail to appreciate. Vegetables take the place in man's ration that silage does in that of the animal.

Quails are worth \$1.20 a dozen in the butcher shop, but on our farm they are worth a couple of dollars apiece, if only for their beauty and companionship, to say nothing of the value they are in the summer when it comes to getting away with bugs and caterpillars.

Rabbits are unusually plentiful in our country this winter, and it seems we are no exception to this condition. The mild winter has kept food plentiful and they are as fat and tender as any meat we ever ate.

A great deal of anxiety over kerosene lamps in children's hands can be prevented by the use of tallow candles. Beef tallow only brings a few cents at the butcher shop while if made into a supply of candles will be worth more than one imagines. We use an old candle mold once having done duty in an Illinois log cabin. It makes a dozen candles at a time. If the children drop a candle it goes out; not so with a lamp.

Every farmer should have a scale these days. Farming is a business that is inexact enough when we try to make it as exact as possible. I notice the boys take a great deal more interest in things when they can measure value over a scale.

Wagon-Box  
Manure Spreader

Only Endless Apron Force Feed Spreader Made.

JUST that:  
It's been a long time getting here—but I've got it.  
The Only Endless Apron Force Feed Manure Spreader in the World.  
The Only Wagon-Box Manure Spreader on the market.  
Think of the combination!—Just the two things in a manure spreader the farmer has always wanted.  
The wise ones said it couldn't be done. I've disappointed them.

First—they said a wagon-box spreader wouldn't work. My hundreds of well satisfied customers have already stopped that talk.  
Then—when it came to an endless apron force feed machine—they said, "impossible". Did you have free mail delivery, telephone or a cream separator ten years ago? Nothing is impossible! You will say so when you see how simple and how wonderfully effective my great new improvement is.  
It is simply turning the spreader business right end to and giving the farmer a chance.

Every farmer can afford a Galloway Wagon-Box Spreader.  
I want every farmer in the United States to own one.  
That's why I sell it direct to you, saving you every cent. (Tell your neighbors.)  
Right at the start I am selling this machine for \$59.50, freight prepaid. At retail it would cost you \$75.00. I also save you tying up \$50.00 to \$70.00 in a spreader truck useless eleven months in the year.  
My guarantee is the broadest possible—I back it up to show you that I mean business by a \$25,000 legal bond.  
Then to absolutely convince you I say, "try one of my spreaders for 30 days on my free

"THE ONLY WAY IS THE GALLOWAY—FROM FACTORY TO FARM."

Backed By \$25,000 Guarantee.

Fits Any Truck  
Saves You 50%

William Galloway,  
Builder of the Only Endless  
Apron Force Feed Manure  
Spreader in the World.

plan." Let me send you one to take out in the field to use, or abuse if you want to, for 30 days. If it's not worth more than my price—take it to the depot—ship it back—and I'll return your money.

Why not get everything that's coming to you out of your land? That manure heap outside of your barn will buy my spreader twice over for you.

Every farmer has been saying,—"I must own a spreader."

Forty-nine out of fifty say the old style horse-killing machine is too high in price. Isn't that a fact?

Now, I claim the Galloway is right in every particular.

Made in three sizes—capacity 50 to 60 bushels. Fits any truck, narrow or wide tread. Lightest draft and simplest machine made and the work it does under all conditions is perfect.

Why not let me send you a machine—and let you be convinced by the machine itself, without sending me a cent? I'll do it today if you will write me.

I have just this further clincher to offer you. For a limited time I will make a proposition to the first farmer owning a Galloway Spreader in every community whereby he can

partly or entirely pay for his machine without a bit of work done. It's a strictly business proposition and will positively hold good only for the first few farmers buying. Either send in your check pinned to this ad, telling me the style of truck you use, or write me at once, postal or letter, so I can send you by return mail my free booklet. Address me personally.

WILLIAM GALLOWAY, President,  
WILLIAM GALLOWAY COMPANY,  
100 Jefferson St., Waterloo, Iowa.  
Ask me also for my large Farm Implement Catalog.

down by this time of the year is mighty hard stock to feed and get into thrifty condition before the grass starts. If you have had an experience of this kind this year just make a great big memorandum of it, for this has been one of the easiest feeding winters we have had in years.

**PILES CURED IN 6 TO 14 DAYS.**  
PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

McKeever & Sons' Sale.

One of the most successful Poland China sales held so far this season in Nebraska was that of Messrs. Wm. McKeever & Sons, of Hubbell, Neb., on January 31st. The day was fine and a good crowd of breeders from Kansas and Nebraska gathered to see one of the best offerings of the big kind of Poland Chinas that will go through a sale ring this year. The top price was \$431, paid by Mr. Phil Dawson for No. 11 of catalog, a daughter of Chief L, and from an Expansion dam. Next highest price was \$210, paid for No. 25, a daughter of Mogul, and one of the growthiest gilts that will be sold this year. The entire offering made an average of \$74.80, which was very satisfactory to all concerned. Below is a list of those selling at \$50 and over:

THE NEW SUPERIOR GRAIN GRADER.

The J. L. Owens Company, of Minneapolis, Minn., makes a strong statement in their advertisement on page 10 of this issue regarding their New Superior Grader. The company make certain claims for their "New Superior" and agree to send it out on a thirty days' trial free, freight prepaid, at the end of which time it may be shipped back at the company's expense if this grader does not do everything that is claimed for it. This company ought to be able to make a good grader, because they have been in the business a long time; indeed, they must

# Increase Your Corn Crop

**THIS BOOK FREE**

**Will You Write Me a Postal for a 50c Corn Book?**

**Do it NOW—while they last.**

The book is from the pen of Professor A. D. Shamel of the Illinois Experiment Station—recognized everywhere as "the man who knows"—about corn.

It's full of photographic illustrations, and explains fully about selection—modern corn breeding and cultural methods.

The American Corn Expert, Professor Holden, demonstrates his Seed-Testing Machine on page 17 of this book. The book should be in the hands of every up-to-date corn-raising farmer—it will help him double his corn crop.

**All I ask you for this 50c Book**

dresses of three of your former neighbors whom you understand will be in the market for a riding plow this season. It will take only a few minutes of your time, and a postal, and I will send you the book prepaid by return mail.

**See that little girl lift her father with one foot?**

He weighs 196 lbs., and she is only 6 years old—yet she can lift him with only one foot.

WHY—and what does the "WHY" mean to you?

Simply this—it means that the Emerson Foot Lift Plows are the easiest handled in the field of any plow made. FOOT-CONTROL ALWAYS—in or out of the hardest soil. Manage the Plow with your Feet—your Horses with your Hands.

The name EMERSON means easiest to handle—lightest draft—and most durable.

Every EMERSON Gang Plow is equipped with 2000-lb. magazine box and axle. When you buy an EMERSON you buy for a lifetime, not for a few years, because an EMERSON will last as long as you live. I will send you, FREE, our Implement Literature, and the Corn Book if you act promptly and write the postal TODAY. I gave away 100,000 of these books—then the supply ran out. They went like wildfire. I've only a limited number this year, so don't wait till they're all gone.

Putting off may mean I won't have a single copy to send to you.

Write TODAY—Now—while you think of it.

S.H. Emerson,  
Emerson Mfg. Co.,  
Rockford, Ill.

Prof. Holden Demonstrating the Seed-Testing Box

**HOW TO GROW CORN**

make a good grader if they maintain the reputation already established. Some of the finest mechanical principles to be found in any kind of machinery are employed in the make-up of the New Superior, and the man who buys this grader, therefore, gets the advantages of the unique adaptation of these mechanical principles. The company recently published a book on "How to Increase Your Profits." It will be sent free upon application to those of our readers who are interested enough in it to ask for a copy. Address the J. L. Owens Company, 614 Superior St., S. E., Minneapolis, Minn., and please mention this paper when you write.

THE FARMER AND CREAM SEPARATOR.

It is interesting to note the improvements that are being brought out to make the work easier and more pleasant down on the farm, and while the work is much easier done, with improved machinery one is now able to save that which was wasted a few years ago, thereby increasing the profits 25 to 50 per cent. Notable among recent improvements are those made in cream separators. We have in mind the Improved 1907 Model Separators which the Davis Cream Separator Company, 54L N. Clinton St., Chicago, are showing in their new catalog, which they will send to anyone interested, postpaid upon receipt of a request. This improved machine skims to a trace, so close you would never know there was ever any butter fat in the milk, and is easily regulated to skim cream of any thickness, either low, medium or high test, as desired. The wonderful cone bowl is made so perfect it is never out of balance. Another thing: If you knew the low prices these machines are selling at, straight from the factory, you would be surprised and want to buy one, but price is not the only thing about this machine. While prices are low, the quality is high, and each machine fully guaranteed. We would advise anyone interested in separators to write at once for catalog No. 118, addressing as above. With high-grade, standard cream separators selling at such low prices we can't help but feel that any dairyman who does not now buy a cream separator is simply wasting 25 to 50 per cent of the profits he should have, and doing twice the work that is necessary about the dairy.

HINTS, SUGGESTIONS, DEVICES  
AND CONDENSED LETTERS  
FROM CORRESPONDENTS.

A NEW IDEA IN HOG WATERERS.

One would almost think that everything that might be discovered or invented in the line of hog waterers had been brought to light. Still, we doubt if many of our readers have ever seen or had experience with a hog waterer similar to the one which we are about to describe. This waterer has been in use on a certain farm for a number of years and has proved entirely satisfactory; in fact, it has been found to have so many

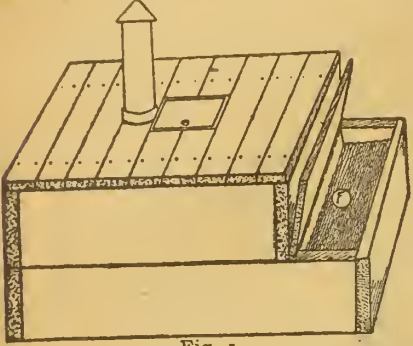

Fig. 1.

superior points that one of our readers has asked us to explain in detail so that its construction will be perfectly clear to each reader. Fig. No. 1 shows the waterer from a side view. The door in the top is for feeding the heater, and

water gains entrance to the tank through a pipe from some supply tank, or else is pumped in. The letter F shows a float on the surface of the water which appears in a small trough to the left of the diagram. This may be covered over in cold weather by door shown in the diagram. The tank throughout is constructed of two-inch material that is matched at the joints, and the cracks are filled with tar or any other material that will prevent leaking.

Now the point of construction in this tank which is different from that of any is shown in Fig. 2. The front side of the trough, from which the hogs drink, has been removed in Fig. 2 for the purpose of making plainer the diagrams. The top has also been left off. The partition between the trough from which the hogs drink and the main supply of the hog waterer, instead of being of wood, is of galvanized sheet iron. The reason for this is that wood is a poor conductor of heat while the sheet iron is a good one. The warmth from the water in the supply tank of the waterer is easily conducted through the galvanized sheet iron partition, and thus keeps the water in the trough from which the hogs drink at a higher temperature than if a

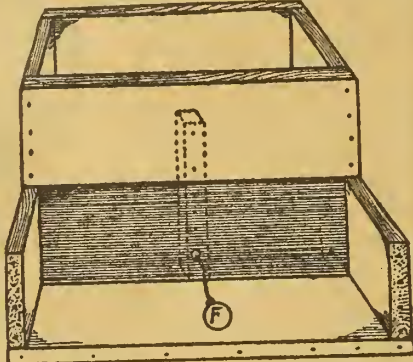

Fig. 2.

wooden partition were used. This is the important feature in the construction of this waterer. Those who have had experience with hog waterers of different types will know how hard it is in real cold weather to keep the water in the trough from which the hogs drink from freezing, even though the water in the tank that supplies the trough is at a fairly warm temperature.

In Fig. 2 the float is again represented by F, which is attached to a copper wire that passes through a hole in the galvanized iron which continues through a 2x4 shown by dotted lines. This hole is generally a half or three-quarters of

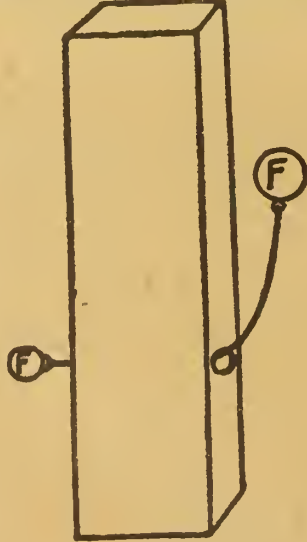

Fig. 3.

an inch in diameter and connects the trough with the supply tank of the hog waterer. Fig 3 shows this 2x4 and the two floats. The float inside of the supply tank is made to close the hole connecting the supply tank with the hog trough. When the water has risen sufficiently high in the drinking trough the float in that trough draws the float on the inside of the supply tank against the hole that prevents further outflow of water.

While this waterer does not differ in most of its particulars from other waterers, it does differ from most of them in that it has the drinking trough separated from the supply by a metal partition. This is the distinct feature about the waterer and it is claimed that one cannot appreciate the difference it makes until he has seen it in actual use.

In the attached illustration our readers will find a home-made wood rack

# Amatite

## ROOFING

# NEEDS NO PAINT

DO YOU USE A ROOFING THAT REQUIRES PAINTING AND COATING?

If so, do you realize that the coating and painting will probably cost as much, if not more, than the first cost of the roof itself?

When you buy a roofing that has to be coated, you must consider the cost of maintenance as well as the first cost. If you do this, you will find that coated roofings cost you just about twice the original cost.

If you try to save money by not coating such roofs they will soon leak and rot away.

The best way out of the difficulty is to buy a roofing that requires no coating, such as Amatite. This Ready Roofing has a special mineral surface which makes painting entirely unnecessary. The first cost of Amatite is the whole cost.

After it is once laid on the roof it costs you nothing to keep up.

Furthermore, the price of Amatite in the first place is less than that of almost any other ready roofing. It is by far the lowest priced of the good ready roofings.

When you get prices don't forget to count in the cost of putting on paint every year, and you will be sure to come back to Amatite as the cheapest and best.

**FREE SAMPLE** Let us send you at once a SAMPLE of AMATITE and a Booklet of information about it. We want you to see how much better it is than the kind that has to be painted.

which W. F. Carlson, of Hamilton county, Iowa, finds very convenient in hauling poles or cord wood. The rack is described as follows: "Take two poles twelve feet long and four inches in diameter. Trim these down so that they will lie well on the bolsters of the wagon. Bore holes one and three-quarter inches in diameter, two and one-half

feet apart, the entire length of the poles. Into these fit small poles to form the bed of the rack. Now bore holes for the upright stake close to the cross pieces. Cut these stakes four and one-half feet long and fit them. When this rack is used the poles should be piled on lengthwise, while for cord wood the timbers are laid crosswise." Another one of our subscribers finds the rack very handy for hauling fodder as the bundles can be piled up crosswise and kept in very good shape for unloading.

**Do Healthy Animals Need a Tonic?**

This question is often raised among stock feeders when considering the use of stock foods. They ask the question, "Does a person in health need medicine?"

It is probably true that if stock were fed for the same purpose that the human being is nourished, there would be no occasion for the use of medicinal tonics under ordinary conditions.

We have most of us learned by experience the evil of over-eating and endeavor to select foods most agreeable to our digestion. Furthermore, we exert an effort to consume only sufficient food to sustain life and repair waste. In fact, we do not aim at putting on weight, and in many cases just the opposite result is hoped for, but if the cow, steer or hog would be given only sufficient food to sustain life and repair waste, no gain would be perceptible; we fully realize that the food consumed that doesn't produce additional weight or milk is entirely wasted, the profit, therefore, being derived from the food consumed in addition to that which is required to sustain life and repair tissue.

Over-feeding, therefore, is a necessity; and the results similar, as in the case of the human. Then again, the animal has not the opportunity of selecting the foods most suitable to its digestion.

Medicinal stock tonics, therefore, must be entitled to a place in the economy of skillful feeding, and the stock preparations that contain the ingredients that have been tested in the medical institutions of our country and found valuable, are being sought after by a large percentage of expert feeders.

Dr. Hess Stock Food is the product of science; it is the result of Dr. Hess' twenty years' experience in the study and practice of medicine, both human and veterinary.

It contains the bitter tonics long known in medicine for improving the appetite and increasing the flow of juices necessary to

**THE HAWKEYE Grain Grader and Cleaner**

**BUILT EXPRESSLY FOR FARMERS**

It is both a grain grader and fanning mill with large capacity and does the best of work. It separates wheat or oats in two grades and cleans them at the same time.

It will clean and grade seed corn.  
It will clean and grade seed wheat.  
It will separate oats from wheat.  
It will separate timothy from clover.

In short, it will do any work required of a fanning mill and grade seed grains besides.

If your dealer does not handle it, write us for illustrated circular and prices. Manufactured by

If Dr. Hess Stock Food fails to increase growth and milk production sufficient to pay for itself many times over, your money will be refunded.

This paper indorses our guarantee.

DAY BY DAY

Agricola

Are people growing better, or are we growing wiser and weaker? The investigations reveal discreditable conditions, but it should be noticed that the trouble is not a new disease, but one inbred from the past. Agricola believes the world is improving because the evidences are all around. Not that the millennium is here, nor that we can lie down on feathery beds of ease yet, but we can do something and do it with better tools, better conditions, and better results than ever before.

Our agricultural colleges have a better name by far now than they had ten and fifteen years ago, and because they have earned it. For many years they were under suspicion, and under unjust suspicion, and, what is worse, they were also under just suspicion. I have been in more than one of them in former years and noticed their work, and it was not of the kind which inspired confidence. I have seen them testing milk, for instance, for butter fat, and that the curdy, obscure tests could be read accurately no one posted in the art would pretend, but they did not know that the visitor understood the Babcock test, and the readings were written down by guess and stood as a matter of record.

And when the plain matter-of-fact farmer was afterward told in farmers' institutes what the cows of the agricultural colleges were yielding per year in butter fat, and was patronizingly asked to compare it with the returns from his own cows, then he was confronted with fiction in the official guise of fact.

I do not know that such conditions have yet been entirely removed, but I entertain a better opinion and a lively hope, for improvement in some lines is evident. The weight of a fat steer, and its condition are indisputable, and taking first and sweepstakes over all private competitors shows that our agricultural colleges are up-to-date in that line.

But the most striking contrast that Agricola has faced is in the comparison of corn at an agricultural college in the corn belt with one which is north of it. The students and even the professors will actually "point with pride" to corn at one college which would be taken out at dead of night and fed in the dark at another. And yet the corn at one may be as much a credit to the college as is that at the other. "Who does the best his circumstance allows, etc.," is truth, as well as poetry, and the corn best for Wisconsin cannot possibly be best for Kansas.

Mistaken conclusions are not always due to faulty reasoning, but sometimes the reasoning is rational in process yet wrong in the premises. I remember a wide-awake school teacher of pioneer days who taught that rocks grow in size year by year. He farmed in summer and noticed big stones sticking out of the ground which were small and scarcely no-

This is Huttig

Yes, sir, — I can afford to stand back of my roofing because, it stands back of me, and makes my word good as gold. I want you to read every word of this advertisement. I wrote it myself, and you can take it from me that whatever Huttig tells you about roofing is so.

H. W. Huttig

President

Anyway, write for a big, free sample of my roofing and let me send you Booklet B, and special Iron-clad Roofing Guarantee. Write me personally, and do it to-day.

I Stand back of Huttig's Rubber Roofing

With a Written and Personally Signed, Legally Binding Guarantee

MY roofing,—known far and wide as HUTTIG'S RUBBER ROOFING—is a "money-back" roofing in FACT as well as in NAME. I give you a written guarantee that this roofing will do what I claim—not a mere VERBAL PROMISE, through your dealer, but an ironclad, legally binding guarantee, signed by the HUTTIG MFG. CO., capitalized at \$1,000,000, and responsible for every promise it makes.

No other roofing gives you a personally signed guarantee as strong as this. No other roofing can AFFORD to do so. Why can I do it?

Simply because my roofing is the only roofing on the market, made from pure, natural, imported Asphalt. That's why! That's the secret of my success with roofing.

Asphalt comes from the famous Asphalt Lake in the Island of Trinidad. About 100,000 tons are brought to this country every year, and a large part of this is used in the exclusive manufacture of HUTTIG'S RUBBER ROOFING.

My roofing is made of long-fibered wool felt, densely compressed and heavily saturated with this specially prepared Natural Trinidad Asphalt, which protects every particle of the fiber.

Now, mark this carefully: The saturation of Felt with Asphalt in HUTTIG'S RUBBER ROOFING is 150 per cent as against 104 per cent, the highest saturation of ANY of the roofings with the crazy names.

That's the principal reason why my roofing will not "stick" in the hottest, nor crack in the coldest weather.

Other rubber roofings, which have to de-

pend on Texas and California Asphalts (products of petroleum oil), crack in the winter and "run" in summer.

Test it for yourself. Send for sample of HUTTIG'S RUBBER ROOFING and the others: then do this—Get a small quantity of sulphuric acid from your druggist. Put in the sample of HUTTIG'S and the other roofings. Let 'em soak for 24 hours, and note results.

Remember, that the very gases that constitute sulphuric acid are found in the atmosphere, and it is their chemical action that causes roofings to decay.

HUTTIG'S RUBBER ROOFING requires no skilled labor to lay it. Every roll contains enough liquid cement, nails, caps, etc., to lay it.

It can be laid on a flat or sloping roof, across or with the slant of the roof; or on the sides of a building it makes and excellent storm protection.

It will not run, rust, rot, crack, leak, blow off, require frequent repairs, and is not a fire trap.

Now, here's how I feel about it. If you have use for roofing this season, you want the best, which is the cheapest in the long run.

You don't want to fool with a doubtful article, when you can get HUTTIG'S with a guarantee that means absolute protection, both to your roof and your pocketbook.

Just put the burden on HUTTIG. My shoulders are broad, I will take care of all your roofing troubles, if you will trust me.

Ask your dealer for HUTTIG'S RUBBER ROOFING. If you can't get it of him, ask ME, and I'll see that you do get it

ticeable formerly. That the frost heaved them up, pushing them into plainer view did not occur to him—they grew as pumpkins grow. Luckily they stopped growing when put in a cellar wall.

And we can circumscribe our own lots. Even adjoining farms have slightly different conditions, and different fields in the same farm require different management and different crops or varieties of seed. That Reid's Yellow Dent is best for one field does not prove that it is best for another on the same quarter section.

Cement and concrete are taking the place of stone as well as of wood. Not only foundations and fence posts and building blocks are now made of cement, but drain tile of cement is an established fact. The corn belt needs tile drainage, and freight charges from the factories increase the cost. This is stimulating the manufacture of cement tiles, for there are sand deposits where there are not clay deposits, and two ways to establish factories doubles the number and halves the freight bill. Agricola has not yet visited a cement

tile factory, but he has examined cement tiles, and they certainly look promising.

Not the least of the benefits of farmers' institutes is that they are teaching farmers to think when standing on their feet and facing an audience. The old-fashioned farmer felt bungling and awkward in public. He could sit and see holes in the other fellow's argument, but he became speedily a victim of stage fright when he arose to express his own views.

And it is not the farmers alone who have found it difficult to speak in public. Educators who are grand in class-work have proven flat and unprofitable upon the public platform. Agricola has attended scores of institutes and never yet heard a good speech from a school teacher or county superintendent. Oh yes, there were essays and written exhortations, pure in precept, systematic in composition, but they lacked vitality, magnetism, pointed application, and that terseness which commands attention. By the same token, preachers there are who can charm and delight when reading the book of Nature to an audience, and there are others who cannot read it clear nor interpret aright what they do read.

The busy world will not stop and stand still for a man to collect his thoughts. The child is not well schooled who can recite his lesson perfectly in a class room where quiet prevails. He must know it though the plaster is falling from the ceiling and there is a clash and a confusion which distracts the uneducated. To be able to solve problems in a crisis, never to be rattled,—that is the test of education.

Strangely enough, many farmers awoke on a winter morning to find their pumps or some other portion of their waterworks frozen. The strangeness comes in because there was no undue freeze-up, and the average weather was mild, but just the same climatic changes always catch many unprepared. And so pipe wrenches and pipe tongs have been in demand and pump heads, if nothing worse, have burst and gone out of commission.

Agricola has lived in the Mississippi Valley long enough to see all the improved farm machinery installed. He has dropped corn by hand, covered it by hand, plowed it with a one horse shovel

Free Book For Men

A handsome illustrated book which explains all about diseases of men such as Nervous Disorders, Weaknesses, Blood Poison, Skin Diseases, Prostate, Pelvic and Urethral Disorders, Piles, Kidney and Bladder Troubles, etc.

This book tells the various stages of these diseases, at what stage they become incurable, and tells of a simple and effective treatment for the cure of the ordinary cases at home. This book tells how men who have broken nature's laws, become weak and run down can regain their strength and vigor and many other important facts which men should know. Those interested should write for the book today. Same will be sent free in plain sealed envelope. Address,

DRS. FELLOWS & FELLOWS CO., 323 Rollins Bldg., Des Moines, Iowa

plow making hand hoeing necessary, cut it up and shocked it by hand, husked it by hand. And all haying was hand work and all harvesting but thrashing was done by machinery. An eight-horse sweep power, which thrashed 200 bushels of wheat a day was called a great invention, and all the straw was pitched by hand onto the straw stack, and the grain measured in a half bushel. Good old times! Goodby forever.

"Thou shalt not covet" and "covet earnestly the best gifts" get mixed in the gray matter of the average brain. Take the brilliant electric light of our city cousins and contrast it with the common kerosene lamp of the farm house, we naturally covet the brighter and handier method of illumination. And so far as Agricola apprehends the subject this coveting may fall under the second category, and be commendable rather than a prohibited emotion.

In this issue on page 5 we publish the latest of the Litchfield series, explaining how one of the latest important parts of this modern machine is built. It reads right, looks right, and ought to be right. We think our friends will agree with us.

SAMPLE CREAM EXTRACTOR FREE GIVEN AWAY

Without Money and Without Price, No Deposit, No Note to Sign and Not Even Your Promise to Pay.

We Offer You

Owners of Cows

A CREAM EXTRACTOR that actually separates the cream from the milk by an automatic process that requires no ice, no chemicals, no labor and no extra machinery.

All realize the reckless extravagance and waste of butter fat, in caring for the cream and milk under the old process of crocks and pans. Besides the money loss of the old process, there is the back-breaking drudgery of washing pans and milk vessels, and the time consumed in this work that can profitably be devoted to other duties. Now tie

PEOPLES AUTOMATIC CREAM EXTRACTOR will stop this loss of Cream, money and valuable time. ARE YOU KEEPING COWS FOR PROFIT? If they are not paying we can make them pay. If we can increase the quantity of your cream from 15 per cent to 20 per cent over your present yield, that means more dollars for you, doesn't it? DO YOU SELL YOUR CREAM? If we give it to you cool, fresh and sweet directly after it comes from the cow unaffected by chemical action, that means more dollars, doesn't it? DO YOU USE YOUR CREAM FOR DOMESTIC PURPOSES? If we improve the quality of your butter all the year through by giving you a harder, sweeter butter that will not stale or become sour, that means a great deal to you, doesn't it?

Remember

It won't cost you a cent to take advantage of the above offer, as we will send one Cream Extractor into each community absolutely free, without money and without price. No contract to sign or note to be given, not even your promise to pay at this or any other time. WRITE TO DAY, AS ONLY ONE PERSON IN EACH COMMUNITY WHERE WE HAVE NO AGENT MAY HAVE THE BENEFIT OF THIS FREE ADVERTISING OFFER. SEND US YOUR NAME AND THE NAME OF YOUR NEAREST FREIGHT OFFICE.

Peoples Supply Co., Dept. K, Kansas City, Mo.

## ECHOES FROM A KANSAS FARM.

With only forty hours of sunshine the first half of January, Kansas is failing to live up to its name. However, every winter we have weather, the like of which was never known here before.

Lots of moisture in the soil is not counted as being just the thing for wheat, at this season of the year. Predictions of a poorer wheat crop this year than last, because of this condition, are coming in.

The fields are rough and tough to travel over these mornings, when frozen, and muddy in the afternoons, when thawed. For the only time in two years we have quit hauling manure direct from the barn to the fields. It is believed that we have discovered that putting strawy manure on wet ground does damage instead of good.

The newspapers tell of corn rotting in piles beside the railroad tracks. We know of none such around here, but corn with no cover and no floor is being damaged more or less. Everything it will pay to feed for the market is being fed, and still there is more corn thrown on the railroads than they can handle.

We cannot now conceive of anyone selling thrifty shoats, then hauling off their corn, but some are doing this very thing. Of course they get a good price for the shoats, but think of the work necessary to get the corn to market! And, at present prospects, it will not be possible to do much heavy hauling on the roads until time for spring work.

According to our old way of figuring—and the new way is the same—thirty-five-cent corn means no more than \$3.50 hogs; that is you can take thrifty shoats and produce pork for \$3.50 per hundred pounds, with corn thirty-five cents a bushel. Instead of getting this price, though, sellers of fat hogs are able to command \$6.00 at any of the local shipping points, any day in the week. A man must need to sell his shoats high to make in such a transaction, counting cost of hauling the corn, too.

Someone wants to know what has become of the spading harrow. We know what became of ours. A neighbor blacksmith took the blades to use in his work, while some of the other parts are still kicking around the premises. The dissecting did not take place, however, until the tool was about worn out. It never did the work that the modern disk harrows will do.

The makers of some of the machinery put out twenty years ago must have been marvelously and wonderfully dense. A neighbor bought a disk about that time, with seeding attachment. The spouts carrying the seed down from the seed box stuck forward at an angle of something like 45 degrees. The first time he turned at a corner, the four-horse evener snapped off all but one of the half; when he turned the other way, a like number on the other side snapped off like pipe stems. Such defects cannot be imagined in the machine of today.

All makers of farm machinery seem to have, simultaneously, adopted the use of the hard pine tongue. We have not bought a tool in the past three years that had anything but a hard pine

O. L. Chase  
St. Louis, Mo.

I AM the paint man. I have a new way of manufacturing and selling paints. It's unique—it's better. It revolutionized the paint business of this country last year. Before my plan was invented paint was sold in two ways—either ready-mixed or the ingredients were bought and mixed by the painter. Ready-mixed paint settles on the shelves, forming a sediment at the bottom of the can. The chemical action in ready-mixed paint, when standing in oil, eats the life out of the oil. The oil is the very life of all paints. Paint made by the painter cannot be properly made on account of lack of the heavy mixing machine. My paint is unlike any other paint in the world. It is ready to use, but not ready-mixed. My paint is made to order after each order is received, packed in hermetically sealed cans with the very day it is made stamped on each can by my factory inspector.

**NOTE—My 8 Year Guarantee Backed by \$50,000 Bond.**

# I Am the Paint Man

**2 Full Gallons Free to Try—6 Months Time to Pay**

**I Guarantee Freight Charges.**

I ship my thick pigment, which has double strength, freshly ground, in separate cans, and in another can I ship the pure, old process Linseed Oil—the kind you used to buy years ago. Any child can stir them together. I sell my paint direct from my factory to user you pay no dealer or middleman profits.

## My \$100.00 Cash Guarantee

I guarantee, under \$100 Cash Forfeit, that the paint I am offering you does not contain water, benzine, whiting, or barytes—and that my Oil is pure, old-fashioned linseed oil and contains absolutely no foreign substance whatever.

I guarantee the freight on six gallons or over. My paint is so good that I make this wonderfully fair test offer:

When you receive your shipment of paint, you can use two full gallons—that will cover 600 square feet of wall—two coats.

If, after you have used that much of my paint, you are not perfectly satisfied with it in

every detail, you can return the remainder of your order and the two gallons will not cost you one penny.

No other paint manufacturer ever made such a liberal offer.

It is because I manufacture the finest paint, put up in the best way, that I can make this offer.

I go even further. I sell all of my paint on six months' time, if desired.

This gives you an opportunity to paint your buildings when they need it, and pay for the paint at your convenience.

**Back of my paint stands my Eight-Year officially signed, iron-clad Guarantee.**

For further particulars regarding my plan of selling, and complete color card of all colors, send a postal to O. L. Chase, St. Louis, Mo. I will send my paint book—the most complete book of its kind ever published—absolutely free. Also my instruction book entitled "This Little Book Tells How to Paint" and copy of my 8-year guarantee.

**O. L. CHASE, The Paint Man.**  
Dept. 27 St. Louis, Mo.

## PETITION FOR AMENDMENT OF UNTAXED ALCOHOL LAW

To the Honorable Senate of the United States, Washington, D. C.:

The undersigned respectfully urge the enactment of legislation amending the laws governing the distillation of alcohol, so as to permit farmers or other persons wishing to produce alcohol on a small scale to distill it in suitable locked stills, and to have it denatured without the expense of a denaturing bonded warehouse; and authorizing the Commissioner of Internal Revenue to prescribe regulations permitting the transportation of denatured alcohol in tank cars.

The purpose of the desired legislation is to reduce the cost of denatured alcohol by giving greater facilities for its production and distribution. Under the present laws relating to this subject alcohol intended to be denatured and sold without payment of internal revenue tax must be produced under the same conditions as distilled beverage spirits. These conditions tend to limit the production of alcohol to large distilleries, while the expense of the required distillery warehouse and bonded denaturing warehouse adds materially to its cost. The statutory limitation on the size of the packages containing alcohol prevents its shipment in tank cars, a method of transportation which would reduce its cost to the consumer.

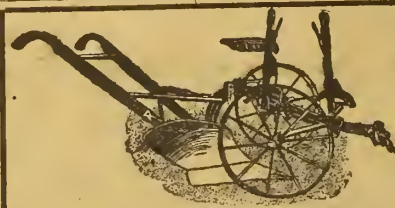

The proposed amendments would not result in the loss of any revenue to the government, and would greatly benefit the farmers of the country both by furnishing them with a material for lighting, heating, and motor fuel purposes, and by creating additional markets for the farm products from which alcohol is distilled.

Please sign and cut out above petition and send it at once to your Senators with a letter urging them to use their influence in favor of the legislation asked for.

tongue. Among this number there has been a mower, grain drill, hay rake and disk harrow. These tools are kept in a dry shed when not in use, and had it not been for this care, new tongues would have been needed ere this. In every other feature, the machinery sold today is much improved, even over that put out just five years ago.

"How to make \$1,000 a year, clear, from an eighty-acre farm," is being discussed in a Missouri farm journal. Several have given their manner of doing it, but even with their figures before him, the practical farmer cannot see how it is going to be done. Remember, now, this means from the eighty acres, no more and no less. It doesn't mean renting land outside for the pasture or hay, or for a field of corn, but it means simply farming just the eighty acres of land. One thousand dollars clear of all expenses, in one year's time, is a big undertaking for the average eighty-acre farmer, on the average eighty-acre farm.

The number coming from the eastern states, or what are, to us, the eastern states, looking for cheaper land, was never greater than right now. Just last week eighteen train loads of homeseekers went through the gateway of the Southwest, Kansas City. Many of these are farmers used to paying from \$5 to \$8 an acre rent for their farm land, and they have become sick of the game which enables them to come out scarcely better than even at the end of a long year of work. Two-hundred-dollars-an-

acre land is good property to own, no doubt, but it is not always good to farm, as a renter.

### Interesting Reading on Manure Spreaders

It is very gratifying for this paper to be able at this opportune time to put before its readers so much information concerning the wonderful results that the modern manure spreader is producing in this country at this time. We hope the very nice display of advertisements for the manure spreader which will be found in this issue will at least receive the careful inspection of our readers. In connection with this we want to remind our subscribers who have been following the serial story of the Litchfield Manufacturing Company, of Waterloo, Iowa, which has appeared weekly for the last year on page 5, to keep in mind the truths that have been weekly emphasized in these articles. The issue this week on the same page is a fair illustration of the balance of these stories that are to come and which will be published in these columns from week to week. We believe that these articles have been very conservative and although some of the statements are strong, the machine without doubt will substantiate every claim that they make for it. Don't fail to read the present chapter of these very interesting stories and continue to follow them each week, as they certainly will be up with the times and will be interesting.

A storm in winter always catches some who have many odd jobs that might have been done, but they did not expect a storm just yet. Eight or ten weeks from now a great many will rush into the field and sow uncleaned seed

## It Heals Without A Scar.

Molds for Cement Posts.

To the Editor of The Wisconsin Farmer:

Molds for cement fence posts may be (like the posts) made in many varying shapes, but for posts four by four inches at the bottom and three by three inches at the top, six feet ten inches long, we use for the bottom or base a piece of two by six-inch pine seven feet long surfaced one side, upon which we nail two strips one-half by one-half by five-eighths inches, six feet ten inches long and four inches from out to out at one end, and three inches from out to out at the other end. These strips form the chamfer on the post and furnish alignment for the side pieces.

In the bottom piece outside of the chamfer strip bore three holes for No. 9 wire, as indicated in Fig. 2, clear through the bottom piece. These holes receive the dowel pin which projects from the side pieces.

The side pieces are made of pine, one inch thick surfaced on one side. They are four inches wide at one end, three inches at the other and six feet ten inches long with the chamfer strip nailed along the top inside edge, and three pieces of No. 9 wire, two inches long, driven about one and a quarter inches into the lower edge, one piece near each end and one in the middle. These wires project about three-quarter inches and engage the holes in the bottom piece, in that way holding the lower edge of the side pieces while the post is still green. (See Fig. 1 and 2.)

One inch from each end of the side pieces cut a saw kerf one-sixteenth of

galvanized end pieces which are made four and a quarter inches by four inches for the butt and three and a quarter inch by three inches for the top of the post. In each end piece seven-eighths inches from each edge, punch four quarter-inch holes (Fig. 3 H. H.) to receive the twisted No. 12 re-enforcing wires. End irons are shaped to hold the sides together, at the same time drawing the sides tightly to the bottom.

Figure 3 represents an end view of the post mold and the different parts have been lettered for sake of description. (S) and (S) indicate the side pieces and on one of them the chamfer strip is marked (C). (D) and (D) represent the dowel pins which engage the holes in the bottom piece. (M) is a mortise for the staple which holds the wire and (H) and (H) represent two of the four holes through the galvanized end piece through which the reinforcing wires pass.

The line post mold which I have attempted to describe is used where these posts are to be manufactured in large

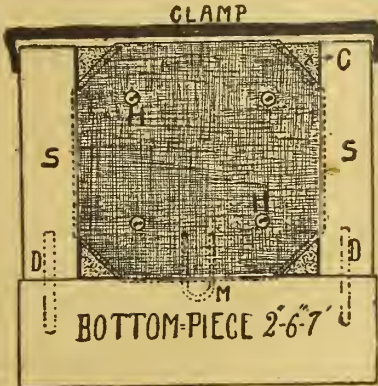

Fig. 3.

numbers, the molds filled at the mixing box and immediately removed to the place where they are to remain until sufficiently seasoned to be removed from the bottom piece. Where only a small number are to be made a piece of one-inch material may be substituted for the two-inch and the mixture carried to the mold. If this thinner piece is used for the bottom it must be supported under its entire length and not moved until the post is at least two weeks old. All corner post molds, brace post molds and brace molds are made of material one inch thick and the mixture is carried to the molds.

Cement posts should be made in a place where there is absolutely no danger of damage from frost during any stage of their manufacture.

Muscatine county, Iowa.

H. N. Macdonald.

Having had some experience in the making of cement posts, I will venture to give your readers a few pointers on their making and construction. While concrete posts are a novelty as yet, nevertheless they have quickly attained a wonderful popularity throughout the country wherever they are made or shown. Their cheapness and durability, together with the simple manner in which they can be made, put them ahead of anything in the post line.

A concrete post made of good materials, properly made and cured, will last forever, while on the other hand a wood or metal post will rot out in a few years. Also, the concrete post has its many

advantages over the wood post, namely, in its neater appearance and heavier weight, thereby making it unnecessary to weight down your fence in going over ditches and other depressions, and also the manner of securing your staples which in a cement post are put to stay, while in a wood post they pull out and rot more or less, making it necessary to keep an open eye on your fence at all times, and last, but not the least, a properly made post with the line wires and staples connected (which in a good post should be) makes a perfect conductor of electricity to the ground, thereby eliminating all danger of lightning striking your fence and going clear around your place killing whatever is within reach.

With a concrete post built as I have said, if lightning strikes anywhere on the wires the current only runs to the

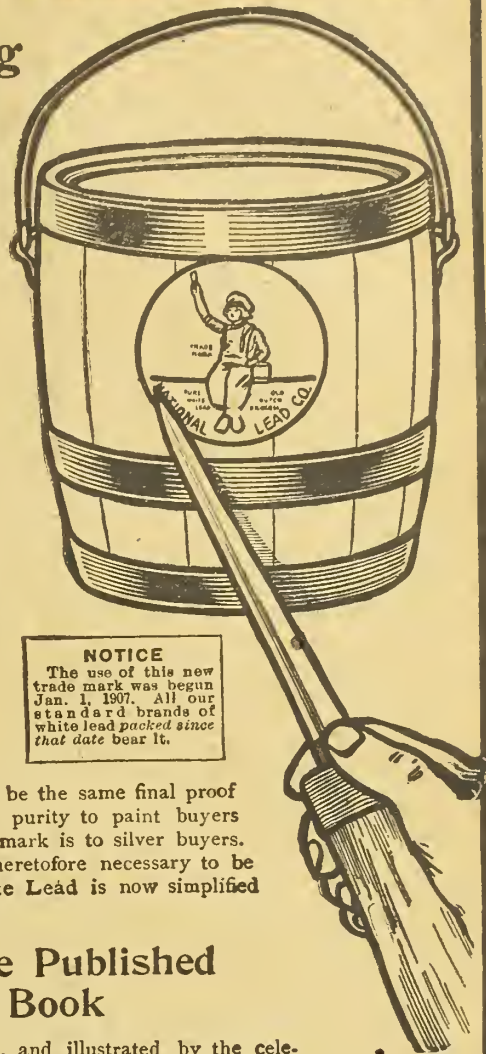

Paint Buying Made Safe

White Lead and Linseed Oil need no argument, no advertising to maintain themselves as the best and most economical paint yet known to man. The difficulty has been for the buyer to be always sure of the purity of the white lead and oil.

This trade mark on the side of a keg means strictly Pure White Lead manufactured by the Old Dutch Process.

It is the hall mark for quality and purity.

This trade mark is for your protection as well as our own. Since (with the exception of one State) it is no crime in law to brand as "Pure White Lead" a keg of anything that looks like white lead, we have registered the trade mark of the Dutch Boy Painter to be the same final proof of quality, genuineness and purity to paint buyers everywhere as the sterling mark is to silver buyers. The care and knowledge heretofore necessary to be sure of securing Pure White Lead is now simplified down into knowing this boy.

NOTICE  
The use of this new trade mark was begun Jan. 1, 1907. All our standard brands of white lead packed since that date bear it.

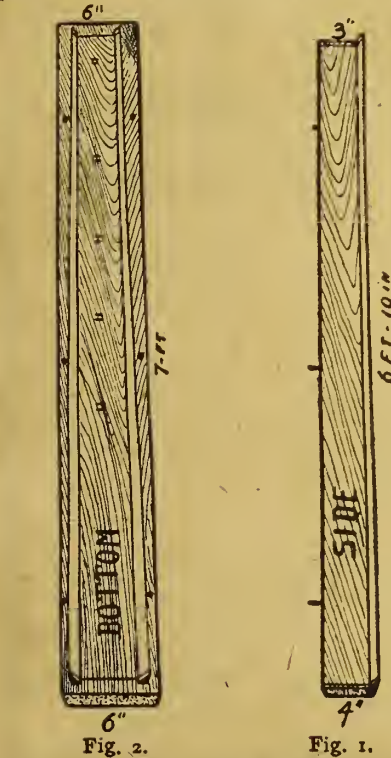

We Have Published a Book

It is handsomely printed, and illustrated by the celebrated artist, Henry Hutt. It is full of practical suggestions and helps to the intelligent use of paint. We will gladly mail a de luxe copy to anyone interested in paint. A postal card request will answer. Address

an inch wide and one-eighth of an inch deep into which, when the bottom and side pieces are set up, are inserted the

Advertisement for Loudon's Double Patent Barn Door Hanger, featuring a picture of the hanger and text describing its flexibility and ease of use.

From a photo of Varlet, imported by Mr. S. J. Miller, of Kirksville, Mo. No retouching has been done and the picture was taken by an amateur. This shows the kind of horses Mr. Miller imports and sells at the barn door at from \$700 to \$1,200. Quality is Mr. Miller's guiding star when buying these horses and he asks prospective buyers to come to his barns at Kirksville, Mo. See page 43 for Mr. Miller's advertisement.

first post and passes from the wire into the staple and thence through the line wire in the center of the post to the ground. As I have said before, concrete posts can be made very cheaply; in fact, they can be made much cheaper than you can buy wood posts for in many localities. The only necessary articles in making good posts is a good post machine or mold, good cement and sand. The cement should be the best Portland, while the sand, to obtain the best results, should be sharp and free from dirt, although most any sand will do. While there is a great variety of post machinery and molds on the market, very few are built to make good posts, most of them being too light to stand the work or being so complicated or inconvenient to use or so constructed that they cannot turn out a perfect post. A mold to turn out a perfect post must be easily taken apart so the soft post will not be injured as it is removed. Most generally the molds are made of wood, they being the simplest and cheapest and, if properly taken care of, the best.

All cement posts should have at least three line wires running the entire length which then makes a very rigid post. The line wires should be at least No. 10 gauge, and better still if No. 8 is used, while the staples should also be of at least No. 14 gauge wire.

As to the proper mixture for concrete posts, it is most generally composed of one-fourth cement and three-fourths sand, though a greater or lesser amount of either can be used. A post as soon as it is made should be kept wet for at least forty-eight hours. The object of this is to properly cure the post and also to make it harder and less liable to check and crack while it is drying.

Garber, Okla.

Subscriber.

There is probably only a few degrees difference between the temperature of the water from the well and that in the storage tank, but we cannot help but feel that the hogs, particularly, and the old cow will drink water direct from the well with a great deal more satisfaction than they will that from the tank.

Harding's Sale.

The R. J. Harding Duroc Jersey brood sow sale proved one of the great sales held so far this season. It was a breeders' sale from start to finish and a great crowd was on hand. The first fifteen head sold averaged \$225, and the entire sale averaged \$125. The top was Dixey Bell, an Orion Dandelion sow, and she went to Mr. O. S. Gilbert, of Conrad, Iowa, at \$400. Col. F. F. Luther cried the sale. Below is a report of the same:

Lot.	Price.
1. H. E. Browning, Hersman, Ill.	\$310.00
2. R. C. Poston, Carydon, Iowa	215.00
3. O. S. Gilbert, Conrad, Iowa	400.00
4. Dr. J. A. Downs, Glidden, Iowa	190.00
5. Grant White, Afton, Iowa	175.00
6. Watson Bros., Creston, Ill.	250.00
8. Wm. Batten, Hastings, Iowa	45.00
10. Watson Bros.	170.00
11. C. M. Dewey, Shannon City, Ia.	155.00
12. W. A. Rankin, Carson, Iowa	165.00
13. H. C. Hall, Brunswick, Iowa	41.00
14. Geo. R. Manifold, Shannon City, Iowa	225.00

Dr. Downs' Sale.

The third annual sale of brood sows from the Clovercroft herd of Dr. J. A. Downs, at Glidden, Iowa, on January 26th, brought out a good crowd of breeders, and farmers, and the entire offering averaged \$49. Duroc Jersey breeders present were well pleased with his offering. It was growthy and had considerable finish, and the buyers went right after it. Below is a list of buyers and prices paid:

A Budget of Real Letters

Here's a "Budget" of real letters written by farmers and stock-raisers in their own language and handwriting.

If you enjoy reading the actual experiences of your fellow farmers telling how they have battled and conquered scab in sheep.

How they have stopped disease among their hogs when they were dying of a rapid rate; how they have rid their stock from ticks, lice, fleas, mange and eczema.

How they prevent these scourges gaining further foothold—this "Budget" will particularly interest you.

You will get a lot of valuable information that may be the means of saving you hundreds of dollars.

These letters were sent to us by farmers who have used Dipolene—that great germ destroyer, preventive and cure of all farm stock diseases.

They are actual, positive evidence that there's nothing you can get which will prove as good, safe and sure a means of keeping disease off your farm as Dipolene.

37. A. E. Myers	28.00
39. Frank Everts	31.00
40. John Livingston, Glidden, Iowa	30.00
41. A. E. Myers	24.00

THE WONDERFUL SUCCESS OF THE WAGON BOX SPREADER.

The success of the Galloway Wagon Box Spreader, advertisement of which appears on page 7 of this issue, has attracted attention all over the country. It has remained for Mr. Wm. Galloway, president of the Wm. Galloway Company, to put upon the market the first and only successful wagon box spreader now being sold to the farmer. This spreader is being sold direct from the Galloway factory at Waterloo, Iowa, to the farm, freight prepaid. We trust that if there are any of our readers who have not shown sufficient interest to write this company for their catalog that they will do so without any further delay. You may not be going to buy a spreader yourself this spring, but no doubt you are this fall, or in another year. We have told our readers so many times of the value of farm manure for not only improving the soil condition and in the crop, but also its advantage in increasing the value of your land in case you wish to sell, that we feel certain our advice to you to buy a spreader will not be in vain. It will pay you to investigate the manure spreader proposition thoroughly. Have you not a truck on your farm that you could set a wagon box spreader on and in that way get a machine that would fill every purpose for spreading manure uniformly and evenly at one-half the usual cost? We understand that the Galloway Company are selling a machine that will fit any farm truck, narrow or wide tread, that has rear wheels thirty-eight inches high or higher. This takes in the average farm truck. Their catalog which is an exceedingly beautiful one, shows every feature of their machine and will give you a perfect idea of just what their machine is like and as they guarantee it to you and back their guarantee with a \$25,000 legal bond, you take absolutely no risk in ordering of them, under their selling plans, which are very liberal. We do not see how we could do you a greater favor than to urge you to send for their catalog by today's mail. We believe you will want one after you read what they have to say in their advertisement. We know the Wm. Galloway Company to be a firm that is perfectly reliable in every way and we can heartily recommend them to our readers.

A FARMER'S OPINION OF THE FALFURRIAS COUNTRY.

There is only one way to positively know what the conditions in a new country are. One way is to go and see the country and the other is to get the opinion of people who are living there, that have no object in mis-

FROM FARMERS

Telling Their Experiences with DIPOLENE In Their Own Handwriting.

Dipolene is a pure coal tar preparation that is perfectly harmless—non-poisonous. It promptly cures scab, mange, eczema, etc.; kills lice, ticks, fleas, and when sprinkled around barns, sheds, pens, in troughs, etc., is a positive preventive of all stock diseases.

As a dip it is effective and economical. One gallon makes 100 gallons of strong solution. Will not discolor or injure wool or feathers and is beneficial to skin.

DIPOLENE THE ONE MINUTE STOCK DIP

Is a remedy every farmer should have on hand and use occasionally. It's the best insurance against loss from disease you can get. Let us send you this "Budget of Real Letters" to prove our claims. They are better arguments than ours—they are actual facts.

To convince you of its true merit without risk we allow you

30 Days Free Trial!

Buy a can at your dealers—if he does not hand it send to us direct—we pay the freight. Try it 30 days, if not as represented send it back at our expense. Isn't that fair? You can't afford to risk loss by not taking advantage of this liberal offer.

Marshall Oil Co., Dept. D1, Marshalltown, IA

Why Don't YOU Go To Washington

Wenatchee, Wash., Oct. 2, 1906.

Max Bass, Dear Sir:—Answering your inquiry would say that I have 14 acres in apples. From these I expect to pick this year from 10,000 to 12,000 boxes. I have already picked over 2,000 boxes, and from the yield so shown, have no doubt that the whole yield will be from 10,000 to 12,000 boxes. One acre of extra heavy apples is averaging 20 boxes to the tree and the trees are twenty feet apart, 110 to the acre, or in other words, the yield will be 2,200 boxes.

My apples so far have averaged \$1 per box net, and I expect to get a higher price for the later varieties.

Yours truly, B. B. Holcomb.

and Make Money Growing Fruit

There are countless opportunities in the State of Washington for a man to establish a good home in a short time. There is money in fruit raising in the Wenatchee Valley—money in wheat in the Big Bend Country. Diversified farming in the Puget Sound region pays well. Land is cheap and the mild climate renders homemaking easy. Bulletin on Washington mailed free on request.

ALASKA—YUKON—PACIFIC EXPOSITION, SEATTLE, JUNE—OCTOBER 1909.

Just Ask for Our SPECIAL PRICE On this CHATHAM Fanning Mill

Our answer will surprise you. Why? Well, there will be a lot of surprises. First, the price that we will quote you. Second, the easy terms on which we will let you pay for the mill.

Third, the Chatham Fanning Mill will actually, clean, separate and grade (yes, sir, we said grade, and we mean it!) from 40 to 80 bushels per hour—its capacity is wonderful—its ease of operation is remarkable—its all-around usefulness and its importance as a profit-maker makes its owner wonder how he ever got along at all without a Chatham.

The Chatham Fanning Mill will handle all kinds of grain and seed. It tackles any kind of a job.

30 Days' Free Trial

Freight

and riddles—a patent bagging attachment which saves one man's time, and more special, practical features than we have space even to name here.

Our idea is to build the Chatham so complete and perfect that the mill sells itself. We will ship you a Chatham Fanning Mill on 30 Days' Free Trial, freight prepaid, no matter where you live. Use it all that time, free, while you are making up your mind whether to buy it or not. If it doesn't do all we say it will, send it back at our expense.

We're not going to let you keep it if it doesn't do the work and do it right! Selling Fanning Mills on the plan we do—direct from our factory to the actual user—the very life of our business depends upon the satisfactory working of the mills we put out.

All we ask is that you try the Chatham and let it prove itself—let it show how it can quickly put its own cost back in your pocket and make a profit for you. The Chatham Fanning Mill isn't a luxury. It's a necessity! You need it on your farm right NOW. Send for the Chatham Book FREE. It tells of over 100 ways to increase farm profits. Tells how to stop the losses and make every cultivated acre on your farm yield crops in abundance. It's a regular Bureau of Free Information on Grain, Breeding, Planting and Seeding. It tells everything in a mighty sensible interesting way. Get it. Read it. Profit by it. Sent promptly, postage paid, if you just ask for it on a postal card. If you live west of the Mississippi, write our Topeka office; if east, write to Detroit.

representing. Readers of this paper are familiar with the claims made for the Falfurrias district in the Gulf Coast country of Texas. The following letter, written by a former resident of Pleasanton, Kan., will be of interest to many who have read the articles on the Falfurrias country published heretofore: "Falfurrias, Texas, Jan. 21, 1907. Mr. James Kennon, Pleasanton, Kan. Dear Sir:—Mr. Fultz has asked me to write you giving you something of my views of this country. Will say that I came down here last July, after traveling over considerable of the country after leaving Pleasanton. When I first came to this country I was very much discouraged, and when Mr. Fultz told me that he was going to see Joe Franklin asking him to come down here, I told him I was going to write to him and tell him not to come; but after having lived here a time I changed my mind very materially. I think that this country is one of the most wonderful countries I have seen, and believe that the opportunities here are simply great. The farmers here, out of their truck crops, are making from \$50 to \$200 or \$300 per acre per year. One man I know of, off of water melons cleared about \$80 an acre. I think this country is much better than California. Mr. Fred Speakes came down here a couple of weeks ago and bought eighty acres of land, and his father is now here also. My advice to all the boys up in Bates county is to come here as soon as possible. The health of this country is fine; the climate is fine; it does not get too hot in summer, nor cold in winter. Kindly tell all the boys up there what I think of this country, and oblige, yours truly, R. G. West." There is surely no comment needed on the above letter. This is the opinion of everyone that goes to Falfurrias and stays there long enough to learn what the country is. About a year ago Mr. George Gibbons, who then lived at Lee's Summit, Mo., wanted to go to Falfurrias, but the members of his family persuaded him to go to Florida. After one year of farming in Florida and a more thorough investigation of the Falfurrias country, Mr. Gibbons has decided to move

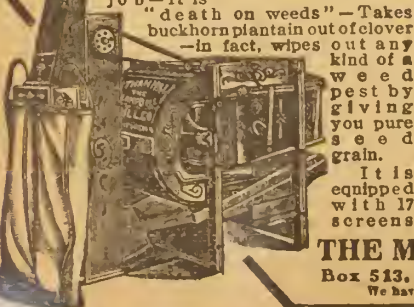

THE KEMPER DISK FURROW OPENER

Will increase the yield of Corn, Cane or Cotton 25%. Guaranteed to pay for itself in one day. Works on any planter. Write for circulars and prices.

WALKER MFG. CO., Council Bluffs, Iowa

When writing to advertisers please mention this paper.

to Falfurrias and will go there at once and buy land. He is determined that nothing shall change his purpose this time. Such examples ought to be enough to decide the doubters that Falfurrias is the place. You can buy land there now at \$15 per acre. Think of raising crops that way from \$50 to \$300 per acre on \$15 land. Corn, cotton, forage crops, sorghum, alfalfa, beans, etc., have been raised successfully without irrigation, by Mexican farmers in their crude way of cultivating lands, for the last twenty-five years. What can the American farmer do with his improved methods and implements. And with the expenditure of a few hundred dollars he can establish an irrigation plant which absolutely assures big crops regardless of season. Those who are interested in bettering their condition now, and providing for the rainy day or old age should not pass this opportunity. It's your chance to help yourself and your children to a competency. Read every word of the advertisement of the Falfurrias Immigration Company, of Kansas City, on page 27, and write this firm for illustrated literature and latest map of Texas, free. Do not wait—prices are advancing.

February 7, 1907.]

## CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kan City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## PLYMOUTH ROCKS.

A SCHOLARSHIP in a Kansas City Business College for sale cheap. Address at once, Thomas, Box 67, Des Moines, Iowa.

## The Week in Kansas.

To the Editor of The Homestead:

The first week of the new year seemed to set the standard of weather for this winter. At any rate, as it was the first week in January, so has it been the rest of the month. What February will be remains to be seen, but tonight ends forever the month of January, 1907, and it has been a month of weather the like of which we will never be slow to part with.

There has been a little of every kind of weather the past week. It has rained, snowed, misted, sleeted, the sun has shown—a little—about as it would shine in May; the wind has blown and it has not blown. There has been more of the disagreeable weather than the agreeable, though. It has not been cold, as cold could be measured at mid-winter. Perhaps, on this account, we should not be too keen to complain. With the local paper from the old home in the Green Mountain state telling of 30 to 40 below zero, and the daily papers claiming very

little better for the present temperature of the states further west along the Canadian border, our little squalls seem small in comparison, and should not give us reason to find fault.

The roads have been bad all through January. When thawed, the mud has not been deep, but when frozen, as has been the case most of the time, they have been rough. Traveling is still in such shape that very little hauling is being done. Corn is remaining in the cribs. Perhaps, as some say, not being able to haul it now, when many would like to, will prove a blessing in disguise. Yet, the man with all the field work he can handle as soon as spring opens, will not have the time to market grain then. He would like to do it now. But that is the trouble here in Kansas; we plan on doing too much of our work during the winter, having been able, during many winters of the past, to work almost without interruption from January to March. Further

north farmers do not expect to do regular work during this time, so never are disappointed.

The weather this morning is of the "standard" sort; it is keeping right up with the pace set. There is a thin coating of frozen rain and sleet on the ground, with a little being added to it from the low-flying, foggy clouds. When January is left behind, at midnight tonight, we hope the brand of weather the month has been noted for will go with it. "Do something, then quit," is what all want to happen, expressing it as the man you meet does.

Henry Hatch.

Coffey Co., Kansas, Jan. 31, 1907.

## Why Not Visit California

this winter? There will be an especially low rate during March and April—colonists' second-class one-way tickets \$33 from Chicago. A corresponding reduction in rates will be made from all points on the North-western Line.

Our daily and personally conducted

tours offer many advantages to the traveler, among which is our service of Pullman tourist sleeping cars, through without change Chicago to San Francisco, Los Angeles or Portland, in which a double berth costs only \$7.

First-class round-trip tickets with very liberal return limits are sold daily. Consult the nearest agent of the North-Western Line for full information regarding rates, routes, etc.

## HOMESEEKERS' EXCURSIONS.

On the first and third Tuesdays of each month, the Iowa Central Railway will sell round trip excursion tickets to points in the North, Northwest, South, Southwest and Southeast. The rate is only one fare plus \$2 and less, with liberal stop-over privileges.

Tickets sold to points in the following states: Minnesota, South Dakota, North Dakota, Arizona, Arkansas, Colorado, Idaho, Indian Territory, Iowa, Kansas, Louisiana, Mexico, Missouri, Nebraska, Montana, New Mexico, Oklahoma, Texas, Utah, Wisconsin, northern Michigan, Wyoming, etc. For rates and full particulars call on agents or address A. B. Cutts, G. P. T. A., Minneapolis, Minn.

## The Louse Question

When your animals rub incessantly at this season of the year, look out for lice. This is especially true of calves and colts. To meet this condition Dr. Hess (M.D., D.V.S.) formulated the famous Instant Louse Killer, which kills lice on stock and poultry.

## INSTANT LOUSE KILLER

Kills ticks on sheep. It, being a powder, can be applied in zero weather. Do not wait for warm weather; do not let the tick eat up your profits; kill him on the spot with Instant Louse Killer. Put up in round cans with perforated top, full pound 25 cts. Sold on a positive written guarantee. Be sure of the word "Instant" on the can; there are 25 imitations.

1 lb. 25c { Except in Canada  
3 lbs. 60c { and extreme  
                  West and South.

If your dealer cannot supply you we will forward 1 lb. by mail or express, prepaid, for 35 cents.

**DR. HESS & CLARK**  
Ashland, Ohio.

## Do Your Own Thinking

Just because someone tells you that some other Separator is as good as the "IOWA" is no reason why you should believe it. Letting other people do your thinking is too expensive. You cannot afford such luxuries. Investigate for yourself. Use your brains for your own benefit—they were given you for that purpose. If you do this you will discover that there is just one machine which takes out all the cream, and that is the "IOWA." The dairyman is fully entitled to all the profit there is, even to the last cent. He gets it only by using an

## OUR DAIRY DEPARTMENT.

ALL communications relating to dairy matters should be addressed to this office. Inquiries of general interest regarding dairy management and production will be promptly answered.

### A FAIR PRICE FOR FARM BUTTER.

There are a good many pounds of butter produced on the farm that are made up into neat packages or tubs and sold direct to city or village customers. Around every city there are always a few people who follow this plan of marketing their dairy products. The plan has its advantages as well as disadvantages. Where butter can be contracted to private parties the year round for twenty to twenty-five and thirty cents a pound, there is generally good money in selling this way.

As a rule, farmers do not receive enough for their butter when they market to private homes. The question of placing a price on the butter for once in the marketing of farm produce falls to the farmer. Often the farmer leaves it to his wife, who hesitates in placing the price per pound sufficiently high to allow of a reasonable profit. She places herself in the position of the person who is buying the butter and it is generally her conclusion that if she had to buy butter at the price that would be allowing her a neat profit, it would be most extravagant buying. However, she does not realize that there is more work to be paid for than that of her own hands. Besides the making of the butter, there is the outside labor to be paid for, there is also feed, interest on the investment, wages, risk, and a great many other things to consider which should be fully taken into account in fixing the price for the butter.

There naturally comes a time in the summer when the price of butter drops, and then butter sold to private parties generally brings several cents over the market quotations. Again, in the winter the farmer who contracts his butter often is getting a price below the market quotations, so that it is a good plan in determining a price for contracted butter to consider this side of the question. A few cents above the average price the year round is not exorbitant in the least, since it is worth that much to the city customer to know that he is going to have a regular supply of butter of uniform quality.

Butter can hardly be produced these days for the same cost that it could a number of years ago. Throughout a large portion of the corn belt the price of land has doubled in no longer a period than the last ten years. The cost of labor has increased almost proportionately, likewise the cost of building materials and machinery. All these things must be taken into account when the dairyman or farmer contracts to deliver so many pounds of butter the year round, and the generous-hearted farmer's wife need not be afraid of asking a good price for her farm product.

### SOURING CREAM TO PREVENT BAD-FLAVORED BUTTER.

It probably sounds contradictory to general practice to recommend the souring of cream immediately after it has been skimmed or separated in order to prevent it from developing undesirable flavors. However, it is a practice that can be followed with good results and is based on perfectly sound reasoning.

The plan is based on the fact that as soon as lactic acid has developed in the milk sufficiently to give it a sour taste the unfavorable bacteria in the cream—that is, those kinds that produce these undesirable flavors—are checked in their development. As is generally known, these unfavorable bacteria cannot work and reproduce themselves in an acid medium. Just as soon as the lactic acid bacteria in milk or cream have become dominant the rest of the list of undesirable forms of bacteria must take a back seat, as it were.

Sweet cream is not necessarily good cream. We know it is a common practice to set the can of cream that is to be churned where it will cool off just as soon as possible after separating and kept at that temperature until ready to churn. It is a very commendable practice, of course, to cool the cream at once after it is separated, but if it is not to be churned for four or five days, as is the case in places where it requires that much time to collect enough cream for a churning, it would be just as well to sour the cream after it has been thoroughly cooled. After it has developed the right degree of acid,

## The Difference

Gomes Out of YOUR Pocket

A common kind of "Bucket Bowl." Heavy, hard to wash, easy to rust.

If you don't know that Sharples Dairy Tubular Cream Separators are different, take no chances until you find out. "Bucket bowl" agents depend on catching the fellows who don't know. Don't let them take the difference out of your pocket. One difference is in the bowl.

### Shake The Insides Out!

Before you buy a separator shake the insides out of the bowl. It will show you how heavy, complicated, hard to wash, easy to injure, quick to rust, "bucket bowls" are as compared to Dairy Tubular bowls. Sharples Dairy Tubulars are different. Nothing inside Dairy Tubular bowls but a small dividing wall of triple tinned pressed steel—no bigger than a napkin ring—good for a lifetime. Yet Tubulars have twice the skimming force of any other separator—skim at least twice as clean.

You have common sense—want to save your wife work—want to save yourself repairs and cream—so why not learn about this now? Our free catalog N-121 shows many other exclusive Tubular advantages of great importance to you. Also ask for free book, "Business Dairying," covering everything from calves to butter.

SHARPLES Dairy Tubular Bowl. Simple, light, durable, easy to wash.

## THE DAIRY QUEEN

THE CREAM SEPARATOR THAT SUITS ALL.

The Dairy Queen is as near perfection as can be reached in cream separators. It fills every requirement, its low and large supply can, its simple and easy bowl to clean, its light running and close skimming is just what you have been wanting. It never gets out of order, it's always ready to skim, and leaves the cream in perfect condition.

### You Can Try It Before You Buy.

The Dairy Queen is sold on guarantee and free trial. We have all confidence and know it is right or we could not offer them this way. We only want a chance to prove this to you, that the Dairy Queen is the most convenient, easiest to operate and most durable separator on the market. Ask your dealer about it or send for free catalog.

Address, E. R. Bailey, Clarinda, Iowa, or

We Manufacture the Davis

## DAVIS CREAM SEPARATOR

direct from their large factory. They'll quote you a little better than 20 to 30% if you want to buy a standard, up-to-date cream separator. Note cut of new machine in this ad. It's a little beauty with the small, wonderful, cone bowl, always in balance because it's made so true it balances itself. Therefore bound to run easier, more easily regulated to skim close and produce heavy or thin cream. Low supply can, large capacity, simple enclosed gearing, easy running, easy to clean. It's made of best materials and fully guaranteed. They prepay freight and guarantee safe arrival at your nearest depot. Say on a postal or in a letter right now. "Send me your Money Saving Catalog No. 118" Davis Cream Separator Co., 54 North Clinton St., CHICAGO, U. S. A.

cool it off again and hold it at a low temperature until time to churn. This is a plan which we have seen carried out successfully where it required several days to collect enough cream for churning, and is one worth trying if you are annoyed with bitter or strong-flavored butter—that is, when it is first churned.

### THE "BOSS" COW IN THE HERD.

In every herd of cows there is some one of the number that takes the initiative. She is the first one to lead the rest through a fence into a cultivated field. If there is a gate in the yard which has been left partly latched, she will be sure to find it and lead the herd into the garden or down the road. To say the least, this kind of a cow is a constant originator of trouble, and it seems to be her pleasure to do anything but chew her cud and produce a good mess of milk in the dairy.

Occasionally such a cow, even with her mean characteristics, is a valuable producer and on account of her vigorous nature her offspring usually develop into good dairy matrons, since they generally closely resemble their dam. In a case like this one hates to part with such a cow. It is often quite possible to bring up her calves to be more docile by treating them kindly when they are young. As a rule, though, one has

to be extremely careful in working with them, as it takes very little of wrong treatment to develop this domineering character of their parent in them.

Where a cow with an unruly nature is only an ordinary producer she will fill a much better place in the beef barrel than in the dairy herd. This is a profitable and quick manner of getting rid of a constant source of aggravation in the herd.

### RED POLLS AND POLLED DURHAMS.

Every now and then someone confuses these two breeds, and equally as often someone makes an inquiry regarding their differences. There are a few points of similarity between the two, though their points of difference are so marked that they should not be easily confused.

The Red Polled breed is a dual-purpose one, combining both good milk and beef qualities. A Red Polled cow is called the farmer's cow often because of this fact. She is a profitable milker and her produce make good beef cattle, while she herself is easily fattened.

A Polled Durham may be described as a Short-horn with the horns bred off. This breed has the good qualities of the Short-horn with the additional advantage of being dehorned by nature. They originated from what are commonly called "freaks" in the Short-horn breed. These freaks matured without

developing horns, and by a process of concentrating their blood in breeding this polled characteristic has become quite well fixed. They are a larger breed and generally more of a beef type, while in color they are like the Short-horn. The Red Polled cattle are uniformly red in color.

The double-standard Polled Durham is eligible to record in the Short-horn herd book and in the Polled Durham record, while the single standard is only eligible in the latter.

### SOME CONCLUSIONS ABOUT MILKING MACHINES.

The department of agriculture has recently published a bulletin which discusses in detail the workings of the milking machine, dealing especially with its practicability under farm conditions. The conclusions drawn at the close of the discussion in this bulletin may interest our readers, and are as follows:

1. Unless sufficient care is used in cleaning the machines, decaying milk and bacteria accumulate in the rubber tubes and contaminate the milk as it passes through them.

2. The few dairymen now using these machines are not exercising sufficient care in washing and sterilizing the machines to keep them in sanitary condition; their milk is therefore of poorer quality from the sanitary standpoint

than that drawn by hand under the same stable conditions.

3. Good sanitary conditions in a stable may be completely counteracted by the unsanitary condition of the milking machine.

4. When kept in fairly clean condition the machine drawn milk contains decidedly smaller numbers of bacteria than the corresponding hand-drawn milk.

5. When the machines are not well cleaned both the number and percentage of acid-producing bacteria are higher than in the hand-drawn milk, but when they are fairly well cleaned both the total number and the percentage of these bacteria are decidedly lower than in the corresponding hand-drawn milk.

6. Both the total number and the percentage of liquefying bacteria found in the milk were in most cases greatly reduced by the use of the machines. This fact is of special significance in milk designed for direct consumption.

7. When properly cared for, drawing the milk by means of the machine increases its keeping quality.

8. Washing the machine with cold water and then with hot water containing soda is not sufficient to keep the rubber tubes clean. Under this treatment the inside of the tubes becomes coated with decaying milk, thus forming ideal conditions for the multiplication of various species of bacteria.

9. Scalding the machines by pumping boiling water through them just before use had little or no effect in reducing germ content of the milk.

10. Boiling in clear water for three-quarters of an hour was not sufficient to keep the rubber tubes in sterile condition.

11. Subjection to steam without pressure for thirty minutes was not sufficient to sterilize rubber tubes.

12. Placing the rubber parts in brine for several hours after being washed reduced the germ content by the machine-drawn milk to about one-half that of the milk drawn by hand.

13. Boiling in water containing a small amount of powdered borax had about the same effect in reducing the bacterial content of the milk as did the brine treatment, but the use of borax is dangerous unless extreme care is exercised.

14. The machines may be effective in the production of sanitary milk if they are properly cleaned and sterilized.

15. The results of these experiments indicate that the machines may be kept in such an unsanitary condition that the keeping quality will not be improved, but may be seriously impaired. They also indicate that with properly cleaned and sterilized machines the keeping quality of the milk may be very materially improved.

According to those conclusions it would appear that there might be a good deal of difficulty encountered by the average person in keeping the various tubes and utensils used in these machines free from undesirable germs. The problem with milking cows with a machine involves more than simply getting the milk away from the cow and into a pail. It means handling the milk in such a way as to keep it free from germs and also milking in such a manner as to maintain the milk flow throughout the natural lactation period.

### Hampshire Swine Breeders' Meeting.

It was a rousing big meeting that was held by the American Hampshire Swine Record Association in Erlanger, Ky., on January 23d.

The 1906 success of the Hampshire breed in the show ring and the increasing demand for the hogs, the swelling of the records within the last year, and the publication of Vol. I of the records got out a goodly attendance to the meeting, although many were hindered on account of high water.

The secretary's and treasurer's reports show over 200 per cent gain in the business of the association over any five previous years of business.

The association is now on a paying basis; the business has increased at such a rate that Vol. I was published, all expenses paid, leaving a balance in the treasurer's hands double the amount ever held at any previous annual meeting.

A petition was presented at this meeting, asking that the place of annual meetings be changed from Erlanger, Ky., to Chicago, Ill., and that the association be re-incorporated under the laws of the state of Illinois. And that the time of meeting be some time during

## CREAM SEPARATOR ADVICE WORTH NOTING

Copy)

DAYTON, OHIO, January 1, 1907.

At the close of our first year's work operating under the "Hand Separator" plan we find that our success has been fully up to expectations.

One of the main points of doubt with us was the ability to produce a high grade butter from cream so gathered, but the year's demand for our butter and the many high scores we have received has proved that the "Hand Separator" plan is the best both for creamery and patron.

When we decided to enter this system we naturally desired to place the best separator with the farmer and our previous experience with power machines and with such hand separators as were in our territory had demonstrated to us that the De Laval was the most satisfactory. While the first cost to the patron may be a little more and our margin of profit is less than on many others, our year's experience has demonstrated to us that our choice was wisely made.

We are now receiving cream from about fifteen hundred hand separators 90 per cent of which are De Laval machines, and we believe we can truthfully say that in each instance they are highly satisfactory.

We have renewed our contract another year for the De Laval agency and our prospects are very bright for even a better year than the one just passed.

THE CONOVER CREAMERY CO.

By VICTOR A. CONOVER, Gen'l Mgr.

The Conover Co. are the biggest "Farm Separator" cream gathers east of Illinois, having built up their immense business through patrons who are almost exclusively DE LAVAL users. At the 1906 Ohio State Fair their butter scored 98 and highest of all exhibits. If you would profit by their experience send for a DE LAVAL catalog and the name of our nearest local agent. Write today before your cows begin to freshen.

compartment sleeping cars, Pullman  
tourist sleeping cars and composite  
observation cars. Double berth in  
tourist cars only \$7 from Chicago. Close  
connection with trains of the North-  
Western Line from Wisconsin points.

For full information apply to nearest  
agent of the North-Western Line.

## Johnson Wants Every Chicken Raiser in the Country to have his big 128-pp, 1907 Poultry Book It's Free to all his Friends

It looks good to poultrymen. I wrote this book myself, as I do all my catalogues, and I filled it as full of the things poultry raisers are always wanting to know about as it can stick—pictures and plans and experience talk. I intended it to be of use to whoever reads it. I guess I succeeded right well.

Of course there's the story of

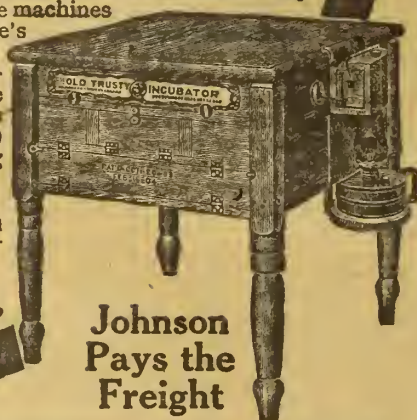

### OLD TRUSTY Incubators and Brooders

In it. The Book's all the better for that. Whoever uses Old Trusties gets results. The simplest, the surest, most perfectly automatic of all machines. And people have learned to know it. More Old Trusties were sold last year than any other single incubator in the United States and every one of them were sold—just as I will sell to you—on a 40, 60 or 90-Day Trial and Five-Year Guaranty. My wife's in with me on it all. When I say "I" I mean "We." Fact is, she named the machines and invented the Brooder all herself. She's always been some on raising about all the chicks that are hatched. Everybody knows that's the real trick of the business. The Old Trusty Brooder is her old way (just changed a little bit) of mothering the little chicks along into full strength.

Over 200 Pictures in the Book. Handsomest photographs you ever saw. Send for it and we'll be introduced. If you're interested, I am.

Yours truly in the poultry business,

M. M. JOHNSON, Incubator Man,  
Clay Center, Nebraska.

Freight

## POULTRY DEPARTMENT.

THIS department is edited by a competent poultryman, who will be pleased to answer questions concerning diseases, poultry management, etc., when they can be answered through the department. Questions will not, however, as a rule, be answered by mail, and stamps need not, therefore, be enclosed with inquiries. Address all letters relating to poultry topics to this office.

### HOW TO GET FERTILE EGGS.

This is a vital problem. Upon its successful solution depend the profits of the hatching season. It is a broad question and has many factors.

We read much of the 200-egg hen. She is all right, especially when the eggs are wanted for market. But these excessive layers are apt to lay many infertile eggs. Therefore our breeding hens should not be too strongly forced. For successful hatching, the germ of life must be hidden away within the ivory walls of the egg, ready at the appointed time to come forth in vigor and strength in its new form.

There are at least three conditions which must be observed if we expect to obtain eggs that will hatch vigorous chicks. The first of these is ancestry. Oliver Wendell Holmes once said that the education of a child should begin twenty years before it is born. Heredity obtains just as strongly in the poultry world. We should begin to work for good, hatchable eggs at least a year before the eggs are produced. This means selecting the birds for our future breeding stock while they are still chicks, choosing those whose strong, sturdy appearance in chickhood indicates strength and vigor of constitution which promises hardy and vigorous birds.

In a letter from a Tennessee subscriber published some time ago in the "Reliable Poultry Journal," we catch a glimpse of the great benefits of strength and vigor in the breeding stock. Note his methods of selection:

"I give my incubator good attention and use only the best eggs, carefully tested for good, even shells, and I always set two hens at the same time. When I test out the infertile eggs I replace with live eggs from under the hens, so that all the eggs left in the machine are strongly fertile, and it is no wonder that I hatch nearly all of them. From time to time I compare it precisely, so that when hatching time comes the chicks hatch like popping corn. When I take off a hatch I do not expect a single chick to die, and they rarely if ever do. If this sounds to you like bragging, let it go at that, but the statement is true that from the last three hatches I have made not a single chick has died. They were raised and are now being raised in brooders in the dead of winter, and not, as you assume, in the spring months of last year. My hens are strong; if they haven't got legs on them like mill posts, then I do not keep them. I know both a hen's capabilities and limitations, and early in the summer can pick out the pullets that will pay for their keep."

The male bird is half the flock, and should be chosen with the greatest of care. Select a bird with a short, well-curved, strong beak, broad head and well-developed wattles, these being indicative of vigor, robustness of constitution and procreative powers. Avoid a male with a long, straight, snaky beak and narrow head. He will be a delusion and a snare.

Many of our most successful breeders alternate the males in their breeding yards. This guards against exhaustion and tends to greater vigor and consequent highest fertility. While resting, the male bird should be shut in comfortable quarters, out of sight of the hens, if possible, and fed extra rations during his vacation. Feed a due proportion of either green cut bone or else beef meal or beef scrap with a liberal grain ration and all the green food he will eat. Two days service and two days rest seems a good rule.

The housing and care of the laying hens is an important consideration. Good ventilation, freedom from drafts, plenty of room, cleanliness; in short, intelligent attention to their comfort and health is imperatively demanded. Space will not permit enlargement on this part of the subject, but the poultry raiser who is determined to attain the highest success must give it due consideration.

Feeding for fertility is one of the most vital parts of the work. Four things are imperative, grain food in proper proportions and quantity, animal food in some form, grit and oyster shell,

## GET STARTED RIGHT.

Don't handicap yourself with poor hatching and brooders. Beware of experiments, of machines that take much attention, of discarded styles, of "talking point" machines. You will be safe if you look to the record. No man ever made a failure of poultry raising if he outfitted with

Succeed  
with a  
Successful

### SUCCESSFUL Incubators and Brooders

They hatch the most and the strongest chicks and brood them best, because they are the best substitutes for the mother hen ever devised. And they take the least of your time and attention. More thousands of users are saying this each year. Try a Successful and you will be one of the number. Incubator and Poultry Catalogue FREE. Booklet, "Proper Care and Feeding Small Chicks, Ducks and Turkeys," 10c. 50c poultry paper one year, 10c.

DES MOINES INCUBATOR CO., Dept. 50, DES MOINES, IOWA.

When Writing to Advertisers Please Mention this Paper

and green or vegetable food. It seems that the advocates of dry feeding have come the nearest to solving the problem in their method of putting all the food, except the green food and the whole grains, in hoppers, allowing the birds to balance their own ration. By this method, Dr. Nottage, the apostle of dry feeding, obtained a very large percentage of fertile eggs in a season when over the entire country poor hatches were the rule. A very strong point in favor of this method is the labor-saving element in it.

The White Holland turkeys are among the heaviest layers. They have a plump and symmetrical body, and flesh of the finest texture, and are hardy, and docile in disposition.

There is no questioning the fact that

**\$7.90**

**FOR OUR 100 EGG HATCHING WONDER**

**DELIVERED**  
in U.S. East of  
Rocky Mountains

The 100-egg Hatching Wonder has triple case, large aluminum-coated tank, double-jacketed heater and our Victor Regulator. The lamp has a big bowl, wide burner and stout metal chimney. Ventilated egg chamber with double glass in door contains movable egg-tray with nursery below. The machine is 26 inches long, 21 inches wide and 14 inches high. In addition to this substantially built incubator, with its egg-tray and nursery, aluminum-coated tank, double-jacketed heater, modern lamp and automatic regulator, the \$7.90 price includes a thermometer, funnel and book of instructions, telling how to get the best results from the incubator, all delivered at any railroad station east of the Rocky Mountains.

If the Brooder is ordered with the incubator the price of both is only \$11.50 delivered anywhere in U.S. east of the Rockies. The price of the incubator delivered west of the Rockies is \$9.90 and the incubator and Brooder together \$14.75.

These prices are delivered at your railroad station, not f. o. b. factory. F. o. b. factory means that you may have to pay cartage from the factory to their station.

Better write us today, we will ship promptly on receipt of your order. Money returned if not as represented.

If you want a larger machine write for our 80-page "Victor Book." Two-thirds of the space is devoted to giving information about the poultry business. The rest tells the truth about Victor Incubators and Brooders. We start with the egg and give pointers that mean increased profits right through to the heavy fowls ready for market. How to make hens lay when eggs are scarce. How to get early spring chickens on the market in time to get best prices. Practical hints that may mean money whether an old hen or an incubator does the hatching.

We want you to have the book and will gladly send it to you free if you will send to the coupon below, or send us a postal card asking for it if you don't want to cut the paper.

washing duck eggs injures them. An experiment tried by putting in one tray eggs that were gathered from the bottom of the creek, where the breeding ducks bathe, while in the other tray were put those that were laid in the house. From twenty to twenty-five per cent of the creek eggs were fertile (according to the length of time they were in the water), while as high as eighty-five per cent of the house-eggs contained good germs.

"Of 50 chickens had with Itoup, some blind, I never lost one after using Walker's Itoup Cure. Given as a preventive I never had chickens do better."—Mary Ann Orfield, Lamoni. All druggists or pre-paid, 50c. Walker Remedy Co., Lamoni, Iowa.

### POINTERS.

—Booster Red, of South Park Lane, Des Moines, Iowa, will have a few sittings of Rhode Island Red eggs for sale this season. His advertisement appears on this page.

—Mr. J. H. Howarth, of Moulton, Iowa, writes that he still has a few more turkeys and a number of Rouen ducks for sale. See his advertisement on this page.

—Mr. H. M. McKeen, of Sac City, Iowa, has some choice Black Langshan cockerels for sale. He has been a breeder of this variety of fowls for the past nine years.

—Mrs. L. M. Estes, of Audubon, Iowa, has an advertisement on this page offering White Wyandotte cockerels for sale. She writes: "My cockerels are nice birds and from stock that scored from 94 to 95 1/2."

—Mr. Dan McCarty, of Winthrop, Iowa, is offering Single Comb Buff Orpington cockerels for sale in his advertisement that appears on this page of The Homestead. Mr. McCarty informs us that he has a choice lot of birds on hand.

—Mr. E. E. Condit, of Newton, Iowa, is offering Light Brahma cockerels for sale in his advertisement that appears on this page of The Homestead. They are of the true Light Brahma shape and from two of the leading strains of that variety.

—Mrs. F. R. McLaughlin, of Manning, Iowa, breeder of Silver Laced Wyandottes, writes: "I still have some very nice Silver Laced Wyandottes also some Pekin drakes. Sales have been good." Mrs. McLaughlin's advertisement appears on this page.

—Mrs. C. E. Crane, of Blencoe, Iowa, whose advertisement appears on this page, writes: "I have a few choice Wyandotte cockerels for sale. They are vigorous and thrifty and must be sold, as I am going to leave the state and must sell them. My prices are reasonable and all orders will be filled promptly."

—Messrs. Strater Bros., of Monroe, Iowa, breeders of Mammoth Bronze turkeys, write: "We still have one young Mammoth Bronze turkey tom for sale. He was hatched the last of May and now weighs thirty-four pounds. Anyone wanting a good one with best bone and quality, has here an opportunity to secure one." See their advertisement on this page.

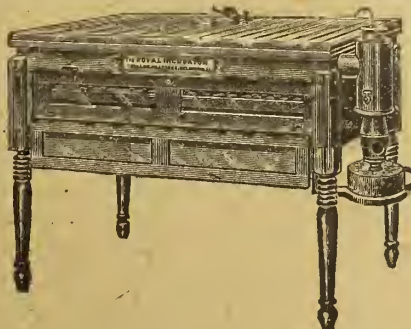

—Mrs. J. C. Webster, of Westview Poultry and Stock Farm, of Montezuma, Iowa, sends in her advertisement this week announcing she has fine Light Brahma cockerels and pullets of the leading strains for sale; also a limited number of Barred Plymouth Rock cockerels that will be sold right. They are fine birds. She can please you. Write her your wants. See advertisement on this page.

—Mrs. C. C. Kitz, of Madelia, Minn., has Mammoth Bronze turkeys of both sexes which she is offering for sale in her advertisement on page 18 of The Homestead. In furnishing copy, Mrs. Kitz writes: "I have as fine a lot of Mammoth Bronze turkeys as I have ever raised. They are from high-scoring stock and are bred right, and will be priced right. None but first-class stock will be shipped."

—Mr. Charles Stuart, breeder of Mammoth Bronze turkeys and Barred Plymouth Rock chickens, of Altoona, Iowa, in sending copy for his advertisement that appears on this page, writes: "As I have decided in the last week to move to Arkansas the first of March, I am offering some fine birds for the prices I have quoted on them. All parties wanting these birds, order in the next ten days, as I must close them out by that time."

—Mr. J. B. McAllister, of Palo, Iowa, whose advertisement will be found on this

This is a representation of the Royal Incubator, a wonderful machine and offered at a still more wonderful low price. See advertisement on page 18. This firm are so surely convinced of the good hatching qualities of their machines even in the hands of the most inexperienced that they offer to send these incubators and brooders out on the most liberal trial proposition ever offered to the American poultrymen. If you are looking

for a first-class machine at a low-down price and freight paid to all points east of the Rockies, you better write today to the Royal Incubator Co., of Des Moines, Ia., Drawer 775, for their new catalog and fifteen day Special Offer. It is printed in English and German. They also offer a very valuable book, entitled "Proper Care and Feeding of Little Chicks, Geese, Ducks and Turkeys," for ten cents., which is worth ten times its price.

## A dollar's worth of Standard Stock Food

—contains more feeds,  
—will go farther,  
—last longer, and  
—produce more and better results,

than a dollar's worth of any other stock food made, whether it costs 5c or 15c a pound.

YOU can prove this to your own satisfaction by examining various stock foods and their feeding directions. The Standard looks better, smells better, tastes better and is better—stronger, richer, more concentrated—and a much less quantity of it is required at each feed.

It gives the best results at the least cost.

Sold on our money-back, square-deal guaranty.

Go to your Dealer and ask him to supply you. If he cannot, do not take a substitute but send to us direct.

We will ship immediately and protect you with our square-deal, money-back guaranty.

**STANDARD STOCK FOOD CO., 1516 Howard Street, Omaha, Neb.**

### FREE TO YOU.

Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on the feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

**\$7.00** Freight Prepaid. **120 EGG**  
**Incubator Ever Made.**

**\$4.50 Buys the Best 100-Chick Brooder.**

Both Incubator and Brooder, if ordered together, cost but \$11.00. Double cases all over, heat copper tank; hot water; self regulating; satisfaction guaranteed. Our book, "Hatching Facts," tells all about it. Mailed free. Write for it.

**Belle City Incubator Company, Box 52, Racine, Wisconsin.**

Branches:  
St. Paul,  
Buffalo,  
Kansas City.

## A Free Book About Incubators

We issue the best book ever written on incubators—written by a man who has spent 25 years in perfecting them—by the man who made the Racine. It tells facts that you must know to get the right incubator. Don't buy without reading it, for the book is free. We pay the freight.

**Racine Hatcher Co., Box 135, Racine, Wis.**  
Warehouses: Buffalo, Detroit, Kansas City, St. Paul.

## BIG MONEY IN POULTRY.

Our big Poultry Book with many new illustrations tells how to make it, also how to feed, breed, grow and market. Poultry for best results. Plans for houses and a great mass of useful information. Tells how to start small and grow big. Illustrates and describes the largest pure bred Poultry Farm in the world; tells about our many varieties; quotes lowest prices on Fowls, Eggs, Incubators and Brooders. Mailed for 4c.

**FRANK FOY, BOX D, DES MOINES, IOWA.**

**\$8.50** Buys the Best **Guaranteed INCUBATOR**

You Are to Be the Judge. All the time you want to fully satisfy yourself. Hot water, copper tank and heater, safety lamp, best regulator, all latest improvements. Don't buy an incubator until you see it. Catalog tells all about it. It's free. **Gerry's Incubator & Poultry Farm, Box 138, Clarinda, Ia.**

## 125 Egg Incubator \$10 and Brooder Both For

If ordered together we send both for \$10 and pay freight. Hot water, copper tanks, double walls, double glass doors. Our free catalog describes them. **Wisconsin Incubator Co., Box 71, Racine, Wis.**

## GLANDT'S SANITARY HEN NEST

and breeds them for their laying as well as their exhibition qualities. She considers those she has for sale at present bet-

ter than she has ever had to offer our readers. She will ship nothing but first-class stock or strictly fresh eggs in season.

—Mrs. H. J. Hess, of Waterloo, Iowa, writes: "Orders for poultry are coming in fast. I still have a few choice Mammoth Bronze tom, weighing twenty-four to twenty-nine pounds, that will be priced right, quality considered. Also Mammoth Bronze pullets—good ones. They are of the celebrated World's Fair strain and my birds have been winners in the leading shows of the state. A few Rose Comb Brown Leghorn cockerels, good size and finely marked, also young hens and pullets by the dozen, a heavy-laying strain. Some fine White Wyandotte cockerels that are heavy-boned, well-shaped, fine, low combs and splendid, pure white plumage, without yellow tinge. Prices very reasonable." See advertisement on this page.

#### EXTRA FINE LANGSHAN COCKERELS.

On this page of this week's Homestead will be found the advertisement of Mr. E. D. Keasy, of Wota, Iowa, who is offering for sale some extra fine Langshan cockerels. These are good birds and he is selling them at popular prices in order to close them out. We have seen these birds and can recommend them to Homestead readers. Send him an order at once if you want a good Langshan cockerel.

#### UNQUALIFIED ENDORSEMENT.

Readers who want to improve their present flocks or wish to start with a very high-class breed should not fail to take advantage of the offer on this page of Mr. W. F. Chamberlain, of Kirkwood, Mo., to get a start with his famous strains. This advertiser is very widely known as the originator of "Dry Chick Feed" and "Chamberlain's Perfect Chick Feed" is now the standard everywhere. The following letter, from a high authority, is remarkably convincing: "Waterbury, N. Y. W. F. Chamberlain, Kirkwood, Mo. Dear Sir:—We are having

excellent reports from several students using 'Chamberlain's Perfect Chick Feed,' and don't hesitate to recommend it. Very truly yours, Columbia School of Poultry Culture, A. A. Brigham, director."

#### A GUARANTEED INCUBATOR FOR \$8.50.

On page 17 of this issue will be found the advertisement of Berry's Incubator and Poultry Farm, at Clarinda, Iowa. In that advertisement you will find that a guaranteed incubator is offered for \$8.50. It is heated with hot water, has a copper tank, safety lamp and the latest regulator. The catalog tells all about it and it will be sent free upon application to the above address. Please mention this paper when you write.

#### BEST POULTRY BOOK.

Here's the book you have been looking for, and it's free. In response to numerous inquiries from subscribers for a reliable book on incubators and chicken raising, we suggest that you send for the Sure Hatch book. This is a splendidly-illustrated book of 102 pages and gives more practical information than many books that sell for \$1 to \$1.50. The Sure Hatch book is so interesting that you'll sit up late to read it. Some poultry books are simply compiled from encyclopedias by men who don't know enough about chickens to set a hen. The Sure Hatch book is different. You can tell by the practical way it's written that the man who wrote it dug up his information with the spade of actual experience. He covers the ground thoroughly. Tells how to make chicken raising pay. His knowledge of incubators and brooders has been gained in building up the world-wide business of the Sure Hatch Incubator Company. Lack of space does not permit us to mention the many subjects fully treated in the book. Write to the Sure Hatch Incubator Company, Box 16, Fremont, Neb., or Dept. 16, Indianapolis, Ind., and ask for a copy of the Sure Hatch book. They will send it to you free, postpaid, by return mail.

**ONLY \$12.75** 

**For This 230 Egg Incubator and We Pay the Freight.**

It's the biggest incubator bargain ever offered.

- 1st. Because so large an incubator has never been sold for so low a price.
- 2nd. Because so good an incubator has never been offered even at double the price. It's the famous

**ROYAL (You Can't Get a Better At Any Price.)**

Understand our proposition: We pay the freight anywhere East of the Rockies; we give you a fair and square trial; we give you a bank guarantee; and we promise you that the Royal, with ordinary attention will do perfect work. Don't confuse it with "cheap" incubators; it is strongly built, will last a lifetime; automatic control of heat; perfectly ventilated and hatches the eggs. Don't make the mistake of buying until you investigate our special offer. Handsome catalog of incubators, brooders, poultry supplies, eggs for hatching and fine poultry FREE. Practical Book, "Care of Chicks, Ducks and Turkeys," 10c, standard 60c Poultry Paper one year 10c.

**ROYAL INCUBATOR CO. Drawer 755 DES MOINES, IOWA.**

**The Klondike INCUBATORS AND BROODERS**

**ARE SOLD ON THIRTY DAYS TRIAL.**

They do not require an expert to manage them. Chicken raising is made a pleasant pastime when they are used. Ask your dealer about them. He may have them on his floor to show you. If not, write us. We will be glad to send catalogue and all information.

**KLONDIKE INCUBATOR Co. Des Moines, Ia. BOX 475**

#### POULTRY.

# Mrs. Cora B. Miller Makes a Fortune

Started a Few Years Ago With No Capital, and Now Employs Nearly One Hundred Clerks and Stenographers.

Until a few years ago Mrs. Cora B. Miller lived in a manner similar to that of thousands of other very poor women of the average small town and village. She now resides in her own palatial brown-stone residence, and is considered one of the most successful business women in the United States.

Several years ago Mrs. Miller learned of a mild and simple preparation that cured herself and several friends of female weakness and piles. She was besieged by so many women needing treatment that she decided to furnish it to those who might call for it. She started with only a few dol-

Mrs. Miller's New Residence, Earned in Less Than One Year.

lars' capital, and the remedy, possessing true and wonderful merit, producing many cures when doctors and other remedies failed, the demand grew so rapidly she was several times compelled to seek larger quarters. She now occupies one of the city's largest office buildings, which she owns, and almost one hundred clerks and stenographers are required to assist in this great business.

## Million Women Use It.

More than a million women have used Mrs. Miller's remedy, and no matter where you live, she can refer you to ladies in your own locality who can and will tell you a sufferer that this marvelous remedy really cures women. Despite the fact that Mrs. Miller's business is very extensive, she is always willing to give aid and advice to every suffering woman who writes to her. She is a generous, good woman and has decided to give away to women who have never used her medicine \$10,000 worth absolutely FREE.

Every woman suffering with pains in the head, back and bowels, bearing-down feelings, nervousness, creeping sensations up the spine, melancholy, desire to cry, hot flashes, weariness, or piles from any cause, should sit right down and send her name and address to Mrs. Cora B. Miller, Box 4607, Kokomo, Ind., and receive by mail (free of charge, in plain wrapper) a 50-cent box of her marvelous medicine; also her valuable book, which every woman should have.

Remember, this offer will not last long, for thousands and thousands of women who are suffering will take advantage of this generous means of getting cured. So if you are ailing, do not suffer another day, but send your name and address to Mrs. Miller for the book and medicine before the \$10,000 worth is all gone.

Active and retired farmers, and all persons owning, renting, dealing in real estate or property of any description to send for sample pages of the only work of the kind published in the world.

## "The Encyclopedia of Iowa Law."

"No work like this has ever been published in the English language." From The Homestead.

"Your book is the only one I have seen on which I can place any reliance." The Hon. H. E. Deemer, Judge of Supreme Court.

"I would not take one hundred dollars for it if I could not get another." W. W. Hagin, R. F. D., Union, Ia.

"No fifty volumes, and I might safely say, not even a hundred volumes in my library could be selected that would be to me of so much practical use what the law is in Iowa on a given question, or advising others as to the law." Judge C. B. Bradshaw.

"The laws of Iowa need no longer be a sealed book to the people of Iowa." Register and Farmer.

Sample pages free to those interested. Address, Iowa Law Book Co., Box 342, Marshalltown, Iowa.

## Musgrave Wire Stretcher

Stretches fence post and post; turns with a crank; pulls 10,000 lbs., \$6.00. Also ask for cat. lawn, poultry and hog fences and gates.

MUSGRAVE FENCE CO., Des Moines, Iowa

## SAVE YOUR MONEY

Give us an opportunity to quote you freight rates on shipment of your household goods to the Coast or Northwest. Address, L. L. Box 299, Des Moines, Ia.

## OUR LEGAL DEPARTMENT

THIS department is edited by a practicing lawyer, who has had years of experience at the bar. He will give accurate and reliable answers to all legal questions when they are of sufficient importance to be of practical interest to any considerable number of our readers. Subscribers who desire questions answered in this department should base them upon a brief, plain, concise statement of the actual facts. To insure immediate attention inquiries should be addressed to "The Legal Department," in care of this paper; but as the inquiries sent are at times very numerous, thus delaying printed answers, those to whom it is important to receive an immediate reply by mail should remit \$1.00, addressed as above.

## LAW QUESTIONS CONSIDERED.

### CUT TIMBER PERSONAL PROPERTY.

A Subscriber, Weeping Water, Neb.—A owned a farm and sold to B one acre of standing timber upon it—not the land, but the timber. Afterwards A sold the farm to C. B. has the timber he bought, cut and ricked up on the land. In case the timber is not removed from the land when C takes possession of the farm, can he hold the timber?

Answer—If C knew when he bought the farm that the timber had been sold by A to B, C cannot hold it. It might, however, save all parties trouble for B to remove his timber before C takes possession.

### OUTLAWED JUDGMENTS.

A Subscriber, Reece, Kan.—B and M went to law over a small debt. The court gave B judgment against M for \$170, and also gave M judgment against B for \$85. B has kept the taxes paid on his judgment; and M has not kept the taxes paid on his judgment, thinking he could never collect it because B has nothing. M has since then bought a farm in the same county where judgment was rendered, and also has a lot of live stock and a farm in an adjoining county. The judgments were rendered nine years ago. (1) Are the judgments outlawed? (2) Can B have execution levied on M's farm in the adjoining county to satisfy his judgment? (3) Can M turn the property over to his wife to defeat the judgment?

Answer—(1) They are. The law provides that a judgment becomes dormant in five years if no execution be issued thereon, and that a dormant judgment may be revived within one year thereafter. When this is not done it is outlawed. It is unnecessary to answer the second and third questions.

### CHANGE OF NAME.

A Subscriber, Hopkins, Mo.—A man by the name of Smith took a boy to raise whose name was Jones. He did not adopt the boy, and as the boy grew to manhood he was called Smith, but he was married by the name of Jones and signed all papers such as notes and deeds with that name. (1) Can he have his name changed to Smith, and if so, how? (2) Would he have to have all the papers he signed as Jones changed? (3) Can his children marry or do any business lawfully under the name of Smith, unless his name is changed?

Answer—(1) He can have his name changed from Jones to Smith by filing in the circuit court of the county where he lives, a petition, under oath, giving his full name and the new name desired, and stating his reasons why the change is desired, and the court will thereupon make an order changing the name accordingly and the same will be entered of record and notice must be published thereof in a newspaper of the county (if there be one) three times, and if there is none, then in St. Louis or Jefferson City. (2) The record of the changed name should also be recorded in the office of the county recorder wherever there be papers or documents

Warranted to give satisfaction.

## GOMBAULT'S CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeney, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price \$1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio.

## 476 Drops Without Missing or Breaking a Kernel

This is what the J. I. Case Round Hole Plate Runner Planter has actually done. It may even do better.

We know it will exceed in accuracy of drop with either mixed or selected corn, that of any other planter made. This claim for a round hole plate planter may seem somewhat remarkable to you, but exhaustive tests have proven it true. We cannot describe here the perfect dropping mechanism. You must see it to fully understand it.

## J. I. CASE ROUND HOLE PLATE RUNNER PLANTER

not only drops more accurately, a given number of kernels, but it does not crack the corn. The valves are so constructed that the planter will drop in check at whatever speed the team may travel. And they will not clog up.

If you are interested in planters, you cannot afford to overlook this one. See it at your dealers. Or write us specially for a complete description. Our catalogue is free. It describes fully the entire J. I. C. Line, including the Single Disc Planter and the Edge Drop Planter, which forms the strongest combination of planters made by any one factory.

## FREE Farmer's Encyclopedia

Simply tell us what implements you will need this season, enclose ten cents for packing and postage, with name and address of your dealer. Book of 145 pages, bound in cloth. Write to-day. Address:

J. I. Case Plow Works., Dept. P 22 Racine, Wis.

signed by the old name, but no change should be made on them. (3) They could.

### ASSUMED NAME.

A Subscriber, Brighton, Iowa.—A married B under an assumed name. (1) Is the marriage valid and binding in law? (2) Do the parties and their children have the same property rights as to inheritance, distribution, etc., as though A had been married to B under his real name?

Answer—(1) The marriage is valid and binding. (2) The parties and their children have precisely the same rights as to property and in all other respects, including inheritance, distributive shares, etc., as though the man had married by his real name.

### MONEY HAD AND RECEIVED.

A Subscriber, Hopkins, Mo.—A exchanged his milling plant in Missouri to B for his farm in Kansas, possession to be given by each to the other on or before April 1, 1905, but as the season was getting late for renting farms, before A got possession, he instructed B to lease the farm and assign the lease to him, A, when the deal was completed, which was done. The rent was in cash and a part was paid down to B, which he turned over to A. The lease called for a note of \$100 and the balance of the rent was due January, 1906. B said there was no note given, but had it at the same time and sent it to a bank in Kansas and collected the money on it, two months before it was due. The mill and the farm were exchanged according to contract. Can A recover the \$100 from B and would it be a civil or criminal action?

Answer—A can sue B and recover the \$100 and interest. It would be a civil action for money had and received. B is not liable to a criminal prosecution.

### RAILROAD CROSSING.

A Subscriber, Lake Mills, Iowa.—The railroad track crosses my farm. The railroad company constructed a private crossing for me, but in the winter the company takes the planks away, and I have to get other planks and lay them over the track, and then remove them after I have crossed. I have much hay and wood to haul across the track in winter time, and this crossing is the only place where I can cross the track. What can be done about the matter?

Answer—The law provides that at the request of the land owner the railroad company shall not only make a suitable crossing, but shall keep it in good repair. See Sec. 2022, Iowa Code, p. 703. You might apply to the railroad commissioners for relief, or you might bring an action in the district court for mandamus. In either case you would need the services of a lawyer. The railroad company can surely be compelled to keep your crossing in good repair in the winter as well as in the summer.

### ABATING A NUISANCE.

A Subscriber, Polo, Ill.—A and B own adjoining farms, with a partition fence between. A has woven wire on the side of the fence next to his field, about forty-two inches high, and two barbed wires above that, making altogether a very good fence, but he has attached on the other side of the posts next to B's field two barbed wires, twelve and twenty-four inches from the ground. B keeps fine thoroughbred mares in this field and it looks as though these lower wires were placed for the purpose of injuring B's valuable horses. In view of this B erected a new woven wire fence on his own ground three feet from the partition fence and running parallel with it, so as to protect his horses from the dangerous wires. (1) Had A a legal right to place the wires as stated? (2) Can he be compelled to remove them? (3) Can B have the matter rightfully settled without difficulty?

Answer—(1) He had no such right. The wires placed as you state form a manifestly dangerous trap for a horse's foot, without being of any use to the fence. They therefore constitute a nuisance.

## SEPARATOR FREE

FOR A TWO MONTHS' TRIAL WE WILL GLADLY SEND YOU A CREAM SEPARATOR; you can use it sixty days, and if you are not sure you have received the best separator in the world, the trial won't cost you one cent. Write for our new Cream Separator Catalogue and learn of THIS GREAT OFFER.

**\$19.75** buys our wonderful 1907 model Dundee Cream Separator, the equal of any machine sold by anyone else up to \$40.00. Our Improved Economy Cream Separator, slightly higher in price than our Dundee, is guaranteed the best separator made, regardless of name or price, and is sold at a small part of the price others ask for high grade separators; and we guarantee our Economy to have greater capacity, to skim closer, skim colder milk, run easier and not get out of order wear longer than any other machine in the market. We guarantee it 20 years, take care of it for you from the day you receive it, and will always furnish you any needed repair or part in the years to come, promptly and on a few day's notice.

**PRICES NOW GREATLY REDUCED.** OUR CREAM SEPARATOR OFFERS are more liberal, more wonderful than ever before, greatly improved models, prices lower than last season. If you have more than one cow, write us a letter or a postal and say, "Send me your New Cream Separator Catalogue and all your new offers," and our great 1907 cream separator proposition will go to you by return mail, free and postpaid. We have two big cream separator factories and can sell you a machine on a two months free trial, on manufacturing cost basis, much less than dealers and agents pay (all these profits you save), at a lower price than you ever thought possible. If you buy from us you get our free Profit Sharing Certificates and can exchange them for your choice of any number of most valuable articles, which we give our customers free. Write for catalogue today. Address: SEARS ROEBUCK & CO., CHICAGO

## Backache and Rheumatic Sufferers,

SEND FOR A 50c. BOX OF  
Swain's Backache and  
Kidney Pills  
"FREE"

You who suffer from Backache, Rheumatism, Gout, Lumbago, Sciatica, Too Frequent, Scanty or Difficult Urination, Gravel, Bright's Disease, Diabetes, Dropsy, Constipation, Nervousness, Female Complaints, Loss of Sexual Desire and many other diseases that come from the kidneys may test Swain's Backache and Kidney Pills "FREE" by sending us ten cents to pay postage and show your good faith. On receipt of the ten cents we will send you a fifty-cent box "FREE." Would we do this, if we did not know that Swain's Backache and Kidney Pills would cure or benefit the above mentioned diseases? Certainly not, for we rely on you to be the sole judge. Address

Swain Medicine Co.,  
Dept. 12, Kansas City, Mo.

sance, which B should tear away without law, and prevent A from going on his (B's) side to attach them again, and if he does attach them again, tear them away again, and if he does attach them again, tear them away every time; it would be but abating a nuisance, which B has the right to do. (2) Probably not, but B can remove them. (3) Probably not, but he should make difficulty for A and let him sue if he wants to. A's conduct is outrageous?

**WITH THE EDITOR.**

Some of our readers have visited the  
capitol building while the legislature  
was in session, but probably the larger  
number have had no such experience.  
For their benefit I shall chat about a  
visit to Topeka, which occurred the mid-  
dle of last month. I went up to at-  
tend the yearly meeting of the Kansas  
Women's Press Association, which met  
this year, for the first time, at a date  
which enabled its members to "take in"  
the sittings of the state legislature. By  
great good luck it chanced that the day  
of our visit was one on which there was  
spirited discussion in both chambers. We  
saw the law-making assembly, if not at  
its best, when it was at least decidedly  
interesting.

The Kansas capitol is not as impos-  
ing as some other state buildings I  
have seen, but it is a handsome struc-  
ture nevertheless, and to a non-exacting  
sightseer seems to serve its purpose very  
well. In addition to the legislative  
chambers, the various committee rooms  
and state offices, it houses the state  
library, of which I wrote after a pre-  
vious visit, and the traveling library, of  
which I hope to tell something in the  
near future.

It was not the building we went to  
see this time. Immediately upon arriv-  
ing we proceeded directly to the house,  
as the lower chamber is termed. In  
this large hall with galleries for the  
public at both ends we found the state  
congressmen seated each at his desk like  
so many pupils in a boys' school. On  
a raised platform at one end sat the  
speaker, toying with the gavel. In front  
of him were the clerk of the house, re-  
porters, etc.

Just at first we used our eyes rather  
more than our ears—the personnel of  
the men at the desks absorbed us. The  
first thing which struck us was that  
the majority of the men appeared to be  
in the forties—there were few bald-  
heads and fewer gray beards. The sec-  
ond thing we noticed was that, on the  
whole, it was a clean-looking body of  
men—there were no bloated faces or  
costly-looking noses.

Evidently the house had at some pre-  
vious sitting referred a bill regarding  
Sabbath observance to a committee.  
This committee reporting back to the  
house that morning, had presented a  
majority and also a minority report.  
When we arrived the house was debat-  
ing which of these reports should be ac-  
cepted. As we were in the ladies' gal-  
lery and had no memoranda we found  
it a little difficult to gain a clear idea  
of the proceedings, but eventually we  
gathered that one part of the committee  
wanted stricter Sunday laws, laws which  
would prohibit Sunday circus and vaude-  
ville performances, and baseball playing,  
and the other—well, it turned out that  
the other did not know just what it  
did want; rather the report it presented  
could be construed to mean either of  
two things and the men could not agree  
as to which was recommended. It was  
really comical. If such a thing should  
happen in a woman's body when men  
were present the women would be held  
up to the ridicule of the nation for  
many a day. Nobody there seemed to  
think it was anything out of the way,  
however. Possibly it is a common oc-  
currence. It ended by the house refer-  
ring the bill back to the committee for  
further consideration. The discussion  
which brought out all this was decid-  
edly interesting. We gathered that the  
good old-fashioned Sunday is still good  
enough for a good many Kansas legis-  
lators, and that they wish their constitu-  
ents to know where they stand on this  
important matter. None of the speeches  
made were especially profound, brilliant  
or even up-to-date. There was no dis-  
play of philosophic reasoning, no flights  
of oratory and no one seemed to know  
about the stand recently taken by  
France in the matter of Sunday observ-  
ance. Still the speeches were good, the  
men spoke from the heart, and some of  
them spoke pretty well. Their points  
were well taken and they made them-  
selves heard.

When, leaving the house, we hurried  
to the senate, we found that it was  
in executive session, with closed doors.  
As it was then 11:30 and adjournment  
would soon be in order we decided to  
depart and return later, which we did.

the committee on ways and means.  
To serve the people well in the legis-  
lative assembly is a high honor. It  
calls for large and varied gifts and  
strong character, but as we were jour-  
neying back to Kansas City that eve-  
ning my friend and I agreed that we  
knew women not a few who could fill  
the place with credit to themselves and  
benefit to the country.

**HOME AND HOMEMAKING.**

**LITTLE HELPS BY THE WAY.**

One kindly deed may turn  
The fountain of thy soul  
To love's sweet day-star, that shall  
O'er thee burn  
Long as its currents roll!  
Oliver Wendell Holmes.

Life is not so short but there is always  
time for courtesy.—Emerson.

Politeness, or civility, or urbanity, or  
whatever we may choose to call it, is the  
oil which preserves the machinery of so-  
ciety from destruction.—Dr. J. O. Holland.

**KEEPING WARM IN WINTER.**  
Chief among the beneficial exercises in the

matter of keeping warm is deep and full breathing through the nostrils. There are plenty of exercises for the body, arms and legs to help the different kinds of breathing. But for my own part I find that deep and full breathing without such movements is quite sufficient. The full breath consists of a deep lower inhaling, followed, without exhaling yet, by an inhaling during which the ribs expand outwards; then, still without exhaling, the breath is sent to the top of the lungs; there it is held for a moment or two; then it is gradually, yet fully, exhaled. It took me many months to learn this way of breathing, which consists of several successive processes, just as the action of rowing does, although we speak of the whole "stroke" as of a unity.

There are other useful exercises. The most familiar are stamping the feet or running, swinging the arms across the chest (in cabman fashion), and rubbing the hands. Rubbing the body with a very rough towel after the bath is fine exercise if it is done thoroughly and energetically.

Few people, however, know how quick is the effect of an altogether different kind of practice—namely, stretching. Stretch the leg out and stretch the toes well out and down; then keeping the leg stretched out, stretch the heel down, instead of the toes. Do this with each leg in turn. Do it with the arms also, stretching the arm out and then the fingers out, then the "heel" of the hand instead of the fingers. One reason why this makes one feel warm is that it gives a clear passage of blood which before had been too sedentary.—London Mail.

JUST A FEW SMILES.

Mother—"Tommy, what did I say I'd do to you if you touched that jam again?"

Tommy—"Why, it's funny, ma, that you should forget it, too. I'm blamed if I can remember."

"Here, hold my horse a minute, will you?"

"Sir! I'm a member of congress!"

"Never mind. You look honest. I'll take a chance."—Courier Journal.

THE GIRLS THAT ARE WANTED.

The girls that are wanted are home girls, Girls that are mother's right hand, That fathers and brothers can trust in, And the little ones understand.

Girls that are fair on the hearthstone And pleasant when nobody sees; Kind and sweet to their own folk, Ready and anxious to please.

The girls that are wanted are wise girls, That know what to do and to say; That drive with a smile and a soft word, The wrath of the household away.

The girls that are wanted are good girls, Good girls from the heart to the lips; Pure as the lily is white and pure, From its heart to its sweet leaf tips. —Selected.

FROM THE HOME COOK BOOK.

Good Scramble—Make the same as described for headcheese until the liquor is poured over the chopped meat and boiled, when cornmeal is stirred in until the contents are as thick as cornmeal mush. Stir constantly for ten or fifteen minutes, then set back on stove and cook slowly for an hour. When

PORTABLE PLATFORM SCALES

OUR SPECIAL

600 lb. - \$5.75

900 lb. - 8.60

1000 lb. - 9.50

The Greatest value ever offered in a high grade platform scale. This is not a cheaply built scale offered at a low price, but a scale built to give satisfaction. Guaranteed accurate. This scale is covered by our 10-year guarantee, and should any part or parts prove defective we will replace them free of charge.

Portable Forge \$3.75

Sterling Lever Forge. Very neat and complete, with a round fire pan 18 inches in diameter; height 30 inches; fan 8 inches in diameter. This forge is especially adapted for farmers' or planters' use, or for light repairing and rivet heating. This forge has wrought pipe legs. The operating principle is a most positive and simple device; nothing about it to get out of order. Will produce a welding heat on inch iron in 5 minutes; just the tool for a farm and shop; weight, with shield, 65 lbs.

TRIO STEEL RANGE, \$24.25

This is a strictly high grade steel range as illustrated, with high warming closet and porcelain lined reservoir. Burns Hard or Soft Coal or Wood. Six holes either 8 or 9 ins. over 15x20x18 inches. We carry a complete line of ranges, cook-stoves, base burners and heaters.

done pour into a shallow dish or mold. This is sliced thin and fried when wanted for the table.

Potatoes Roasted in Gravy—Pare potatoes of even size, letting them stand in cold water for ten minutes. Dry and put in the pan with the roasting spare ribs. They will come out brown and crisp, and will be found very appetizing.

Timbale of Rice with Peaches—After washing six ounces of rice, put into an agate stewpan with a little butter, four ounces of sugar, and a few pounded bitter and sweet almonds. Add one quart of milk and a little salt. Let the whole boil very gently over a slow fire, and by the time the milk has been absorbed by the rice the latter will be sufficiently done. When the rice is done, add the yolks and the well-whipped whites of three eggs. Line a mold with short paste. The prepared rice should then be put into the mold and baked for about an hour. Then turn the timbale out of the mold onto a dish, and sprinkle with sugar. Put some canned peaches around the base, and set away to get cold. This is delicious and can be eaten hot as well as cold.

## AMONG OURSELVES.

Sometimes in the course of a discussion carried on Among Ourselves for several weeks it becomes advisable to allow the person who started the subject to speak a second time. It will be remembered that our friend, Mrs. Ed. Streeter, started a ball rolling which gave us a merry chase. Well, Mrs. Streeter is here again this week:

This week has been a splendid one for meditation. It has stormed since Monday till today (Saturday). How we do rejoice in the sunshine again! If gloomy tempers and nagging dispositions have the same effect on those around us as this "spell" of weather has had, then I do hope that none of us will ever be guilty of indulging in them. We cannot all be beautiful, but we can all be sunny, and this brings me to the subject I started out to talk about. I have revolved over and over in my mind the answers to my questions to the gentlemen friends. One question they misunderstood. I said they "pretended" contempt for women, not that they did have contempt. Now, I think the early training of some men has had a great deal to do with that "pretended" contempt. I have heard, and no doubt you have also, heard people say to some small boy, "Girls are no good, are they? They can't do this, or they can't do that, can they?" And they grow up with the idea that girls are rather a necessary nuisance. I did not intend to convey the meaning that they had contempt for their character. As for going to church, I think it is as some said, that men are out in the world all week, and when Sunday comes they much prefer resting and reading their neglected papers to crowding into dress-up clothes and sitting decorously in church. As to tracking in mud and leaving old clothes around, that is all a matter of training and habit, and a woman with tact and diplomacy can overcome it to a great extent, or she can drive a man to the saloon, or any other place but home by eternally jawing about it. I suppose a great many of you have read the articles in the late Cosmopolitan on "The Girl Who Travels Alone," by Eleanor Gates. I wish some of you would express your opinions about girls traveling alone. My opinion has always been that a woman was safe anywhere if she carried herself with dignity. I want to tell the children about our walnuting trip some time.

I second the motion about book talks. Let us have them once in a while.

The motion for occasional book talks having been duly seconded, it is now before the house. What will you do with it, friends? Apropos of Mrs. Streeter's remarks, is it not true that from the time little boys are promoted to the dignity of trousers they are taught that boys are superior to girls? I knew a little lad who was punished by being put in petticoats when he was naughty, as if to be a girl were the worst thing that could befall him.

But another friend who gave us a topic for lively discussion is with us, An Illinois Bachelor, friends:

Would I intrude to ask a second hearing? It seems as if I had stirred up a hornet's nest. I am causing controversy as diversified as President Roosevelt on the negro troop decision. My remark on kissing was wrongly interpreted. I would deserve criticism and even reproach should I ask a lady for a kiss; but can I not find out her views without lowering myself to this? I meant that I did not intentionally keep company with a girl who would allow a good-night kiss. If I were a girl I would not keep company with a young man who used intoxicants, tobacco or profane language. Such are not worthy of a lady's company. I would like the opinion of both sexes on this matter. I wish some lover of books would tell me something to read. "Richard Hardy's Seven Days" is good and so is "Alice of Old Vincennes." I have read the Bible through twice. How many of you have done that?

I wonder what a show of hands on that question would give us?—not what it would twenty-five years ago I fear. Let us resolve to read our Bibles more. The "Pleasant Fields of Holy Writ" will reward our ranging, of that be very sure. And won't those who are doing general reading tell us of books they are finding worth while? In a circle like this we ought to have no trouble in having a good book talk quite often.

The bachelors have been making quite a sensation in our circle of late. Of all who have appeared before us none has made a better impression than Minnesota Nicholas whom "Justice Sincere" makes a text for a fine little sermon:

I wish to express my pleasure in reading such a manly letter as Minnesota Nicholas wrote. Such character as he exhibits does not spring up in a day. It is part of a heritage that is without price. He is the kind every young woman should hold as her ideal if she values future happiness. The young man that is not a gentleman always, or the young woman that lacks in womanly grace and modesty is not the one that will strive his or her best in life for the other's happiness. Girls, if a young man cares

Otto Schwien, Box 206 Davenport, Iowa

for you as he ought, he will protect your virtues as he would his life. Don't trifle and flirt. There are better ways, and as to the husband with whom you will be

happy, don't expect to meet him in the ball room or among the sports, but rather at the churches. If this were oftener the rule, than the exception, more of our young men would be in the churches and would be manly men. Perhaps, girls, you have never given a serious thought to this, that a part of this responsibility is yours. Young men, place a value above price on your own self-respect, for when you cannot respect yourself, who else can? Character is yours to make or to mar. The highest tribute that can be paid you is that you are a man of your word and a Christian gentleman. "Justice Sincere" has a word regarding Cousin Hardmaster, but it will keep until next meeting.

"M. L. Farmer" is so interested in Minnesota Nicholas that she says: "I would like to know where he got his ideas," then addressing the young man, she asks, "Did you get them from your mother, or from your father, or from both? Or did you get them by reading and thinking and observing?" We shall be pleased to have Minnesota Bachelor answer these questions. Another member of the circle, "A Farmer's Wife," after congratulating the young man upon the stand he has taken proceeds thus:

True Christian men and women should do their utmost to abolish a different standard of morals for the sexes. To that end I am going to risk treading on toes, but let me say the toes trod upon deserve a five-pound rock dropped on them. I refer to women, several of whom are usually found in a community, who spend time that could be better employed in training both sons and daughters in Christian principles and a decent regard for the proprieties of life—in talking and manufacturing scandal, and repeating tales whose strongest point has a distinct packing-house odor. Although gossip is supposed to be only a woman's weakness, many men seem to enjoy the same diversion, judging from tales repeated to me by my husband, and the wives of other husbands. Creameries seem a popular place for the spreading of unsavory yarns, and stranger of all, the man or woman who will not mix in this talk is not popular. We see lots written about the high ideals of the American citizen, and much of it is true. But there is certainly needful improvement in that respect. It has also been said, the pen is mightier than the sword, and I wish every true man and woman would use their pen and voice against this blot upon American manhood and womanhood until such a sentiment is created against it that our rural homes may be purged of falsehood and gossip, and those who derive entertainment therefrom may become ashamed to utter the imaginings of their evil minds.

The matter of the existing double standard of morals referred to by "A Farmer's Wife" seems to appeal very strongly to our readers if we may judge by the number of letters received. Like some other subjects of very vital interest to the home it is a subject difficult of general discussion. There are persons who think that to discuss such a subject is almost indecent; persons who think it probably dangerous, and persons who think it certainly questionable, as well as persons who think that the best interests of society are served by pure-minded, fearless exchange of opinion which tends to the formation of healthy public sentiment. Let us respect each other's judgment as we listen to a final word on the matter from Nebraska Bachelor and R. A. P.:

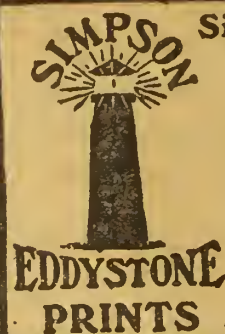

I want to enter a plea for an equal standard of purity for both sexes. Parents, teach your boys, as well as your girls, to be pure and modest and honorable. Set them a good example yourselves; try and turn their thoughts in proper channels; allow no vulgar or degrading conversation or literature in your home; do not allow your girls to associate with boys or men unless you know them to be of good moral character. To the girls I would say, have nothing

to do with a man who does not pay your proper respect. Do not allow any undue familiarity; remember that one occasion of this kind leads to another and do not let it pass unrebuked. If a man's intentions are not purely honorable you should not desire his company. And I will add, even if I am a man, that if you are a good, pure girl, the best of them is none too good for you. And to the boys I would say, do not take any liberties with a girl that you would not have some other fellow undertake toward your sister. Remember, when you drag a girl down, that you are breaking her mother's heart, just as surely as your mother's heart would be broken should your sister be dragged down by some other fellow.

The discussion, "Why are there so many fallen women?" has run some time, but it seems to me that it is of vital importance, for we all have mothers, and most of us, sisters or daughters. I know but little about city life, so will write from the country's standpoint as I see it. Why are there so many fallen women? Almost always because there are fallen or depraved men and boys, and why these men and boys? Our answer is, on account of false teaching or standards, or lack of any teaching. When will fathers and mothers realize that to protect their home and daughters they must protect and teach their sons right living and standards, and this teaching can't begin too young. The man or boy that would tempt a woman or girl has first degraded his own manhood or had false teaching, for an upright man naturally respects and protects woman. We have used the words, boy and girl, because we wonder how many fathers and mothers stop to think of the many temptations their children have to meet before they are in their teens, especially in our schools. Teach and protect your boys from the cradle up, the same as your girls, and help them to realize that the happiest life is the upright one. When men and boys are given to understand that there is but one standard for all, then will they conduct themselves accordingly. Man has demanded purity in woman and woman has met the demand. Now let woman demand the same of men, and they will meet the demand, and let the men with wives and daughters join them.

More and more I am persuaded that the most important work in the world is training the young, and the more fully I am persuaded on this point the more anxious am I that this matter should receive here Among Ourselves the attention it deserves. If we had a good vital talk along this line every week in the year it would not be too often. I am glad we are to have one this week. I bespeak a cordial hearing for "A Sad and Empty-armed Mother."

Let me give you a true incident. A young mother had a beautiful baby boy. He was her only treasure, as his father died shortly after his birth. Against the advice of true friends she gave up to her baby's every whim. While only a few weeks old, she carried and rocked him by hours, just because she loved to do it. Later on he grew too heavy for her strength, but on being laid in his cradle and coaxed, he kicked and struggled and cried till his face was blue. This his mamma could not endure, so, with aching arms, she carried her darling till he was asleep, and she was ready to drop with fatigue. This baby soon screamed, kicked, rolled on the floor, slapped and scratched his mamma's face, for by so doing he got what he wanted. When he started to school, more trouble arose, for he expected to have his own way there, too. His mamma would pity her "much abused" pet and told the teacher she knew "he had a temper," but she couldn't see why the rest didn't let him have "his own way." They surely could do that; they ought to pity him, as he had no dear papa like they had. Common sense knows this made things worse, as the children beat the boy and made his nose bleed once, so he was kept at home and mamma taught him. As he grew older, he got in many scrapes and at the age of twenty in a fit of temper, he shot a chum, for which he spent years in confinement. Luck alone kept the bullet from killing. Once his now white-haired, broken-hearted mother, although she is forty-three years old, he moaned her fate, saying, "Oh, son, why did you bring such sorrow to your poor mother's heart? Far better you had died with your

father." He said, "Mother, since I have been in prison I have learned to keep my temper in check. Had you taught me that, I would not now be here. You have ruined my life, so don't come here to reproach me for bringing sorrow to you." Hard words for her bleeding heart; but was the son very wrong? I see numberless hands "held up in holy horror." I think a person that puts a child in the cellar or uses a whip cruelly is a brute, and not fit to own a child. Loving words will do more good than such treatment, but if words fail, a little switch will often help. Show the child why you wish it to mind. Often children are abused and never know what it really is for. The mother who always lets her children have their own sweet will loves herself better than them, for that is easier on her, just at the time. Teach your children to always have their own way and think others are abusing them and soon they will trample on and disrespect you. A baby will cry for a butcher knife as soon as for your friend's gold watch. Baby will spoil the watch by dropping it, but the mother will let her have it; but she removes the knife and lets her baby cry, sooner than let her have that. Now why does she not do the same about the watch? Simply because she is selfish. Here are some questions I would like to see discussed in the Home Department. Are all parents responsible for what their children are? Should all parents be blamed because their children are not what they ought to be? Do children, not only the younger ones, but the older ones, live up to the good training which they get at home?

A talk of this kind cannot fail to be helpful to parents. It is hoped that some questions about to be propounded by Mrs. Mira Scott will lead to other talks of a similar character.

Dressmaking and Millinery. No. 555.

Sylvia Silverthorne, Muscatine, Iowa. [All inquiries and remittances for patterns described in these articles should be addressed to Sylvia Silverthorne, Muscatine, Iowa, and not to the office of this paper nor to the editor of the Home Department.]

There are wonderful possibilities in some of the cast-off garments in any wardrobe, of which, the chances are, the possessor is unaware. Put into the hands of the professional "cleaner and dyer" they might come back to you "like new" and ready to wear, or to be remodeled, if that is desirable. While home dyeing and home cleaning (the latter of garments that may not be laundered in the ordinary way) will most often prove a "delusion and a snare," the professional is able to not only do the work in a satisfactory manner, but he can also foresee possible results, and will not advise work that will be of no advantage to you. In a general way I can give you a few hints, but for specific cases I must refer you to those familiar with the business. This line of work is now carried on in all

Kalamazoo Stove Co., Manufacturers, Kalamazoo, Mich.

All Kalamazoo Cook Stoves and Ranges are fitted with patent oven thermometer which makes baking and roasting easy. All stoves blacked, polished and ready for immediate use when you receive them.

OAK STOVE HEATER, For All Kinds of Fuel.

Oven Thermometer

the process. The exceptions to this are that stains and discolorations are not always remedied, although if you know the cause of the stain or what has taken out the color, the cleaner may be able to use the proper "corrective." Any fabric that is all of one material, as all-wool, all-silk, all-cotton or all-linen may be dyed, but mixtures need to be tested before there is any certainty. Any color may be made black, but not always a satisfactory black, for if there are strong

[5003—Bishop Nightgown, 32 to 40 bust.]

contrasts of color there may be two shades seen in the dyed fabric. Here again the judgment of the skilled must be called to your aid. Any plain colored material may be dyed another color or shade, but only by having a piece of cloth tested are you able to be certain as to the color or tint it will show when it has gone through the process. Usually the new color must be

[5537—Girl's Dress, 8 to 14 years.]

one that is darker than the original. For mixed materials the only way to know beforehand what shades and colors are possible is to submit a sample of the fabric to the dyer, and he will return it to you "dyed." Then you can decide whether or not you care to have the work done. I have been agreeably surprised within the last year to learn to what extent the ablest and best-dressed people are patrons of dyeing and cleaning establishments. It is an "economy" of which we should all take advantage, and I gladly pass on such information as I am able to give.

I need not describe the Bishop nightgown

pictured in No. 5003, as all are familiar with it, and it is a general favorite. For those who have been requesting this I must say that I was not prepared to present it earlier. The sleeve is joined to the body portion in a seam that extends to the neck. The adjustment is made by means of drawstrings run through beading, and it may be made to fit up about the neck as snugly as one likes. The sleeves may be open, or adjusted by means of beading and ribbons, or even by joining to a band. Pattern No. 5003 is cut in sizes for a 32, 34, 36, 38 and 40-inch bust measure.

No. 5537 pictures a charming guimpe

dress, the broad pleat at the front giving a suggestion of the princess. If liked the dress may be made of one material throughout. A lining is provided with the pattern, but this may be used or omitted at will. The waist and skirt are cut separate and joined in a seam, except where the front is extended to form the pleat that gives a vanel effect. Pattern No. 5537 is cut in sizes for girls of 8, 10, 12 and 14 years of age. Give age when ordering pattern. Send eleven cents in money (not stamps) for any pattern wanted, these or others. Address all orders to Sylvia Silverthorne, Muscatine, Iowa.

## PLEASANT FIELDS OF HOLY WRIT

### The International Sunday-School Lesson.

First Quarter. Lesson VI. Genesis xii, 1-8. February 10, 1907.

#### Abram Called to Be a Blessing.

Four centuries and a quarter had passed since the flood. Noah himself had been dead only seventy-five years. Yet the new race seemed as deeply sunk in as the old. The goodness and severity of God in the deluge appeared to have been in vain. In the midnight gloom of a general degeneracy some few tapers, like that of Melchisedec's on Zion were yet alight; but even these were in danger of extinction by the violence of the wicked.

The race was in revolt against God. It had built its defiant tower, whose lofty stories were to be a refuge in case of a second flood. It seemed to have learned nothing by the sudden judgment which confounded its language and scattered it abroad. The first chapter of the Epistle to the Romans gives a faithful portraiture of the moral condition of the race at this period. Though they knew God, they glorified Him not as God, were thankless, and changed His glory into an image. "With their theoretical errors the stream of their practical transgressions rose to a fearful height." The remains of these eldest cities of the Euphrates Valley, now being dug up, show the people given to those gross immoralities usually attendant upon heathenism. The peril was so extreme that the knowledge of God would be entirely lost, and that, too, not by accident but by design. They did not like (wish or care) to retain God in their knowledge, so the foolish heart of the race was darkened.

At this crisis an ever-watchful Providence stepped in, meeting the emergency in a manner to excite the admiration of men and angels. He let the stream of human life flow on in its perverse course, not arresting it by any further general judgments. But from the great torrent foaming out its shame and casting up its mire and dirt, He took aside a little stream comparatively pure and had it run in a channel He had prepared for it, much as water is taken aside in the race to turn the mill. Here was no capricious favoritism. The design was to bless all humanity by blessing one of its families.

The proverb, "What God does, is well done," has no finer exemplification than in the selection of the progenitor of the new race. His very name is significant—Abram, "exalted father." Physically, intellectually, spiritually, he was God's man for the hour. His phenomenal virility has survived in his descendants for forty centuries. So has his intellectuality. He was ready for the glorious appearance that approached him. Then, as ever, the prepared message came to the prepared mind.

Abram was the first of pilgrim fathers, the first emigrant impelled by religious motives. He undertook his journey for his conscience' sake. He left a lovely land—marvelously rich—the home of the wheat-grain, pomegranate, apple, and grape. He left the highest civilization of his day and libraries with their tile-page volumes. He left country, kindred, father's house, to become henceforth a pilgrim and a stranger.

Well may his name be engraven high upon that tall obelisk, the eleventh chapter of the Epistle to the Hebrews, among the immortal heroes of faith, for it was with faith that he heard the Divine call, and by faith he obeyed, going out, not knowing whither he went.

It pleased God to encourage and sustain his faith with exceeding great and gracious promises. God undertook to be his guide, promising to show him the land, to make of him a great nation, bless him, and make him a blessing; to make His cause his own, so that his friends should be God's friends, his en-

emies God's enemies. He should be the first link in that long chain of generations of which, in the fullness of time, the Messiah would be born.

Three verses suffice to describe the call; the fourth narrates the obedience. So Abram departed. A blessed adventurer, he voyaged across the sea of sand upon his ship of the desert. As Columbus landing upon the shore of the new world unfurled the standard of Spain, and took possession of it in the name of his kingly patron, so Abram, reaching at length the land of promise, built an altar and dedicated the land and its inhabitants to Jehovah.

#### Analysis and Key.

1. Human degeneracy demands Divine intervention.
2. The Divine method. A little stream of human life. Directed in a special racial channel. No favoritism. The blessed one to bless all.
3. Abraham's fitness to be progenitor.
4. The first pilgrim father. A hero of faith.

#### The Teacher's Lantern.

The genesis of anything always has a peculiar fascination. We never tire of origins. This lesson brings us to the fountain head of the most important racial stream that has ever coursed its way through history; a stream to whose bosom the oracles of God were committed for twenty centuries; a stream that bore to earth the infant Messiah, as His type once floated on the Nile. A bird's-eye view of the winding of this stream, and the possible important function it may perform in the future of the kingdom of God, will prove an attractive introduction to the lesson.

Effort should be made to portray Abraham's exalted character and his fitness for the purpose for which God employed him. Crowd his career into a nutshell. Display its salient traits—faith, resolution, courage, military tact, magnanimity, etc.; admit its blemishes, but show them mere spots on the sun. Abraham would be a good man for our age; he was superlatively good for the age in which he lived. The Bible deals faithfully with the characters it portrays. It presents its characters, not ideally, but as they actually were.

Legends concerning Abraham may be used with good effect, especially the one from the Koran which describes him as secretly nourished in a cave until he grew up. Coming to the mouth of the cave for the first time, he sees a star and cries, "This is my god." But the star fades before the moon, and he acknowledges the latter as his god. But when the sun rose he turned in adoration to it, until it in turn sunk; then the patriarch cried: "Neither star, nor moon, nor sun shall be my god, but He who made the heavens and the earth!" By whatever process, Abraham had shaken off the polytheism and idolatry of his fathers and was monotheistic and Messiah-aspiring.

Through this fascinating narrative, as through a tissue curtain, one sees the Christian life spiritually portrayed. The Christian is a called one. He has heard and heeded. He breaks away from an old environment. He makes a transition. The word Hebrew first applied to Abram (Genesis xiv, 13) is supposed to mean "one who has crossed over," and to refer to the passage of the Euphrates. The Christian starts for a better land, assuring his heart with the faithfulness of the Promiser. He sings:

I'm but a stranger here—  
Heaven's my home.

He shows by his manner of life that he regards himself as a pilgrim. He might go back to his old life if he want-

ed to, as Abraham might have gone back to Mesopotamia, but he did not. He rears his altars as he journeys on. As Matthew Henry says: "Wherever Abraham had a tent, there God had an altar." He is God's witness as he goes, observed of all observers, his light and salt, the savor of all about him. He has but one other river to cross, and that is Jordan, and then he enters the sweet fields of Canaan.

It paid Abraham well, and that for two worlds, to obey God. Present-day obedience to God has promise of the life that now is, and of that which is to come.

A lasting and good fame is the gift of God. "I will make thy name great." Terah is the type of those who fall out by the way in the march to the land of promise. Robert Collyer says: "Terah started for the highlands of Canaan, but he settled on a flat."

## ADVERTISING NOTES.

Mr. Alexander James, of Shenandoah, Iowa, has five varieties of seed corn which he is offering for sale on page 29 of this issue. He can supply it either in the ear or shelled and guarantees satisfaction or will refund the money.

The New Albany Box & Basket Co., of New Albany, Ind., manufacture berry boxes and baskets, fruit and vegetable packages of all kinds. Send them for catalog if you are liable to be in need, as per advertisement on page 29 of this issue.

Eighty-five thousand acres of the best Texas land is to be up cut into tracts to suit purchasers. It is being placed on the market by Mr. John W. McKamey, of Port Lavaca, Texas. This land is in an ideal location and in productiveness is unexcelled; there is good water and fine drainage. The advertisement appears on page 26 of this issue.

The advertisement of the St. Louis Bag & Burlap Co. appears on page 10 of this issue of The Homestead. This company buy grain, feed and cotton seed meal bags, paying highest cash prices for same. They depend on farmer boys to collect them from their neighbors and in this way the farm boy can make good money in his spare time. Write the company and they will quote prices.

In order to close out a farmer's ledger account book which originally sold for from \$3 to \$5, The Journal, of Centerville, S. D., is offering them for sale at ninety-five cents. This is less than the cost of printing. These books are eight and one-half by fourteen inches, cloth bound, with leather back, departments for every kind of grain, stock and produce, and are designed to last for fifteen years. The advertisement from which further information can be obtained appears on page 4 of this issue.

The Colonial Securities & Trust Co., of Denver, Colo., are offering farms for sale near Denver, on which they will give the purchasers an opportunity to pay for same from a share of the crops. In their advertisement on page 26 of this issue they say: "We furnish an expert on the Campbell system free of charge to instruct you to plow your land by steam and extend you credit on machinery and building material if necessary." Write them for full particulars.

We would direct the attention of our readers to the petition asking for the enactment of legislation amending the untaxed denatured alcohol law, published on page 10 of this issue. These amendments are of the utmost importance to the farmers of the country, as they would permit the establishment of small stills for the production of alcohol from various farm products, and cheapen the cost of denatured alcohol so as to permit of its general use for lighting, heating and motor fuel purposes. As the time for action by congress is short, we would urge our readers to promptly cut out this petition, sign it, and send it at once with a letter to their senators, urging them to secure the enactment of this legislation at the present session of congress.

Many readers will be interested in two articles which Mr. G. M. Ditto, of Joliet, Ill., is advertising in this issue. The first is the Ditto double-cut, triple-gear, hall-bearing feed grinder which has been popular for so many years. It is a machine that needs no commendation from us. The other article will be more seasonable very shortly now. It is an endgate broadcast seed sower which Mr. Ditto has perfected. Like his celebrated feed mill, it is one of the very best appliances of its kind. It has a positive force feed and will sow regularly and dependably all kinds of seeds. Of course, the type is well understood. It attaches to the rear endgate of any wagon. The wagon carries the seed and the driver can fill into the hopper. It does fast work as well as clean, regular work, there being but little occasion to stop until the job is done. Circulars giving full information on both these articles can be had by writing to Mr. Ditto at Joliet, directing as requested in the advertisement on page 15.

## Genasco puts an end to your roof troubles.

You need never have another leaky house, barn, shed or chicken-house as long as you live.

Genasco Ready Roofing is made of natural asphalt from the wonderful Trinidad Asphalt Lake, and stands all sorts of weather—never cracks, rusts, rots, or catches fire.

Smooth and mineral surfaces, several weights. Every roll complete with nails and cement for laying.

Write for Book N, which tells facts and reasons—also samples, and go to the most progressive dealer in your neighborhood to see Genasco.

**THE BARBER ASPHALT PAVING COMPANY**

Largest producers of asphalt in the world

PHILADELPHIA

New York San Francisco Chicago

## You will never see this in the Southwest.

Nature takes better care of your live stock in the Southwest during winter, than you can possibly give them in the cold winters of the North and East. Not only does nature take care of the stock in the Southwest, but takes care of its owner as well and spares him the expense of building heavy shelter and providing food for long feeding periods.

## Nature is kind to the Southwestern Farmer

for he has pleasant weather all the year and rich land to cultivate practically 12 months every year. This rich land which he occupies under such favorable conditions is capable of growing 30 bushels of wheat to the acre as a regular thing—50 bushels of corn, 90 bushels of oats or five cuttings of alfalfa, and it only cost him a small fraction of what land costs in your state, where you are forced to be idle almost half the year.

Why don't you move to the Southwest and exchange a winter's misery on high-priced land for 12 months of comfort on rich but low-priced land? The difference between the two is a prosperous, contented life.

We publish for FREE distribution illustrated books about Missouri, Kansas, Arkansas, Indian Territory, Oklahoma, Texas and New Mexico. Tell me what particular state or territory you are interested in and I will send you the book pertaining to it—together with any specific information you may ask for. Write to-day while you think of it.

A trip to the Southwest will make you enthusiastic about the country. The trip can be made at very small cost. On the first and third Tuesday of each month, very low rate round trip tickets will be on sale via the Rock Island-Frisco Lines. Write me about it. I can probably suggest a trip that will enable you to see the best of the country at the least cost.

**JOHN SEBASTIAN, Pass. Traffic Mgr., Rock Island-Frisco Lines**  
1415 La Salle Street Station, Chicago or 1413 Frisco Building, St. Louis.

ing full information on both these articles can be had by writing to Mr. Ditto at Joliet, directing as requested in the advertisement on page 15.

The Advance Fence Company, of Peoria, Ill., in their advertisement that appears on page 27 of this issue, ask that readers of The Homestead examine carefully any wire fencing before buying. They point out the fact that it is important to see whether the stays are made of whole wire or short pieces, that it makes a big difference in the strength of the fence, the whole wire fence being fully twice as strong and costing no more. The stay wire of the Advance Fence Company's woven wire fence is continuous, one piece running continuously up and down across the fence without an end for many rods. This fence is sold on thirty days' approval, so that it can be thoroughly tested. They have had seventeen years' experience in building this kind of a fence and have every confidence in it. Send for their free fence book which tells all about the Advance Fence.

### THE KEMPER DISK FURROW OPENER.

On page 12 of this issue will be found the advertisement of the Walker Manufacturing Company, of Council Bluffs, Iowa. This company manufacture furrow openers, disk sharpeners, windmill regulators, stock waterers, hay bunchers, hay sweeps, woven wire fence and washing machines. Their disk furrow opener when attached to a planter will easily pay for itself in one day. Circulars will be sent on application describing their full line of goods. Address Walker Manufacturing Company, Council Bluffs, Iowa, and please mention this paper when you write.

### GETTING MOST FOR YOUR MONEY.

It is in the art of getting the most for his money that the successful man outdistances his neighbor. It is not brilliancy or a sixth sense; merely the common sense which makes every dollar count for its utmost. Before you buy an incubator, write George Ertel Company, Quincy, Ill., for a copy of the Victor Book. This tells how dollars invested in the hatching machines will pay the greatest dividends. If you want most for your money you ought to get and read it before you buy an incubator or a brooder. They will tell you, too, about their 100-Egg Hatching Wonder, delivered for \$7.90. This is for the man who wants to start raising chickens in a small way, and they have many testimonials like this: "April, 1906. In October last I bought of you a 100-egg Hatching Wonder and Brooder, and now give you the results of three hatchings: No. 1—104 eggs, nine out on test, ninety-five chicks; No. 2—107 eggs, twelve out on test, ninety-five chicks; No. 3—103 eggs, seven out on test, ninety-six chicks; total, 286 chicks. I do not know what you may think of that, but I think it

can't be beat, and the chicks are as lively as little crickets. The machine is truly a wonder. Wm. Trumpp, 1553 Lincoln Ave., Alameda, Cal." If you want one machine or several, it will be to your interest to write Mr. Ertel before you buy. He can give you most for your money because he has carefully studied the science of incubation and has worked out his machines to accomplish the results. They build to last and in every way aim to give the purchaser most for his money. One cent for a postal card will bring you the Victor Book, with its eighty pages of valuable information. Just address George Ertel Company, Quincy, Ill.

### THE CHATHAM FANNING MILL.

The Chatham Fanning Mill is advertised on page 12 of this issue, and the advertisement of that famous mill is worth a careful reading. The Chatham Mill will be sent on a thirty days' free trial with freight prepaid. It is guaranteed to grade anywhere from forty to eighty bushels per hour and do the work thoroughly. If it does not come up to this record and satisfy the purchaser in every way the mill may be returned. The Chatham book which describes all about this mill and, in addition, gives a hundred suggestions that will increase the yield of crops, will be sent free upon application to the Mannaon-Campbell Company, Ltd., Topeka, Kan., or Detroit, Mich.

### A BUGGY BOOK FREE.

Those who are interested in buggies should look up the advertisement of the Ohio Carriage Mfg. Co., of Cincinnati, Ohio, on page 22 of this issue. This company offer to send a vehicle on thirty days' trial free, which of course is liberal and is, in addition, the best indication that the company make good vehicles. A booklet will be sent free, and this explains how their famous split hickory vehicles are made, starting in with the raw material and ending up with the most beautiful buggies that one can find in any market in the world. Address Ohio Carriage Manufacturing Company, Station 31, Cincinnati, Ohio, and please mention this paper when you write.

### A CORN BOOK WITHOUT COST.

Prof. A. D. Shamel, formerly of the Illinois Experiment Station, is recognized as one of the greatest corn experts in the United States. He has recently written a book on this subject covering all points that need to be emphasized in growing a good crop of corn. Although this book ordinarily sells for fifty cents, the Emerson Manufacturing Company, of Rockford, Ill., offer it, in their advertisement on page 7 of this issue, to all persons who will give on a postal card the names and addresses of three farmers who are likely to buy a riding plow this season. That is surely a simple matter, and the book, although obtained without money and with so little cost of labor, is just as valuable as if one paid the publisher's price. Do not delay sending these

names, for fear the matter slips your mind and you will therefore fail to get a book. Address your letter or card to Mr. S. H. Emerson, care Emerson Manufacturing Company, Rockford, Ill.

### SELL YOUR FARM.

Any reader of this paper who wishes to sell a farm or town property should not overlook the advertisement of the Glenn Realty Company, of Kansas City, Mo., on page 26 of this issue. This company have become known to thousands of buyers through their extensive advertising in the papers all over the country. When they list a piece of property they advertise it in papers which reach hundreds of thousands of readers, and by this means they are able to get in communication with parties who want just such properties as they have on their books. This firm would be glad to hear from anyone who wishes to buy or sell property of any kind. No matter where property is located, they are prepared to handle it if the price is right. Write them and mention this paper.

### FROM FARM TO TANNERY.

Every farmer is more or less interested in marketing hides of various kinds, and we therefore believe that all our readers will be interested in the advertisement of Messrs. J. S. Smith & Co., of Chicago. This company tans hides on a large scale, and they are in a position to pay full value for all shipments. Their motto is "No shipments too large or too small," and they guarantee fair and liberal treatment to all. The company has been doing business more than forty years, and their growth has been due to the fact that they have built up the business on an honest foundation. Their folder entitled "How to Prepare Hides and Furs for Market" will be sent free upon application. Address Messrs. J. S. Smith & Co., Dept. 16, Chicago, and please mention this paper when you write.

### A PLANTER THAT DROPS UNIFORMLY.

When a planter has made the record of checking 476 times in a corn field without missing and without breaking a kernel it would seem that it had well nigh approached perfection. This is the record made by the J. I. Case Round Hole Plate Runner Planter. The valves are so constructed in this planter that it will drop in check no matter how fast or how slow the team may walk. This is an important matter because many a man who is expert in handling his wire falls to do good checking on account of the drop being slow or fast. The offer that the Case Company are making at the present time is simply this: They will send their Farmer's Encyclopedia, a book of 146 pages bound in cloth, to all persons who will enclose ten cents for packing and postage if they will name the implements that they intend to purchase this season and in addition give the address of the local dealer. This book con-

tains many valuable suggestions on corn raising and other subjects. The advertisement will be found on page 19 of this issue. For further information address the J. I. Case Plow Works, Racine, Wis., and please mention this paper when you write.

#### PRUSSIAN STOCK TONIC.

A pair of Prussian Stock Tonic contains 1,200 doses and costs \$3.50. If sensibly fed to live stock, this may save ten times its value in feed by contributing to the better digestion of all foods consumed. Not only that, but by putting animals in good shape it may ward off disease and thereby effect a saving of hundreds of dollars. Prussian Stock Tonic has been on the market long enough to have its merits proven. A stock raiser's manual in which advice is given about the feeding of this, as well as other foods, will be sent upon application to Prussian Remedy Company, St. Paul, Minn. The advertisement will be found on page 31, and if you write for this manual please mention The Homestead.

#### GOOD BUGGIES AT LOW COST.

The Elkhart Carriage and Harness Company, of Elkhart, Ind., make the statement in their advertisement on page 6 of this issue that they have been selling vehicles and harness direct from their factory to the users for more than a third of a century. The company make 200 styles of vehicles and fifty-six styles of harness. As an example of their low price they are selling their combination top buggy and driving wagon with stanhope style buggy seat and bike gear, and also an extra seat for open wagon, for the sum of \$61.50. Ordinarily such an outfit would sell for \$100. A catalog will be sent free upon application. Address Elkhart Carriage and Harness Manufacturing Company, Elkhart, Ind., and please mention this paper when you write.

#### DR. WILLIAMS NOW LOCATED IN THE FLYNN BUILDING, DES MOINES, IOWA.

For the past two years the business of Dr. Williams has grown rapidly and it has become necessary for him to establish his offices in the Flynn building, where he will have better facilities for giving each patient prompt and efficient service. He will have three times the floor space and three times the number of rooms he has been using for the past seven years. He has new apparatus, new furnishings and no expense has been spared to make the business a continued success. Dr. Williams established his business in Des Moines twenty years ago. He has maintained the business by practical and honorable methods, and this explains why public confidence in the doctor seems permanent and unchangeable. His announcement will be found on page 30.

#### A KANSAS FARM BARGAIN.

Messrs. Olander & Rapp, of Osage City, Kan., are offering a choice bargain in an Osage county, Kansas, farm consisting of 160 acres, in their advertisement that appears on page 26 of this issue. Fifty acres of this farm are in cultivation, about forty acres in hay land, one acre in orchard, two in timber and the balance in pasture. One hundred and thirty-five acres, so they state, can be cultivated, the balance being a little broken, but of the very best pasture land. The improvements consist of a six-room house in good condition, barn for seven horses, large hay loft with good buggy shed attached. There is barn room for twelve head of cows, cattle shed, corn cribs, etc. The price, if sold before the 20th, is stated in the advertisement. Send for their list of Osage county farms which they have for sale.

#### THE HATCH-ALL INCUBATOR CATALOG.

After taking the time to carefully examine every paragraph in the seventy-two page catalog published by the Hebron Incubator Company, of Hebron, Neb., we are free to pronounce it one of the most interesting and useful booklets that one could have around where poultry is kept. This company manufactures the Hatch-All incubators. The merits of their incubators need no argument in their behalf, as each machine speaks for itself. Another word, however, about the catalog. Every page is illustrated, and these are not pen drawings or brush daubs—they are taken from actual photographs. Scores of testimonials are given, from those who have used the Hatch-All incubator and in most cases the photograph of the party giving the testimonial is published, and in some in-

## You Can Buy—And Lay Gordon, Van Tine FLINTCOATED ROOFING Rubber Fire-Proof

### 50% BELOW DEALERS' PRICES!

#### Have you received one of our large catalogs?

This book contains 920 pages and each page is 9 1/2 by 12 inches. If one of these immense books has not been received by you, simply with your first order for goods to go by freight ask for this immense book, and same will be sent to you free of charge with your goods, together with our compliments. It will pay you to have one, especially when it is free. *We sell everything.*

**The T. M. Roberts Co-Operative Supply Co., Dept. Minneapolis, Minnesota**

stances an illustration of his poultry plant. We urge our readers to send at once for this catalog to the Hebron Manufacturing Company, Box 8, Hebron, Neb., and please mention this paper when you write. See advertisement on page 16.

#### FOR BEGINNERS IN FRUIT GROWING.

The A B C of fruit growing, that is, instructions for beginners, written by Mr. Charles A. Green, will be mailed free to all who request it when sending for free catalog of Green's Nursery Company, of Rochester, N. Y. Here you will find instructions for planting and growing apples, peaches, pears, plums, strawberries, raspberries, blackberries, grapes and all kinds of hardy fruits. Mr. Charles A. Green has a new book, giving his personal experience of thirty years as a fruit grower, which will be mailed to you free if you will send him the names and addresses of three fruit growers in your locality. See advertisement on page 29.

#### TO PREVENT SCOURS IN PIGS.

As spring approaches it is a highly important matter that men should be ready to handle their young pigs so as to prevent loss. Last spring possibly 25 per cent of the pigs farrowed in the corn belt early in the season were lost by that much-dreaded disease, scours. This is altogether unnecessary, because the problem has been solved by the Agricultural Remedy Company, of Topeka, Kan. This company manufacture Anti-Scour. Four hundred doses in a box only cost \$1. Every swine breeder should

have a box on hand and should send for it without delay. The advertisement will be found on page 31. When you write address Agricultural Remedy Company, Topeka, Kan., and mention The Homestead.

#### A FLEXIBLE DOOR HANGER.

The Loudon Machinery Co., of Fairfield, Iowa, have for sometime been putting on the market a double-tread barn door hanger. This door is hung on two sets of hinges and straddles the track like a hay carrier. It has absolute center draft and no side hitch. It is not merely the old-fashioned slide door, but involves a new idea, one that was patented in 1897. It can be no manner of means be removed from the track by any kind of live stock. It is close fitting and the best of it is that it can be purchased for practically the same price as a common door. It is fully described in a catalog and a copy of this will be sent free upon application. The advertisement of this door is found on page 11. When you write address Loudon Machinery Company, 49 Broadway, Fairfield, Iowa, and please mention The Homestead.

#### SAVE THE PAINTING.

By buying a ready roofing that never needs coating or painting, you can save a big load of work every year. Amateite Ready Roofing has a mineral surface that is self-protecting without paint. By using Amateite you can save all the cost of paint, and, what is still more important, the trouble and responsibility of doing the work. If you

neglect the painting of other kinds of roofing, you soon need a new roof, so there is trouble and expense either way. Remember that Amateite needs no coating. Send for a free sample and examine the firm, strong mineral surface. Address the nearest office of the Barrett Manufacturing Company, New York, Chicago, Cleveland, Allegheny, Kansas City, St. Louis, Minneapolis, Philadelphia, New Orleans, Boston and Cincinnati. See advertisement on page 9.

#### SAMPLE CREAM EXTRACTOR FREE.

To introduce their Peoples Automatic Cream Extractor in each locality where they have no agent, the Peoples Supply Company, Dept. K., Kansas City, Mo., are offering to give away absolutely free, without price, note or deposit, one complete machine, including an imported dairy thermometer. The Peoples Cream Extractor is meeting with great success wherever introduced. Over 100,000 are in use. It is operated by an automatic process that requires no ice, chemicals or extra labor and machinery.

The manufacturers are unusually liberal in their offer, and are willing to send one extractor in each community to the first person who writes for their generous advertising offer. They have adopted this method of quickly introducing their cream extractors in every home where cows are kept. See advertisement on page 9.

#### INTERESTING VETERINARY BOOK FREE.

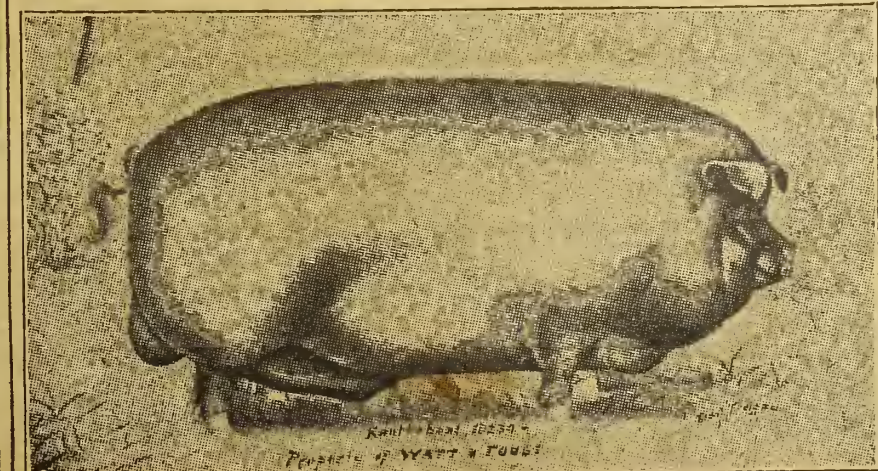

Our editorial department has just received a sixty-four-page booklet which is by long odds one of the most complete treatises on animal diseases that has come to our desk. The symptoms, cause and practical remedy are given in plain readable English, covering practically every disease to which the horse, cow, hog, sheep and poultry are heir. The various subjects have been treated exhaustively by authorities at forty different American agricultural colleges. The booklet has been compiled and printed by the Zenner Disinfectant Company, 131 Lafayette Ave., Detroit, Mich., and we have arranged with them to furnish a copy free to each and every reader of this publication. You only need to send a postal card giving your detailed address, and the book will be gladly sent to you free of all charge and without obligation. Better write immediately, for there is bound to be a tremendous demand for this little booklet of sixty-four pages.

#### ONE WAY SETTLERS' RATES

To points in Nebraska, Eastern Colorado, Kansas, Missouri, Arkansas, Indian Territory, Oklahoma, Texas, Louisiana, Alabama and Mississippi, etc.

The Iowa Central Railway will place on sale on the first and third Tuesdays of each month, January to March, inclusive, one-way tickets at the extremely low rate of only one fare plus \$2 for the benefit of homeseekers and settlers.

Don't fail to call on Iowa Central agents for full particulars, rates, etc., or address A. B. Cutts, G. F. T. A., Minneapolis, Minn.

KANT-BE-BEAT 10239 A.

Forty-one sows in the John M. Morrison & Son's Duroc Jersey sale, at College View, Neb., on February 12th, are bred to the above boar. See advertisement on page 48.

# LANDS AND HOMES FOR SALE

## 3 REASONS

Why you should buy So. Dak. Lands  
1st. The south-eastern part of the state is in the great fertile Mississippi Valley. Soil is the same as that of Iowa and Illinois. We sell land in this section from \$25 to \$50 per acre, according to location and improvements. This land equals in every respect land which is selling for \$75. to \$125. in Iowa and Illinois.  
2d. We have the same climatic conditions and rain fall as in Northern Iowa and Illinois. Our average production of Corn equals the average in the above named states. Compare the difference in price of land.  
3d. Our Agency covers the 16 S. E. counties of the State; they produced 80 per cent. of the State's corn crop. We can show you actual production values; our lands are time-tried and crop-tested, proving its ability to produce abundantly: **Corn, Oats, Red Clover, Alfalfa, Blue Grass and Timothy.** All essential to mature the great American Steer.  
Write to-day for list and literature

## Manlove Bros. &amp; Norris Duroc Sale.

The first annual brood sow sale of Messrs. Manlove Bros. & Norris, of Bowen, Ill., was a success. These gentlemen have been liberal purchasers of the best herds and have given their support to the breeders throughout the entire country. That the stock offered was appreciated by those present may be seen from the average secured. Mr. Chas. Cooper, of Ferris, Ill., topped the offering, securing a daughter of Tip Top Notcher and out of Fairview Maid, at \$305. Mr. Arthur Vail, of Hume, Mo., and Mr. Ernest Pancake, of Ransom, Ill., were the competing bidders. Messrs. Thomas & Hogsett, of Golden, Ill., secured the show sow, Remington Queen, at the bargain price of \$150. Colonel Igo opened the sale and was assisted in the selling by Colonels Keil, McGowan and Reppert. The stock was offered in fine breeding condition and will do well if properly cared for by the new owners. List of sales follows:

Lot.	Price.
1. Thomas & Hogsett, Golden, Ill.	\$150.00

## Thomas &amp; Hogsett Sale.

The first annual brood sow sale of Messrs. Thomas & Hogsett, at Golden, Ill., was a pronounced success. The bidding was snappy from start to finish, and the large gathering of farmers, together with a representative crowd of breeders, realized that the stock offered for sale was of high quality, as well as breeding of the best kind. This firm held one of the most successful sales of the year in October, 1906, and the same holds true with the sale on Saturday, February 2d. The females bred to Tip Top Notcher were in good demand and found ready sale at remunerative prices. Mr. Thos. Johnson, of Columbus, Ohio, topped the offering, paying \$340 for the first-prize gilt at the Illinois State Fair, U Kan't Beat Her 128026. This gilt was sired by Ambition and was bred to Tip Top Notcher for March farrow. Mr. Johnson is to be congratulated upon securing this gilt at such a bargain price, as she is one of the best gilts that has gone through the sale ring for many months in Illinois. Messrs. Fred Kraschel & Son, of Macon, Ill., and McNeil Bros., of Bowen, Ill., were the competing bidders. Mr. H. E. Browning, of the well-known firm of

Messrs. Fagan, Browning & McCabe, of Hersman, Ill., secured a daughter of C. E.'s Col., and out of Dew Drop Girl by Model Chief, bred to Tip Top Notcher, for \$210. Messrs. E. M. Castle & Son, of Joy, Ill., secured the litter sister to Helen Blazes III., Helen Blazes I., bred to Ambition, at \$195. Messrs. E. H. Deal & Son, of Elwood, Ill., paid \$195 for a daughter of Ambition bred to Tip Top Notcher. Col. Judd McGowan opened the sale with a strong plea to the farmers of the vicinity to take hold of the Duroc, and cited numerous instances where those who bought thoroughbred hogs in former sales had made considerable money. He was assisted in the selling by Colonels Reppert and Keil. A list of sales follows:

Lot.	Price.
1. Thos. Johnson, Columbus, Ohio.	\$340.00
2. R. J. McCray, Golden, Ill.	72.50
3. T. E. Laurie, Jacksonville, Ill.	77.50
4. E. M. Castle & Son, Joy, Ill.	85.00

## Hudson's Brood Sow Sale.

The first annual Duroc Jersey sale of Mr. W. H. Hudson, of Lohrville, Iowa, was a success, and an average of over \$40 was made on the entire offering. Col. F. F. Luther cried the sale, and Mr. Hudson was considerably elated over the success of his first sale. Below is a report of the same:

## Examine Fence Carefully

before you buy it and see whether the stays are made of whole wire or short pieces. It makes a big difference in the strength of the fence and as the whole wire fence costs you no more, and is fully twice as strong, why buy the other? Our stay wire is continuous—one piece running continuously up and down across the fence without an end for many rods. Thus we preserve and utilize all the strength and service there is in the wire, fully half of which is wasted in cut stay fences—sacrificed to convenience and speed in manufacture. Our method of weaving is a little slower and costs us a trifle more, but it's worth while—it's the only correct way of weaving a fence.

**30 days approval.** But why argue and hesitate? Let us ship you what fence, etc. you need on 30 days approval. We want you to examine and test it. We want to show you the difference between ours—the best made fence on earth—and the other fences that are being offered to you. During the 30 days you can test it thoroughly. You can put up a part of it or all of it and turn your stock against it. Give it any kind of a test you wish. After examining it and comparing its construction with others we will gladly let you be the judge. If you don't like it, send the whole business back and it won't cost you a cent as we will pay freight both ways and refund every cent you paid. 17 years experience with this kind of fence gives us the confidence to make this offer.

We prepay freight to any steam railroad station in the United States on 40 rods or more and guarantee the safe delivery of your shipment. Our free Fence Book tells all about Advance Fence. Let us send it to you with freight paid prices on our line.

## Osborn's Brood Sow Sale.

A representative crowd of Duroc Jersey breeders from Iowa, Nebraska, Illinois and Missouri were in attendance at the O. E. Osborn sale at Weston, Iowa, on January 30th, and an average of \$70 was made. The local attendance was not the best, and the less desirable things were not eagerly picked up. The breeders were ready to buy the good ones at good prices. Below is a report of the sale:

Allen's Maid, A. E. Pausch, Chariton, Iowa	\$230.00

Canadian Government  
FREE FARMS

OVER 200,000 American farmers who have settled in Canada during the past few years, testify to the fact that Canada is beyond question the greatest farming land in the world.

## Over Ninety Million Bushels of Wheat

from the harvest of 1906 means good money to the farmers of Western Canada, when the world has to be fed. Cattle Raising, Dairying and Mixed Farming are also profitable callings. Coal, wood and water in abundance; churches and schools convenient; markets easy of access; taxes low. For literature and information address the Superintendent of Immigration, Ottawa, Canada.

or the authorized Canadian Government Agent  
W. F. Bennett, 801 N. Y. Life Bldg., Omaha, Neb.  
E. T. Holmes, 215 Jackson St., St. Paul, Minn.

## FARMS! FARMS! FARMS!

WE can show you farms to suit the most particular and any sized pocket-book. Note the location and prices of some of them. The farms in the following states range in prices as follows: Iowa, \$20 to \$150; Kansas, \$8 to \$40; Texas, \$3 to \$40; Mexico, \$1 to \$12.50; Minnesota, \$6 to \$30; Canada, \$4 to \$10, and N. and S. Dak. \$8 to \$25 per acre. Some of the above we can exchange for city property or merchandise.

**The McClure Co.**  
310 5th St.

DES MOINES, IOWA

WANTED to sell or exchange, well improved, splendid 236 acre eastern Kansas farm that adjoins town with graded school, for a smaller farm in Iowa. Address, James E. Seaton, Vernon, Kan.

**TO EXCHANGE:** Have a good improved farm, well located, to exchange for registered cattle or stallions. Write giving description and prices. Box 81, Independence, Iowa.

**FOR Sale:** two well improved farms near town, church and school. Bargains for homes or investment. E. Jay Roberts, Chester, Iowa.

Gilt, Geo. Kerr, Sabetha, Kan. 66.00  
Gilt, G. Van Patton, Sutton, Neb. 130.00

Someone has said that this is prosperous gone mad. It is claimed that all nine-tenths of the people live for now is to make money. How about it?

# FOUR FREE

## 4 HARDY BLIZZARD BELT EVERGREENS

### FREE

If you are not already acquainted with us we want to grasp your hand across the miles and introduce you to the The Gardner Nursery Company, Osage, Iowa. We are growers of Hardy "Blizzard Belt" nursery stock. We are Gardeners by name and "Gardeners" by occupation. We grow Hardy Trees. We have been at it for nearly 40 years and are proud of our record. We expect to continue growing Hardy nursery stock for another 40 years and maybe longer. We grow our "Blizzard Belt" Evergreens in ten million lots. To advertise them and prove that they are healthy, well rooted and vigorous, we offer to send four fine sample trees 3 years old, free to a limited number of property owners. Mailing expense 5 cents, which send or not as you wish. A postal will bring them. Last year we distributed 500,000 of these sample evergreens and gained thousands of new friends. This year we have

## RESERVED 600,000 TREES

for this free advertising distribution and if you want your share of them write at once for they will go fast. W. H. Gibboney, Mandan, North Dakota, writes: "Please accept thanks for the sample evergreens. They are doing fine." This is but a sample of thousands of letters. Our catalog containing 64 colored plates of our Hardy "Blizzard Belt" Fruits, Ornamentals, Evergreens, etc., with a mine of valuable information for fruit growers, is free for the asking. Write today.

The Gardner Nursery Company, 21 Nursery Ave., Osage, Iowa.

## SELECT GARDEN SEEDS

Send us 5 two-cent stamps and we will send you 5 full sized packets of Garden Seeds that have been tested—any varieties you may select. We will also send our large new Catalog for 1907 telling you how you can get one acre of pure bred seed corn free, or how you can get 5 packets of garden seeds free.

Write today. We will do exactly as we agree to,

Box 12

NISHNA VALLEY SEED CO.

Hamburg, Iowa.

## We Breed 7 Varieties of SEED CORN

We raise every ear of corn sold by us for seed on our own farms. We cultivate 7 large farms; each of them produces a pure variety of seed corn. Our plan of cultivation insures your getting pure bred corn, the best varieties.

We have increased the yield of certain varieties from 35 to 90 bushels per acre on the same land. That shows what breeding will do. If you want some of that kind of seed corn send your name for catalog. We sell hundreds of bushels of seed corn to our neighbors annually; they tell us it is the best they can find anywhere. That's proof that our seed is what you want.

Box 16

W. W. VAN SANT & SONS

Ferragut, Iowa.

**SEED CORN**  
146 bushels per acre; the kind that will please you. Makes bushels where other sorts yield pecks. It's the kind that pays to plant. Change your seed and grow two bushels where you now grow but one. Write for our big Catalog. It tells you all about every farm, field and garden seed and crop that grows. A postal card will bring it, FREE.  
Address, RATEKIN'S SEED HOUSE, SHENANDOAH, IOWA.  
(The largest seed corn growers in the world.)

## SEED CORN

NEW GOLDEN WEST and all the best varieties of choice, selected, thoroughly tested seed corn, which have yielded 75 to 216 bushels per acre. Costs Only 25 cents Per Acre for Seed. Large, descriptive catalog of Seed Corn and all kinds of Farm and Garden Seed mailed free if you mention this paper.  
IOWA SEED CO., DES MOINES, IOWA.

## BOX OF SEEDS GIVENAWAY

This is our 20th Anniversary in the Seed Business and we are giving away 50,000 Boxes of this great selection of new crop seeds, over 100 packets, all different varieties, many novelties.  
We give this entire Box of Seeds to any person who will hand out a little of our advertising matter in their neighborhood. If you want a box, SEND FOR PARTICULARS AT ONCE. Our new Seed Catalog for 1907, 20th anniversary edition, is the Greatest Catalog we have ever issued, full of Bargains, mailed free. Address, Mills Seed Co., Box 260, Rose Hill, N. Y.

## CLOVER

New Crop IOWA GROWN Re-cleaned and Tested

JOHN A. SALZER SEED CO., La Crosse, Wis.

**FREE** Our handsome Garden Annual and Seed Catalog. Send your address on a postal, with name of neighbor who is a seed buyer. For your trouble we'll mail you a packet of Flower Seeds. If you write before March 15th address Coles Seed Store, Pella, Ia.

## HORTICULTURAL TOPICS

THIS department is conducted by an experienced horticulturist. All questions relating to horticulture will be answered if of sufficient general interest to warrant a reply in this department. Communications and inquiries upon horticultural topics should be addressed to this office.

### ADULTERATION OF GARDEN AND OTHER SEEDS.

An interesting discussion has been going on in the national house of representatives relating to the agricultural appropriation bill. Incidentally, the question of free seed distribution comes in for its share of applause as well as abuse, while in connection with this the adulteration of seeds has been discussed at some length.

Representative Mann, of Illinois, last week called special attention to the question of seed adulteration. He stated that if seedsmen of the country would give more attention to the question of adulteration of seed and less to the small free seed distribution by congress, they would confer a greater benefit upon the country. He called attention to the fact that while he never believed that the free distribution of seed was a governmental function, yet the distribution of pure seed by congress has had a tendency to compel seedsmen to sell pure seed in competition with those which come into the hands of individuals received from the government.

Possibly not more than 10 to 20 per cent of the seed sold is adulterated, yet, considering the enormous amount of seed that is handled commercially, this percentage makes a vast amount. This adulteration is wilfully made for the express purpose of defrauding the person who purchases the seeds.

Representative Mann enumerated four classes of adulteration—namely, the mixing of Canadian blue grass with Kentucky blue grass; the sale of Canadian blue grass unadulterated under the name of Kentucky blue grass; the admixture of weed seeds with farm and garden seeds, and the sale of dead seed.

Of 352 samples of alfalfa examined by the department of agriculture, half of these were found to contain dodder seed, while in the case of 522 samples of red clover, 116 contained dodder. Seventeen samples, examined, representing an aggregate of 282,000 pounds of alfalfa seed imported in 1906, revealed the fact that less than 50 per cent of this alfalfa seed germinated. Two sixteen-lot samples germinated 8 and 9 per cent, respectively. Of the 990,000 pounds of clover seed imported in 1906, less than 43 per cent was red clover seed that germinated.

An instance was given which shed a little light on one phase of the vegetable seed question. A seed concern in Ohio had gone into the hands of a receiver. In the inventory was listed a considerable quantity of onion seed more than two years old. The members of the firm had testified in the receivership proceedings that onion seed more than two years old would not germinate, and yet considerable value was placed upon the inventory item of onion seed more than two years old, and when asked why they considered it of value the answer was: "It is of value because it increases the bulk and quantity of seed which we sell" by adulteration.

According to the case made out by Mr. Mann, the United States is the dumping ground for the worthless seed from European countries and from Canada. Canada, for example, has strict laws preventing the sale of seeds containing weed seeds in its own provinces and everything that does not come up to the standard is considered fit only for export. Mr. Mann made it very clear in his discussion that the rank and file of American seedsmen do not follow these sharp practices, but are, on the other hand, co-operating with the department of agriculture to protect farmers against the influx of foul seeds. The firms that are handling the 10 per cent of foul seeds are those that must be dealt with.

It remains to be seen whether the \$238,000 item in the appropriation bill shall be used only for the purpose of propagation and testing of new, rare and uncommon seeds, trees, bulbs, etc., to be sent only to actual experimenters, or to be used to distribute seeds broadcast over the land as has been the case in past years.

### Orchard Destroyed by Smoke.

To the Editor of The Homestead:  
A few days ago we drove past an apple orchard located upon a hillside which

## Let Us Help You

Let us help you make your planting a success. Our seed experience of over fifty years enables us to give you expert advice on the raising of various vegetables. ## 300,000 RED CEDARS.

WE MAKE a specialty of growing Red Cedars from seed and we are the largest growers in the United States. Write us for price list.  
GARLAND & FOWLER, Afton, Iowa

AGENTS wanted to introduce Burbank's wonderful stoneless plum—miracle, and sell our well-known hardy nursery stock. Big pay. Best proposition offered salesmen. Oregon Nursery Co., Detroit, Michigan.

KHERSON SEED OATS FOR SALE. Big yield, will not lodge or rust. 50 cents a bushel. Aye Brothers, Blair, Nebraska.

slopes to the northwest. In the valley below at a distance of 100 yards is a large brick and tile plant with its numerous kilns. It is apparent that the trees have suffered from the smoke and fumes from the kilns, as most of them are dead and the remainder are so badly damaged that they, too, will soon succumb. I am told that before the kilns were erected the orchard was in fine condition and bearing large crops of fruit.

Many suppose that since carbon dioxide (or carbonic acid gas, as an old physiology has it) is necessary for growing plants and this same carbon dioxide is a product of combustion, smoke must be a good thing for plants. The conclusion is erroneous. In the first place, carbon dioxide is colorless; hence smoke contains other substances. The principle

pal visible substance in coal smoke is finely divided carbon which has not burned at all. This cannot be used by plants, but instead settles upon the leaves and by excluding the atmosphere, literally smothers them.

Another, and perhaps great injury from too much smoke is that caused by the noxious gases. Carbon monoxid is one of these. It is an active poison, as are the sulphur and chlorin gases which are often present. It is quite likely that the poisoning by these gases and the mechanical strangulation by the fine particles deposited are responsible for the damaged conditions observed.

Franklin Brown.

## HORTICULTURAL NOTES.

### A RELIABLE SEED COMPANY.

On page 29 of this issue will be found the advertisement of Messrs. Northrup, King & Co., of Minneapolis, Minn. This company make a very liberal offer, which is made in their catalog, by which buyers get eleven varieties of flower and vegetable seeds worth \$1.00 free. This catalog will be sent free upon application. Address Northrup, King & Co., Minneapolis, Minn., and please mention this paper when you write.

### CHESTNUT TREES SCARCE.

Reforestation is a national problem. The scarcity of the black walnut, chestnut, oak, etc., is growing alarming. The man who plants chestnut trees now is depositing a valuable bank account for himself and children. Chestnuts are good food and command a high price in the nut market. Ten thousand year-old chestnut trees are being given away to property owners who write

part of the work, and they cater only to the farmer trade, that demands a practical, reliable grade and variety of seed corn and other seeds at a reasonable price. See advertisement on page 28.

### A GOOD SPRAYING OUTFIT.

Formerly spray pumps were used for spraying trees only, consequently these pumps were in use only during a very short time every year. The Spraymotor is now recommended not only for trees, but two men in half a day can paint a large barn. The Spraymotor pump is made in thirty-six different sizes and varies in price all the way from \$10 to \$300. Send at once for catalog H to the Spraymotor Company, Buffalo, N. Y. See advertisement on page 5.

### THE BEST OF SEEDS.

The Currie Bros. Company, of Milwaukee, Wis., are offering Turkestan alfalfa at \$18 per 100 pounds. That item will be found in their advertisement on this page of this issue. In barley, they are handling the

### DIAMOND JOE'S BIG WHITE CORN.

This is a variety of corn now placed on the market by the Ratekin Seed House, of Shenandoah, Iowa. Concerning this corn, Mr. J. W. Ratekin writes: "We knew for ourselves what this seed corn would do, but little did we think when we cataloged it last year that it was going to awaken such wild admiration throughout the corn growing world or that it would so quickly make such an astounding record as it has made everywhere. Many of our customers have reported almost unbelievable yields. Some report 100 bushels per acre, while quite a number report as high as 150 bushels per acre. In general character it comes closer to my ideal of white corn than any other variety of white corn I have ever before found. I scarcely believe it possible for any human being to get a higher type of perfection by breeding from the finest specimens. It is very early to mature, making itself safely anywhere in Iowa in 100 days. The type is fixed, color uniform, and viewing it from every standpoint, I cannot see where it can be improved upon for general field corn purposes." Our readers are requested to send to the Ratekin Seed House, Shenandoah, Iowa, for catalog giving a full description of this corn, as well as a number of other varieties. This catalog, in addition to describing the varieties now for sale by this firm, gives a great deal of practical information about corn growing. See the advertisement on page 28 and please mention this paper when you write.

to the Gardner Nursery Company, Osage, Iowa. Now is a good time to get a start and plant chestnut trees.

### 300,000 RED CEDARS.

This seems like a large number of trees, but it is the number now offered for sale by Messrs. Garland & Fowler, of Afton, Iowa, as per their advertisement on page 28 of this issue. This firm is one of the largest growers of red cedars in the United States and make this their specialty. These 300,000 trees are of various sizes and descriptions. The firm grow their trees from seed and are therefore experts in their business. This firm are reliable and they have a grand lot of red cedars to offer the trade. They can furnish the dealer, as well as the farmer, and can fill any sized order. Readers of this paper, and especially those who want red cedars, should write them at once for price list and be kind enough to mention this paper when writing.

### NOTES ON SEED BUSINESS.

Mr. J. B. Armstrong, of Shenandoah, Iowa, lays claim to being the originator of the seed corn business. He has done a great deal toward the betterment in general of the quality of corn all over the United States. He has had singular success with a number of new standard kinds, and also written a book on "Corn Growing and Intense Cultivation," which is commended by the United States Agriculture Department, experimental colleges and testing stations. The firm of J. B. Armstrong & Sons plant annually a large acreage of corn especially for seed. They have a large plant for storage, curing and preparation of seed corn, equipped with the best-made machinery for the proper grading of seed corn, and a corps of men who make a business and study of selecting and grading seed corn, and who work entirely by the day and not by the piece, securing conscientious work. A member of the firm has active charge of this particular

kind that is recommended by the Wisconsin State Agricultural Department—something a good deal better than the common six-row kind. Their 130-page catalog contains a list of practically all kinds of good farm and garden seeds that are being offered. The company make a specialty of northern grown seed, so that corn-belt readers can make no mistake by sending there for clover, alfalfa, small grain and vegetables. Address Currie Bros. & Co., Dept. 17, Milwaukee, Wis., and please mention The Homestead when you write.

## IOWA CLOVER

STOCK INSURANCE.

Dr. Hess Stock Food insures a healthy condition of both dam and offspring; it also counteracts the danger of over-feeding. Think of the vitality given off in milking and the strain on the system due to calving. Then you can form some idea of the necessity for tonics. Stock fed for market are also over-fed continually and need something to assist digestion. Professors Winslow, Quitman, Finlay Dun, and all noted authorities, recommend bitter tonics for improving digestion—iron for the blood, nitrates for assisting nature in throwing off poisonous waste material from the system. Such ingredients are incorporated in

DR HESS STOCK FOOD

The Prescription of Dr. Hess (M.D., D.V.S.), and besides it is

Sold on a Written Guarantee.

100 lbs., \$5.00    Except in Canada  
25 lb. Pail, \$1.60    and extreme  
Smaller quantities at a    West and South  
slight advance.

Where Dr. Hess Stock Food differs in particular is in the dose—it's small and fed but twice a day, which proves it has the most digestive strength to the pound. Our Government recognizes Dr. Hess Stock Food as a medicinal tonic and this paper is back of the guarantee. If your dealer cannot supply you, we will.

OUR SHEEP DEPARTMENT

THIS department is edited by a gentleman who has long made the management of sheep a special study. He will be pleased to answer in this department, all questions of general interest relating to the care of the flock and other kindred topics. Address inquiries, communications, etc., in relation to sheep to this office.

PLAYING WITH THE RAM.

Those who have handled rams, more or less, have probably learned that it is very easy to develop a playful or tricky disposition in these animals. There is nothing that is absolutely so annoying when one goes about among a flock as to constantly have one eye on this fellow for fear he might attempt an assault on you at some unexpected moment. One's relation with the herd ram or young rams should be strictly on a business basis. The ram should be made to know that whenever you enter his quarters it is for the purpose of feeding or for necessary care and not for any intention of playing with him. Any over-friendly advances on his part must never be recognized. This will prevent future trouble.

It often happens that it is necessary for the boys to work around the flock, and we have seen boys unmeaningly spoil very good rams by playing with them. The first exhibitions of this friendliness may not result unfavorably. It is often a great deal of fun for the boys to cause the ram to back off and perhaps tramp the ground a little or get ready to butt. He may butt them around the legs oftentimes, and until he gets severe it may seem more funny than serious. However, before long he will be the biggest nuisance that one ever had to contend with.

The fact that it is absolutely impossible to break a ram of this aggravating characteristic should make it very essential that he never be given a chance to develop it. If he is made to know his place from the very start and his friendly advances always rejected, he will probably never become bothersome. Of course we do not mean that he should not be given the best of care in every way and handled for clipping and tagging, when necessary. All of these operations can be performed without developing a bad disposition.

Successful Winter Shepherding.

To the Editor of The Homestead:

Upon the care of the ewes during the winter months much depends as to whether success and profit will attend the flock or not. Breeding ewes are easily handled at all times of the year, but there are a few things it will be well to consider at this time. If the ram has not been taken from the flock remove him at once. The ram is not only a torment to the ewes, but may, by butting or roughness at feeding time, cause more or less abortion among the eyes.

The ram will also do much better himself if away from the ewes, as he will remain quiet and not be continually on the move, as is apt to be the case where a vigorous ram is left with the flock.

The ration of the ewes during the gestation period is also worthy of consideration. Let them have the run of the pastures during the day, as they will

CANCER OF THE BREAST CURED

How Mrs. Ollie Phillips' Life was Saved

ST. CHARLES, IOWA, Nov. 15, '06.

DR. L. T. LEACH, Indianapolis, Ind.

Dear Doctor: I am glad to write you that I am cured of the terrible cancer of the breast. When I first applied to you for treatment I was too weak to walk without assistance. You ought to see me now. I can step around as well as anyone. People look at me with wonder, and I never fail to give you the credit for it. Words cannot express my heartfelt thanks to you.

Yours gratefully,  
OLLIE M. PHILLIPS.

CANCEROL has proved its merit in the treatment of cancer. It is not in an experimental stage. Records of undisputed cures of cancer in nearly every part of the body are contained in Dr. Leach's new 100 page book. This book also tells the cause of cancer and instructs in the care of the patient; tells what to do in case of bleeding, pain, odor, etc. A valuable guide in the treatment of any case. secure much green stuff right along and take plenty of exercise. The grain ration should be mostly oats, with perhaps one-third corn. Roots, such as turnips, rutabagas, etc., are much relished by sheep and are very desirable during the winter as they furnish succulence. If possible, they should always form a part of the winter ration. Toward the end of the gestation period a liberal allowance of bran should be fed. For forage nothing can touch alfalfa and clover hay for sheep; after these corn fodder is preferable, but feed as little timothy hay as possible.

Give the ewes shelter from rain and snow, especially cold rains, and see that they have a dry place in which to lie over night, but do not make the error of shutting them up in a close, hot stable with no ventilation. Ventilation and dryness are the essentials in sheltering. Salt and pure, clean water are of course essential, and nothing will pay you better, too, than extreme cleanliness about the feeding and watering of the sheep.

Story county, Iowa.

Griffitts' Duroc Jersey Sale.

A representative gathering of breeders and farmers were present at the first annual brood sow sale of Mr. H. B. Griffitts, of Bowen, Ill., on Thursday, January 31st. Colonel McGowan opened the sale with a splendid plea for improved stock and called attention to the success of the Duroc breed the past ten years. Messrs. Fred Kraschel & Son, of Macon, Ill., secured a bargain in the High Chief yearling sow bred to Commodore at \$525. High Chief is one of the best sons of Ohio Chief, and crossed with Commodore, the sensational Duroc boar of the year, should produce something worthy of the good herd into which this sow has gone. Up to the \$400 mark, several of the best breeders were competing bidders. Messrs. Fagan, Browning & McCabe, of Hersman, Ill., secured a very good gilt at \$285 in Queen Dotie, a daughter of the grand champion sow at the World's Fair, Helen Blazes V., litter sister to Helen Blazes III., went to Messrs. McNeil Bros., of Bowen, Ill., at \$160. Messrs. Manlove Bros. & Norris, of Bowen, Ill., secured a yearling sow of exceptional merit by Mayor Jr. at \$100. Mr. H. J. Hooker, of Olustee, Okla., was a liberal bidder at bargain prices. Col. onels Reppert, Igo and Keil assisted in the selling in a very satisfactory manner. A list of sales follows:

1. T. E. Laurie, Jacksonville, Ill., \$ 85.00  
2. Bert Brown, Bowen, Ill., 30.00  
3. Ernest Pancake, Ransom, Ill., 30.00  
4. John McCune, Tennessee, Ill., 85.00  
5. M. & W. T. Gatton, Springfield, Ill., 60.00  
6. Substitute, Fagan, Browning & McCabe, Hersman, Ill., 137.50  
7. H. J. Hooker, Olustee, Okla., 80.00

## Cancer Cured No Knife, No Pain

People I have cured of cancer prove the astonishing results of my treatment. Peter Keagan, Galesburg, Ill., writes: "It is only a question of time—I must die." Doctors said "no hope." My new method was used and to-day Mr. Keagan's cancer of the throat is healed, and he is well. I have made wonderful cures without pain, operations, sticky balms, oils or plasters. My treatment is clean and wholesome. It gives instant relief from the smothering, itching and terrible burning pain, destroys the offensive odor and has cured cases given up by the family physician and specialists. If you have cancer or have a friend who has cancer, write me to-day. Full information, proofs and advice given without charge. Address DR. RUPERT WELLS, 2165 Kadiol Bldg., St. Louis, Missouri.

## VETERINARY MATTERS

PROFESSIONAL veterinary advice through this department to regular subscribers only. We do not answer veterinary inquiries for the benefit of "neighbors." Parties desiring information will be required to send their names in full with their address. No question will be answered by mail unless accompanied by a fee of \$1.00. In order that correct information may be given, the symptoms should be accurately described, stating of how long standing, together with color and age of animal, and what treatment, if any, has been resorted to. All veterinary inquiries should be addressed to this office.

### SYMPTOMS AND TREATMENT.

#### ABORTION.

I have a wolf hound that is with whelp and I need her to run with my pack of dogs. Can you tell me what to give her that will cause abortion without injuring her health?

It is against the principles of this paper to suggest means of causing abortion. The case should be left to nature.

#### LAMENESS.

I have a mule that fell on the ice three weeks ago and his hind legs came right back behind him. He handled one leg as though it were cork from the hock joint down. There is a little swelling in the fetlock.

Your description of the position taken by the mule at time of fall would indicate that he fractured his pelvis and in that case the lameness still is located in that part and may never be completely recovered from. Mule should be put in slings and the repair work left to nature if your veterinarian finds that there is a fracture of the pelvis.

#### WARTS.

I have a yearling heifer, red in color, that is covered with white warts from its head to shoulders, as thick as they can be. When the calf rubs against anything they fall off. It appears to be in perfect health otherwise and is doing finely. It has been that way since early in the summer. Haven't done anything for it and would like to know what causes them and what will cure them.

Warts are due to some deranged condition of the function of the skin which usually cannot be explained. Wet the affected parts once daily with strong vinegar or with Fowler's solution of arsenic.

#### LAMENESS.

I have a brown mare coming five years old that suckled a colt all summer. She ran on grass and had oats twice a day. Along in September, I began driving her some, from twice to three times a month. About two months after I began to use her she began to get a little lame toward the last of the drive of twelve or fifteen miles. Her hoofs were broken off short so I got her shod and drove her about twelve miles. She then got pretty lame and the next morning could hardly get around. I called a veterinarian who bled her from the vein that ran from the foot and burned the sole of the foot with something. In a few days she was all right. Then in about three weeks I drove her about ten miles and she got lame in her left front foot. I put it in a poultice of flax seed over night and the next morning she was all right; but after she is driven a few miles she goes lame again. Her feet are flat and seem hard and dry. Her frog seems as hard as her hoof. Her hind legs swell at the ankle joint after she stands in the barn a while and she rests her hind feet a good deal, first one and then the other. She does not seem to have much life, but acts as though it were hard work for her to trot. She does not finch when I tap her feet with a hammer. She travels as though her feet were sore. The other day I put a blister of cerate of cantharides around the head of the hoof. The lameness seems to be mostly in her left front foot. Can you tell me what the trouble is and a cure?

Give up the thought of driving the mare for the present. Take her to the

## Chief Cause of Hog Losses

This exposure shows stomach and intestines taken from a twenty-five pound shoat, full of intestinal worms.

This shows liver of same shoat, with worm in bile bladder. The duct through which worm has come was split with knife to show worm.

Colfax, Iowa, Sept. 19, 1906.

### To Whom It May Concern:

During the month of August, 1906, my shoats got sick, and a number of them died. On August 27th, Mr. Deal, representing the Iowa Stock Food Company, called at my place and told me my hogs were dying on account of worm trouble. In order to make sure of this, we killed one pig. On examination we found the stomach and a portion of the small intestines full of intestinal worms. Some of the worms had worked their way through the bile duct and into the bile bladder and liver.

The jar that Mr. Deal carries with him contains the liver, stomach, intestines and worms taken from this shoat. If anyone doubts this and will write me, I will, if necessary, go before any notary public and make oath to the above fact.

I fed Iowa Worm Powder to the balance of my pigs. It cleaned them of worms, and I had no more losses. Iowa Worm Powder will accomplish all that is claimed for it. I never saw anything that would remove the worms so effectively. I also consider Iowa Stock Food the best appetizer and conditioner I ever fed. The feeding of these products has saved me my crop of pigs. Anyone can be convinced of their value by using them. Very truly,  
G. L. POULSON.

**FREE!** To any person who has never fed Iowa Worm Powder we will send a \$1.00 package FREE on receipt of 25 cents in stamps for postage and packing. Address Dept. A.

**IOWA STOCK FOOD CO.,** Jefferson, Iowa.

blacksmith and have him shoe her with toe plates, letting the heels, frogs and bars absolutely alone. Then blister the hoof-head once a month as you have already done and let her run out doors every day after blister has been washed off. She will have to recover from contracted hoofs before she will be much use for road driving and a run on grass, shod as advised, may be necessary to complete the cure. Incidentally her other troubles will disappear as she lives a natural, out-door life.

#### CORN STALK DISEASE.

In regard to the corn stalk disease mentioned in a previous issue, what are the symptoms of an animal dying of the fungus spoken of, as contrasted with one dying of impaction of the third stomach? In some cases does not the stomach in which the dry stalks are first deposited, or the first stomach, become packed and dry to such an extent that the animal becomes sick and dies? What causes the fungus? Is it caused by damp weather? It seems that our best and largest matured crops cause the most loss. There is scarcely a neighbor of my acquaintance who has not suffered a loss this year and I know of some four or five horses

## BROOKS' NEW CURE

Brooks' Appliance. New discovery. Wonderful. No obnoxious springs or pads. Automatic Air Cushions. Binds and draws the broken parts together as you would a broken limb. No salves. No lymphol. No limes. Durable, cheap. Pat. Sept. 10, '01. SENT ON TRIAL. CATALOGUE FREE.

C. E. BROOKS, 2144 Brooks' Bldg.,

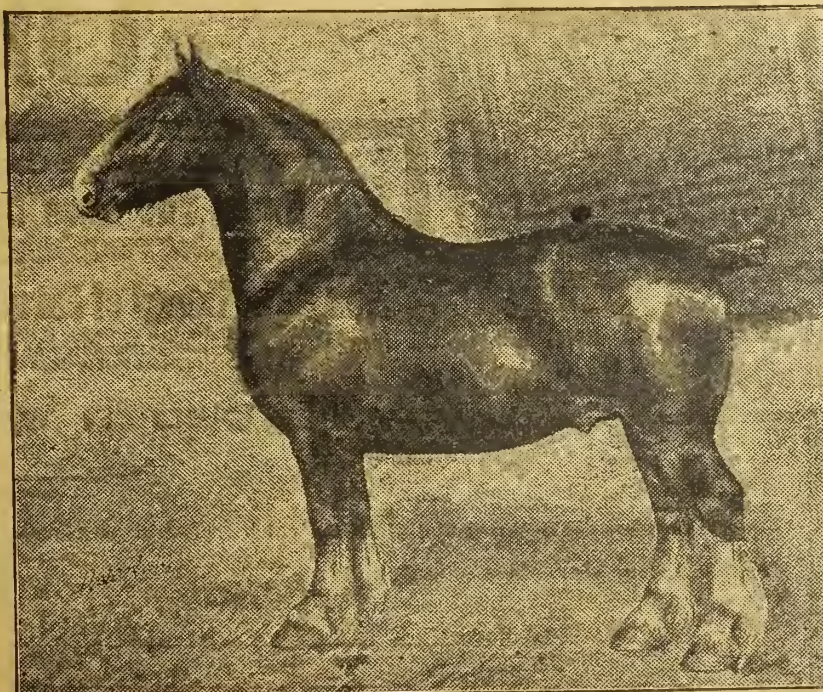

MARSHALL, MICH.

supposed to have died from the effects of stalks. How can I find and know this fungus and why does it appear to kill young stock oftenest, as is the case in this locality? Is this fungus a poison, and in an emergency what is likely to give the most radical results?

The disease formerly called "corn stalk disease" is more properly speaking caused by bacteria than a fungus and these minute organisms are wholly invisible to the human eye. The modern name of the disease is "septicaemia haemorrhagica" and it kills cattle, horses, swine, sheep, goats and other animals. Where the disease is caused by the germs referred to there always is a sudden rise in temperature and somewhere in or on the body escape of bloody substance into the tissues. In impaction of the paunch, third stomach or intestines, fever is not a usual symptom and the extravasation of bloody material into the tissues is absent. The former disease may kill in six hours; the latter requires several days. The first disease is "catching" in that it is contracted by invasion of some scratch or wound, externally or internally by the specific bacteria impaction on the contrary is merely due to the eating of large quantities of dry, coarse fodder in the absence of a sufficient amount of water, or succulent food. The germ disease is incurable; the impaction often is relieved by prompt drenching with large doses of castor oil or other physic or by opening of the rumen and removal of some of the food by hand. The germs of septicaemia haemorrhagica are most prevalent on low, rich land where the best crops of corn are produced. Young animals fall victims most readily as they have less resistance and possibly on account of greater liability to injury of tender membranes and skin.

#### Oil Cure for Cancer.

Dr. D. M. Bye's Combination Oil Cure is a recognized Cure for Cancer and Tumor. Beware of Imitators. Write today to the Originator for his free books. Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind.

Lunsdale Governor 23468, a grandson of Lincolnshire Lad, one of the good two-year-old Shires to be sold in the Watson, Woods Bros. & Kelly auction, February 26th-27th, at Lincoln, Neb.

F. A. Edwards' Short-horn Sale.

Mr. F. A. Edwards, of Webster City, Iowa, held at Bluff View Farm, on January 29th, the most successful sale held at Bluff View in recent years. Mr. Edwards announced that his offering was a superior one and the very large crowd assembled from Illinois, Minnesota, Nebraska and Iowa were in no wise disappointed. The Scotch cattle were fully appreciated and brought good, strong prices. The Scotch-topped cattle and the bulls sold entirely too low. Mr. J. L. Reece, of New Providence, Iowa, secured Imp. Fair Duchess and bull calf at \$430. She is one of the best specimens of the breed. Mr. Wm. Myers, of Carroll, Iowa, purchased her daughter, Imp. Fair Duchess of Bluff View, and bull calf at \$425. Competition was very strong on Heather Belle, the show heifer (two years old), daughter of Duke of Oakland 2d and Imp. Fair Duchess. Mr. Leslie Smith, representing Mr. N. P. Clarke, of St. Cloud, Minn., and Mr. Thos. Stanton, for Col. Frank O. Lowden, of Oregon, Ill., were the runners up on this beautiful specimen of hoveine character. Mr. Stanton surrendered to Mr. Leslie Smith on a \$700 bid and Mr. Clarke became her owner at this figure. Mr. F. M. Benner, of Woolstock, Iowa, secured a snap in Imp. Queen Bess 32d, bred to Viscount Secret. There was no better bargain in the sale. Col. F. O. Lowden secured Heather Blossom at \$390, a promising heifer bred to Secret Viscount. Mr. Carl Sparhoe, of Ellsworth, Iowa, secured, at \$395, Larch Hill Countess of Gloster, and cow calf, and a rare bargain. Mr. Edwards accorded his guests a square deal. Col. Geo. P. Bellows never did better work and sold every animal before leaving the box. Some cattle were sold for outside parties which are not listed. All of Mr. Edwards' cattle are calculated in the averages given, but buyers' names are attached only to those selling at \$100 and upward.

A WIDE-AWAKE BREEDER.

Breeders of Short-horn cattle throughout the state of Kansas and the adjoining states are acquainted with Mr. C. S. Nevius, of Chiles, Kan., either personally or by reputation. He is known as one of those young men who by his personal efforts, push and energy has made a success of the cattle business, and is today classed among the cattle improvers of the corn belt. Mr. Nevius, it is true, has devoted the larger part of his time for the past few years to cattle, but while pushing the cattle he has at the same time been hard at work breeding Poland

China hogs. The work has been somewhat of an uphill job, as Mr. Nevius is one of the men who realize that in order to be profitable to the farmer the hog must be practical. With this idea in view Mr. Nevius has gone after the big kind, the kind that has checked the rush of farmers to other breeds, and he is today breeding a class of hogs

that have size, quality and the desired feeding qualities. No fads or fancies have entered into Mr. Nevius' breeding operation and a more useful lot of Poland China hogs is hard to find. His leading herd boar, Designer, is one of the largest, is well proportioned and as smooth as they are grown. Mr. Nevius will hold a sale of these big-growth Poland Chinas on Monday, February 18th, and the man who wants them big and smooth should write Mr. Nevius to put his name on his mailing list.

Homeseekers' Rates.

Homeseekers' tickets are on sale via the North-Western Line from points in Wisconsin the first and third Tuesday of each month at very low rates for the round trip to points throughout the West, Northwest and Southwest. Also

special low rates for one-way colonists' tickets same dates in February and March to Colorado, Wyoming and the Black Hills, and to Pacific coast points daily during March and April. Ask agents of the North-Western Line for particulars.

**Announcement**

### Extraordinary

The Double Eagle Gold Mining Company, incorporated under the laws of Colorado for \$3,000,000, divided into 3,000,000 absolutely non-assessable shares.

### PROPERTY.

The property of the Company is located in Bridal Veil Basin, near the city of Telluride, and right in the very heart of the rich gold and silver bearing district of San Miguel County, Colorado.

It consists of twelve very rich claims and three mill-sites, and comprises about 130 acres. The Company owns this property in fee simple, and there is no incumbrance or indebtedness on same.

Immediately surrounding this Company's property are the famous Smuggler Union, Liberty Bell, Tomboy, Nellie and Camp Bird mines.

These companies earned upwards of \$4,500,000 last year. The Double Eagle property is more advantageously situated, and its ores assay far greater values than any of the foregoing companies.

### PRESENT EQUIPMENT.

This company has erected on its property one fully equipped mill with a capacity of ten tons daily, a blacksmith shop, a machine shop, power house, and dynamo room, a bunk house, assay office and laboratory and other minor buildings, all fully equipped. The machinery and buildings are all in splendid condition, and as good as when installed.

### WATER POWER.

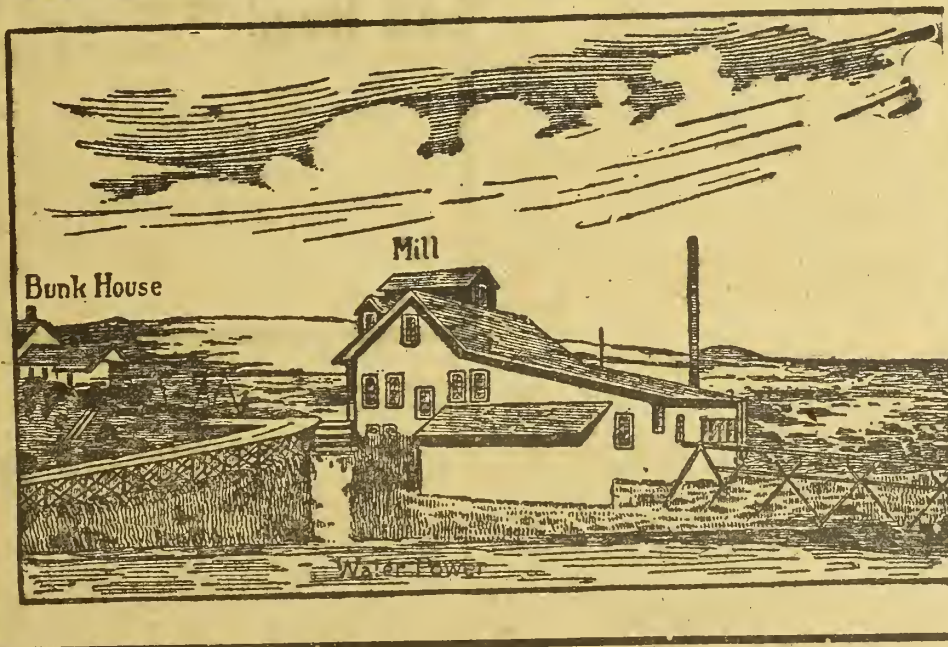

Within 150 feet of the mill runs Bridal Veil Creek, and this stream has been utilized by this Company to provide about 80 horse power. A turbine has been installed which gives us sufficient power for all present needs. One hundred horse power more can be generated on our water rights. We have no expensive fuels costs.

### DEVELOPMENT.

The various claims of the Double Eagle Group have been opened up in eight different locations, and to date work has been done, as a result of which there is now upward of 3,000 feet of tunneling, drifts, cross-cuts, winzes and up-raises. These cuttings, crosscuts and drift upon eight true fissure veins from four and a half to twelve feet wide.

### VALUE OF ORE DEPOSITS.

Assays and smelter tests show that the average value of the Double Eagle ores are upwards of \$60.00 per ton. Assays show from \$44.00 to \$8,261.00 gold and silver values per ton. The Company has now over 210,000 tons of this high grade ore blocked out, and also about 140,000 tons of low grade ore, averaging about \$10.00 per ton, lying on the dumps, only awaiting increased facilities to be turned into cash.

This Developed Mining Property is Located in the Heart of Colorado's Richest District  
**THE COMPANY'S OFFER.**

This Company now offers to the public its treasury stock at ten cents (10c.) per share. This is an unparalleled offer. Seldom, if ever, is the opportunity presented of purchasing stocks in a property of this character at this low price. The price of this stock will advance to fifteen cents in a very short time.

**THE COMPANY'S PURPOSE**  
Is to increase the mill capacity to 200 tons per day; to install a 200 ton cyanide plant, to install aerial tramways; to equip the shafts with electric hoists; to increase the water power; to continue underground development, and to purchase other very rich claims on which the company now has option. It is to accomplish the foregoing that the Company is placing on the market 1,000,000 shares of its treasury stock.

### ESTIMATED EARNINGS.

This Company confidently expects to pay dividends of at least 30 per cent annually. This means that at ten cents per share your investment will earn you 300 per cent, and that each share you now pay ten cents for will then be worth one dollar, i. e., \$25.00 will buy 250 shares. Thirty per cent dividends on 250 shares will net you \$75.00 per year; in addition your stock will be worth \$250.00 on the market. Just think what \$1,000.00 will do.

### THE COMPANY'S OFFICERS.

Pres., J. H. HARRINGTON, of the Harrington McCormick Commission Co., Kansas City, Mo.

Vice Pres., WM. PEET, President of Peet Bros. Soap Co., Kansas City, Mo.  
Sec. and Treas., C. C. COURTNEY, State Agent of the Mutual Benefit Life Insurance Co., Kansas City, Mo.

### DIRECTORS.

HARRY HALDEMAN, of the Sonora Chief Mining Company... Kansas City, Mo.  
J. T. GOODELL, Cudahy Packing Company... Kansas City, Mo.  
E. E. TOMLINSON, Traffic Manager, Swift & Co... Chicago Illinois  
Z. F. CRIDER, Crider Bros. Com. Co... Kansas City, Mo.  
C. H. BOYER, Boyer Safety Device and Equipment Co... Kansas City, Mo.  
J. H. KETNER, Prop. Hotel Washington, ... Kansas City Mo.

### REFERENCES

The foregoing gentlemen earnestly urge you to inquire of ANY BANK IN KANSAS CITY, MO., or any MERCANTILE AGENCY, as to their character and high standing. They are men of the very highest integrity and are trusted and respected business men of Kansas City. We also refer you to the FIRST NATIONAL BANK OF TELLURIDE, COLO.

F. C. VINCENT, Fiscal Agent, 432-441 Gibraltar Bldg. KANSAS CITY, MO.

**THIS STOCK WILL ADVANCE TO 15 CENTS PER SHARE BY MARCH 1st.**

The Double Eagle Co. has already spent over \$200,000 in Development and Equipment of its 12 rich Claims.

If you PURCHASE DOUBLE EAGLE NOW you permanently increase your income. Bear in mind that this is a Developed, Producing Industry and not in any respect a prospect. It costs you nothing to inquire. Cut out the coupon, mail today.

## Our Guarantee

### This is Important

This Company will positively repurchase from any stockholder any stock purchased by him (from the Fiscal Agent of this company) in the Double Eagle Gold Mining Co. at any time after one year from date of purchase of said stock, and will pay said purchasers 10 per cent. over and above the price paid by said purchaser for said stock.

This protects your investment. This guarantee is backed by over \$400,000 assets.

## IMPORTANT!

The Famous Camp Bird, Liberty Bell, Tom Boy and Smuggler Union Mines are within a stone's throw of The Double Eagle Mines. All have paid millions of dollars per year to their stockholders and none have stock for sale.

San Miguel County, in which The Double Eagle is situated, produced \$3,992,264 in precious metals in 1906.

Stansell & Matern Duroo Sale.

A good representation of breeders and a large crowd of farmers were present on Monday, January 28th, at the annual Duroo Jersey brood sow sale of Messrs. Stansell & Matern, of McNabb, Ill. The offering was in nice breeding condition and was appreciated by those present. Mr. H. E. Brown, of Hirsman, Ill., topped the sale, paying \$145 for the yearling sow, My Delight, a daughter of Chief Of All, he by Ohio Boy. Messrs. E. M. Castle & Son, of Joy, Ill., were the competing bidders. Mr. F. M. Erschen, of Odell, Ill., secured a bargain in a daughter of Tip Top Notcher at \$105, and was a liberal bidder on the best sorts. Colonels Keppert and Keil conducted the selling in a satisfactory manner. A list of animals selling for \$25 or over follows:

A. L. Mossman's Brood Sow Sale.

On the morning of January 29th about forty breeders from all parts of Iowa and Nebraska drove to Mr. A. L. Mossman's farm to attend his Duroo Jersey brood sow sale and were not disappointed with the offering as will be seen by the prices. A large crowd gathered in the tent and did full justice to the dinner. The offering was in fine condition, and Mr. J. D. Pollock, of Thayer, Iowa, topped the sale for a full sister to Nos. 33 and 34 of the catalog, sire Al's Chief 43327, dam Gold Choice 126018, paying \$235. Below is a list of prices paid and address of purchasers. Mr. Mossman desires to thank all who attended his sale and asks them to come again:

Quick & Son's Sale.

Breeders from Indiana, Ohio, Illinois and Kentucky were present at the annual brood sow sale of Messrs. S. R. Quick & Son, at Gosport, Ind., on Wednesday, January 30th. This firm have been breeding Durocs for a number of years and the offering was appreciated by those present. Mr. E. S. Kelley, of Yellow Springs, Ohio, topped the offering, securing a daughter of Beat Him If You Can, the \$3,000 son of Kan't Be Beat, at \$100. Messrs. Geo. W. Smith & Son, of Shelbyville, Ind., secured the next highest-priced one in a good gilt at \$85. This firm were liberal buyers. Col. Onel Isenhower opened the sale and was well assisted in the selling by Col. Tom

J. O. James' Big Poland China, Sow Sale.

The Biggest of the Breed

Braddyville, Iowa, February 23, 1907

**40 Head** 20 spring and fall yearlings, 3 matured sows, 17 spring gilts.

Fifteen sows in the sale are sired by my noted big boar, Pawnee Lad, considered one of the greatest big boars, and sire of the big kind, in southern Iowa. There will also be twelve Big Prospect sows in the sale out of Pawnee Lad sows. Others are sired by Proud Monarch, Nemo L's Dude, P. W. Perfection and other well known boars. They are bred to Pawnee Lad, Big Giant and Nebraska Chief. If you want the large sized Poland Chinas with big bone and out of prolific strains come to my sale. I have made a specialty of the big kind and that is the only kind I breed. Write for catalog, mentioning Iowa Homestead. Address,

H. C. Duncan, Auct.

## Great Combination Duroc Jersey Bred Sow Sale.

On February 23d will be held, at David City, Neb., the combination Duroc Jersey sale of fifty head, consigned by Messrs. Henry Bock, Joe Hilger and M. Tillman. Fifty head have been selected from these three good herds and among them are some very choice individuals. Mr. Henry Bock will offer twenty head, ten of which are tried brood sows and the balance are the tops of about fifty head of gilts raised this year. They are mostly bred to Surprise Jr., he by Young Surprise, dam Crown Queen by Wernsman's Choice. This fellow is very large, has wonderful bone and is a very good hog from end to end. He comes from the herd of Mr. Jacob Wernsman, of Cedar Bluffs, Neb., and was one of the best pigs raised on that place. Mr. Bock is using another young hog of very much the same breeding that is a very promising pig. Mr. Joe Hilger will offer seven tried sows and thirteen good, growthy spring gilts. They are all bred to Uno Higgins' Model, a grandson of Higgins' Model, that is one of the good pigs seen this year. He is very broad, has good back and ham, good bone and stands on extra good feet. He will be included in the sale and anyone looking for a good pig might do well by coming and taking a look at this young hog. Mr. M. Tillman will offer twelve head of gilts that are as growthy as we have had the pleasure of looking at this year. They are very smooth sows of good length, good backs, very broad, and good bone and feet. They are of typical brood sow type and should be looked up by those looking for breeding stock. They are bred to a son of Mendenhall's Chief, a son of Butler Chief, both extra good pigs. Catalogs are now ready and should be in every Duroc man's possession. Those who cannot attend can send a bid to Mr. Ray Page, of

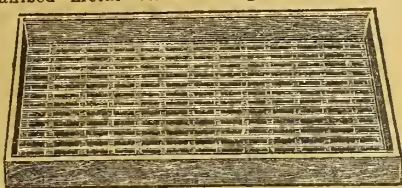

The Homestead, and it will be properly cared for. When writing please mention The Homestead.

## Good Farm Power.

No one denies the fact that the gasoline engine furnishes the ideal farm power. The kind of engine manufactured by the Witte Iron Works, of Kansas City, Mo., is especially "ideal" in its design and workmanship. There are no sparks or flames to ignite stacks or buildings; it is economical of gasoline; it is simple so that anyone who can run ordinary farm machinery can operate these portable engines without difficulty. It would take several columns to point out the merits of the Witte Portable Gasoline Engines, but as this has been done in catalog Address Witte Iron Works Co., West Fifth St., Kansas City, Mo., and please mention this paper when you write.

## The Perfection Seed Corn Grader.

By turning to page 5 of this issue you will find the advertisement of the Perfection Seed Corn Grader. This grader sells for \$1, or \$1.35 charges prepaid. It is a galvanized metal sieve corrugated in such a

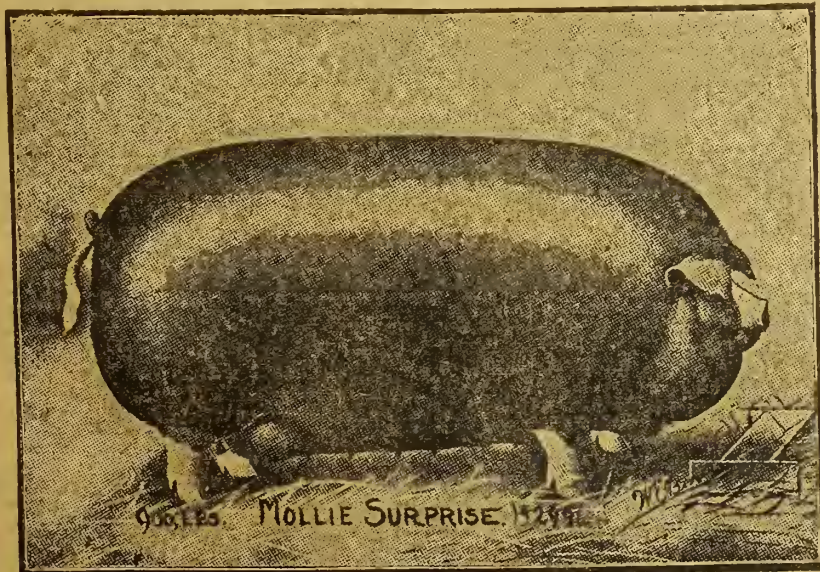

way as to let through only kernels of uniform size and shape. It is not merely a perforated piece of flat galvanized iron nailed on a frame, but is ribbed in such a way so that the corn is naturally directed through the holes. By the use of the Perfection grader all odd-shaped kernels are discarded. The work can be done rapidly, it is simplicity in itself and when you are through you can hang it up on a nail until you are ready for it next year. There is nothing to get out of order in the Perfection. It is for sale by the W. E. Ashby Telephone Cut Out Company, of Chariton, Iowa. You are safe in sending the price of this grader without even going to the trouble of corresponding. In your first communication please state that you saw the advertisement in this paper.

## Frank Vrtiska's Duroc Jersey Sale.

Mr. Frank Vrtiska's sale of pure-bred sows was held at his farm, four miles northwest of Pawnee City, Neb., January 29th, and was a success in every sense of the word. An average of \$45 was made, which was due principally to the excellence of the offering. However, there was a goodly number present and accommodations and arrangements of the sale ring was excellent. The top of the sale was \$100, paid by Mr. Frank Duder, of Table Rock, for No. 33. The list of purchasers follows:

The blacksmith shops are filling up with plows to be sharpened. This is a good sign, a sign that every plow share

This is an illustration of one of the brood sows in the herd of Mr. W. W. Wheeler, of Harlan, Iowa. She was sired by the great Chief Price, a boar weighing 1,005 pounds, and out of Mollie Jones 166842 by Mollie King Jr. 28009, her second dam being Jones Surprise 13642. This sow has size in abundance and carries her weight on a ten-inch bone. She is eighty-three inches from end of nose to root of tail and has a heart girth of seventy-six inches. She weighed 430 pounds at ten months, 630 as a yearling, 800 as a two-year-old and could easily carry 1,000 pounds. She raises large litters of pigs; indeed, her smallest litter was her first, which was nine pigs. Mr. Wheeler is breeding the Mastodon Polands, his entire herd last year averaging eleven pigs to the sow. He has had splendid opportunities to sell gilts, but has kept them all for his brood sow sale February 27th. He is offering April gilts that weigh from 275 to 300 pounds, March gilts that weigh from 300 to 340 pounds, and yearlings that weigh from 400 to 475 pounds. He has spared neither time nor money to build up his herd in the essentials, and he cordially invites all those who like the large, smooth, prolific Poland China to attend his sale at Harlan on February 27th.

I Will Sell at Brookside Farm One Mile East Farlin, Greene County, Iowa.

Wednesday, February 20, 1907

## 50 SELECT POLAND BRED SOWS 50

Eight tried sows, Miss Winsome by Chief 4th 71743; Lady Tecumseh 18968 by Chief Crop Ear; Choice Blackbird 189690 by Iowa's Choice, Logan Chief and others. ## FIELD NOTES.

Mr. E. T. Rickard, of Grinnell, Iowa, will hold a public sale of Aberdeen Angus cattle on March 15th.

Messrs. M. F. Buchanan & Sons, of Lamoni, Iowa, announce a sale of Duroc Jerseys to take place February 26th.

Mr. E. Jay Roberts, of Chester, Iowa, has two well-improved farms which he is offering for sale in his advertisement that appears on page 27.

Mr. F. G. Paul, of Laurel, Iowa, names February 28th as the date on which he will sell fifty head of Poland China and Chester White bred sows.

Mr. W. F. Hemmerling, of Dike, Iowa, proprietor of the Model herd of Chester Whites, writes that his bred sows and gilts are all sold, and that everything is doing fine. See change in advertisement on page 50 of this issue.

Messrs. Sandquist Bros., of Oakland, Neb., are offering Poland China bred sows for sale in their advertisement that appears on page 51 of this issue. These sows are bred to Perfect Quality, Missouri's Top Chief and Growth Expansion.

On February 26th, Mr. Wm. W. McClelland, one of the best-known Duroc Jersey breeders in southwestern Iowa, will sell about forty head of brood sows at Clarinda, Iowa. Mr. McClelland has a good herd and he is offering a choice lot of sows in the sale.

Mr. F. M. Jenkins, of Pomeroy, Iowa, proprietor of the Cyclone herd of Duroc Jersey swine, has gilts bred to a Crimson Jr. boar for sale. They are of good size, color, length and bone. The price at which they will be sold appears in the advertisement on page 51 of this issue.

The production of good corn is the desire of every true farmer. A proper selection of seed is the only way of insuring the year's corn crop. To use any kind of seed, regardless of selection, is to court failure; and poor seed does not pay out in the feed lot or on the market. Nubbins are a poor return for the farmer. The finest varieties of corn in the country are grown in southwestern Iowa, the kind that brings

more bushels to the acre than any other. The Mishna Valley Seed Company, Box 12, Hamburg, Iowa, will gladly send samples and catalog of corn and other seed to those who request them.

Mr. Ant. Vanderwaal, of Pella, Iowa, has an aged Belgian stallion which he desires to sell or exchange for another of the same breed and for which, if necessary, he would be willing to pay a difference. His advertisement appears on page 53 of this issue of The Homestead.

Mr. F. L. Morse, of Floyd, Iowa, has some choice Poland China gilts bred to M's Perfection, which he is offering for sale in his advertisement on page 35. In furnishing copy Mr. Morse writes: "These gilts are a good, long-bodied lot with nice hams, good broad backs and plenty of bone. I guarantee them as represented and will ship nothing that is not first class."

"The Virginia Country Homes" is a handsomely illustrated periodical published every two months in the interest of the real estate business of Messrs. H. W. Hilleary & Co., of Charlottesville, Va. The most noted places in that state are shown in its columns. The advertisement giving further particulars in regard to this periodical appears on page 26 of this issue of The Homestead.

Why not save your money as well when it comes to moving as you do in buying goods? There is an advertisement of a reliable Des Moines firm on page 19 of this issue of The Homestead who will save you on your freight rates if you will give them the opportunity. Write L. Lock Box 299, Des Moines, Iowa, for particulars, and mention The Homestead.

On February 26th, Mr. Jas. E. Walker, of Anita, Iowa, will make a Poland China brood sow sale at Atlantic, Iowa, at which time he will sell thirty head of brood sows. He is putting in some good yearlings and matured sows and the pick of his spring gilts. They will be bred to Corrected 100201, a son of Corrector 2d, and Timekeeper 115587, a son of the great Keep On. Write Mr. Walker at once and have him send you a catalog of his sale.

The third annual jack and mule sale of Mr. G. M. Scott, of Rea, Mo., is announced to take place on March 7th. At that time Mr. Scott will sell twenty-five large black jacks, which he considers as good as are bred. He will also sell at the same time twenty-two good three-year-old mules. Catalog containing photos of jacks is now ready. See his advertisement that appears on page 35.

Mr. J. G. Truman, of Trumans' Pioneer Stud Farm, Bushnell, Ill., writes: "I am in receipt of a cablegram from our Mr. J. H. Truman advising us that he has shipped another consignment of stallions. They left London on the 25th inst., and should arrive here about the 9th of February. Trade with us is very good and we have a large selection of first-class stallions on hand." See advertisement on page 55.

Mr. J. H. Barker, of Mazon, Ill., breeder of Poland China swine, is advertising some good strong spring gilts by Keep On 2d, Come On, Contractor, L. & W. Perfection 2d and other sires, for sale in his advertisement that appears on page 51. The gilts are from Perfection, E. L.'s Perfection, Likeness Perfection, Keep On and other dams. They have all been bred for March, April and May farrow, to Chief Perfection 2d out of a Keep On dam.

Mr. L. Maasdam, of Pella, Iowa, in ordering a re-insertion of his advertisement offering a Percheron stallion for sale, writes: "I corresponded with several men in regard to this animal, but have not yet sold him. Those who have written in regard to this stallion should come and look at him, in which case I believe they would be sure to buy. He is a No. 1 stallion." Mr. Maasdam's advertisement appears on page 53.

Mr. Allen Koons, of Batavia, Iowa, bought two very choice imported stallions of Mr. Frank L. Stream, of Creston, Iowa, recently. One was a three-year-old black Percheron, weighing 1,900 pounds, and the other was a bay, imported Belgian, two years old, weighing 1,750 pounds. These were the two best horses in Mr. Stream's barns. Mr. Koons had looked through a great many stables and found exactly what he wanted at Creston, Iowa. See advertisement on page 54.

It will probably be interesting news to a great many of our readers, especially those located in Adair county, Iowa, to know that Mr. C. L. Waltz, of Orient, Iowa, recently purchased from Mr. J. G. Truman, of Bushnell, Ill., one of the best Shire stallions that has ever been imported by this firm. This horse, Teneham Stroxtan 5533, will be remembered as one of the prize-winning horses in different 1906 state fairs. Mr. Waltz is to be congratulated on his choice of a stallion.

Mr. H. D. Parsons, breeder of Short-horn cattle, of Newton, Iowa, announces in his advertisement that appears on page 52, that he has five bulls ready for service, which are offered for sale. Four are Scotch, three red and one roan, and one is a Scotch-topped red. Mr. Parsons advises The Homestead he is pricing these bulls at figures that will surely appeal to any purchaser, and he feels sure in individual character they will please the most critical. He also has a choice lot of Scotch and Scotch-topped heifers which he will sell at reasonable prices.

Mr. J. B. McAllister, of Palo, Iowa, breeder of Poland China hogs, writes as follows: "The Poland China sows I am offering for sale are of good length and bone, well quartered and stand right up on their toes; sired by my great boar, H's T. C's U. S., which did good service for two years at the head of the noted herd of Messrs. Hakes & Son, of Williamsburg, Iowa, and has been at the head of my herd for the past two years, and which I recently sold to that noted Short-horn breeder of Mt. Vernon, Iowa, Mr. Geo. H. Budge. The dams of the sows I have for sale are all old tried sows and these gilts are from good large litters; their dams are of the Tecumseh, Wilkes, Corwin and Look Me Over strains. They will weigh 200 pounds or better and are bred for April and May farrow to a son of Eva's Chief, the hog which has won sweepstakes at the Central City (Iowa) and Interstate fair of Marion, Iowa, for four years in succession. I would be pleased to quote prices on them

If the dealers would only be fair to you and me, you would have less lamp troubles and I would make more chimneys.

If a MACBETH lamp-chimney was sold every time one is asked for, I would make all the lamp-chimneys instead of half of them.

The Index explains how to get a MACBETH chimney to fit every lamp, and how to care for lamps. Sent free to everyone asking for it.

Address, MACBETH, Pittsburgh.

to any of your readers who may be in need of young brood sows." See advertisement on page 51.

Mr. W. G. Unitt, of Seward, Neb., breeder of Duroc Jersey swine, in a recent communication to The Homestead, sends the following letter from one of his customers, Mr. George W. Spratt, of Weston, Mo. He says this is only one of many letters of a similar character he has received during his three years as a Duroc Jersey breeder. The following is Mr. Spratt's letter: "As I have not written you since I received the pig, I thought I would write a few lines. He arrived all O. K. on the morning of the 10th, and I will say I am well pleased with him, as he has good bone, strong back and will make a large hog. I had the misfortune to lose my other hog, the reason for me buying so late. I may want to buy again. When I do, I will remember you, as I do not think I could expect to be better suited."

Mr. T. A. Stevenson, of Shannon City, Iowa, has an advertisement on page 35 of this issue, offering the Shire stallion, Toft Right Stamp 5704, for sale. Mr. Stevenson advises that this is a great horse, an extraordinary fine breeder and that his get have won premiums for him at the Iowa State Fair, and wherever shown they have always won first. Toft Right Stamp combines the choicest strains of Shire blood in England and America. He won first at the Illinois State Fair and second at the Chicago International fat stock show in 1900, and at the Ringgold County Fair in September, 1901, he won first and grand sweepstakes over all draft horses. He is a beautiful dark bay with fine disposition, has extra heavy clean bone and the very best of style and splendid action. He stands seventeen hands high and weighs about 2,300 pounds in show condition.

Mr. James Cockerton, of Whiting, Iowa, in furnishing copy for his advertisement on page 35 of this issue, writes: "The sows that I am advertising for sale will weigh from 250 to 300 pounds. They are from the big-boned, prolific type. A number of the sows are sired by Standard Chief 2d 92441, my 800 pounds two-year-old boar, his bone measuring eleven inches in the thinnest part of the hind leg. He has an extra fine head and ear, stands on the best of feet and legs, with good, wide, well-arched back. He won sweepstakes at our county fair last fall. The sows are not fat, but just in good breeding condition, with good, smooth coats of hair, and all from large litters, and will be priced reasonably. They are bred to Sunshine Lad, a grandson of Iowa Sunshine. I also have some extra large Toulouse ganders and Barred Plymouth Rock cockerels for sale."

The offering of Mr. F. H. Houghton, of Marshalltown, Iowa, that he makes in his advertisement on page 35 of this issue, are a few choice sows reserved by him for his private use in the old reliable herd of Berkshires, and anyone purchasing one of these sows will get the careful and experienced judgment of the twenty years' experience of a successful breeder. The fact that Mr. Houghton has changed his plans somewhat is the reason for offering these sows. The gilts will weigh about 200 pounds. The oldest sows are all bred and are safe in pig to a son of Lord Lee Senator, a son of Royal Highclere, and Champion Duke, the yearling show boar of 1906. He can sell pairs not related and bred to different boars that are not related. These sows should bring some show pigs if properly raised. This is an opportunity to secure some choice animals at a reasonable price.

## CLOSING OUT.

Anyone wanting a good jack or stallion should not overlook the advertisement of Mr. Wm. Hunter, of Kansas City, Mo., in this issue. Mr. Hunter has other business and is closing out his stock. He is offering also 100 breeding ewes, fifty of which have lambs. See his advertisement on page 35.

## GO TO TEXAS.

Do not overlook the advertisement of Messrs. Boyer & Peterson, of Kansas City, Mo., in the Lands and Homes department. This firm are extensive dealers in Texas lands and are offering lands in the Panhandle country at bed-rock prices. The lands they have for sale are A1, as the firm do not handle any other class of land. Write them for full particulars.

## THE WICHITA HORSE SALE.

Messrs. Robt. Burgess & Son, of Wenona, Ill., and Wichita, Kan., wish to announce their forthcoming horse sale at Wichita, Kan., on Friday, October 22d. They are consigning to this sale fifty head of Percherons, Belgians, Shires and Hackneys, both imported and home bred, to this sale. As they won the majority of the ribbons in the stallion classes at the Kansas State Fair, 1906, this sale gives the public an unexcelled opportunity to secure a prize winner at their own price, as many of the prize winners will be included in this sale. The horses shown in this country the past fall by his majesty King Edward VII., of England and Lord Rothschild, which were pur-

February 7, 1907.]

chased by Messrs. Burgess & Son, at the recent International will be on exhibition at this sale. Write Messrs. Burgess for further information, kindly mentioning this paper as per the announcement on page 54 of this issue.

#### PROUD ADVANCE IS DEAD.

Every breeder of Duroc Jerseys will regret to learn that the noted boar, Proud Advance, died on February 2d, after being sick for two or three weeks. The breed has sustained a great loss in his demise, because he was one of the greatest sires of the present day. He was owned by the Proud Advance Stock Company, of Shannon City, Iowa, who were very fortunate in having a great many sows bred to him in their sales on February 19th and 20th. This will be the last chance that breeders will ever have to get a sow bred to the great king of kings.

#### FAMOUS DIRECT DRAFT TONGUE TRUCK.

The Famous Direct Draft Tongue Truck is a horse's friend and delight. The attachment is a truck having wheels and supporting the end of the stub pole, the horses being hitched to a clevis which guides the wheels and renders the use of a tongue unnecessary except with a skittish team, in which case there is a provision for a light tongue which takes none of the motions of the machine and merely serves as a preventive against backing into it. There is nothing a team has to do that is as hard on them as pulling a disk barrow, and still disking is a very important thing and must be done. The tongue trucks are to be welcomed as a blessing and relief from the rigors of this time, and the Famous Direct Draft Tongue Truck is the simplest, but the most effective, truck that is made, as it can be used on any kind of a disk, either old or new. It is manufactured by the Crescent Furnace & Foundry Co., of Des Moines, Iowa. Their advertisement appears on page 32 of this issue. Write them for a more detailed description of their machine and mention The Homestead.

#### SEXSMITH'S SOW SALE.

On Wednesday, February 13th, Mr. Harry A. Sexsmith will make a public sale of high-class Duroc Jersey sows at his farm near Greenfield Iowa. He sells Valley Lady, a daughter of Reed's Banker. This is the sow that raised the great Ohio Chief litter, one of which won sixth place at Des Moines. She is a splendid sow and is bred to Crimson I Am, a son of Crimson Wonder. He also sells three choice Ohio Chief gilts out of this sow, all bred to Crimson I Am. Here is a great commingling of prize-winning blood, and the outcome should be all right. He also sells a Proud Advance yearling out of the great Nan Orion, bred to King Top Notcher. Orient Maid is also a daughter of Proud Advance out of Vernie H. S., a half sister to the dam of the great Ruberta. He sells three good Stout's Advancer gilts out of Minnie Watson, the best sow he ever owned, bred to Valley Chief, a son of Ohio Chief, and Crimson I Am. Other sows are bred to H. A.'s Choice Goods 51197 and King Top Notcher. Mr. Sexsmith is putting up a splendid offering, and they carry the blood of the most noted winners. We do not hesitate to urge our readers to attend his sale because we know he has some of the best.

#### FRED STRONG'S SOW SALE.

On February 14th, Mr. Fred Strong will sell Duroc Jersey sows from his Sunny Slope herd, at Orient, Iowa. Mr. Strong breeds the good ones and his offering is first class and is bred in the purple. He will sell daughters of Ohio Chief, Proud Advance, Harding's Proud Advance, Stout's Advancer, Keep On, Brighton Wonder, Perfection Chief, W. L. A.'s Choice Goods, Tom Watson and Top Notcher Chief. They will be bred to Valley Chief 51095, a son of Ohio Chief, and F. A.'s Choice Goods, a son of W. L. A.'s Choice Goods. He sells old Missouri Girl, a daughter of Tom Watson, bred to Valley Chief, also Lucy Brooklyn, a daughter of Top Notcher Chief, junior champion at St. Louis; dam a litter sister to Proud Advance, and the sow that topped the Johnston Bros. & Newkirk sale last winter. He also sells a good daughter of Proud Advance, bred to a son of Crimson Wonder. Lady Chip is a daughter of Orion Chip, and she is bred to Valley Chief for an early litter. He sells a good Ohio Chief gilt bred to a son of Crimson Wonder; also a gilt by Stout's Advancer. Harding's Proud Advance, Harding's Improver, Belle's Red Chief and Keep On. It is an up-to-date offering in every respect. Send for catalog at once and mention The Homestead.

#### IRA JACKSON'S DUROC SALE.

The blood of Orion Chief and Kruger predominates in the Duroc Jersey offering of Mr. Ira Jackson, of Tippecanoe City, Ohio, to be sold on Wednesday, February 13th. That this blood is desirable in Duroc Jerseys is evident from the fact that during the past year, 1906, Mr. Jackson won more first prizes at the Iowa and Illinois State Fairs than any other exhibitor. It was the mating of the blood of Orion Chief with that of Kruger, and vice versa, that enabled Mr. Jackson to secure these prizes. Both of these noted boars were winners at the World's Fair, Orion Chief winning first in class and Kruger second in his class. In our issue of last week we referred to some of the best breeders in the middle West who are using boars of Mr. Jackson's breeding in their herds. These breeders have seen and know the value of using at the head of their herds, boars which have the individuality and ancestry to produce the best type of Durocs. Do you wish to improve your herd? Are you in need of new blood in your herd? If either condition confronts you it should be your intention to get the blood which produces the stock of that quality, size and finish which wins at the strongest shows of this country. We wish to call the attention of our readers to another fact regarding this offering which is vitally important to everyone. There are no bad feet in the entire offering. Mr. Jackson will not offer this kind of stock for sale, nor will he have it in his herd. The offering is uniform throughout, and every individual listed is worthy the consideration of every breeder. Mr. Jackson's sale follows that of Messrs. Watt & Foust, at Dayton, on Tuesday, February 12th. The traction cars stop in front of the farm, so that there are no long drives

to make. Free accommodation for all breeders from a distance at the Phillips House in Dayton. We especially urge readers of this paper to be present sale day, feeling confident that the offering will please the most discriminating buyers. Bids sent to Mr. D. M. Pierce, in care of Mr. Jackson, will be properly handled. Write at once for catalog as per the advertisement on page 56 of this issue, kindly mentioning this paper.

#### THE "ONLY WAY CIRCUIT" OF DUROC SALES.

We wish to call attention to the announcement on page 40 of this issue of the "Only Way Circuit" of Duroc sales which will be held at Elwood, Dwight and Odell, Ill., on February 19th, 20th and 21st. This circuit is made up of breeders residing on the

What Mr. Baxter has done, others can do. The offering this year is a better one than the previous ones from these good herds, and everyone can find what they want. There will be six fall yearlings and thirty-five spring gilts. The boars in use in these herds are worthy of special mention. Auditor D. was the second-prize boar pig under six months at the Illinois State Fair, 1906. Two of his litter mates are included in this offering and many of the sows are in pig to him. What you say is, in the opinion of the writer representing The Homestead, the best son of Proud Advance to be found anywhere. He is out of an Orion sow, and since both his sire and grandsire, two of as good boars as the breed ever produced, are dead, sows bred to him should find ready sale among the best breeders. Double Track is another of the herd boars in use in these herds. He

Notcher. His dam is Rose O'Grady, one of the best sows in the herd of Mr. F. M. Erschen. Much of the offering of Messrs. Taylor & Morris are bred to this boar. Messrs. John Schroterberger & Sons are using a boar called Archer. He is one of the best sons of Ambition, the phenomenal yearling in use in the well-known herd of Messrs. Thomas & Hogsett. Archer was in the litter which won third as get of boar at the Illinois State Fair, and the bulk of the offering of this firm have been bred to him. With the exception of three litters all of the offering of Messrs. Schroterberger is sired by Perfection J. K., he by Allison Jr. Perfection, and out of Owance Belle, the sow which has produced so much good stock in the herd of Messrs. Kraschel & Son. The sale will be held at the residence of Mr. Taylor, three miles northwest of Dwight, and the train service is such that breeders can easily reach this sale from the sale the day previous at very small expense. Further particulars regarding this offering will be given in these columns next week.

#### THIRD DAY, FEBRUARY 21ST.

On the third and last day of this circuit Mr. F. M. Erschen, of Odell, Ill., will offer to the public an unusually good lot of Duroc sows representing the tops of his herd. Mr. Erschen has been a liberal buyer during the past few months from the best herds of the country and the quality and breeding of the offering will please the most discriminating buyer. Thirty-five head make up the offering, three two-year-olds, seven yearlings and twenty-five gilts. They are bred to such noted boars as Hanley II., he by None Such, the sire of the noted breeding and show boar at the head of the noted herd of Messrs. McNeil Bros., Indiana Boy, Long Duke and Frank's Choice. Two very good yearling sows which go into the sale are sired by One Such, he a half brother to Hanley, both being sired by None Such. Several are sired by Comet, he one of the best sons of the International winner, Gold Finch, now at the head of the good herd of Mr. Harry Riggan, at Petersburg, Ill. In our next issue we will have more to say regarding this good offering, but wish to advise our readers to secure a catalog at once. Plan to attend all the sales in this circuit. They are so located that breeders can make all of them at very little expense and the offerings which have been selected will be found in keeping with the best which have gone under the hammer this year. Mr. D. M. Pierce, representing The Homestead, will be present at all of these sales, and bids sent to him will be properly handled. Write for catalogs at once, kindly mentioning The Homestead, as per the advertisement on page 40 of this issue. Further particulars will be given in these columns in our next issue.

#### CHAPEL HILL BERKSHIRES.

Readers of The Homestead who are desirous of securing the large, growthy, heavy-boned, long-bodied, deep-sided Berkshire brood sows will find a splendid lot of this type and character for sale at Chapel Hill Breeding Farm, owned by Mr. Wm. D. McTavish, of Coggon, Iowa. Mr. McTavish is one of the older, as well as one of the most reliable breeders of Berkshire swine in the West. As evidence of his standing we might state that he is at the present time president of the Iowa State Swine Breeders' Association, also secretary and treasurer of the National Association of Expert Judges of Swine. At the present writing he has a splendid lot of gilt-edge Berkshire sows for sale at the modest price of from \$35 to \$50, guaranteed safe in pig. As evidence of the esteem in which these 300-pound spring gilts are held, we might state that wherever they have been shipped out Mr. McTavish has received splendid endorsements from those receiving them. We reprint below a letter from one of Mr. McTavish's customers at Pueblo, Colo., in reference to a male pig sent to him recently. The letter reads as follows: "Pueblo, Colo., Dec. 26, 1906. Mr. Wm. D. McTavish, Coggon, Iowa. Dear Sir: That you may know how the last pig you sent me turned out, I wish to report that at our Colorado State Fair he won first in his class, championship of the breed and grand championship; with the yearling gilt from the Enterprise sow and two other gilts that I raised, I won first on breeders' herd. His pigs are coming on now and they look right to me. He is a very long hog, with very short nose and an excellent back. Hoping that you will continue well and prosperous, I remain, very truly, Hubert Work."

#### WATSON'S BROOD SOW SALE.

Whenever Mr. H. E. Watson, of Edinburg, Ind., invites Duroc Jersey breeders to come to his annual sales they may rest assured that there is something good in store for them. Such is the case with the offering which has been selected for the forthcoming sale which will be held on February 23d, the day following Messrs. Harris & Sons' Commodore sale at Louisville, Ky., on February 22d. Mr. Watson has held several successful sales in the past, and the offering is of equal merit. In fact it is above the average, as it includes many of the best sows which Mr. Watson owns and has helped him to get to the high position which he now holds among the Duroc fraternity. His principal herd boar is High Chief, one of the best sons of Ohio Chief. A daughter of this boar was sold to Messrs. Harris & Sons, of Waverly, Ky., who in turn sold her to Mr. H. B. Griffiths, of Bowen, Ill., and in the latter's sale last week she sold for \$525, having been bred to Commodore. A number of the females in the sale are either sired by or bred to High Chief and should prove valuable additions to good herds. Mr. Watson is using a very good boar in his herd, Col. Scott, by Carl's Colonel, a full brother in blood to Prince of Colonels and a number of sows are bred to him. Others are bred to Watson's King, he by Perfect King, one of the boars in use in the herds of Messrs. Johnston Bros. & Newkirk, of Brooklyn, Iowa, and C. W. & Wm. Reed, of Rose Hill, Iowa. The offering is a select one, and the breeders who are in the market for valuable sows should write at once for catalog as per the announcement on page 34 of this issue. Mr. D. M. Pierce, representing this paper, will be present at this sale and bids sent to him will be properly handled. Further particulars regarding this offering will be given in these col-

## OWE THEIR RESULTS TO THE HOMESTEAD.

LIVE STOCK ADVERTISERS FIND THAT NO OTHER MEDIUM SELLS SO MANY ANIMALS.

MR. George H. Lawshe, of Harlan, Iowa, breeder and shipper of Improved Chester White swine, reporting his sales at the beginning of the season, writes:

"I have had an extra nice trade this season, selling a large number of animals at good prices. I carried an advertisement in another publication, from which I received just two inquiries but no sales. All the rest I can trace to The Homestead and your Mr. White. Many thanks for the excellent service."

Mr. J. S. Golder, of Scribner, Neb., breeder of Percherons, writes:

"Please change my advertisement. Have sold everything in the mare line, several head going to Iowa parties. Have also enjoyed a good trade in stallions."

Messrs. H. C. Dawson & Sons, of Endicott, Neb., breeders of Poland China hogs, write:

"Send us your bill to date. We want the advertisement stopped for a while to catch our breath a few weeks. Have sold over 150 head so far and expect to sell 100 sows by March."

Messrs. J. R. Mills & Son, of Perry, Iowa, breeders of Percherons and Short-horns, write:

"Enclosed find my check for \$100. We are well pleased with the sale—had only one fault to find, we did not have stock enough to supply the buyers. We thank The Homestead, for it was your advertisements that brought the buyers."

Chicago & Alton railway, within a short distance of each other and they have selected the tops from their good herds for these sales. They have been liberal purchasers from the best herds and have wisely mated their stock so that breeders may feel assured that they will not be disappointed in the offering. The blood lines represent some of the most noted families and the stock is individually of the high character demanded by the best breeders. We are pleased to recommend these gentlemen and their offerings to readers of The Homestead in search of good Duroc Jerseys.

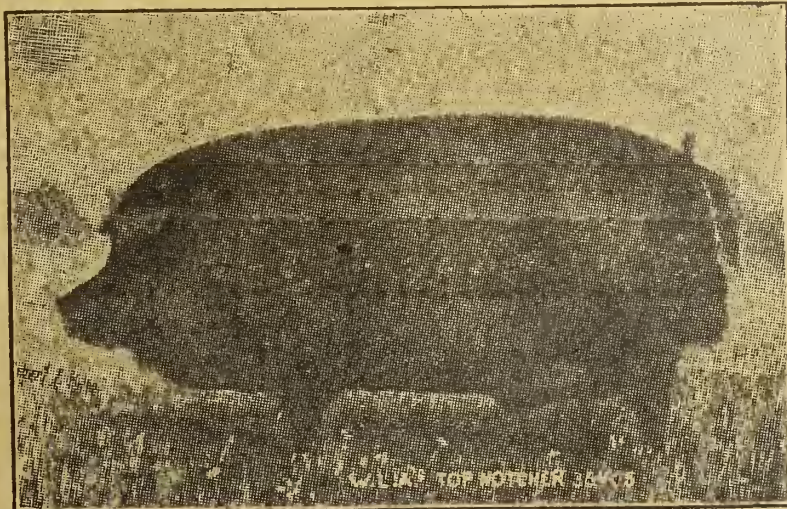

#### FIRST DAY, TUESDAY, FEBRUARY 19TH.

Messrs. E. H. Deal & Son, Fred Schweizer and J. G. Norton, of Elwood, Ill., are the consignors to this sale. They have held several sales and have sold stock to the best breeders, much of which has been retained in their herds, while others have thought well enough of stock bred by these gentlemen to consign it to their sales bred to their noted boars. A very good instance of this kind is that of Mr. Ed. A. Baxter. Last year Mr. Baxter topped this sale and secured a very good sow in Red Carnation, a daughter of Ely's Improver. She raised a litter of pigs and was bred to the noted boar, Buddy K. IV., and sold with a litter at side in Mr. Baxter's fall sale for \$410, topping the sale.

is a son of Echo King and his dam is Belle Nebraska, she by Red Chief I Am and out of Nebraska Belle. A sow bred to this boar will prove a valuable addition to any herd. Fashion Boy by Stoner's Improver and out of the International winner, Daisy Muller, has proven himself a valuable sire, and a number of sows in the sale are either bred to or are sired by him. There are two other boars in use to which some of the sows are bred, King Ely by Ely's Improver, he the sire of Red Carnation, and Chancellor, he by Comet by Gold Finch. The breeding and individuality of the sires of this offering and the boars to which they are bred cannot be excelled and we are pleased to recommend it to our readers. Further particulars will be found in our next issue.

#### SECOND DAY, FEBRUARY 20TH.

Messrs. Taylor, Morris and Schroterberger & Sons have joined hands in this sale and have taken from their herds only the tops. These breeders are among the younger members of the Duroc fraternity, but have selected and mated their stock so that no one will regret having been at their first annual sale. The offering is made up of forty head, one yearling, five fall yearlings and thirty-four gilts. Messrs. Taylor & Morris, own one of the best sons of Tip Top Notcher the writer has seen. He has been recorded as Illinois

W. L. A.'s Top Notcher illustrated above was used with much success in the herd of Duroc Jerseys owned by Messrs. W. L. Addy & Son, of Parnell, Mo. They have listed for their sale on Friday, February 22d, a strong lot of fall yearlings got by this boar and bred to their great breeding boar, W. L. A.'s Choice Goods. See page 43 for advertisement of their sale.

umns next week. We wish to call attention, however, to the fact that eight fall boars, the pick of the September pigs by High Chief, will be included in the offering. This is an unexcelled opportunity to secure a show boar for next year.

### N. C. BASSETT SELLS POLANDS.

On February 20th at Brookside Farm, one mile east of Farlin on the C. M. & St. P. between Jefferson and Lohrville, Iowa, Mr. N. C. Bassett will present to his brother breeders and farmers a choice collection of Poland China females. The selection should prove a very attractive one to buyers, since it combines very choice breeding with superior individual merit. There should be something in this sale for everybody that is looking for members of this breed. Those after something mature would certainly find some good picking in eight tried sows principally of the Perfection breeding. Many of these will have produce in the sale which will speak for their ability as breeders. There will be eighteen head of fall yearlings, and among them there certainly will be some choice ones. They are of the large, roomy kind and are sired and bred right. Twenty-four head of very fancy spring gilts complete the offering, and as they are well grown and of the big, vigorous kind, they should go quick. The spring gilts are from large litters and are typical of the breed in every way. They are in splendid condition, as in fact is the case with all the offering, and we advise those of our readers who are looking for something good in this breed to send at once for a catalog to Mr. N. C. Bassett, addressing him at Jefferson, Iowa. Kindly mention The Homestead when so doing.

### TETER'S DUROC SALE.

Mr. J. A. Teter, of Remington, Ind., invites the Duroc breeders to be present at his annual brood sow sale which will be held on Monday of next week, February 11th. It is with a feeling of pride that Mr. Teter invites breeders to visit this sale, for he has selected the tops from his good herd for this occasion. This means something, for Mr. Teter has been one of the most successful showmen to be found anywhere. He was the owner of Top Notcher Again, a World's Fair winner, a boar which has done much for the good herd of Mr. H. S. Allen, of Russell, Iowa. Included in the offering which Mr. Teter has selected are a number of show sows. Particular attention is called to the yearling prize-winning sow, Clover Blossom 1st. This great sow was sired by Crimson Top, dam Clover Blossom, by Kan't Be Beat. Clover Blossom 1st was champion and grand champion sow at Michigan State Fair, Detroit, 1906, second at Indiana State Fair and third at Illinois State Fair, 1906. She is safe in pig to the noted prize-winning boar, Golden Chief. This boar was second at Indiana State Fair and is the sire of much of the good stock included in the sale. Four other state fair prize-winning sows are included in this offering and should attract the attention of discriminating buyers. At three state fairs of 1906, Illinois, Indiana and Michigan, as strong shows as the breed produces, Mr. Teter won twenty-nine prizes, including two grand champions, three champions, ten firsts, nine seconds and six thirds. Many of the animals which won the above prizes are included in this sale. Readers of this paper who intend to be present at the Ohio sales should arrange to go by way of Mr. Teter's at Remington. Railroad accommodations are such that all can reach Dayton, Ohio, the next morning in plenty of time for Messrs. Watt & Foust's sale. Bids sent to Mr. D. M. Pierce will be properly handled. Plan to be present sale day. Catalogs will be sent free to all who write as per the advertisement on page 48 of this issue. Kindly mention The Homestead when writing.

### PODENDORF'S IOWA SUNSHINE SALE.

On February 23d, at Logan, Iowa, Mr. A. J. Podendorf, one of the best breeders and one of the greatest showmen in the state of Iowa, will sell forty head of choice Poland Chinas. There will be thirty head of bred sows and ten fall pigs. Among these fall pigs, all of which are sired by old Iowa Sunshine, are some great prospects for show material for next year. In matured sows he is selling some of the very best he has in his herd. Some of the older sows are dams of some of his prize-winning litters. No. 1 in catalog will be Lena Pet, one of the most useful brood sows to be sold this winter. She is a very large sow, always farrows large, even litters and raises them. Her pigs have been winners at Iowa and Nebraska State Fairs. Several of the best sows in the sale are her daughters. Another very attractive sow is U. S. Lady by U. S. Perfection, he being a litter brother to Happy Perfection, the sire of Ed. Klever's Thicket. U. S. Lady breeds more quality than any sows he will sell or have, and we doubt if as good a breeder will be sold this winter. She is the dam of the second prize gilt at Iowa State Fair in 1905. She is also the dam of Iowa Beauty, the sow that won two years in succession at Iowa State Fair. Another great sow is Tec. Bell 2d by Chief Tec. Beauty by Chief Tec. 3d, dam Lora Pet. This sow is a great brood sow. She farrows very large litters and raises them. She is the dam of the great litter Mr. Podendorf sold in his sale in 1905. Another great sow is Iowa Pride by Iowa Sunshine. As a show sow she carries to her credit three Iowa and Nebraska State Fair ribbons of 1905 and one at Iowa State Fair of 1906. She will make a great brood sow. Mr. Podendorf is fitting some of her pigs up for state fair of 1907. Her litter sister, Iowa Pride 2d, is an Iowa and Nebraska State Fair winner in 1905 as a brood sow. He will put in some fall pigs to show what she can produce, and considers one of her fall pigs the best fall boar he ever bred. Some think him a better pig than Sunshine Finish, the pig that Mr. Podendorf won second on at Iowa

## Podendorf's Great Iowa Sunshine Poland China Sale

Logan, Iowa, February 23, 1907

# 40 Head, 30 bred sows, 40 10 fall pigs

I am selling some of my best show sows and some of the best daughters of old Iowa Sunshine, the greatest sire of prize winners in the state of Iowa. There will be daughters of Perfection E. L., Iowa Sunshine, Proud Perfection and the great Mischief Maker in the sale. I am also selling some great fall pigs by Iowa Sunshine that will make show material. One of these is the best prospect I know of for a show boar next year. Also a gilt that is a show prospect. Write me at once for catalog. Address,

## A. J. Podendorf, Logan, Ia. Col. Jensen, Auctioneer

Send bids to M. T. White, Homestead representative, in care of Mr. Podendorf.

three by Lora Pet. Almost the entire offering are heavy in pig. You take no chance getting sows that are not in pig. Write for Mr. Podendorf's catalog and mention The Homestead. If you cannot be there, send your bid to Mr. M. T. White, Homestead representative, in care of Mr. Podendorf.

### PUCKETT & GRINNELL SALE.

Friday, February 15th, the day following the Whitehall combination sale at Yellow Springs, Ohio, Messrs. Puckett & Grinnell will sell fifty head of richly-bred Durocs. Very few offerings have animals included that carry as much of the blood of Ohio Chief as does the sale of Messrs. Puckett & Grinnell. The breeder who is in search of Ohio Chief blood should by all means be present at this sale. The great hog, S. S.'s Success 13519 (A.) by S. S.'s Col. 9765 (A.) by Ohio Chief 8727 (A.), dam Woods Lady II. 23682 (A.) by Col. C. 9377 (A.) by the great Walt's Col. 5795 (A.), has proven his great worth as a breeder and is an extra fine individual and shows how Ohio Chief's get breed on. Many choice sows will be sold State Fair in 1906. The gilts in this sale are large; a number will weigh 300 pounds by sale day, and are as smooth a bunch as ever walked through the sale ring this winter. Among them are two by Iowa Sunshine and out of Pig Girl that are very large, smooth as a ribbon. Another is a litter sister to Sunshine Finish, the boar pig that won second at Iowa State Fair in the under six months class in 1906. She is a show sow and will make a great brood sow. She shows heavy in pig by Western E. L. Two other sows are by R. O. Klever and one bred and heavy in pig by Iowa Sunshine. Other good sows are two by Tec. Bell 2d. Other good sows are two by Tec. Bell 2d. In this sale by this great sire and others are bred to him, and then to crown all he is a winner at Indiana and Ohio State Fairs. Chief's Model 7307 (A.) (by The Model 13427 (A.) by Morton's Model 7539 (A.) by Orion II. 6537 (A.) by Orion; dam Chief's Belle V. 30982 (A.) by Ohio Chief 8727 (A.). is another good male that is surely bred right and is right as an individual. Other males in use are S. S.'s Col. 9765 (A.) by Ohio Chief 8727 (A.), Puckett's Chief 14205 (A.)

## 36 Richly Bred Durocs 36 At Auction

At My Farm Near Seward, Nebraska

# FEBRUARY 20, 1907

Twenty good, growthy fall yearlings, five aged sows and eleven spring gilts, bred to such boars as Fashion Improver, one of the best living sons of Improver II. Jr., champion first prize pig at Ohio and New York State Fairs last fall. My sows represent the best blood known to the breed. Write for catalog and come to the sale. Send bids to Ray Page, who will represent this paper.

## S. P. BRIGGS, Seward, Neb.

by Ohio Chief 8727, and Ideal Success 18687 (A.) by S. S.'s Success 13519 by S. S.'s Col. 9765 (A.) by Ohio Chief 8727 (A.) The offering embraces the blood of Kan't Be Beat, Top Notcher, Veribest, Lucy Wonder, Dutchess 40th, Variety, etc., and among the attractions are many descendants of Ohio Chief. One daughter of Ohio Chief is O. C.'s Variety V. 33134, with the Orion and Col. M. cross. She is thin in flesh, but an extra good sow and should command breeders' attention. This good sale follows the Yellow Springs sale and should be attended by all who attend the great Ohio circuit. Bids sent to Mr. D. M. Pierce will be properly handled. See advertisement on page 56 and write for catalog, kindly mentioning The Homestead.

### WHITEHALL DUROC SALE.

In our last issue we called the attention of our readers to the combination sale of Duroc Jerseys which will be held at Yellow Springs, Ohio, on Thursday, February 14th. The writer representing this paper has carefully inspected each consignment which goes into this sale, and is pleased to recommend

the stock as worthy of a place in the best herds. Mr. S. E. Morton, of Camden, Ohio, sends forward a bunch of yearling and apring gilts which are rich in the blood of Ohio Chief. It is the best lot of Durocs which Mr. Morton has ever put into a sale and includes much show material. Mr. Fred Bauer, of Eastwood, Ohio, sends forward a bunch that will appeal to buyers wanting the best. Mr. E. S. Kelley, of Yellow Springs, Ohio, at whose farm the sale is held, includes some of the best gilts of the season's crop. They are aired by the noted boars in use in this herd and will do well for their new owners. Mr. C. E. Sparks puts in a fine draft from his herd, and those who have been present at other sales held at Whitehall will know that Mr. Sparks has only included the tops of his herd. Messrs. Fogg & Black fill out the balance of the offering with good stock from their herd. We wish to call attention to one important fact in connection with this sale and correct an impression which prevails in the minds of some of the breeders. This sale is not held to dispose of a lot of tail end stock, but is a combination of the breeders of Ohio who have stock for sale, yet not enough for each man to hold a public sale of his own. It is the top stock, and the sale gives the breeders of the central West an opportunity to secure well-bred stock of show-yard individuality without visiting the several herds. This sale follows that of Mr. Ira Jackson, of Tippecanoe City, Ohio, and can easily be reached by either the traction line or steam road. Look up the advertisement on page 56 of this issue and plan to be present at the entire circuit of sales. Bids sent to Mr. D. M. Pierce, in care of Whitehall farm, Yellow Springs, Ohio, will be properly handled. Kindly mention The Homestead when writing.

### DEWITT'S POLAND CHINA SALE.

A public sale of Poland China brood sows will be held at the Clappett barn, Russell, Iowa, on February 13th, when Mr. A. W. DeWitt will sell thirty head. He will sell a few matured sows, all tried brood sows, yearlings and spring gilts. The most of these will be sired by Honest John 99583, possibly the best breeding boar ever owned by Mr. DeWitt. The rest will be sired by Young Jumbo 2d 106305 and Buroak King 90377. They are all bred to Exception, a grandson of old Expansion, and a hog with lots of size and plenty of bone. He has also used A. W. Standard on these

February 7, 1907.]

# Greatest Brood Sow Sale of the Year

Attention is called to the great Royal Purple Brood Sow Sale.  
**Louisville, Kentucky, Friday, Feb. 22, 1907**

One of the greatest lots of sows ever passed through sale ring. **ATTRACTIONS**—Useful Bess by Top Notcher 8803, possibly the last sow by him to be sold in the sale ring; Orion Miss by Orion; Jim's Lady by Junior Jim; Grace F. II. by Ed's Col.; Anne Belle by Sure Winner; Kant's Belle by Kant's Be Beat, all bred to Commodore, king of the breed. Commodore Best, bred to Ed's Col.; Commodore Lady; Commodore Lass, all by Commodore and bred to the great Top Notcher X., one of the best breeders in the land. Other great sows bred to Commodore, Top Notcher X., Ed's Col., Ky. Col. II., Chilton's Col. and other noted sires. Send for catalogs and come to Louisville, Ky., meet the southern and eastern breeders and have a good time. Send bids to D. M. Pierce, in care of Hotel Willard, Louisville, Ky., and same will be honestly and fairly treated. The man who fails to get one of these great sows will always regret it, and lose money. Only a limited number of sows are bred to Commodore. The greatest opportunity of the year.

Commodore 13381, first and champion and headed first-prize aged herd at Illinois, Ky. and Tenn. State Fairs, 1907.

Cols. H. L. Iglehart and Tom Vinnedge, Auctioneers.

Amos W. Harris & Sons, Waverly, Kentucky.

sows and he is a son of standard Chief. Mr. Dewitt is offering a class of sows that are very prolific, having lots of stretch and size enough to suit both farmers and breeders. He is offering a good, practical lot of brood sows, and they are the kind that will make money for those who buy them. Write Mr. A. W. Dewitt, Russell, Iowa, for a copy of his catalog and then go to his sale.

## THE MCCLURE REAL ESTATE AGENCY.

In Des Moines this name stands for reliability, for it is a firm that has been in business in the city for years and is considered perfectly reliable. They have a list of farms located in almost any section of the West, that is unsurpassed by any other firm. They would be glad to correspond with you regarding any of their farms and will guarantee a "square deal." The Homestead Company wishes to call the attention of its readers to their advertisement which appears on page 27 of this issue.

## ARNTZ EYE CURE.

Mr. Lew Arntz is an optician of the city of Des Moines and has been for many years. He has been so successful in his line that at the present time he can boast of one of the largest practices in the city. At the urgent request of his many satisfied patients he has put on the market a remedy for the cure of granulated and ulcerated eye lids. If you will write him he will send you absolutely free of cost his book of testimonials and a sample bottle. Send ten cents for postage. Address the Arntz Optical Company, 150 Sixth Ave., Des Moines, Iowa. Please mention this paper. His advertisement appears on page 34.

## AN ORION-DANDELION SOW SALE.

One of the great hogs that has been used in southern Iowa is Orion Dandelion, the sire of Nan Orion, that made Mr. Geo. R. Mansfield famous. He is also the sire of several other great sows, and the Orion-Dandelion sows have always been great producers. At Corning, Iowa, on February 12th, Messrs. Harrison & Robinson, of Prescott, Iowa, will make their annual brood sow sale. They will sell twenty fall yearlings and 30 choice gilts. Sixteen of these will be sired by Orion-Dandelion, he having been used at head of these herds before he died. Others will be sired by I Am Crimson Wonder 41023, a grandson of Nebraska Belle. Some are sired by Improver Choice 48075, a son of Improver II., and some are sired by Proud Advance and Kant's Be Beat. Besides these are some by Red Prince II., and The Lad For Me. They are bred to O. E.'s Chief 55471 and Chief of Hazeldell 55469, both sons of Ohio Chief; Perfection Advance, a son of Proud Advance; I Am Crimson Wonder, a grandson of Nebraska Belle; Improver's Choice and Orion Dandelion II., the best son of old Orion Dandelion. If you are looking for Orion Dandelion sows, the blood that has made many Duroc Jersey breeders famous, then attend this sale and buy them. Send for their catalog and mention The Homestead. Address Harrison & Robinson, Prescott, Iowa.

## J. O. JAMES' BIG POLANDS.

One of the great Poland China sales that will be pulled off in southern Iowa this year is that of Mr. J. O. James, at Bradyville, Iowa, on February 23d. Mr. James breeds the great big, long-bodied, big-boned kind of Poland and no man has a better herd of their kind nor a better offering to go through a sale ring. He sells forty head, twenty yearlings and fall gilts, seventeen spring gilts and three matured sows. At the head of the James herd is the great big boar, Pawnee Lad, and no large hog in the state has a better reputation for size, nor for the siring of extreme size, length of body and large bone. He is selling fifteen Pawnee Lad sows in this sale and fifteen Big Prospect gilts. Among his good, matured sows to be sold is Rose Perfection by Proud Monarch, dam Rose Allerton by Allerton Tecumseh. She is bred to Pawnee Lad for March 10th farrow. She is a most excellent brood sow and three of her litter averaged ten in each. She is a large sow and will have a spring gilt in the sale by Pawnee Lad. Miss Nemo L. by Nemo L's Dude is another good sow in this sale. She is bred to Pawnee Lad for March litter. His old sows, May Price, one of the greatest brood sows, goes into the sale bred to Pawnee Lad. Also May Price 4th and May Price 5th, litter sisters to Rood's R's Pawnee Lad, stand at the head of the Fred Rood sale, and the boar he thinks so much of. Anna Price 4th was a year old last March, and if anyone wants a big one, here is where he can get her. She is bred to Big Giant, a son of Rood's Tecumseh by Big Tecumseh by Blain's Tecumseh. He also sells two goods sows in Anna Price 7th and Anna Price 8th, both bred to Big Giant. He also sells a corking good gilt by Paw-

nee Lad out of Lady Gianness by P. W. Perfection. Iowa Girl is a fall yearling by P. W. Perfection, the boar that sired so much of the stuff in the great Rood-Fessenmeyer sale. Some of these sows are bred to Nebraska Chief, a son of Pawnee Lad. If you are looking for the big kind, with great stretch of body and big bone, then go to the J. O. James sale. Write for his catalog and mention The Homestead.

## SECOND ANNUAL SALE OF POLAND \* CHINA BRED SOWS.

On the fair grounds at Algona, Iowa, February 15th, will occur the second annual sale of Poland China bred sows, the property of Messrs. H. H. Styer, of Whittemore, Iowa, and M. P. Dan, of Burt, Iowa. Those who attended their last sale know that this means a rare opportunity to secure the very best Poland Chinas in the country. There will be sold at that time fifty-one head, consisting of twelve tried sows, seven fall gilts, thirty-one spring gilts and one herd boar. The most of the gilts are bred to Robert Alert, which was a state fair winner. Some are bred to Meddler Jr., a son of the world's champion. The rest are bred to Klever's O. K., Keep On Style, Black Hawk and Spellbinder II. The sale will be held in the stock pavilion, so there will be no postponement on account of weather. Remember the place and date, Algona, Iowa, February 15th, at 1 o'clock. Address Mr. H. H. Styer, Route 2, Whittemore, Iowa, or Mr. M. P. Dan, Route 2, Burt, Iowa. Their advertisement appears on page 45 of this issue.

## LAST CALL FOR THE WM. RAY & SON POLAND CHINA SALE.

On February 9th, at the sale pavilion at Defiance, Iowa, Messrs. Wm. Ray & Son will sell forty head of choice Poland China brood sows. In this sale will be two daughters of the world's fair champion boar, Meddler, bred to their great young boar, Perfection L. & W. They also sell a daughter of Grand Chief Tecumseh 2d, the sensational Nebraska sweepstakes boar, and she is bred to Impudence 3d, one of the greatest sons of the Iowa State Fair sweepstakes boar, Impudence. They are also selling daughters of their old herd boar, Dakota Chief 2d, a son of the sweepstakes boar, Dakota Chief that headed their herd for a number of years. Others are sired by Happy Medium, Improver and other good hogs. The above firm are using two hogs that will pass the most critical inspection. They are Impudence 3d and Perfection L. & W. They are both sons of sensational winners and are splendid boars themselves. If you want a sow bred to one of these great young animals it will pay you to buy one or more of these sows. The offering is good, both in the way of matured sows and spring gilts. Be sure to write for their catalog and mention The Homestead.

## LAST CALL FOR THE VAN PATTEN DUROC SALE.

An opportunity to buy something good in the Duroc Jersey bred sow line is offered in the sale of Mr. Gilbert Van Patten, of Sutton, Neb., on February 14th. Mr. Van Patten has been one of the most successful breeders and showmen in the ranks of the Duroc Jersey fraternity. It was he who brought out the great show boar, Van's Perfection, the sweepstakes boar of three state fairs and a winner of ribbons three years in succession. Mr. Van Patten is the gentleman that purchased Tom Davis, the second-prize yearling at the Iowa State Fair and brought him to Nebraska and won first on him in same class. A great many of the top sows in the Van Patten sale are bred to this hog and the man who gets one of them will have something that by no means will be unprofitable to him. His other boar is Medoc, the hog that Mr. Van Patten has used with success for two years and has produced some of his best show animals. Both of these great boars have been bred to the sows in the sale and either would be a credit to head any herd in the business. The offering is not large, only thirty head being cataloged, but among them are show sows which should be sought for by leading breeders. Model C., a daughter of the great Billy K., and first-prize sow over twelve months at Nebraska this year, is one of the good ones to be offered. She is a sow of good size, carries a great broad back, good ham and side lines, very deep, good bone and extra good feet. She is bred to Tom Davis and would look well in any man's herd. Model B., a litter sister, was third-prize sow in same show and is almost as good a sow. She will also be sold bred to Tom Davis. Model E. is another of the same litter that deserves mentioning, and bred to the show boar, Tom Davis, should produce something very good. The two fall yearlings by Medoc, mentioned in the catalog, are extra good and are from the same dam

in their class at the Nebraska State Fair that the three already mentioned are. They were good enough to win third and fourth last fall and they are good prospects for show another year. They are both safe in pig to Tom Davis, which should produce something worth looking up. It is not very often that a man gets a sow that will produce show stuff from different boars, but such is the case in Rose Bud Lady. She is the dam of the three great prize-winning yearlings already mentioned, also the dam of the two fall yearlings. She is bred back to Medoc and will be offered for sale. If you are looking for a producer, don't quit bidding on this sow, as she is a money maker at any reasonable price. There are several sows in this sale that breeders should go after. If you cannot be present, send a bid to Mr. Ray Page, of The Homestead, and it will be properly handled. Catalogs are now ready and should be in the hands of every lover of good Durocs. Write for one at once and mention The Homestead.

## BERGREN'S SOW SALE.

On February 22d, at Stanton, Iowa, Mr. E. N. Bergren will sell forty head of Poland China brood sows. Mr. Bergren has one of the best bred herds in Iowa, and he is putting in a splendid offering of sows in the sale. They are made up of fall yearlings, matured sows and spring gilts. Two of these are daughters of G's Perfection, out of Lady I Know by Perfect I Know. One is bred to Stunner, his prize-winning herd boar, the other to Peerless Perfection. He sells a good Big Perfection sow, also bred to Stunner. One of his best brood sows is Model U. S. by U. S. Chief 2d, and she is bred to Stunner for February farrow. Hoosier Girl 3d, a daughter of Charmer Chief and Queen of Spades, a daughter of Col Mack, are both bred to Stunner and both of these are good brood sows. The gilts are sired by Prospector by Big Prospect, Big Klever, Shamrock, Long Wonder, Extension, Peerless Perfection and Big Perfection. Stunner 107149, is a son of Black Sunshine by Black Perfection by Chief Perfection 2d, dam Stehlin's Choice by Perfection E. L. He was shown at Des Moines, where he got in the winnings, also at several other fairs. He is bred to many of the sows in the sale, and a sow bred to him is strictly all right. Cantrell's Corrector is a son of Corrector 2d out of Wine On by the great Keep On. He is also bred to some of the sows in the sale. The offering is a good one in many ways. There are sows in the sale that will please those who are after lots of size and also sows that have plenty of quality. Write for his catalog at once and mention The Homestead.

## LAST CALL FOR THE HESS & SONS SHORT-HORN SALE.

With this issue we wish to call the attention of our readers for the last time to the sale of Short-horn cattle to be held at the farm of Messrs. Hess & Sons, near Surprise, Neb., on February 12th. They are offering about forty head of choicely-bred animals. Some of them are straight Scotch and the balance have several good Scotch tops. Messrs. Hess & Sons have been breeding good Short-horns for several years and have not only looked for richly-bred animals, but have bred size and quality along with it. Today they probably have one of the largest herds of pure-bred cattle in this part of the state. Most of the young heifers and young bulls to be sold are the get of Golden Victor. His sire is a Luverne Cruickshank-bred bull, dam Emma 17th by Victor of Homewood, tracing back to Imp. Emma 3d. This great bull has been doing service in this herd for several years and his get are more sought for now than ever. He breeds an even, smooth type of Short-horn with plenty of size and quality. The cows in the sale are very large and of the low-down, blocky type and extra good milkers. They represent such noted families as the Rose of Sharons, Rose Strathallen tribe and among the top sires mentioned are Secret Valentine, Prince Ramsden, Imp. Cupbearer and many others of equal note. We are sure that these cattle will suit you, as they have the breeding and individuality combined. A nice catalog has been prepared and should be in the hands of every man who is interested in good Short-horn cattle. Come and put in the day with these gentlemen and they will treat you right. You will find free hotel accommodations and livery to and from the farm on sale day. Write for a catalog and mention The Homestead.

## August Voge's Duroc Sale.

On January 19th breeders and neighbors gathered at Portsmouth, Iowa, to look over

## ....JOHN JUSTICE....

Ankeny, Polk County, Iowa,

Will sell at farm, half mile from Quilhart Crossing, on D. M. I. F. & N. R. R., and one and one-half miles north of Berwick,  
**FRIDAY, FEB. 15, 1907.**

## 40 Duroc Jersey 40 Sows and Gilts 40

Sired by Proud Lad 35943, Billy K. Jr., Gilt Edge and others. Bred to Keep On and Advance boars. Send for catalog.  
 Col. C. E. Luther, Auctioneer.

the offering made at that place by Mr. Voge and paid generously for the numbers that were cataloged to be sold there. Mr. R. M. Skillen, of Greene, Iowa, topped the sale by paying \$212.50 for a gilt sired by Lafollette 36563 out of Panora Girl 71006. As will be seen by the following list of purchasers, a high average was maintained:

Lot.	Purchaser	Price.

27.	Larson & Hemmish, Persia, Iowa...	82.50

## The Wonderful Success of O. L. CHASE, Individual Paint Maker of St. Louis.

No other paint maker in the country has stirred up the manufacturers in his line so much during the past twelve months as has O. L. Chase, Individual Paint Maker of St. Louis, manufacturer of the O. L. Chase Made-to-Order Paint. Individual Paint Making means making paint for each individual, making the paint to fill every order after the order is received. That is what Mr. Chase is engaged in doing. He has taken his stand against the "ready-mixed" paints which deteriorate in the can. O. L. Chase paint is ready to use but not ready mixed. He supplies his color pigments, freshly ground, in one can, his old process linseed oil in separate cans. That's the way they come to the user. The exact date of their making (Guarantee of absolute freshness) is stamped on every can. There is no chance in O. L. Chase Made-to-Order Paints, as in ordinary ready-mixed paints, for chemical action to eat the life out of the oil.

It is impossible to make too much of the matter of freshness in paints. Anyone interested in paint, maker, dealer or user, if he never appreciated that fact before, will do so when he reads the reasons given in the four pages of questions and answers in the Chase Fresh Paint Book. Here is an extract in the form of a guarantee from the current advertising of Mr. Chase, which assuredly speaks for itself:

### My \$100 Cash Guarantee

"I guarantee under \$100.00 Cash forfeit, that the paint I am offering you does not contain water, benzine, whitening or barites—and that my oil is pure, old-fashioned linseed oil and contains absolutely no foreign substance whatever."

Mr. Chase sells his paint on a most remarkably liberal plan. He has a special Spring proposition on price for 1907. Other paint makers have raised prices of paint. He has lowered his. He allows the purchaser to open and try two full gallons out of any six-gallon order or over, and to return the remainder if not satisfied, without paying a cent for paint used in test. In case of return, he pays the freight. He guarantees freight charges so that the buyer knows exactly what the paint costs him delivered.

Mr. Chase's paint book, entitled "My Fresh Paint Book," is certainly a remarkable work on the subject of painting and paints. A copy may be had by writing him for it. Address O. L. Chase, The Paint Man, Dept. 27, St. Louis, Mo. It is a good book for those who will be painting this Spring, to send for.

# "ONLY WAY" SALE CIRCUIT

## Three Days, Feb. 19-20-21, '07

These sales are  
all easy of access,  
being on the main  
line of the C. & A.

DWIGHT, ILLINOIS

#### 40 HEAD-1 Yearling-5 Fall Gilts- 34 Spring Gilts

bred to Illinois Notcher by Tip Top Notcher and Archer by Ambition. These sows are sired by Perfection J. K., by Allison Jr. Perfection; Sport by Big King. Five gilts out of Lady Alice by Proud Advance, her dam being Amy M. by Orion. Five litter mates to "What You Say"; two spring gilts by Buddy T.'s Best by Buddy T. Sale held at W. J. Taylor's, three miles northwest of Dwight, in heated tent. Col. Reppert, Auctioneer.

#### THURSDAY, FEBRUARY 21, 1907

F. M. Erschen,

#### 35---Head of Chocicely Bred Sows---35

Odell, Illinois

Three two-year-old sows; seven yearlings and twenty-five young gilts bred to Hanley II 50433, Indiana Boy 50435, Long Duke 44289 and Frank's Choice 35801. Sows sired by Comet, a good son of Gold Finch; One Such by None Such and out of Decatur Belle IV; Odell Boy he by King Wonder 14131; Dumont by Conodo C.; Choice Goods, he by Echo King and out of Decatur Belle II. The gilts are sired by Ohio Boy 107112, I. J.s Chief 12445, Corrector Boy and other good boars. Sale to be held three and one-half miles north of Odell. Everybody will be made comfortable. Cols. Reppert and McGowan, Auctioneers.

#### The John M. Morrison & Sons Duroc Offering.

The Duroc offering of Messrs. John M. Morrison & Sons which will be made at College View, Neb., February 12th, is a notable one. On that date half interest will be sold in the great show and breeding boar, Kan't Be Beat. It is rather an unusual thing to make an offering of this kind at public auction, but Messrs. Morrison have decided to do this in order that the blood of this great hog shall become more widely disseminated. This pig has won fifty-seven first and sweepstakes prizes out of fifty-eight showings, and his get have won eighty-one first, champion, grand champion and sweepstakes prizes. In this offering on February 12th will be found forty-one tried sows, yearlings and gilts bred to this notable hog. Of this number twelve gilts are by Ohio Chief out of prize-winning sows. The list offered includes such noted sows as Village Pride, Sheza Goodun, Crimson Lass of Cherokee and Sutton Lady. It will be remembered that Village Pride was a first-prize winner at Iowa and Nebraska and her dam, Parnell B., was also a winner. Sheza Goodun is out of Miss Box and sired by Crimson Wonder, the prize member of that great litter of last year from Miss Bob. She won both years in Iowa—in a class of 110 in 1905. Crimson Lass of Cherokee is a litter sister of Glendale Critic and a full sister of Crimson Wonder. Her blood lines are right and as an individual she is a choice one. Sutton Lady won second in Iowa in 1903 and is a dam of Van's Lady, first-prize sow at Lincoln in 1904, and dam also of Perfection Chief, the first-prize hog in the aged boar class in 1905 in Iowa and second at St. Louis as a pig. In the offering are several Ohio Chief gilts that are something extra. No. 10 in the catalog, for example, is out of Village Pride by Ohio Chief, while No. 11 is out of Royal Lass by the same sire. Another extra good gilt is out of Lady Top Notcher by Ohio Chief. This gilt carries two crosses of Ohio Chief. Throughout, the Morrison offering is something extra, not only in breeding, but in growthiness, quality and desirable characteristics generally. Catalog is ready and will be gladly sent on application. Address Messrs. John M. Morrison & Sons, College View, Neb., and please mention The Homestead when you write. Bear in mind that the date, February 12th, is near at hand.

#### Last Call for Ruebel Bros.' Great Sow Sale.

It is with considerable pleasure that we call Homestead readers' attention to the Poland China brood sow sale of Messrs. Ruebel Bros., at Rockwell City, Iowa, on February 12th. It is a decidedly high-class offering, and one that will commend itself to all lovers of good Poland Chinas. It is a large offering, there being sixty-six head in the sale. It is a richly-bred offering, there being two daughters of Chief Tecumseh 3d in the sale, a couple of daughters of Chief Perfection 2d, Keep On, Mischief Maker, Pilatis Chief, and other high-class sires. A great many of the gilts are sired by R's

Keep On, a son of the great Keep On, and a half-brother in blood to the great On and On, Prince Alert, Impudence and Keep Ahead, four state fair sweepstakes boars. He is bred to a great many of the sows in the sale. Some of the gilts are sired by Iowa Chief, a son of old Thickset. The R's Keep On gilts are mostly bred to their great young boar, Moderator, that Mr. John Blain selected for himself after visiting over thirty Poland China herds. The two Chief Tecumseh 3d sows are grand good ones. One of these is one of the best daughters of that famous old boar, and she is bred to Moderator. They are selling two good Chief Perfection sows that any breeder could afford to own, one bred to R's Keep On, the other

to Iowa Chief. Besides these are daughters of Proud Perfection Jr., Iowa Sunshine, Country Gentleman and other good boars. They also sell Ware's Darkness, a daughter of Perfect Darkness, purchased of Mr. Ed Ware, and she is bred to Iowa Chief. The offering is the best Messrs. Ruebel Bros. have ever sold from their herd. It is an offering that combines size and quality, ample home, with enough finish to satisfy any of our best breeders. Write for their catalog and go to their sale. Kindly mention The Homestead when writing.

#### Buy a Sister to Ruberta.

In the S. P. Freed Duroc Jersey sow

sale at Ames, Iowa, on February 11th, will be sold five full sisters to the great sow, Ruberta, that recently sold in the F. E. Garrett sale for \$1,500. These gilts are sired by Tientsin and are out of Ruth G. II. by Fairview Chief. Tientsin was a son of Tolstoy and is therefore a half brother to the great Crimson Wonder. Ruberta was the first-prize yearling sow at the Iowa State Fair. There are two gilts in this litter that are as good at their age as was Ruberta. Four of these are bred to Manley Orion, a prize winner at Des Moines, and one of the greatest sons of that noted sire. There is show material in some of these gilts. Duroc Jersey breeders should go after them, as they promise a good outcome.

Clover Blossom 1st, champion and grand champion sow Michigan State Fair, Detroit, 1906; second at Indiana State Fair, and third Illinois State Fair, 1906, one of the good females included in the Duroc sale of Mr. J. A. Teter, of Remington, Ind. See field notes.

# IOWA'S THREE GREATEST Duroc Jersey Sow Sales!

Never before in the history of the breed has such an offering been made as will be sold in these three sales

**A. E. Poush, Chariton, Iowa, Feb. 18**

**40 HEAD OF ROYAL PURPLE TOPS**

Of his herd and the tops of several herds. Included in the offering is Lady Pride, one of the greatest yearlings to be sold this season. Five great gilts by Proud Advance and Daisy Orion. Several gilts by Ben Davis, Hanley, Buddy K. IV., Improver King. The offering will be bred to Savannah Belle's Chief, by Ohio Chief, and out of Savannah Belle. Others to Daisy's Advance, the greatest boar Proud Advance ever sired. Others to Orion Advance, by Orion, dam Proud Lady, the \$1,275 sow. If you cannot come send your bids, as I have the greatest lot of sows that has ever been sold, all things considered.

**THE LAST CHANCE TO GET A SOW BRED TO PROUD ADVANCE.**

**SHELDON BROS.**

**Shannon City, Ia., Feb. 19th**

**PROUD ADVANCE DIED FEBRUARY 2**  
This is the last chance to get a sow bred to him.

**Thirty Fall Yearling and Matured Sows and Ten Gilts**

In the offering will be about twenty-five head sired by the great Proud Advance 23549, and bred to Ohio Chief II.; the rest of them will be bred to Proud Advance. Twenty head of fall yearlings the equal of which has never been put in one sale before. Write for catalog.

**WHITE & DEWEY**

**Shannon City, Ia., Feb. 20th**

**PROUD ADVANCE DIED FEBRUARY 2**

**The last chance to get a sow bred to Proud Advance.**

In this offering will be fall yearlings and gilts sired by Proud Advance and several head of yearlings and gilts sired by Crimson Wonder I Am, two of them being full sisters to Crimson Wonder I Am Again. We have by far the best offering we have ever had. Have also used Proud Wonder I Am, one of the best sons of Crimson Wonder I Am, on some of the sows. Write for catalog.

**Send bids to M. T. White, Homestead representative, or to Col. F. F. Luther, in care of the above breeders and they will be properly attended to.**

## Johnston Bros. & Newkirk's Great Sale.

Never in the history of the Duroc Jersey breed will a greater lot of brood sows be sold than will go through the sale ring of Messrs. Johnston Bros. & Newkirk, at Brooklyn, Iowa, on February 15th. They are selecting the very best they have, including many of their show sows, and they are bred to the most noted sires of the breed. From no herd in the United States have come more winners than have come from the Johnston Bros. herd. The great Proud Advance was bred here, as was also the noted prize-winning boar, Advancer, Reed's Banker and other great boars, as well as some of the most sensational sows of the breed. They have won considerably over 100 of the leading prizes at the state fairs and World's Fairs in the past four years, and many of the sows that they are selling in this sale can go out and win their share of the ribbons against the world. Just a word about the boars at the head of this herd. Advancer 28773 hardly needs a word from us at this time. He was the Iowa state sweepstakes boar two years in succession and is the sire of Proud Advance, Advancer and other good ones. Model Chief 44969 is considered the best living son of Ohio Chief and he was the sire of the first and third-prize pigs at the Iowa State Fair last year. Model Chief II. 53757 is considered by Messrs. Johnston Bros. the best pig they have ever owned. They are also using Perfect King 53753, a son of old Perfect King, and these boars have been bred to the sows that go into the sale. There will be a number of daughters of old Advancer in the sale, also daughters of the great Advancer. For two years this great boar has won first prize in his class at the Iowa State Fair, and last fall, in the face of stronger competition than ever before, at the greatest show of Duroc Jerseys held any place, he and his get captured sixteen prizes, and if nothing interferes with his further development he promises to make an equally good record another year. The Advancer sows in this sale that have been bred to Model Chief 2d will be the most valuable Duroc Jersey sows that will go through any sale ring this year. The yearlings are notably good from almost any point of view. They have as much promise as does the sensational Ruberta that recently sold for \$1,500. Every one knows what Advancer and Advancer have done. Model Chief 2d is unquestionably, although only an April pig, as good an individual as exists in the state of Iowa. He comes by this excellence honestly because he is a son of Model Chief and Model Chief again is one of the acknowledged best sons of that greatly exploited hog, Ohio Chief. Model Chief, at the Iowa State Fair last fall had the honor of having been the sire of the pig that took first in class under six months and of the pigs that took first as produce of sow. It will be remembered by those in attendance that both these classes were strongly contested. Some of the Advancer sows by way of variety have been bred to Perfect King. Perfect King is a son of King of Kings, he by Morton's King, and on the side of his dam he traces back to prominent Ohio winners at state and national shows.

This hog has not yet fully developed, but there is every probability that he will make a strong cross with the Advancer blood. Seven yearling daughters of that grand old Advancer have been cataloged. They are full sisters to Advancer, Proud Advance, Advancer Lad and I Am Advance. They are full sisters to the sows that have topped the sales for the past two years and their dam, it may be said, has produced more prize winners than any other Duroc Jersey sow that ever existed. These sows bred to Model Chief 2d should be equally as valuable as the Advancer sows. Among the gilts there will be, aside from Advancer and Advancer daughters, those of Iowa Banker, Model Chief, Top Notcher Chief, Keep On, Commander Jr. and one by Crimson Wonder I Am. Every reader of The Homestead who is interested in Duroc Jersey hogs should send for one of their catalogs. If you cannot be there in person, send your bids to Mr. M. T. White, Homestead representative, in care of Messrs. Johnston Bros. & Newkirk, and it will be properly looked after.

**Jack Sale March 5th.**

On March 5th Mr. O. P. Hendershot, of Hebron, Neb., will offer a draft of twenty-five mammoth Kentucky-bred jacks, fifteen good Percheron stallions and five well-bred Percheron mares. This offering is strictly high class in every respect and they will be offered to the public at whatever you see fit to pay. Every animal brought into the ring will be sold if a bid is put on it and no by-bidding or humbug work will be tolerated at this sale. We wish to say right here that this is a grand opportunity to secure breeding stock that are richly bred and very high-class individuals. Mr. Hendershot is a man that has become known throughout all parts of the draft horse world through the character of the animals he handled and the square dealing that every customer receives at his place. He will hold his sale at Hebron, March 5th, and to those in the market for a good stallion or jack we can earnestly recommend this sale. Catalogs are now ready and can be had by dropping a card to Mr. Hendershot. When writing please mention this paper.

**Beau Donald Herefords.**

Beau Donald Herefords are the sort that Mr. John Secor, of Mechanicsville, Iowa, is growing. A short time since The Homestead favored its readers by running the tabulated pedigree of one of Mr. Secor's present herd bulls, Beau Donald 48th, a son of the famous Beau Donald and grandson of Beau Brummel. On another page in this issue will be found the other one of Mr. Secor's present herd bulls, whose pedigree we respectfully submit to the most critical Hereford breeder in the land. Mr. Secor has a nice bunch of yearling bulls sired by these two bulls now ready to place on the market. He is not particular about sparing many females at present, but will make attractive prices to all Homestead readers on these Hereford bulls. The tabulated pedigree of Iowa Donald Premier 187137 will be found page 48

## Grand Three Days' Sale

**FEBRUARY 19-20-21 AT**

**Grand Junction, Greene County, Iowa**

**140 CHOICE POLAND CHINA SOWS and GILTS**

Carefully selected from the herds of Geo. F. Freie, Ogden; C. C. Healy, Dana; and C. M. Howard, J. L. Hudson and G. W. Wampler of Grand Junction.

You will find a strong collection of mature sows in this sale. They have proved to be regular and prolific producers. There are some of the great roomy kind and others of a more showy type. The breeding is standard and represents all the leading lines of blood. Here is a splendid opportunity to secure some reliable foundation stock.

The gilts are from March and April litters and many are from sows to be sold in the sale. They are a nice growthy bunch and contain a great many of the great deep-bodied, strong-boned type. They are sired by Tecumseh Meddler, Nemo L. Dude, Keep On and Black Chief boars. They will contain some choice members.

Send for catalog to C. C. Healy, Dana, Iowa. Post up, brother breeders, we have something worth your money and attention. C. E. Luther, Auct.

**McWILLIAMS'**

## DUROC-JERSEY SOW SALE

**Wall Lake, Ia., February 22, 1907**

**40 HEAD, 5 FALL YEARLINGS, 9 AGED SOWS, 26 SPRING GILTS 40**  
THE LATTER Sired BY MY GREAT BOAR

**ORION J.**

The aged sows are sired by Challenger Model, one of the best sons of old Duroc Challenger; Royal American, Milbank Boy and Tolstoy. The gilts are sired by Orion J., Sunnyside Wonder, (a son of Tolstoy out of an Orion sow), Gilbert King and a grandson of American Royal. They are bred to Orion J., Sunnyside Hero, Challenger King and Sunnyside King. I am offering the cream of my herd. These Orion J. gilts are the best I have ever raised. Write at once for catalog. Address,

**M. A. McWilliams,**

**W. C. Lookingbell, Auctioneer.**

**Wall Lake, Ia.**

### Last Call for B. W. Hale's Sale of Duroc Bred Sows.

Mr. B. W. Hale, of Laddonia, Mo., has cataloged forty head for his first sale of Duroc Jersey bred sows. Several of the number are sows Mr. Hale does not like to part with, but in order to make his sale attractive they will sell to the highest bidder. Mr. Hale has, since he founded his herd a few years ago, bought the best stock he could find and has used good boars and as a result his offering merits the attention of breeders and farmers who are hunting good seed hogs. A catalog of the offering has just reached our desk and we find cataloged as Lot 1 the two-year-old sow, Perfect Gold Dust 33d, a great-granddaughter of Sensation. Her sire, Best of Notchers, was out of Fancy VIII, by Top Notcher. Her dam, Perfect Gold Dust XXX., was got by Tip Top Notcher. It will be seen that she is a line-bred sow with the crosses coming in about right. She is bred to Chief Paul Finch for an early litter. That the litter she is carrying will be good cannot be denied, as she is of the brood sow type and a good one to buy. No. 2 of the catalog is Macon B., a yearling that has for her sire the great Buddy K. IV., owned by Mr. Ed. A. Baxter. She is bred to Chief Paul Finch. This should be an attraction, as sows by Buddy K. IV. are in demand. The great Kan't Be Beat is the grandsire of Lot 3, Illinois Beauty, a sow Mr. Hale bought at Mr. Seckman's 1906 sale. Those hunting the blood of Kan't Be Beat should look her over sale day. She is bred to Champ Clark, the son of Tip Top Notcher and Gold Dust Rose, the dam of Helen Blazes. Lots 7, 8, 9 and 10 are spring gilts of Mr. Hale's breeding. Their dam, Top Notcher Lady, is a granddaughter of old Top Notcher. Boars from this litter went to three states and the four gilts should be appreciated. Four July, 1905, yearlings are cataloged as Lots 11, 12, 13 and 14. Their sire, Ohio Flash Light, was by Top Notcher. Two are bred to Chief Paul Finch and two to Champ Clark. Quite a fancy gilt of Mr. A. F. Russell's breeding is cataloged as Lot 27. She was got by Iowa King, he by Ohio King. Two daughters of Gen. Cronje are listed as Lots 36 and 37. Breeders wanting the blood of the 1906 American Royal champion should look to these. Gen. Cronje was got by the great Ohio Chief. Mr. Hale's entire offering is rich in such breeding as his been mentioned above. He sells at his farm, near Laddonia, Mo., where every comfort may be had. See page 49 for advertisement and remember that Mr. Hale's sale is the third of the Illinois and Missouri circuit.

### Keasey's Poland China Sale.

On February 13, 1907, at the Franklin Center Stock Farm, four miles southeast of Wlota, Iowa, Mr. E. D. Keasey will offer forty head of decidedly high-class sows and five boars, including his herd boar, Who 123135, a son of Royal Perfection. The sows that go in are a toppy, high-class lot and include daughters of Chief Perfection 2d, Keep On, Perfection E. L., Chief Sunshine 2d, Keep On 2d and Iowa Perfection. There will be twenty-three very choice gilts in the sale, mostly the get if his herd boar, Who, and they are decidedly nice in head and ear, are well developed and carry the blood of some of the greatest sires known to the breed. Among these gilts are four by Who 28205 and out of a daughter of Chief Climax that deserve more than a passing notice. Two boars of this same litter go in. They are fancy in head and ear, are smooth and well developed, carrying lots of length and a nice bone, and buyers will like them when they go to the sale. Anyone wanting a young herd boar will not go wrong in buying either one of these, and the sows will make most excellent brood sows. There a lot more of the Who gilts in his sale and they are a very toppy lot all through. The breeding of the older sows is sufficient to show that they are good and bred along the most popular and up-to-date lines. They will be bred to either Who 28207 or Contractor, the great young boar Mr. Keasey purchased of Mr. Geo. H. White. Readers of The Homestead all know Contractor, as he was a winner both at Des Moines and at the Nebraska State Fair. The breeder who wants a proven sire should go after Who 28207. He has done a great work in the Keasey herd and his get will show it on sale day. He is a good boar and is worth a place at the head of any good herd. Write for a catalog at once; but the thing to do is to get on the train and go to the sale. Remember the date is next Wednesday, February 13th. Be sure you go to the sale.

### Last Call for T. E. Laurie's Sale of Duroc Bred Sows.

The last announcement of the sale of Duroc Jersey bred sows to be held by Mr. T. E. Laurie, of Jacksonville, Ill., at his farm near Jacksonville, will be found on page 27 under the heading of the Illinois and Missouri Duroc sale circuit. Mr. Laurie is known as one of those breeders who likes good ones, knows a good one when he sees it and never offers anything but good ones such as will add to most any herd and be a credit to the herd from which they came. For his sale on February 13th Mr. Laurie has gone to great expense, he having paid high breeding services in order that he might offer sows bred to certain great boars. This has been done because Mr. Laurie knows that he has not all the good boars of the breed and when he owns a sow that he thinks will mate well with some known breeding boar he stands the service fee and backs his judgment with the cash. In the advertisement will be found a list of several of these sows and the boars to which they are bred. More fashionable pedigrees cannot be found than the pigs from these sows will carry. Each of the sows are sows of great individual merit and all should go to good herds. Mr. Laurie sells a fine lot got by He's Our Pride or bred to him, and a number by Buddy K., a litter brother to Buddy K. IV., or bred to him. Another such an opportunity to get stuff bred to an equal number of great breeding boars will not be found this winter. Mr. Laurie sells at his farm, which is five miles from Jacksonville, Ill. Those going to the sale via the Chicago & Alton can stop at Savage, six miles north of Jacksonville. This will land you within a mile of the farm and Mr. Laurie will meet

you at the station. Those who cannot attend and wish to send bids should send them to either of the auctioneers announced in the advertisement. Send in care of Mr. Laurie.

### Joe Steward's Bred Poland Sow Sale.

A Homestead representative recently had the pleasure of inspecting the Poland China bred sows that are offered for sale on another page by that old-time, reliable breeder of Poland Chinas, Mr. Joe Steward, of Ames, Iowa. The writer has known Mr. Steward for twenty years and during all that time he has kept abreast of the times in maintaining his Poland China herd to the highest standard of excellence. At the present time Mr. Steward is offering a few splendid sows and gilts, among them is the beautiful sow, Sunshade, a daughter of Hummer and he by Perfection E. L. Sunshade's dam was Sunlight by Winning Sunshine and out of Lady Knox. This splendid sow was bred November 20th to Gay Perfection 2d, and is held at the ridiculously low price of \$45. He is also offering for sale the sow, Meadow Best's 4th, bred October 26th to Gay Perfection, at the same price. This sow was sired by Hulda's Perfection, her dam being Bess Chief 2d, a daughter of Black Chief and out of Bess Chief by Chief AA. Mr. Steward is also offering some daughters of Gay Perfection 2d bred for April and May farrow. We might hear remarked that Gay Perfection 2d was the sire of the Poland China barrows exhibited by the Iowa Agricultural College at the last International Show in Chicago where they were invincible. The fact that they are bred to Sultan, the new boar at the college farm, bred by Mr. Ed Klever, should materially add to their value. Sultan was by Thickset, he by Happy Perfection and he by Perfect Perfection, Thickset's dam being Chief's Ina 2d by Chief Tecumseh 2d. Sultan's dam was Ruth Perfection by Chief Perfection 2d; her dam being a daughter of Chief Tecumseh 2d. Mr. Steward is offering some gilts bred for later farrow at from \$25 up. It will pay Homestead readers to consult his announcement on page 51.

### McWilliams' Brood Sow Sale.

On February 22d, Mr. M. A. McWilliams, of Wall Lake, Iowa, will make his annual Duroc Jersey brood sow sale, and he will sell forty head in this sale. There is no better breeder in his section of the state, and he always puts up a good, practical lot of sows. He has bred for a type, and always puts up a class of sows that have plenty of size and lots of bone. In this sale he will sell five fall yearlings sired by Gilbert King, nine aged sows sired by Challenger's Model, a son of old Duroc Challenger, and a boar that left a lot of good sows in the McWilliams herd. The rest of the matured sows are sired by Royal American, Milbank Boy and old Tolstoy. There will be about thirty good gilts in the sale and these will be sired by Orion J., a son of the great Orion and out of the noted sow, Kruger Maid. He is a litter brother to the prize-winning boar, Arion, that won many laurels for the Manley herd. Some will be sired by Sunnyside Wonder, a son of Tolstoy, and a few by Gilbert's King, a grandson of American Royal. These will be bred to Orion J., Sunnyside Hero, a grandson of Duroc Challenger, and Sunnyside King. There is a line of good breeding behind the McWilliams offering, and there is a bunch of good sows in the sale that deserves attention at the hands of breeders and farmers. Mr. McWilliams has won his way to the front as a reliable breeder, and no man has done a more satisfactory business, nor has dealt more fairly with his customers. If any of our readers are wanting to buy some good Duroc Jersey sows, they will find the McWilliams sale a good one to attend. Write at once for his catalog and mention The Homestead.

### Peter Mouw's Big Poland and Hereford Sale.

On February 14th and 15th, Mr. Peter Mouw will make a Hereford and a Poland China brood sow sale. The Hereford sale is a dispersion of his entire herd, including his two herd bulls, Harvey 4th 57540, a bull that has weighed 2,800 pounds, and Prince Donald 162634, a son of the noted prize-winning bull, Prince Rupert, and a grandson of the noted Beau Donald, on both the sire and dam side. Here is one of the best bred young Hereford bulls that will be sold this year. He is a double bred Beau Donald-Beau Brummel-Anxiety 4th bull, and carries the blood of more of the famous winners than any other bull that has been offered for sale in a long time. He will sell a lot of good cows, mostly daughters of Harvey 4th, Western Briton and other well-bred bulls. They will all be bred to the two bulls named above. He will sell fifty head of sows of the big kind. This is the kind that has made Mr. Mouw famous and he is offering some good ones. They are sired by Longfellow 2d, Chief Price, Surprise Wonder 4th, Tecumseh Wonder, Sunshine Chief, Orange Chief, Chief Standard and Wonder 3d, all noted for their great size and bone. The reputation that Mr. Mouw has enjoyed as a breeder of the big Poland Chinas, is sufficient to say that the coming sale will have some of the best in it that Mr. Mouw has ever bred. Write for his catalog and mention The Homestead.

### W. J. Finley to Sell Jacks and Jennets.

On Saturday, March 2d, at Marshall, Mo., Mr. W. J. Finley, of Marshall, Mo., will sell forty head of high-class jacks and jennets and ten stallions. Mr. Finley has bred and raised jacks for a number of years and this will be his first public sale. He has listed twenty registered black Mammoth jacks, ten registered jennets, several of which have jack colts at side and others bred to drop colts this spring. Mr. Finley will also sell ten stallions, three standard and registered trotting-bred, one registered coach stallion, one registered Shire stallion, one registered Percheron and five grade Percheron stallions. This will be an opportunity for the stallion buyers as well as the man hunting a good jack. Mr. Finley sells at his barns in North Marshall. Write him for a catalog and kindly mention this paper when doing so.

## The Perfection Chief Stock Co.'s

Annual Sale of

# DUROC = SOWS

AT

## Maryville, Mo., Monday, Feb. 25th

# 50 head bred to the great Perfection Chief, Pilot Kruger, Radiant and Gladstone. . . 50

For this sale we are putting in as good as we own. Special attention is called to the Proud Advance yearlings and spring gilts bred to Perfection Chief. February 7, 1907.]

FRIDAY, FEBRUARY 22, 1907,

AT  
PARNELL, MISSOURI.**35 HEAD. A FEW ARE OUR BEST TRIED SOWS. BALANCE FALL AND SPRING GILTS.**

W. L. A.'s CHOICE GOODS, our great breeding boar got by La-follette and out of S. E.'s Model by Ohio Chief has been used on a goodly number. He was assisted by King of Mo., he by King of Kings. Among the attractions are daughters of W. L. A.'s Choice Goods, Proud Advance, Tom Watson, Addy's Ohio Chief, Harding's Proud Advance and other great boars. Sale in town. Write for catalog.

LUTHER AND OTHERS, AUCTS. ADDY &amp; SON, PARNELL, MISSOURI.

**ADDY & MURPHY'S****GREAT  
DUROC BRED  
SOW SALES.**

SATURDAY, FEBRUARY 23, 1907,

AT  
SAVANNAH, MISSOURI.**40 HEAD. ELEVEN YEARLING SOWS, TWENTY-NINE SPRING GILTS.**

OHIO CHIEF AGAIN, that great son of Ohio Chief and out of Savannah Belle, has been used on a goodly number. OHIO BELLE has litter sister bred to Crimson Wonder I Am, the 1906 champion at Iowa State Fair, should prove a great attraction. See the Proud Advance gilts bred to Ohio Chief Again; others by Perfection Chief, Radiant, Tip Top Notcher, Hanley and Sir Thomas are good. I Am Crimson Wonder has been used on some. Sale at farm in city limits. Write for catalog.

LUTHER &amp; MCGOWAN, AUCTS. S. R. MURPHY, SAVANNAH, MISSOURI.

Attention is called to the sales of A. E. Poush, Chariton, Iowa, February 18th; Sheldon Bros., Shannon City, Iowa, February 19th; White & Dewey, Shannon City, Iowa, February 20th; A. L. & U. G. Lynch, Mt. Ayr, Iowa, February 21st.

**Carl Hansen's Sow Sale.**

On February 15th, Mr. Carl Hansen will make his first annual Duroc Jersey brood sow sale at his farm near Herman, Neb. Mr. Hansen is one of the younger breeders in the state of Nebraska, and he is one of the best, and his offering on this occasion is the equal of anything that will be sold in the West. They will be sired by Bar None, Bar None II., Critic's Echo, and Grant's Hero. Mr. Hansen writes as follows about his offering: "In issuing this catalog of my first sale of Duroc Jersey bred sows I invite all to be with us on sale day. This offering is remarkable for its uniformity in size, color and quality, having good feet, good backs, loins and hams, as well as good heart girth. It is after six years of hard work and close study that I now offer these sows for sale at public auction and I would feel encouraged to see many old breeders here, as well as the younger ones, who are just starting in the red hog business, whether they wish to buy or not. I have handled these sows as best I could, with a view to good results, and they will gain a little every day till farrowing time without getting too fat." They are bred to Grant's Hero 40413, a son of Duroc Paragon, Grant's Challenger, and Grant's Defender. The greater number of the gilts in the sale will be sired by Bar None, his old herd boar, and a hog that has done him a great deal of good. He also offers a few choice gilts by Grant's Hero and one by Critic's Echo. Mr. Hansen will sell a good bunch of sows and it will be a good place to buy. The man that wants a few good sows can buy them right in his sale. Write for catalog and kindly mention The Homestead.

**White & Dewey's Sow Sale.**

On February 20th Messrs. White & Dewey will make their annual Duroc Jersey sow sale at Shannon City, Iowa. This will be one of the noted sales of the year and it will be the last time an opportunity will ever be had to buy a sow bred to Proud Advance. That old king of kings passed away at their farm on February 2d and one of the greatest boars that ever lived has gone beyond the divide. They are selling a grand lot of fall yearlings and spring gilts sired by Proud Advance and bred to Ohio Chief II. They are also selling some Ohio Chief gilts bred to Proud Advance and several head of yearlings and gilts sired by Crimson Wonder I Am, two of them being full sisters to Crimson Wonder I Am Again, the sweepstakes boar at Des Moines. They have also used Proud Wonder I Am, one of the best sons of Crimson Wonder I Am. One of the best sows that they sell is Orion Daisy, a daughter of Orion Dandelion, a litter sister to the sow that topped their sale last year. She is a two-year-old sow and is bred to Ohio Chief 2d. Reliance Lady is another good sow. She is a daughter of Reliance and is bred to Ohio Chief 2d. They are selling five sows bred to Proud Advance. Mr. Dewey sells four Proud Advance sows bred to Ohio Chief 2d and three daughters of Alix Pride, also bred to the same boar. He also sells two daughters of Miss Bob's Wonder bred to Proud Advance and Singletrack. One of his best old sows is Lady Banner by Ohio Banner and she is also bred to Ohio Chief 2d. Send for their catalog at once and mention The Homestead. If you cannot be there in person send your bid to Mr. M. T. White, Homestead representative, or the auctioneer, in care of the above breeders.

**The Last Call for Huff's Sow Sale.**

At his farm near Mondamin, Iowa, on February 13th, Mr. C. A. Huff, will sell forty-five head of Duroc Jersey sows. He is offering a good lot and a well-bred one, and they deserve attention at the hands of the breeders and farmers. The most of his offering are sired by Iowa Challenger, a son of Duroc Challenger, and Rustler, a son of old Glendale Chief; a few are sired by On-awa Orion, a son of Orion's Profit, that in turn was the sire of Dale, the Minnesota sweepstakes boar, and a number are also sired by E. Z., a son of old Surprise. He is selling yearlings and matured sows and spring gilts. Iowa Challenger 37603 is a son of Duroc Challenger and his dam is a Duroc King sow, a combination that has done so much in the way of producing the winners. He is bred to all the matured sows, and is an excellent breeder. He is also using Royal H. 54823, a grandson of American Royal; D. O. 54819, a grandson of Orion's Profit; Bonney 54825, grandson of Noble King, and Ben Fay Yet 54817, a grandson of Brighton Wonder. Mr. Huff is selling a class of sows that are splendid in length, extra good in bone, and nice in color. If any of our readers want brood sows, here will be one of the best places we know of to buy them. Write for his catalog and mention The Homestead.

**Crow's Big Poland China Sows.**

The kind of Poland Chinas that has brought Mr. W. J. Crow to the front is the same kind he will sell in his sale at Maclay, Clay county, Iowa, on February 20th. This is the big kind and the very prolific kind, the kind that always has the stretch and the depth, as well as the

bone. In his forthcoming sale he will sell forty-five head of these and they should attract the attention of both breeders and farmers. They will be sired by Crow's Model 30729, Up To Date 36007, Look Here 37768, Chief Tecumseh 4th, and others. These are all out of dams of the large, prolific kind, and are bred in the best of the larger strains of the breed. These sows are bred to Crow's Model, a hog of the 1,000-pounds caliber, with great length and a ten and one-half inch bone, and Up To Date, an 800-pound uog at twenty-four months of age, with a strong ten-inch bone. The latter hog not only has the size, but he has the finish of a smaller hog. He has the length, depth and thickness and stands on the best of feet. He is also using Cor-rector 2d 72295, a boar that has had considerable reputation as a sire before Mr. Crow bought him. Mr. Crow sells all his sows in his annual sales and therefore has the best of the herd in this sale. Sale will be held in comfortable quarters and there will be no postponement on account of weather. If you want the large type of Poland Chinas, those of the prolific strains, you will find them in the Crow sale. Write for catalog and mention The Homestead.

**Wheeler's "Mastodon" Poland Chinas.**

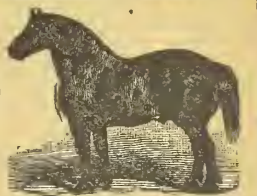

One of the greatest Poland China brood sow sales that will be made this year will be that of Mr. W. W. Wheeler, at Harlan, Iowa, on February 27th, when he will sell forty-five head of his mastodon brood sows. Mr. Wheeler has made a reputation on his "Mastodon" strain of Polands, because of their size, great stretch of body and the big bone that they invariably have. The offering that he will sell on this occasion are of the big, prolific kind, the kind that has made breeders famous, and the kind that they all want. The kind that Mr. Wheeler is raising is the kind that weigh over the scales and the kind that bring the money. They have been raised right and have been fed a balanced ration, and have been developed along such lines as will promote their growth and make good bone. This offering contains the blood of Mastodon, Chief Price, Grand Chief Wonder, Surprise Wonder 5th, Long-fellow, Longfellow B., Columbia Chief 2d, Demonstrator, Sunshine Chief, Orange Maid 6th, Orange Maid D., Lady Wonder 5th and Lady Wonder 6th, all famous for their size and all bred in blood of the largest strains of Poland Chinas known to the breed. Mr. Wheeler is making a great offering in this

Sired by Advance 11309, Advancer 28773, Model Chief 44969, Keep On 37327, Top Notcher Chief 29247, and others of equal merit and bred to Advance Advancer, Model Chief, Model Chief II, the most sensational pig of the breed, Perfect King, a good son of King of Kings. Here is the place to get the blood that has won more prizes than any other strain of the Duroc-Jersey breed. Eight full sisters to Advancer, every one a good one. Five fall sows by Advancer, every one a show sow, including the second prize fall sow bred to Model Chief. Also the fifth prize fall sow bred to Perfect King. This is by odds the best offering we have ever made. One of the best gilts to be sold this year is by Iowa Banker, bred to Advancer. We invite every lover of Duroc-Jersey hogs to attend this sale and see the most uniform lot of sows to be sold this year. There is no sow in this sale that is worth \$1,000 more than the others. Send for catalog at once, it tells all about the offering, and kindly mention Iowa Homestead. Address,

**MILLER'S  
IMP. PERCHERONS  
AND  
FRENCH COACHERS.**

Among the Percherons are coming three and four-year-olds that weigh 1,900 pounds. They have the quality and bone; all dark colors. I am selling these stallions at the barn door at from \$700 to \$1,200. Nothing better brought over this year. I also have some first-class Mammoth jacks. Come to my barns and let me show you, or write me describing what you want. If I cannot fill the description I will say so.

Also fine litter of smooth-coated fox terrier puppies \$3 to \$7.50 each.  
**S. J. MILLER, KIRKSVILLE, MO.**

**FINLEY'S JACK SALE AT MARSHALL, MISSOURI**

**Sat., March 2d, '07 40 Head High-Class Jacks, Jennets and Stallions 40**  
20 REGISTERED blk mammoth Jacks, 15 to 16 hands high, 10 regist'd Jennets, extra fine, several with Jack colts at side, others bred to good Jack. Ten stallions (3 standard and registered trotting-bred, 4 to 7 years old), 1 registered Coach stallion, 1 registered Shire stallion, 1 registered Percheron stallion, 5 grade Percheron stallions from 2 to 6 years old. Sale will be at Finley's home in North Marshall. Sale will begin at 12:30. Sale will be held under cover. No postponement. Nothing for sale privately after cataloged. Auctioneers: Sparks, Harriman, Snyder, Hieronymous, Ross, Hudson, Logsdon, Irvine. Write for catalog. Terms—Cash.

**W. J. FINLEY, MARSHALL, MISSOURI**

sale. All lovers of the big-boned, large Poland Chinas should come to his sale. He has size and bone sufficient to please all the boys. He has spared neither time nor money to get the biggest Poland Chinas for foundation and he has just what he advertises. He is not simply advertising the big ones, but he has them. His famous "Mastodons" are winning their way to the front because they are what the people want. Write for his catalog at once and then come to his sale and see the big ones sell. If you cannot be there in person send your bid to Mr. M. T. White, Homestead representative, in care of Mr. Wheeler and it will be properly attended to.

**W. A. Foster's Sow Sale.**

On Friday, February 15th, Mr. W. A. Foster will make his annual Duroc Jersey brood sow sale, at which time he will sell

thirty-five head. They will be sired by old Parnell Banner, Gaytee, Bill Watts, Crimson Wonder I Am, the Iowa State Fair sweepstakes boar, and a few by other sires. They will be bred to Bill Watts 38395, a son of old Kan't Be Beat, out of a Top Notcher sow; I Am Orion, a son of old Orion, and Foster's Wonder 54491, a son of Crimson Wonder I Am. He sells two March gilts sired by the sweepstakes boar, Crimson Wonder I Am, and out of a Leo Tolstoy sow; they are both bred to I Am Orion, and are full of quality and good enough for anybody. Quite a number of the gilts are sired by Bill Watts 38395, a son of I Am Perfection and they are mostly bred to the Crimson Wonder boar. Mr. Foster has a good line of blood in his herd, and is making a splendid offering of brood sows. If it is possible we would like to have all that can do it, attend this sale. Write for catalog and mention The Homestead.

### More of S. R. Murphy's Sale of Duroc Jersey Sows.

When the breeders have gathered at the ring side at Mr. S. R. Murphy's, at Savannah, Mo., on Saturday, February 23d, they will be called on to pass judgment on as good a lot of Duroc Jersey sows as Mr. Murphy has ever owned. Just what their verdict on that richly-bred daughter of Ohio Chief and Savannah Belle will be no one can tell. She has been named Ohio Belle 127310 and is due to farrow April 1st to the service of Crimson Wonder I Am, the 1906 champion at the Iowa State Fair. Ohio Belle is a wonderfully well-proportioned young sow. She has the Ohio Chief head and is good all over. Breeders know Crimson Wonder I Am, and the litter will be one to which those looking for top herd boar material should turn their attention. This is the only chance we know of to get an Ohio Chief sow bred to the champion, Crimson Wonder I Am. One of the greatest things Mr. Murphy sells is a gilt of February, 1906, farrow that was got by the great Proud Advance. She is bred to Ohio Chief Again for an April 1st litter. Breeders who want a top Proud Advance sow should watch this gilt. She is well developed; has the strong back, an extra fine head, four good legs and is as smooth as they are grown. She will prove an addition to any herd. Three other Proud Advance gilts bred to Ohio Chief Again for early litters will be found good things to buy for brood sows. Four Radiant gilts will also be found desirable. They are the fine-colored sort, and are the right stamp. Two are bred to Ohio Chief Again, one to I Am Crimson Wonder, and one to a Kruger-bred boar. Four Sensation Winner gilts are fine brood sow prospects. Two are bred to Ohio Chief Again and two to I Am Crimson Wonder. Then there will be a Hanley gilt bred to Ohio Chief Again and an Allison-bred gilt bred to Buddy K. 4th. Mr. Ed A. Baxter's great herd boar. This will be an opportunity to get eastern blood. Five Perfection Chief gilts bred to Ohio Chief Again are good and should produce some good stuff. Mr. Murphy has also listed a number of proven brood sows, mostly yearlings and sows that have raised good litters. These are the kind to buy in order to get something good by his great Ohio Chief-Savannah Belle boar. Write Mr. Murphy today for a catalog and arrange to be with him sale day. See page 43 for advertisement.

### S. P. Briggs Sells Duroc Jersey Bred Sows February 20th.

We wish in this issue to call the attention of our readers to the sale of Duroc Jersey bred sows to be held at Seward, Neb., on February 20th by Mr. S. P. Briggs. In this sale will be included an offering that should interest all who are in the market for good, useful, well-bred Durocs. This firm have been in the business for quite a number of years and have built up a reputation that is enviable among the best of breeders. Their first attempt at public sale business was last February, when they made an average of over \$50 on about forty head. This year they will offer thirty-six head and they are a very choice lot. Mr. Briggs considers them the best lot of sows he has ever had together. There will be five of his tried brood sows and among them are included some of the best mothers in the herd. Twenty good, big strong, fall yearlings, very growthy and with quality enough to go into any herd; eleven spring gilts, the tops of about fifty head raised this year, and not a poor one in the bunch. These sows are bred to such boars as Fashion's Improver, a son of Improver II, that is a show boar in every respect and has won laurels in the hottest of competition. He has proven a good breeder, having sired some of the very best stuff now in the Briggs herd. In looking for a herd boar to cross on Fashion's Improver sows this fall Mr. Briggs purchased what he considers the best pig brought to the West this year. This pig was purchased from the well-known firm of Watt & Foust, of Cedarville, Ohio. He was eld by Golden Rule, the sire of most of Messrs. Watt & Foust's show herd this last fall. His dam was Cedarville Queen VIII, first and junior champion ewe at the St. Louis Exposition. Junior Champion won first at the Ohio and New York State Fairs last fall, also headed first-prize young herd at both places. At New York he was also reserve champion and reserve grand champion. About twenty head of these sows will be bred to Junior Champion, and a sow bred to him should be something very prospective for a next spring litter. We will go into detail more in regard to the sows in our next issue; meanwhile, send for a catalog and make arrangements to attend this sale. If you cannot attend send a bid to Mr. Ray Page, of this paper, and it will be well cared for.

### Herd Bull Material in Novinger & Sons' Sale of Short-horns.

On Tuesday, February 26th, at their farm near Kirksville, Mo., Messrs. I. A. Novinger & Sons, of Kirksville, Mo., will sell forty head of Short-horns—fifteen bulls and twenty-five females. There is herd bull material in this offering. Several are pure Scotch and several are animals that carry several Scotch tops. The writer has seen every offering Messrs. Novinger have made for several years, and this is the best that they have ever made. There are bulls in the offering that are fit to go out as herd headers, and the man hunting for this kind should not overlook this sale. In females Messrs. Novinger are selling a most useful lot; some are pure Scotch, others are the good, reliable Scotch-topped sort, and all are the kind that Messrs. Novinger are glad to recommend. The cows and heifers of breeding age are in calf or have calves at foot by Lavender Viscount 2d, a son of the champion, Lavender Viscount. Lavender Viscount 2d has now been in service in Messrs. Novinger's herd for two years and the class of stock he is getting shows that he is a breeding bull of great merit. His calves are mostly good reds, with now and then a rich red roan thrown in. They all have the desired spring of rib, the easy-fleshing qualities and good heads and horns. Cows in calf to Lavender Viscount 2d are desirable and Messrs. Novinger should have two buyers to every cow they sell on March 1st. Returning to the bull end of their

## 100 Richly Bred Duroc Jersey Sows at Auction

### FEBRUARY 11, 1907

Geo. Schwab, sale to be held at his farm.  
35 HEAD—15 MATURED SOWS 20 SPRING GILTS.

Three daughters of Red Knight, first and sweepstakes boar at Nebraska State Fair, 1905, and bred to Jeffries, one of the best sons of Van's Perfection. Most of the offering are sired by Morton Prince. If you want prize winning blood, come to this sale. Write at once for catalog. Address

**Geo. P. Schwab,**  
CLAY CENTER, NEBRASKA.

### FEBRUARY 12, 1907

H. B. Loudon & Son, sale to be held at farm.  
25 RICHLY BRED SHORT-HORNS, 15 CHOICE BROOD SOWS.

On the above date we will disperse our entire herd of Short-horn cattle. There are some choice animals in the bunch, of the most noted Scotch families. Our brood sow offering is not large, but we have the goods. Daughters of the great Hambletonian and bred to Jumbo's Perfection. Write for a catalog and look over the breeding of these cattle and hogs. Address

**H. B. Loudon & Son,**  
CLAY CENTER, NEBRASKA.

### FEBRUARY 13, 1907

Wm. J. East & Son, sale at farm.  
35 head of richly bred Durocs representing the blood of most prominent strains.

Several daughters of Beydek, first-prize hog in class at Nebraska State Fair, and third at St. Louis. A number of the sows are mated to Kansas Banker, one of the best sons of Improver II. Each animal a useful one and many sows of rich breeding and show-yard individuality. Write for a catalog. Address

**W. J. East & Son,**  
CLAY CENTER, NEBRASKA.

Col. C. E. Luther will do the selling. Mail bids sent to Ray Page of this paper will be properly handled.

offering we will say that it will be hard to find fifteen better ones in a single sale. In their advertisement, which appears on page 42, will be found the pedigree of one of the best young bulls to go in any sale this year. This youngster is not only bred in the purple, but has the conformation and the individuality to back up his rich pedigree. In future issues more will be said of him. Messrs. Novinger have listed a Butterfly bull, a rich red that was got by Hampton's Choice, a half brother to Hampton's Best. This is another that will be found in the herd heading class. He, too, is a pure Scotch fellow. There will also be a Lancaster and an Imp. Eliza in the sale that should attract attention. These are sons of Lavender Viscount 2d. Messrs. Novinger sell at their farm, one and a half miles from Kirksville, Mo., where every accommodation can be extended their guests. Col. George P. Bellows and Harry W. Graham will do the selling. Write Messrs. Novinger for a catalog and kindly mention this paper when doing so.

### Last, But Not Least, Comes the Maupin & Applegate Sale of Durocs.

The last sale of the Illinois-Missouri Duroc Sow Sale Circuit comes on Friday, February 15th, at Shelbyna, Mo., at which time Messrs. Maupin & Applegate, of that place, sell sixty head of sows and gilts. These are the gentlemen who believe in good herd boars, those that are strong individually and backed by ancestors that have made good as sires as well as in the show ring. They were among the first, if not the first, men who had the nerve to back their judgment and pay \$300 for a spring pig less than six months of age. They also bought other good pigs and have used them on their best sows. The breeding of these will be found in the advertisement, as will several of the attractions. The writer wishes to say that any who want bred sows, either to add to their herds or a number for founding a herd, can find them at Messrs. Maupin & Applegate's sale. Breeders attending their sale can get off for home in the evening after the sale, as Shelbyna is on the main line of the C. B. & Q. and about forty miles west of Quincy and Hannibal. For the advertisement of the sale see Illinois-Missouri sale circuit advertisement on page 49. Bids to their auctioneers in their care will be treated honorably.

### Wheatley & Ward Offer Angus Bulls.

Messrs. Wheatley & Ward, of King City, Mo., breeders of Aberdeen Angus cattle, have a change of advertisement on page 35, in which they are offering bulls that are now ready for service. These are the get of their great herd bulls as announced in the advertisement and are out of Queen Mother, Pride, Erica, Heather Bell and other families. Messrs. Wheatley & Ward have spared no expense in putting their herd in such shape that it is today one of the good ones of the country. The cows are of the Angus type and are the kind that produce. The bulls at the head of the herd are the beefy type, low down and prepotent sires. Messrs. Wheatley & Ward have upwards of twenty head of bulls that are ready for service and the writer takes pleasure in recommending them to any who are in the market for bulls. Write these gentlemen, telling them what you want, or, better still, go and see the herd.

### Remember the Riffin and Rogers Duroc Sow Sale.

Tuesday, February 12th, at Petersburg, Ill., Messrs. Harry Riffin and C. T. Rogers, of Petersburg, Ill., open the great Illinois and Missouri Duroc Sale Circuit by selling forty head of as good and useful Duroc bred sows as are often found in a single sale. Both gentlemen are straining a point to make this sale one that shall reflect creditably to their herds. They have listed hogs that should stay in their herds, but as they want to make a good starter for this circuit they have decided to let go as good as they own. In field notes of last week we mentioned several of the offering, gave much of the breeding and had we received a catalog, we would be able to say more of the offering. We will say this much, we have seen the hogs, both the sows

## THIRTIETH Semi-Annual Sale ..... JACKS AND JENNETS .....

Sale will be held on the farm five miles from Belmond and eight miles from Clarion. Free hotel accommodations to my guests at either Clarion or Belmond, also free conveyance to and from the farm. Address for catalogs.

COL. J. A. BENSON, AUCTIONEER.

T. A. DAVENPORT, BELMOND, IOWA.

## Sheldon Bros.' Sow Sale.

Old Proud Advance is dead, but his spirit lives on. He died February 2d at the home of the Proud Advance Stock Farm. On February 19th, however, will be the last time that Messrs. Sheldon Bros. will ever be able to offer sows bred to this old king of kings. The offering from this well-known herd is by far the best that ever were brought into the ring at this farm. One of the attractions, as there are many, is Lady Alix, the litter sister of Alix 2d, the great show sow. This is one that any breeder would be proud to own, as she is an individual of the massive type, being very smooth and of the very best of brood sow appearance. She will be remembered as selling in the Renshaw sale last spring and being very near the equal of her sister, the sweepstakes sow. She is bred to Ohio Chief 2d, which is one of the greatest sons of Ohio Chief that ever lived. In the estimation of many he is considered almost the equal of the noted Ohio Chief. A stronger back and better rib is seldom found on a hog. He is large and deep, with strong feet and legs. Sows bred to him will be attractions, also the get will be attractions next fall in your sales. One daughter of Ohio Chief, bred for a March litter to Proud Advance, is a very fine animal, being smooth and good size. This combination of breeding should be the catch of the season. The facts of the case in this sale are that Messrs. Sheldon Bros. are selling twenty daughters of Proud Advance bred to Ohio Chief 2d and almost that number bred to Proud Advance. The larger part of the offering are past one year and every one is a good one. The lot of fall gilts is the finest we ever saw, as they are mostly daughters of Proud Advance and out of the high class of sows which have been in use in the Sheldon herds. A new addition to the herd in the way of a herd boar is Crimson Chief, a son of Crimson Wonder, and out of Fancy West. He is the Crimson Wonder type, but is larger than the most of that family, but carries the qualities which have placed them in the fore rank of the Duroc breed. Several sows in the herd will be bred to him for the sale. This cross on the daughters of Proud Advance should make prize winners. We wish to say to those who have never attended a sale on this farm that there will be an offering sold February 19th that every animal will have size and quality. If you want a Proud Advance sow or a sow bred to Proud Advance you had better attend this sale. If you cannot do that, send a bid to Mr. M. T. White, Homestead representative, in care of the above firm and it will be properly looked after.

## Brown's Red Knight Sale.

A sale of Duroc Jersey bred sows that should attract breeders from all parts of the corn belt is that to be held at Osceola, Neb., February 21st, by Mr. E. J. Brown. Mr. Brown is a breeder of several years' experience and understands well the idea of properly mating hogs to produce the best results, and breeders will get the advantage of his years of experience at this sale. This sale consists of forty head of well-selected sows from about 100 head, and they are rich in the blood of the most noted prize winners. It was Mr. E. J. Brown who showed the great Red Knight that won first and sweepstakes at Nebraska State Fair, 1905, and he is considered one of the best breeding boars of the breed. There will be eight daughters of this great hog included in this sale and several of the best not by him are bred to him. Mr. Brown has used this great hog very successfully for three years and when it became necessary to find the proper hog to nick with the Red Knight sows, it looked like a hard proposition. After carefully inspecting several good herds and looking over the youngsters at the state fair, Mr. Brown purchased a son of Belle's Chief that would be a credit to any herd. He was fourth-prize pig at the Nebraska State Fair and had many friends for a better place. He is a grandson of Crimson Wonder on the dam's side and carries that great loin, broad back, good hams and side lines, a neat head and ear, good bone and good feet. The cross of this young hog on Red Knight sows ought to be something extra good. In Red Duster we have a very promising yearling. He is very large of his age and has as good a bone as you seldom see under a Duroc Jersey hog. He carries a good back, has good length, good ham and good head and ear. He is a grandson of the great sweepstakes boar, Gold Dust Jim, and is a very promising sire. With these three good sires in the herd and with the quality of the females he is offering we predict a great future in their offspring. We will go into detail more fully in regard to the sows in our next issue. Mr. Brown has a nice catalog prepared and it should be in the hands of every lover of good Durocs. Write for one and arrange to attend. If you cannot be on hand send a bid to Mr. Ray Page, of The Homestead, and it will be properly treated. When writing for catalog please mention The Homestead. Mr. Axel F. Johnson, of Osceola, will sell on February 22d.

## Poush's Great Brood Sow Sale.

One of the greatest Duroc Jersey brood sow sales that will be held in Iowa this year will be that of Mr. A. F. Poush, of Chariton, Iowa, on February 18th. Few herds in the state of Iowa or any other state can show such an array of brood sows as he is offering in this sale. Mr. Ed Poush

was never known to buy a poor sow, and as like begets like, he therefore is offering the cream of the breed. His gilts are extra large, good color and are right up on their toes. In the sale are ten daughters of Proud Advance. They are last spring gilts and are out of such sows as Madrid Belle by Wauneta Hub, who has two daughters in the sale and they are of the very best ones, as they have extra good feet and the rest to match. There are three out of Queen's Choice, a granddaughter of Tom Watson. They are the roomy type and are the making of great brood sows. One daughter of Nan Orion, the great brood sow by Orion Dandelion, is one of the very best ones of the sale, as she has nice color, neat head, good bone and as smooth as are often found. Two others are out of a daughter of Orion. One of these is the best show prospect of the lot. While her litter sister is more of the roomy type which make the great producers, to say which of these daughters of Proud Advance is the best would be quite difficult, as there is such a resemblance in the get of this great sire that one can almost pick them from the different herds over the country. Others of the good gilts are sired by Ben Davis and out of sows of the very best families. One of the attractions of this sale will be the daughter of Hanley which is a very smooth animal and as she is bred to Orion Advance she should be one of the desirable ones. Remember that the offering is bred to a son of Proud Lady and Orion, also a son of Savannah Belle and Ohio Chief, and for a third boar you find a son of Proud Advance and Daisy Orion. Most of the offering is bred to Savannah Belle Chief and Orion Advance. A better pair of young boars are hard to find. Write for a catalog, as every one in the sale is a good one. Kindly mention The Homestead and if you cannot be present send your bid to Mr. M. T. White, who will represent this paper at the sale, and it will be attended to.

## Cloverdale Farm Sale of Duroc Sows.

One of the good places to secure some excellent Duroc Jersey bred sows next week will be at the sale of Messrs. G. C. Everts & Son, on the farm, four and one-half miles south of Gray, Audubon county, Iowa. February 15th is the chosen date and as careful preparation has been made for the sale, it should score a success. A tent has been provided and rigs will be at hand for the use of visiting breeders to convey them to the farm. Train service is good from the north and south, so that those who are planning to attend this kind of sales need not fear any inconvenience in these respects. The twenty head of yearling and two-year-old sows include a first-class collection and represent the breeding of Orion's Ideal 4314 by Peerless Orion by Orion 5293. For breeding this is just what so many are looking for and they will find these sows of individual merit that deserve the name of their ancestry. Others are sired by Young Advance 4315 and by Top Notcher King 28578. The younger sows are a nice, uniform bunch and no breeder will be disappointed with them, as they are a thrifty, breezy-looking lot, of good scale and bone. These have been bred to Crimson Wonder Choice, a splendid grandson of Crimson Wonder 26355. He is an assistant that promises to make a good sire. You will find plenty of length and bone, as well as quality in this offering. Write for catalog at once and plan to attend this sale. Kindly mention The Homestead and bring the catalog with you.

## Last Notice John Justice Duroc Sale.

While this is the last notice of this sale, we desire to point to the fact that the event will not take place until Friday of the week following this. February 15th is the chosen date and Mr. Justice wants to be sure that every intending visitor will have a catalog in hand in time to find just what there will be in the offering. While Mr. Justice has not been saying as much about his sale as he might, it is no more than fair to say that there will be some good red hogs to be seen at the Greenwood herd on sale day. And by the way, it might be well to again mention the fact that those coming to this sale from or through Des Moines will find it most convenient to the 8:20 morning train on the Des M. I. F. and Northern railway for Quilhart crossing, which is but a few minutes' walk from the farm. It is only a mile and a half from Berwick and six miles from Ankeny, so parties may drive these distances without any inconveniences. The offering will have for special attractions two fall yearlings sired by Proud Lad and a number of March gilts of same breeding. Any of these will stand a good bid, as they are bred to two splendid young boars. Send for catalog at once and come to the sale. The favor will be returned. Remember, a good dinner at the farm.

## First-Class Gilts at Private Treaty.

There are always a few people who prefer buying in this manner. For those who are looking for some first-class Duroc Jersey gilts we would recommend them to write or visit Mr. W. E. Robey, of Truro, Iowa. Surely among his bunch you should find some fine picking. Size, bone and breeding are of the kind that this breed is noted for. Whether you buy of Mr. Robey by mail order or on sight, we can promise you that you will be treated fair and square in every way. Here is an exceptional opportunity to secure some first-class young stock at reasonable prices.

## Hamilton & Son's Annual Poland China Sale

GUIDE ROCK, NEB., FEB. 16, 1907.

## 43 Head of Big, Roomy Sows 43

These sows represent the blood of many noted prize winners, including Mogul Corrector, Go On, Hadley Jr. and many other noted sires. The best lot we have ever had to offer. They are bred to such boars as Mogul, the Nebraska champion; Major B. and I Am Allerton, one of the most promising yearlings in service today. Write for catalog. If you cannot attend send a bid to Ray Page, of this paper. We are also selling seven head of good Scotch-topped Short-horns.

J. H. HAMILTON & SON,

GUIDE ROCK, NEB.

Cols. John Brennan, G. B. Denny, J. H. Ellinger, Auctioneers.

## ORION DANDELION BRED SOW SALE

Every lover of Poland Chinas is invited to attend this sale. If you can't come send bids to Col. H. S. Duncan, or M. T. White. Any lot in catalog will do you good. Send for catalog.

W. W. Wheeler, Harlan, Ia.

## The Perfection Chief Stock Company's Great Duroc Sow Sale.

On Monday, February 25th, at Maryville, Mo., the Perfection Chief Stock Company, a company that was organized by Mr. O. B. Kimmons and Mr. T. G. Nash, of Pickering, Mo., and also Mr. George M. McMurray, of Maryville, Mo., when these gentlemen bought the great show and breeding boar, Perfection Chief, will hold their first sale of bred sows. For this sale these gentlemen have listed fifty head of sows and gilts, many of which are great sows. A goodly number are bred to Perfection Chief, others are bred to Gladstone and Radiant. Perfection Chief was shown two years. In 1904 as a pig he won second at the World's Fair at St. Louis and in 1905 he was the first-prize junior yearling at the Iowa State Fair. He was got by Valley Chief, he by St. Elmo, a great breeding boar that was used with much success by Mr. Van Paten, of Sutton, Neb. His dam, Sutton Lady, was a first-prize winner at the Nebraska State Fair a few years ago. She was got by Van's Perfection, a boar that won championship after championship in 1903, defeating the best hogs of the breed. In breeding condition Perfection Chief weighs 800 pounds and is as smooth as they are made. Radiant, another boar and one to which several sows are bred, is Manley-bred and comes of winning ancestry through both sire and dam. As a sire Radiant is one of the best, and Radiant pigs are the kind that please the most critical judges. Gladstone, a McFarland-bred boar and one that has proven a success in Messrs. Nash & Kimmons' herd, has been used on a few of the offering. The sows listed are the tops of the herds these gentlemen own, and there are attractions here that are the equal of any that go through any sale ring this year. Mr. O. B. Kimmons practically makes a dispersion sale, as he is moving from his present location to a farm near Maryville, where he will continue in the Duroc business and will found another herd. It is with reluctance that he parts with several sows, but he cannot keep all the good ones. He and Mr. Nash will have in the sale two yearling daughters of the great Proud Advance. The writer has seen many Proud Advance sows, but as yet he has not seen two better ones than these. They are best described as two almost faultless sows. Just how the breeders will place them remains to be seen sale day. Both are brood sows and will prove a valuable addition to any herd. They are in pig to Perfection Chief. There are a number of great sows in this offering of Messrs. Nash & Kimmons' and the man wanting top stuff will find it here. In all, these gentlemen sell twenty-one yearlings and matured sows and fifteen spring gilts. Some Radiant gilts will bear inspection. Mr. George M. McMurray, the other member of the firm, sells fourteen spring gilts, all good ones, the tops of his 1906 crop, and the top of Mr. C. A. Wright's fall sale. The Wright gilt, American Beauty, was got by Challenger and out of a daughter of Sneed's Champion. She was also the first-prize gilt at the St. Joseph Interstate Show last fall and is bred to Butler Orion, a boar Mr. Wright paid a long price for at the Iowa State Fair last fall. Two gilts got by Chief No. 1, a grandson of Ohio Chief and out of a Top Notcher sow, will be found among the good things Mr. McMurray sells. Then there will be eight sisters which Mr. McMurray calls the Nodaway Sisters, that were got by Iowa King and are out of Nodaway Nora, the top sow of Mr. A. F. Russell's sale last year. These are good and will please the more critical buyer. The Perfection Chief Stock Company sell on Monday so that buyers from a distance who are attending the Iowa and Missouri Circuit the week before can stay over Sunday as the guests of the Perfection Chief Stock Company, and at their expense. It will pay any who want something extra good to be on hand Monday, February 25th. Write today for a catalog of this sale and kindly mention this paper when doing so.

## Watson, Woods Bros. & Kelly Company's Great Horse Sale.

We want to especially call the attention of our readers to Watson, Woods Bros. & Kelly Co.'s annual sale of imported stallions. This firm inaugurated the selling of strictly first-class imported stallions at auction one year ago. While the prices realized at that time only averaged \$1,150, still the firm were satisfied and believed that a little education would convince the people that this was the way to buy them and that in the future where sales were conducted as their sale was last year, strictly on the square, the prices would be a little bit stronger for a good horse. They

are offering this year, on February 26th and 27th, sixty head, comprising thirty-five Percherons, twenty English Shires, five Royal Belgians and one Oldenberg Coach stallion. The Percherons all run black but six. There are five yearlings, fifteen two-year-olds and the balance three and four-year-olds. From a personal inspection of these horses we are free to say that they are certainly a very superior lot. They have many coming three-year-olds that will walk on the scales today in ordinary flesh and weigh from 1,800 to 1,900 pounds. They have one four-year-old that will weigh 2,200 pounds and quite a number of strong ton horses. This is equally true of the Shires and also the Belgians. In fact, we think there is no question but what this will be the grandest offering of imported stallions ever put under the hammer in the United States. It will be well for those contemplating purchasing a stallion to remember the date, February 26th and 27th, and be on hand. The sale will be held in the new live stock pavilion at the state fair grounds, which will be nicely heated. Cars will run from Lincoln to the fair grounds on both days. If you will write to Watson, Woods Bros. & Kelly Co. they will send you their beautifully illustrated catalog, showing the pictures of nearly half the horses to be sold. They will also offer at the same time four imported mares, three of them with filly colts at foot, and one pair of home-bred mares. Two of these imported mares weigh a ton and over today. The other two are a matched pair of blacks, weighing 3,600 pounds. All four of them are heavy in foal to a good, strong, ton stallion. This will be a great opportunity to buy good mares at reasonable prices. There being so few in the sale it will not attract a large mare crowd, and those who come will certainly derive the benefit. Send for catalog and mention this paper. See page 54.

## The Commodore Duroc Sale.

One of the best Duroc Jersey sales of the year is that of Messrs. Amos W. Harris & Sons, of Waverly, Ky., which will be held at Louisville, Ky., on February 22d. The record which this noted boar has made this year is one to feel proud of, especially in view of the fact that the premiums have been won in the strongest shows. The females which go into this sale bred to Commodore, represent the leading blood of both the East and West, and will prove valuable additions to any herd. There are only a few females bred to Commodore which will be sold this year, and the man who misses this opportunity both loses money and valuable additions to his herd. There are a few gilts in the herd, some by Commodore that will be bred to Top Notcher 10th. This boar was bred by Messrs. Watt & Foust and sold as a pig to Mr. E. F. Hurlburt, of Stonington, Ill., and registered as Red Cloud 10445 (A.), and sold by Mr. Hurlburt to Mr. L. D. Radcliff, from whom he was purchased by Messrs. Harris and re-registered by them as Top Notcher 10th, so that he would be in the family name. As Red Cloud he sired Owanecco Belle 27564, the dam of Gold Cloud, the champion boar at the Illinois State Fair, now at the head of the good herd of Messrs. Fred Kreschel & Son, of Macon, Ill. This gives the two boars in the Harris herd the distinction of either being champions or producing champions at the Illinois State Fair in shows of large numbers and in competition with some of the best hogs of the breed from several states. The catalogs of this sale are now ready and will be mailed to all who are interested in Durocs if they will write as per the advertisement on page 39 of this issue. It should be noted that a High Chief sow bred to Commodore, sold in the sale of Mr. H. B. Griffiths, at Bowen, Ill., on Thursday of last week at the top price of \$525. There was keen competition for this sow and she was worthy of the good herd into which she was sold, that of Messrs. Fred Kreschel & Son, of Macon, Ill. Western breeders who wish to add new blood to their herds should not miss this sale. Bids sent to Mr. D. M. Pierce, care of Willard Hotel, Louisville, Ky., after February 15th, will be properly handled. Write for catalog of this noted sale at once, kindly mentioning this paper.

## Monsees & Sons' Jack and Jennet Sale.

Each year, on the first Tuesday in March, Messrs. L. M. Monsees & Sons, of Smithton, Mo., make a public sale of jacks and jennets. This year on March 5th they will offer sixty head of unquestionably the best jacks and jennets they have ever put through a sale ring. This is saying a great deal, but Mr. Monsees asks all who can to come the day before, examine the stock and sat-

## ANNUAL SALE

# DUROC JERSEYS

40

BRED SOWS

AGED--YEARLINGS--GILTS

40

AT OSCEOLA, NEBRASKA, FEB. 21, 1907.

I WILL sell on the above date forty head of select brood sows that are the best I have ever offered. Eight daughters of the great Red Knight 25199, first and sweepstakes boar Nebraska State Fair, 1905. Eight granddaughters of Crimson Wonder and out of Red Knight dams. Fourteen Belle's Echo gilts. Scale and bone are my specialties. My sows are the large, roomy kind that make good mothers. They are bred to three as good boars as I am able to get together. Write for catalog. Mail bids may be sent to Ray Page of The Homestead.

E. J. Brown, Prop., Osceola, Neb.

COLONEL CALLAHAN, AUCTIONEER.

Isfy themselves that this is no exaggeration. It is hardly probable that another such a show of jacks of the mammoth strain have ever been seen in one barn. The development of size and bone is but little short of phenomenal, but is easily understood when it is learned that the majority of these jacks are of Messrs. Monsees' breeding or descend from Superior Mammoth, the Chicago World's Fair champion, and Orphan's Boy, the St. Louis World's Fair champion. A number of the jennets will sell with jack colts at side and to please many who have asked for yearling jack colts, Mr. Monsees has listed seven yearling jacks, every one a good one. Among the many good ones is a prize winner at St. Louis World's Fair. This jack should go to a section of the country where the best is wanted. Watch for future articles on the greatest sale Messrs. Monsees have ever made. They have the goods and you should arrange to be there if you want a jack or some jennets. See page 44 for advertisement and write today for a catalog, mentioning this paper when doing so.

## Some Good Duroc Jersey Sows for Sale.

We direct the attention of Homestead readers to the advertisement on page 35 of Mr. A. L. Mossman, the Duroc Jersey breeder of Radcliffe, Iowa. Mr. Mossman has a number of richly-bred sows which he is offering for sale to make room for his coming spring crop. They are bred to A. L.'s Chief 4332,

one of the good sons of Ohio Chief, and Corrector 2d by Mr. Nidlinger's Corrector. They are of the same quality and breeding as the forty-four breed sows which Mr. Mossman recently sold at public auction and made the grand average of \$76.80. They have been handled and fed so that they will do the purchaser good and will be sold at a reasonable price. Mr. Mossman can be reached by telephone and we would suggest that if any of our readers want some first-class Duroc Jersey bred sows that they write him for further particulars.

## Some Good Dutch Belted Bulls.

The Elmside Farm, of Garden Grove, Iowa, is offering on page 35 of this issue, two extra good Dutch Belted bulls. One of these is a two-year-old and the other a yearling, and they are typical individuals of the breed with strong constitutional powers. Dutch Belted cattle are increasing in this country and are finding an important place on account of their heavy milking qualities, together with their fattening ability when placed in the feed lot. It is doubtful if any breed has been built up more carefully than the Dutch Belted, because they were for many years handled only by the nobility of Holland. To those who have pure-bred herds or who desire something for crossing purposes we recommend that communication be established with the proprietor of Elmside Farm, Mr. C. D. Mallette, of Garden Grove, Iowa.

**Last Call for the Morrison Bred Sow Sale**

With this issue we call the attention of our readers for the last time to the Duroc Jersey bred sow sale of Messrs. John M. Morrison & Sons, of College View, Neb. We consider this one of the great attractions of the bred sow season for two reasons. First, that it is the home of the great Kan't Be Beat, the \$2,500 boar and winner of more first and sweepstakes ribbons than any hog in the business, having won fifty-seven first and sweepstakes premiums out of fifty-eight times shown. This is a record that is outstanding in the history of winnings of a Duroc Jersey boar. Not only has he been a great show animal, but has produced many show hogs that have won ribbons in the hottest competition. The other reason why this sale should be attractive is the fact that this is the home of more prize-winning sows than any herd in the West. Messrs. Morrison have been buyers of nothing but the very best, purchasing some of the highest-priced prize-winning sows offered in the last two years. There will be forty-five head in this offering, including seven of their tried sows, six fall yearlings and thirty-two growthy spring gilts, every sow bred to the great Kan't Be Beat. Village Pride, one of the best producers Messrs. Morrison have ever owned, will be sold in this sale. She was a Nebraska State Fair winner two years in succession and has been a very profitable animal in their herd. Sheza A. Gooden, a daughter of Crimson Wonder, dam Miss Bob, is another great attraction of this sale. She was a winner at the Iowa and Nebraska State Fairs as a yearling and is bred to the great Kan't Be Beat for an early litter. Seven of this litter were sold by Messrs. Morrison for \$874. Sutton Lady is a daughter of the great sweepstakes boar, Van's Perfection, and second-prize sow at the Nebraska State Fair; she is a sow that should find a home in some good herd. Crimson Lass of Cherokee, a full sister to Crimson Wonder and litter sister to Glendale Critic, is a sow that is considered one of the best yearlings to be sold this year, and bred to this hog surely ought to produce something very choice. Ceres Belle by Bell's Echo, dam Ceres 4th, the dam of the great Red Knight, is also to be sold and the man who buys her and cares for her litter is going to have something that will make him a lot of money. Of the gilts twelve are daughters of the great Ohio Chief and trace to the most noted sires on the dam's side. They are very growthy and with quality enough to go into any company. No man can afford to limit his bids on these gilts, as they are certainly great prospects. Come to this sale, look over this great offering and you will feel well repaid for your time. They invite breeders to be their guests from the time they get off the trains until the sale the following day. Plan to be present at College View, February 12th. You will be more than pleased with the offering. Write for a catalog at once and arrange to attend. Mention The Homestead when writing.

**Last Call for the Rosenfeld & Siverly Angus Sale.**

At Kelly, Story county, Iowa, the above breeding firm will sell on Friday, February 15, 1907, forty head of Angus cows and young bulls. Especial care has been taken in getting this offering together to make it an attractive one, and those who are looking for some good representatives of this breed will do well to carefully look over the catalog and inspect the selection sale day. The farm is right at the edge of town and free entertainment will be furnished to those from a distance. No. 1 in the catalog is a Heatherbloom cow sired by Beau Elsmere 23724. While this cow is advanced somewhat in age, she shows good indications of much future usefulness and is in good condition even though she has recently weaned a lusty bull calf. Another is Bonnie Heather Bell 67111, a four-year-old and a beauty, with the type of the early-maturing kind. A yearling bull sired by Dutch Watson 41202 out of this dam, is in the sale. A Barbara cow is one of the creditable ones and is a good mother, as well as a fine cow to own in a herd. She has a heifer in the sale that will show how she breeds. Another of this breeding is Queen Barbara 81736, a coming three-year-old, and from indications promises to make a most excellent producer, as her calf at foot will show. She is safe in calf to the herd bull, Blackene. Here is a three-sided proposition and one worth close attention. There will also be good numbers in some Georgianna cows, also a Ruth cow, the dam of a fine show steer. This cow is sired by Broadus King 2d and is one of the good ones. At the head of the herd stands Blackene 72214 by Blackwood Lad 42084. He is a very strong individual and his type is right. Most of the cows are bred to this bull. The young bulls are a very smooth bunch and range in age from nine to eighteen months. They are sired by Prince of Fairview 61796. Investigate this sale. It will be a good chance to get some extra good breeding Angus. Write for catalog. Advertisement appears on this page. Kindly mention The Homestead.

**Last Call for J. H. Watson's Fifth Annual Poland Sow Sale.**

On Tuesday, February 12, 1907, Mr. J. H. Watson will sell forty head of his best sows and gilts in a comfortable sale tent at Madrid, Iowa. The collection should be an attractive one, as it contains a strong combination of first-class individual merit and choice strains of Poland China blood. For attractions Mr. Watson has selected several of his best sows which have been very regular and reliable producers. One of the sows, a three-year-old, is sired by Johnson Chief 62243, a sweepstakes boar at Lincoln, Neb., in 1902. The sow herself is a very smooth, large hog and some of the best yearlings in the sale are from her litters. She is in pig to J. H.'s Dude 118073, a splendid son of Nemo L's Dude, one of the good Iowa hogs. Others of the sows are sired by Chief Perf. 2d, Keep On, Look's Choice and Mondamin Sunshine. The fifteen fall yearlings are large and growthy and will surprise many on sale day with their great size and straight bone. They are sired by Trade Mark 65313 by Mahaska Chief 41549. The gilts are bred by the same pattern in individuality, and those afraid of short, blocky gilts may here cast their fears to the winds. They

have been mated to two very strong individuals in J. H.'s Dude and Mischief Model. Several young boars and sows sired by Winning Dude are consigned by Mr. E. M. Metzger, of Fairfield, Iowa. Plan to attend this sale. Here will be a splendid chance for beginners to buy, for not an animal goes in the sale that is not absolutely a reliable and regular producer. Send for catalog at once, mentioning The Homestead.

**Letters From Fellow Farmers.**

There is nothing, we believe, that is more valuable to farmers than the interchange of ideas, experiences and methods connected with the operation and management of their farms. It is a policy that ought to be encouraged and agitated in the farm press because it is one that is so fruitful of good. If you, dear reader, have during the past season successfully overcome some disease among your stock; if you have by taking precautionary methods prevented a scourge getting foothold on your premises even when it has been prevalent in your neighborhood, what better service can you render your brother farmer, though he may live 1,000 miles from you, than to voice your experience in some way that he may be benefited thereby. We are glad to note that this custom is becoming more general and in our advertising columns in this issue is an advertisement of a well-known firm who are offering to send a "budget" of letters from farmers in their own words and handwriting telling their experiences in preventing and curing such diseases as scab, mange, eczema, etc., and ridding stock of lice, ticks, fleas, etc., which certainly make very interesting and instructive reading. We have read some of these letters and can say without hesitation they are worth hundreds of dollars to those who keep horses, cattle, sheep and hogs, for the reason they tell the actual experiences; how the writers have battled with, conquered and overcome contagious diseases and pests among their stock. One man writes his pigs were dying off with sore mouth and skin disease and how he stopped the death loss. Another tells how he cured Texas itch and lice among his cattle—in fact these letters cover every disease and parasite that is known among farm animals. Another man writes how he cured a colt that was badly cut on a barb wire fence. Certainly such information is of unusual value to farmers. What can be learned from the experience of others is more than clear gain, for it will prevent a similar loss if the lesson it teaches is followed. Just turn to the advertisement of the Marshall Oil Company, Marshalltown, Iowa, on page 12 and then send for this "budget" of original letters. They will gladly send it free post-paid to anyone writing for it.

**Additions Made to the Edmonds, Shade & Co.'s Herefords.**

Two important additions were made to the Hereford herd of Messrs. Edmonds, Shade & Co., of Kingsley, Iowa, on Friday of last week. On that date the purchase was made of the great herd header, Imp. Albany, the highest priced two-year-old bull ever sold. This noted bull was at the head of the Avery & Hines Co. herd at Alto Pass, Ill. He has never been defeated in any show and was a champion bull in England; indeed, he comes from a family of champions because his sire was champion of England for four consecutive seasons. This bull is still in his prime, and the firm of Messrs. Edmonds, Shade & Co. are to be congratulated over their good fortune in securing him. On the same date the firm purchased Imp. Queen Quarantine, a seven-year-old cow bred by Her Majesty Queen Victoria. The addition of two such animals as these to one herd on one day is an event of more than ordinary importance, and for that reason we have thought that the friends of Herefords generally and those who have had occasion to be interested in the Edmonds, Shade & Co. lines of breeding would be interested in the announcement of the above fact.

**Lefebure's Big Sale of Chester White Bred Sows and Short-horn Cattle.**

Mr. John Lefebure, of Fairfax, Iowa, will sell at his farm, three miles from Fairfax, Iowa, on February 21st, forty-two head of the choicest Chester White bred sows that was ever offered by one breeder in a one-day sale. One of our representatives, who is a practical swine breeder, has carefully inspected this offering and pronounces it excellent. Fine heads and ears, splendid feet and legs, with 300-pound bodies on March and April gilts of right conformation are not easily obtained, but Mr. Lefebure has them. He sells at the same time and place twenty good Short-horn cattle, among which are some good Scotch animals, Brawith Buds, Secrets, Victorias, etc. Our next issue will contain particulars. Application for catalogs should be made to Mr. John Lefebure, of Fairfax, Iowa.

**Last Call for the Kirkpatrick-Wilson Duroc Jersey Sale.**

Few sales this year will possess better breeding than will go through the Kirkpatrick-Wilson sale on February 13th. They are offering thirty-five head that represent the blood of the most noted strains of the breed. They have always used good boars. Crimson Wonder was used in the Kirkpatrick herd and it was a blow to the Duroc Jersey breeders when this hog was accidentally killed, as he was surely a great breeder. Of this offering five are matured sows, three fall and one spring yearling and twenty-six spring gilts. The three fall yearlings and one aged sow are daughters of the great Crimson Wonder and the get of this boar included in this sale are worthy of a place in any good herd. The one spring yearling to be offered will be bred to the great Kan't Be Beat. About fifteen of the best gilts consigned by both parties are bred to Lincoln Wonder, a son of Ohio Chief, that is surely one of the best young boars of the year, and if there is anything in the fact that like produces like the get of this young boar should be sought for by leading breeders. The balance of the gilts are bred to Crimson Model by Malcolm's Model, dam Glendale

**Great Short-Horn Dispersion Sale.****—TO BE HELD AT—****LOOMIS, NEB., FEBRUARY 15, 1907.****24 Cows and Heifers 24****4 Aged Bulls, 10 Yearling Bulls, Including the Great Scotch Bull, Goldie 152298**

There will be some excellent Scotch and Scotch-topped cows and heifers in this sale; also a fine bunch of young bulls. The great young bull, Prince Volomia 223588, by Orange Viceroy 164269 is also to be sold. I will offer my entire lot of breeding cows, some with calves at foot by above named bulls. The breeder and farmer will find what they are looking for here. They are the dual purpose Short-horn. Write for catalog. When writing please mention this paper.

**I. C. WELCH,****J. SKINNER & SON,****BEDFORD, IOWA.****PIPER BROS. AND R. C. MICHAEL, AUCTIONEERS****RUEBEL BROS.' THIRD ANNUAL SALE****FEBRUARY 12, 1907.****60 POLAND CHINA BRED SOWS.**

Consisting of matured sows, fall gilts and spring gilts. Bred to R.'s Keep On, one of the great sons of the noted Keep On 61015, and Iowa Chief, by Ed. Klever's Thicket. Iowa Chief is the best Thicket boar in Iowa—twenty are bred to Moderator, the great young boar we purchased of John Blain, Pawnee City, Nebraska. This was the best extra large smooth pig that Mr. Blain was able to find after visiting twenty-five or thirty of the best herds in Nebraska and Iowa. There will be sows in this sale sired by Chief Perfection 2d, Keep On, Mischief Maker, Chief Tecumseh 3d and other noted boars. If you want size, breeding and quality you can get it here. Get your name on our mailing list for a catalog.

**RUEBEL BROS.****ROCKWELL CITY, IA.**

Maid, the first-prize sow under six months and come to the sale. You will be well at Iowa and Nebraska State Fairs in 1905. taken care of while in Lincoln. When writing for catalog, look over this breeding and please mention The Homestead.

# PRIZE WINNING DUROC JERSEYS AT AUCTION

**In Heated Pavilion at Remington, Ind.,  
ON MONDAY, FEBRUARY 11, 1907.**

**FORTY HEAD---THE PROPERTY OF MR. JOHN A. TETER, OF REMINGTON, INDIANA.**

In 1906 herd was shown at Michigan, Indiana and Illinois State Fairs and won 29 prizes, including two grand championships, three championships, ten firsts, nine seconds and six thirds. Many of these prize winners are included in the offering. Special Attraction—Clover Blossom 1st 39900 (A.) by Crimson Top 12501, dam Clover Blossom 28828 by Kan't Be Beat, champion and grand champion sow Michigan State Fair, Detroit, 1906; second at Indiana State Fair and third Illinois State Fair, 1906, goes into sale bred to Golden Chief. No better sow of her age will go through the auction ring this winter. Four other state fair prize winners included in the offering. This sale can easily be made on the way to the noted Ohio circuit without any additional expense. Write for catalogs, mentioning The Homestead.

**COLS. KEIL, HARMON & KENYON, AUCTIONEERS.**

**J. A. TETER, REMINGTON, IND.**

Third prize boar Indiana State Fair, 1905, also sire of 1st prize male pig, 1st prize sow pig, 1st prize young herd, 1st prize get of boar, 2 firsts on herd bred by Exhibitor.

## Grand Junction, Ia., Combination Poland Sow Sale.

At Grand Junction, Greene county, Iowa, February 19th, 20th and 21st, will be held a combination sale which will represent carefully-selected drafts from the herds of five successful breeders in the vicinity of the above named place. The consignors are Messrs. Geo. F. Frele, of Ogden; C. C. Healy, of Dana; and G. W. Wampler, J. L. Hudson and C. M. Howard, of Grand Junction. Each one of these breeders has taken especial pains to select only the best from their respective herds, since this is the first offering which they are about to sell in combination. We can safely recommend breeders and farmers to lend their hearty support to this sale, as each of the consignors is well known in their communities and the offering that will be brought together on the three sale days will speak for itself regarding the success which these men have achieved in their work as breeders. This sale will be an excellent opportunity to secure some choice sows for starting a herd. All the numbers offered in this line have proven very reliable, regular breeders and none of them have reached that stage where their abilities along this line are on the wane. Naturally a collection of sows from a number of herds will bring together some choice ones and will represent a number of different lines of breeding. This is quite true in this instance. There will be something there to suit every person that is looking for good hogs. The breeding is standard and represents a number of the very best strains of breeding. If you have not yet been favored with a catalog you should send for one at once, as the list is so extensive that in our small space we can only recommend the offering to you as a whole. Those looking for gilts will not experience any disappointment should they find it their good fortune to bring away some one of the many choice ones to be sold that day. There is among the collection a great number of large, heavy-boned, growthy things from March litters that are big as yearlings. They will certainly be attractive to anyone wanting some of the big kind of Poland. The list of boars to which this collection has been bred is a very representative collection, both in regard to their individual merit and breeding. Plan to attend this sale one day at least, if you cannot take in all three. Catalogs may be procured by writing to Mr. C. C. Healy, of Dana, Iowa. Kindly mention The Homestead when making this request.

## Combination Poland Sow Sale, Maxwell, Iowa.

On Tuesday, February 19, 1907, will be held a combination sale of Poland China bred sows and gilts at Maxwell, Iowa, in Story county, that will offer some first-class representatives of this breed. Messrs. J. E. Hull and J. O. Thompson are the two consignors and have planned to have the sale take place in comfortable quarters in town. The offering consists of the best there are in the herds. In fact some of the sows are reluctantly entered and would not be were it not for the fact that these gentlemen are making their first sale and want it to be a success. Among the eleven head of mature sows and yearlings are some splendid individuals of outstanding merit, both in regard to breeding and conformation and prolificacy. Visitors and buyers will find plenty of size and bone in the offering, as well as quality. One of the numbers worthy of special mention is a sow, T. C. Whiteface, with two gilts, a yearling and a two-year-old in the sale. This group will bear some close investigation and it would make a most excellent start for foundation purposes. An offer on the old sow of an even hundred has been refused. Another worthy bunch is six yearlings and tried sows sired by Regardless 93337 principally. This lot is large and growthy and strong in bone. They should be most satisfactory individuals in any herd. Another to mention is a sow by Johnson's Chief 62243 and is one of the big kind of sows that are sure breeders and money makers. The gilts include some very large and well-grown things. Just the stuff for making roomy, breezy sows. These are sired by a great powerful son of Big Chief Tec. 82321, bred by Mr. Harvey Johnson. Others are sired by Chief D. 87425 and Perfection H. 106471; others by Mischief's Model 98435. One of the yearlings, Tec. Beauty, was a first prize county fair hog. The mature sows are bred to Perfection H., also Dude Federick, an 800-pound yearling and prize winner. Another is Keep On Again. This is a first-class offering and bred to first-class boars. Send for a catalog at once and investigate. Plan to attend and lend your en-

couragement to this sale. These breeders will be glad to return your visit. Kindly mention The Homestead when sending for catalog.

## Poland China Bred Sows for Sale.

Mr. T. A. Davenport, of Belmond, Iowa, a well-known and reliable breeder of Poland China swine and Short-horn cattle, announces his bred sow sale at the Pike Timber farm February 21st, at which time and place Mr. Davenport is offering for sale fifteen splendid aged sows, all safe in pig to Superior Sunshine and fifteen spring gilts sired by this same boar, but bred to Pike Timber Perfection and Pike Timber Meddler. The first-named boar was sired by Jewel Perfection, he by Lee Perfection and out of a daughter of Proud Perfection, while the last-named bog, Pike Timber Meddler, was sired by the show hog, Meddler, and he by Mischief Maker. His dam was Perfection and she by Proud Perfection. Thus, it will be seen that these two young boars to which these gilts are bred are possessed of choice breeding. Homestead readers who are in search of good Poland China blood should keep this sale in mind and make their arrangements to attend it on February 21st. Mr. Davenport has always been successful with his Poland Chinas, never having any trouble whatever in disposing of all the male pigs that he could raise, at an early date. The fact should not be lost sight of that his herd boar Superior Sunshine is also listed for sale. His record number is 92455. He is a two-year-old boar, or will be three in March, and was sired by Perfect Sunshine, his dam being by Superior U. S. 72111. Here is a grand opportunity for someone to secure a splendid Poland China boar and a good breeder. At the same time and place, Mr. Davenport will sell seven Short-horn bulls, two of which are Scotch. In ages these bulls run from thirteen to sixteen months. Some are sired by Imp. Charmer and others by the Duchess of Gloster bull, Baron Gloster 8th.

## Watt & Foust and Mahan Bros.' Durocs.

Much interest has been taken in recent years in the Duroc herds of Messrs. Watt & Foust, of Cedarville and Xenia, Ohio, and Mahan Bros., of Osborn, Ohio. They have shown stock at some of the greatest shows of the country and have always won their shares of the ribbons. It is not necessary to repeat their winnings, as every breeder is familiar with the names and winnings of these two firms. In the offerings which breeders will have an opportunity to secure at Dayton, Ohio, on February 12th, are a number of show-yard winners and some valuable females which if properly cared for will certainly make show-yard material for the fall shows. The blood of the noted Kan't Be Beat, a boar which has done much for the breed in both the East and West, is found in this offering, and some of his yearling daughters which have won prizes throughout the entire country will go into this sale. The boars in use in these herds have been winners and the females winners, so that the breeder looking for prize-winning stock may reasonably expect such if he sees fit to buy from these good herds. We take pleasure in recommending this offering to the readers of The Homestead in the market for good breeding stock. Those of our readers who are present at the sale of Mr. J. A. Teter, at Remington, Ind., may easily reach this sale. Stop at the Phillips House at Dayton, Ohio, at the expense of these gentlemen and you will be well taken care of. Bids may be sent to Mr. D. M. Pierce, as per the advertisement on page 56 of this issue. Kindly mention The Homestead when writing and arrange to be present at this important sale. This is the first of a series of noted sales in Ohio, all of which can be reached from Dayton at a very small expense. Plan to be present at this noted sale.

## Neal's Dispersion Sale, February 20th.

On February 20th, Mr. H. C. Neal, of Houston, Neb., will disperse his entire herd of Poland China hogs, among which are some very choice individuals. It is not often that one gets an opportunity of this kind and when we do, we should act at once. This is a dispersion sale. Mr. Neal has decided to move off the farm and for this reason is scilling the entire herd. Two great herd boars will be offered and those in need of a tried sire should attend this sale and take a look at Cedar Lawn Chief. He is by Allertou's Chief and has for a dam Cairo Girl by L's What's Wanted. He is the type of hog that is in demand at present and as a breeder will have

## Great Kant-Be-Beat Sale

**1-2 Interest in the Sensational King of Prize Getters, Kant-Be-Beat 10239a and 41 tried sows, yearlings and gilts at Public Auction**

## DUROCS Huff's Second Annual Sale MONDAMIN, IOWA, FEBRUARY-13, 1907

**44 HEAD OF CHOICE SOWS 44 HEAD**  
7 Mature Sows, 10 Fall Yearlings, 27 Gilts

STRONG in the blood of Orion, Iowa Challenger, Onawa Orion by Orion's Profit; E. Z. by Sur-prize; Rustler by Glendale Chief and other noted strains. Sale at farm, four miles north of town in heated and seated tent. Send for catalogs and plan to spend the day with us.

**C. W. HUFF, - MONDAMIN, IA.**  
Tupper Bros., Auctioneers.

enough of his get in the sale to make a very creditable showing. The young boar that Mr. Neal is using is Great Look, a son of Grand Look, the hog so successfully shown by Messrs. Dawson & Sons this year. He is a very growthy fellow, of good length, broad back, well arched; has good ham, good, even side lines, good bone and feet. Look him up sale day if you are in the market for a young boar, as he is a good one. As to the brood sows, we have an offering here that we think would be hard to

duplicate. They are very smooth, even sows and we are sure that we can suit you at this sale if you will attend. We will go into full detail in regard to these sows in the next issue. In the meantime send for a catalog and get acquainted with the breeding. Those who cannot attend can send a bid to Mr. John Blaine, one of the most competent hogmen of this state, who will attend this sale for The Homestead. Please send all mail in care of Mr. H. C. Neal. When writing, mention this paper.

# Great Duroc Sale Circuit

**185  
HEAD****AS GOOD AS ARE RAISED IN TWO STATES**

REPRESENTING THE BLOOD OF GOLD FINCH, CHICAGO LAD, OHIO CHIEF, PROUD ADVANCE, BUDDY K. 4th, TOP NOTCHER, HE'S OUR PRIDE, BUDDY K, BELLE'S CHIEF, KAN'T BE BEAT, CHAMP. CLARK AND OTHER GREAT SIRES.

**A GRAND OPPORTUNITY TO BUY DUROC SOWS THAT ARE PRODUCERS****185  
HEAD****TUESDAY, FEBRUARY 12, 1906**IN HEATED SALE PAVILION, AT  
**PETERSBURG, ILLINOIS**

We will sell forty head of sows and gilts, the tops of two herds—twenty yearlings and twenty spring gilts. Gold Finch, first in class at Chicago in 1903; Chicago Lad, champion at the same show; Uncle Fred, a son of Helen Blazes IV., and Proud Wonder, a son of Crimson Wonder, are the principal sires, and the boars to which the sows are bred. We also sell daughters of Proud Advance, and close descendants of Ohio Chief, Top Notcher, Improver II., Orion, and other great sires. If you want good ones, well bred, arrange to be with us sale day. Write either of us for catalog.

**Harry Riggin, C. T. Rogers, Petersburg, Ill.**AUCTIONEERS:  
Cols. Reppert and McDowell**WEDNESDAY, FEBRUARY 13, 1907**AT MY FARM NEAR  
**JACKSONVILLE, ILLINOIS**

I will sell twenty yearlings and twenty-five spring gilts got by some of the best boars known to the breed and bred to boars of national reputation. Here are a few of them: Corrine Laurie, in second-prize aged herd at Springfield, bred to Tip Top Notcher; Annie Laurie, a daughter of Buddy K. IV., bred to Proud Advance; Golden Girl, by Buddy K. IV., bred to Tip Top Notcher; a spring gilt by Buddy K. IV., bred to Proud Advance, and a spring gilt got by Top Notcher Chief, bred to Mayor Jr., first in class at Illinois State Fair in 1905. I also sell a great lot that were got by my two herd boars, He's Our Pride, a Kan't Be Beat-Top Notcher boar, and Buddy K., a litter brother to Buddy K. IV. Arrange to be my guest sale day, as I think the hogs will please you. Write me for catalog.

**T. E. LAURIE, JACKSONVILLE, ILL.**AUCTIONEERS:  
Cols. Reppert and Cox & Son.**THURSDAY, FEBRUARY 14, 1907**AT MY FARM NEAR  
**LADDONIA, MISSOURI**

I am including in this—my first sale—twenty aged and yearling sows and twenty spring gilts as good as I own. Among the attractions are Perfect Gold Dust 33d, four granddaughters of Best of Top Notchers, and three Top Notcher gilts, an A. F. Russell gilt got by the great Iowa King, and two Gen. Cronje gilts; also daughters of my herd boars, Champ Clark by Tip Top Notcher and out of Gold Dust Rose, dam of Helen Blazes, and Chief Paul Finch, a son of King Morton and out of a daughter of Gold Finch. I believe the class of stock I am offering merits the attention of the breeding fraternity and you are cordially invited. Write for catalog.

**B. W. HALE, Box 2, LADDONIA, MO.**AUCTIONEERS:  
Cols. Reppert, McCowan, Kell and Others**FRIDAY, FEBRUARY 15, 1907**IN HARRISON'S BARN AT  
**SHELBYNA, MISSOURI**

We offer twenty-two aged and yearling sows, ten fall and winter gilts and twenty-eight spring gilts. We have this past year bought such great boars as Belle's Chief 51323, a son of the great Ohio Chief and Savannah Belle, the \$750 Murphy gilt; Buddy O. 2d, a son of the champion, Buddy K. IV., and Tip Top Notcher's Baby, and Queen's Advance, a son of Proud Advance, and have used them on our sale stuff, along with Paul Kruger, a grandson of Gold Finch. We are offering some great attractions in Helen's Sister, bred to Belle's Chief; Rose and Rosebud, litter sisters, some show material here; Maud and seven sisters, by Missouri Chief; Helena 8th by Oom Paul, and her two daughters. Our entire offering consists of tops of two good herds. Send for catalog and try to be our guests sale day.

**Maupin & Applegate, Shelbyna, Mo.**AUCTIONEERS:  
Cols. Reppert and McCowan**For Catalogs Address Each Breeding Firm and Kindly Mention This Paper.****Schwab Sells Duroc Bred Sows February 11th.**

With this issue we wish to call the attention for the last time to the advertisement of Messrs. Geo. P. & G. W. Schwab, of Clay Center, Neb., who will hold a sale of Duroc Jersey bred sows on February 11th. This sale is the opening date of the Clay county circuit and Messrs. Schwab think that they have a very good offering to put before the public on that date. Their offering is not large, only thirty-five head being cataloged, and among them are animals of the very choicest breeding. A greater part of the offering are the get of the great boar, Morton Prince, a boar that has done much in building up the breed and has produced some very high-class animals. They are bred to such boars as Jeffries, a son of Van's Perfection, the sweepstakes boar of three state fairs, having won first and sweepstakes at Iowa, Nebraska and Kansas State Fairs, also at the Kansas City Royal show the same year. Others are bred to Long Knight, a son of the great Red Knight, the sweepstakes boar at Nebraska State Fair, 1905. There will be three sisters to this boar in this sale and if breeding has anything to do with it they should find good homes. They are all safe in pig to Jeffries. There will be eighteen gilts of April farrow and mostly bred to Long Knight. Write for a catalog, look over the breeding and arrange to attend this sale. Those who cannot be on hand can send bids to Mr. Ray Page, of this paper, and they will be properly cared for. When writing for catalog please mention this paper.

**Last Call for East & Son's Duroc Bred Sow Sale.**

On February 13th, the third day of the Clay county circuit, Messrs. Wm. J. East & Son, of Clay Center, Neb., will offer a draft of Duroc Jersey bred sows that are extra good. Mr. East is a breeder of several years' experience, has bred and shown many prize winners and you can always bank on seeing a bunch of growthy, smooth ones at Messrs. East's on sale day. This year is no exception to the rule and they have been putting forth every effort to make this one of the most attractive sales they have ever made. They will offer thirty-five head, the tops of about 100 head raised this year, and they have been fed and raised right to do the purchaser good. Messrs. East have a quarter section of land fenced hog tight, as they believe in giving a hog plenty of range, which is one of the most essential things in raising good, strong litters of pigs. A number of these sows are bred to Bezdek, a first-prize winner at the Nebraska State Fair and third in same class at St. Louis same year. He is also the sire of a number of the best things in the sale. Kansas Banker sired by Improver II., dam Countess, the highest-priced sow ever sold in Kansas, is a young boar that is well liked by everyone, and if nothing happens to him he will no doubt make them go some next fall. Messrs. East are using him on some of the best gilts, and his get should be extra good. Messrs. East have a nice catalog prepared which will explain everything in regard to breeding. If

you haven't one already, send for it at once and arrange to attend the sale. Sale will be held at the farm in heated tent. Free hotel accommodation and livery can be had on day of sale, and parties coming to Harvard will be conveyed to sale from that point. If you cannot attend, send bids to Mr. Ray Page, of this paper, and they will be properly cared for. Write for catalog and mention this paper.

**Louden & Son's Short-horns and Durocs.**

On February 12th Messrs. H. B. Louden & Son, of Clay Center, Neb., will disperse their entire herd of Short-horn cattle, and also sell fifteen head of very choice Duroc Jersey brood sows. The writer had occasion to visit this herd a few days ago and can positively say that it is as growthy a bunch of sows with lots of quality, as he has seen this year, and earnestly recommends them to any buyers who are looking for good ones. There are two daughters of Hambletonian that are extra good and both bred to Jumbo's Perfection. They are fall sows, very growthy, good even side lines, broad backs, good hams, good bone and stand up well on their feet. This great cross of prize-winning blood has proven profitable to Mr. Louden and in these two sows there is a very bright future for someone. They also have a fine gilt by Jumbo's Perfection, dam Royal Beauty by American Royal that is one of the best things we have had the pleasure of looking at this year. She is very smooth, will weigh a trifle over 300 pounds and has a back and ham that would be a credit to any sow. She is safe in pig to Lad's Top Notcher, a son of old Tip Top Notcher that Messrs. Louden purchased in the East this fall at a long price. The offering as a whole is extra good, and not a poor one in the bunch. They are considered by Messrs. Louden & Son fifteen as top sows as they ever put in one sale. Write for their catalog and look over the breeding. As to the cattle they are dispersing their entire herd, and among them are some very choice breeding animals. Their herd bull, Duke of Bonniebrae 183477, is a very good individual and was got by Victor Baron, a choicely-bred Scotch bull of Mr. Cruickshank's Victoria family, and was used very successfully in the herds of Messrs. Parsons and J. R. Crawford & Sons, of Newton, Iowa. One of the largest and more useful cows of the offering is Daisy, got by Lord Washington, he by Airdrie Duke of Hazelhurst 117846, of the noted Duchess family. She traces to some of the most noted families known to the Short-horn breed and will make a profitable animal for someone. No. 3 in the catalog is conceded the best thing in the sale and has a fine bull calf at foot. She was got by Knight of Elgin 2d, a 2,300-pound bull in breeding condition, got by Knight of Elgin and tracing to Imp. Rose Mary. Lots 9, 12 and 13 are all good, well-bred heifers got by Duke of Bonniebrae, he by Victor Baron, and every one safe in calf. These cattle are of a milking strain and are profitable animals for both the breeder and the farmer. Catalogs are now ready, of both hogs and cattle, so send for one and look over the breeding of every animal. Mail bids can be sent to Mr. Ray Page, of this paper, and

they will be properly handled. Write for a catalog now and arrange to attend.

**Last Call for the Hamilton & Son Poland and China Sale.**

Messrs. J. H. Hamilton & Son, of Guide Rock, Neb., are offering the public an opportunity of buying some very high-class animals in the bred sow sale to be held in Guide Rock, February 16th. If you are in the market for the right type of Poland Chinas we urge that you arrange to attend this sale. They have the hog that is in demand at the present, and as to the breeding we consider that there are few herds in the state equal to this. Forty-three head will be offered and a smoother, more even bunch will be hard to find. The majority of the younger stuff are the get of the great boar, Mogul, the first-prize boar at the Nebraska State Fair in 1904. He is a son of Grand Chief, dam Mat by L's Perfection, and has proven a wonderful sire. In No. 2 in catalog we think we have a wonderful brood sow. She is a daughter of Hadley Jr. out of Favonia 3d by Belle's Tec., and she has a number of her get in the sale which will speak very highly for her. She is bred to Major B. for a late February litter. In No. 3 we have Black Beauty, a daughter of Corrector, dam Perfection Beauty 4th by Chief Perfection 2d. She is an extra good brood sow. She raised ten pigs last spring, nine this fall and is bred again to the great Mogul. She is worthy of any man's consideration and should find a good home. In No. 4 we have a good yearling by Mogul and out of Butler's Sensation by Butler 93d, and she is bred to I Am Allerton for an early litter. In Nos. 5, 6 and 7 we have three fine fall yearlings that are smooth as apples. Two of them will be sold safe in pig to Mogul and the other to I Am Allerton, the young boar that is so well thought of by every breeder who has seen him. He is by I Am Sunshine, dam Miss Allerton by Allerton Tec. This young hog was the top boar in the W. T. Garrett sale last fall and was one of the \$742.50 litter and the dam selling at \$150 at six years old. Arrange to attend this sale, as you will be pleased with the offering, and if you cannot attend, send a bid to Mr. Ray Page of this paper in care of Messrs. Hamilton & Son. It will be properly handled. Catalogs are now ready and should be in the hands of every reader of this paper. Write for one and mention this paper.

**Last Call for the Davis and Kerr Sales.**

On February 13th and 14th the firms of Messrs. J. B. Davis & Son, of Fairview, Kan., and Geo. Kerr, of Sabetha, Kan., will offer eighty head of Duroc Jersey bred sows from their well-known herds, and among them will be some choice individuals. Messrs. Davis will hold forth the first day and put up forty head which they consider the best they have ever had. The younger stuff in the sale are mostly the get of old Monarch 28395, he by Morton's Model, dam Preble, a full sister to the great Ohio Chief. They represent the blood of Duroc Chalenger, Ohio Chief, Top Notcher, Orion and

other prominent show and breeding boars. Most of the offering are bred to Fairview Chief 32585, a son of Kan't Be Beat. This hog is a good individual and has proven a good breeder. Take them all through Messrs. Davis have a good bunch of sows to offer. They are growthy, smooth and will make good useful sows. On February 14th Mr. Kerr will offer forty head that are right in every respect. They are bred to such boars as Lincoln Chief, he by the great Ohio Chief; Kerr's Model by W. L. A's Choice Goods, and Orion III., a grandson of old Orion. One of the special attractions of this offering is Lady Crimson, a daughter of Crimson Wonder and bred to Lincoln Chief for early farrow. Grace McFarland by Oom Paul II. is the sow that won first at the Kansas City Royal in yearling class, 1904, and is safe in pig to Lincoln Chief. Royal O. is one of Mr. Kerr's show sows that he will offer. She was first-prize sow in under one year class at Hutchinson, and is safe in pig to Lincoln Chief. Catalogs are now ready for both sales and will be mailed to anyone who will drop these gentlemen a card. Write for one and mention this paper.

**Last Call for the Mattson Short-horn Sale.**

A dispersion sale that should be of interest to all Short-horn breeders is that of Mr. A. H. Mattson, of Loomis, Neb. He is offering his entire herd of breeding cows, two great herd bulls and about fifteen head of good young bulls and heifers. They are in splendid condition for a winter sale and every female of breeding age is with calf or will have calf at foot sale day. The great Scotch bull, Goldie, will be sold in this sale and anyone wishing a herd header would do well to take a trip to see this bull. He is a son of Sir Charming 2d, dam Chaine by Red Victor. He is a massive red bull of great scale, weighing over a ton in good breeding condition, and as a breeder he ranks among the best. Prince Volonia, a son of Orange Viceroy, dam Irene by Duke Goldfinder, is an attractive young bull and is a very high-class individual. His get are showing up well and were it not for the fact that Mr. Mattson is quitting the business this bull could not be bought. This sale includes what Mr. Mattson considers the best cow he has ever owned. This animal was referred to in our last issue and will be a prominent feature in this sale. This cow is Orletta, a massive, broad-backed cow of the blocky, heavy type and of good breeding. She was got by Prince Lee, dam Allama 21st by Red Ravenwood. This great cow has been a wonderful producer and will have a calf at foot sale day by the great Scotch bull, Goldie. There are twenty-four cows and heifers of breeding age and surely are a very useful, well-bred lot. Ten of these good cows will have calves at foot, most of them by the herd bull, Goldie. There are ten good yearling bulls of serviceable age and well bred enough to go to good herds. The offering throughout is a very desirable one and a credit to any one man to own. The catalogs are now ready for mailing and should be in the hands of every Short-horn breeder. Write for catalog and mention The Homestead.

COL. T. C. CALLAHAN, AUCTIONEER.

## REMEMBER MY FIFTH ANNUAL SALE 40 Poland China Bred Sows and Gilts

MADRID, BOONE COUNTY, IOWA,

FEBRUARY 12, 1907.

I HAVE selected for this sale five attractions in as many tried sows. They represent some of my best and are sired by Johnson's Chief 62343, a champion at Nebraska, 1902; also by Chief Perfection 21. Keep On, Looks Choice and Mondamin Sunshine. Fifteen fall yearlings, beauties well grown and showing every indication of making valuable individuals. Sired by Trade Mark 66313, a hog of unusual strong bone and smooth body, and a sire of my best young stock. A score of gilts completes my offering. They are as big as you will find; mostly of early litters and sired by Mischief's Model, also by Handspring 87701, a St. Louis prize hog, and Sunburst, a second prize at Illinois State Fair. I can show you a good combination of bone, quality and size as any. My young stock is bred to J. H.'s Dude. I want you to have my catalog. It will include beside my offering several young boars and sows, sired by a son of Nemo L's Dude. We shall look for you on sale day.

J. H. WATSON, Prop.

COL. H. S. DUNCAN, Auctioneer.

## Ruebel Bros. Third Annual Sale of POLAND CHINA BRED SOWS

TO BE HELD AT FARM FIVE MILES EAST OF ROCKWELL CITY, IA., ON

TUESDAY, FEBRUARY 12, 1907

Twenty tried brood sows, seven fall yearlings, 38 spring gilts. There will be sows in this offering sired by Chief Perf. 2d, Keep On, Mischief Maker, Chief Tec. 3d, Palatis Chief, R's Keep On and Iowa Chief, and bred to R's Keep On, Iowa Chief and Moderator, the great young boar we purchased of John Blain. This will be one of the best lots of large, prolific, heavy boned Poland Chinas that will go through a sale ring this winter. Our hogs are all healthy, and in fine condition. Our entire lot of sows farrowed an average of over nine pigs to the litter last spring. Having sold our farm and our new location not being properly arranged for the hog business compels us to put in some of our very best brood sows that could not be bought under any other circumstances. Do not miss this opportunity to secure some of these choice animals at your own price. We are also offering a number of good Short-horn bulls at private sale. Send for catalog. Lunch at 11:30; sale at 12:30. Col. F. M. Woods and Assts., Auctioneers

RUEBEL BROS., Rockwell City, Iowa.

## OUT OF THE RING BUT STILL IN THE LEAD

We have been ruled out of the International Fat Stock Show ring in Chicago, and disbarred from the association privileges for one year.

BECAUSE we refused to submit to the decision of one judge, knowing that he, however honest and capable he might be, was selected solely by our only would-be competitor, we being refused another judge to act with this one, drastic action was taken by the superintendent of the horse department, barring us from showing, not only in the German Coach classes, but also in the Belgian and Percheron classes, in which we had several entries, and well prepared for the battle. It is currently reported among horsemen who are on the "inside," that the measures adopted to deprive us of a fair showing grew out of plans laid by an envious breeder. However true this may be, we have reasons to suspect that the generally recognized merits of the Oltmanns breedings and importations have created an uneasiness in certain quarters. In fact, we know of more than one preconcerted effort to gain from us by unfair means, that which cannot be fairly gained. In the show world we stand without fear of successful competition.

The individuality given each one of our animals places them in a class by themselves. In our breeding studies, both in Germany and America, every effort is made and with unvarying success too, to bring out most prominently those qualities of equine flesh that have given fame to the German Coach Horse and won for them a high place. On two continents the name we carry stands for excellence, in horse flesh. We are proud of our record as breeders and importers of German Coach as well as Percherons and Belgian breeds. Our buying facilities are unsurpassed. The senior member of our firm, Landschaftsrat O. V. Oltmanns, resides in the German Coach Horse district, and within four hours ride of the Percheron and Belgian Horse district of France and Belgium, and is ever on the lookout for the finest and best old country produces. We buy better horses at less expense than any other importer can possibly do, and for that reason can give you a better horse for less money than you can buy elsewhere. Write us for full particulars or call at our barns at Watseka, Ill., or Ft. Worth, Tex. Though ruled out of the ring we are still in the lead.

OLTMANNS BROS., Leer, Germany, Ft. Worth, Texas, Watseka, Illinois.

## THE LAFAYETTE STOCK FARM

J. CROUCH & SONS, Props.  
Lafayette, Ind.

Our sweeping victories at all the leading live stock shows in the United States is evidence of the class of horses that we handle. At the late International, the greatest live stock show in the world, we won 21 first prizes and 12 seconds, including 3 championships. Our horses are all fresh imported, on which we will put a gilt-edged guarantee that they must be good breeders. All stallions are personally selected by one of the members of our firm and are purchased direct from the breeders in Europe. Our facilities for purchasing and handling stallions are equalled by no other importer and thus we are enabled to handle higher-class horses at less money than our competitors. Our terms are liberal. Importations arrive frequently, insuring buyers a large selection from which to select a stallion.

J. CROUCH & SON.

Departments:

Sedalia, Mo. Nashville, Tenn. Seattle Wash. Sacramento, Cal.

## Registered Percheron Stallions For Sale

GOOD colors, large size, three and four-year-olds. Priced so they will pay for themselves the first season. Also several span high-grade Percheron and Shire mares in total to registered horses, ages five to nine years old. Address,

Address, E. H. KNICKERBOCKER, Fairfax, Iowa

PERCHERON STALLIONS AND MARES FOR SALE. Blacks and grays. Nady Brothers Fairfield, Iowa.

When writing to advertisers please mention this paper.

## 80 STALLIONS

THE BEST IMPORTED STALLIONS

ONE THOUSAND DOLLARS each. Home bred registered draft stallions \$250 to \$750 at my stable door. Address,

A. LATIMER WILSON, CRESTON, IOWA

20 IMPORTED Percheron stallions arrived Jan. 4, 1907. Your choice, but one, for \$1,000. Also home-bred stallions. Frank L. Stream, Creston, Ia.

When writing to advertisers please mention this paper.

# Public Sale

The Largest Sale of Draft Stallions Ever Held in the West will be at Wichita, Kansas, Friday, February 22d, Starting at 8:30 A. M. Sharp

50 Head Percherons, Belgians, 50 Head Shires and Hackneys.

This sale will consist of some of the choicest stallions of our stud, both imported and American bred. As we won every prize in the stallion class at the great State Fair of Kansas, it gives the public the grandest opportunity to purchase a prize winner at their own prices.

### PRIZES WON IN 1906

Champion Percheron stallion at the Kansas State Fair.	First—Best five Percheron stallions, Kansas State Fair.
Champion Belgian stallion at the Kansas State Fair.	First—Best five Belgian stallions, Kansas State Fair.
Champion Shire stallion at the Illinois State Fair.	First—Best five Shire stallions, Illinois State Fair.
Champion Shire stallion at the American Royal, Kansas City.	First—Best five Shire stallions, International, Chicago.
Champion American-bred Percheron stallion at the American Royal.	Second—Best five Belgian stallions, International, Chicago.
Champion Shire stallion at International, Chicago.	Second—Best five Belgian stallions, Illinois State Fair.
Reserve champion Belgian stallion, International, Chicago.	Second—Best five Belgian stallions, American Royal, Kansas City.
First—Best five Shire stallions, American Royal, Kansas City.	Second—Best five Percheron stallions, American Royal, Kansas City.

His Majesty King Edward VII. of England and Lord Rothschild's exhibit of stallions were purchased by us at the Great International Exposition at Chicago, 1906. These Grand Stallions, Girton Charmer and Premvictor, will be on exhibition at this sale. Do not fail to see the Highest Priced Draft Stallions ever imported to this country.

As we are now located at Wichita, we intend holding an annual sale in this city, this being our first. Our AIM is to surprise the PUBLIC with such Stallions as were never before placed at auction. All Stallions will be sold with our regular guarantee of 60 per cent and will be sold so that all payments will not become due until you have made two seasons and one collection from your HORSE.

This sale will not affect our business in any way, as we will have over 250 head left after the sale for our Spring trade, not including our New Importation which will arrive soon.

TERMS—Will be one year and six months from date with interest at 6 per cent from date, or six per cent discount for cash. All credit must be bankable. Send for catalog and calendar.

**Robt. Burgess & Son, - Wenona, Ill.**

**Rhea Bros., Arlington, Neb.**

Breeders of Percheron Stallions. We exhibited 11 stallions at late Nebraska State Fair and won 9 prizes as follows: 2d and 4th on four year-olds, 1st on three year-olds, 2d, 3d and 4th on 2 year-olds and 1st, 2d and 3d on yearlings. At Interstate Fair at Sioux City, Ia., we had 7 entries and got 5 places, 2d on 4 year-olds, 1st and 3d on 3 year-olds, 2d on 2 year-olds, 1st on yearlings. Our horses are home bred and acclimated, have size, bone, quality, are raised in pastures, not pumped with grain and drugs, thus insuring good service from the start. Every stallion sold under a positive breeding guarantee. Arlington is on main line N. W. Ry., 25 miles northwest of Omaha, eight miles east of Fremont.

## PERCHERON IMPORTING COMPANY, CHARITON, IOWA.

YOU want an imported stallion of purest breeding. With a short back, upheaded, gentle and handsome. We have them. We pay the freight and return fare. We guarantee and insure every horse. # FRANK IAMS'

"TOP NOTCHERS," largest pair of four-year-old Percheron and Belgian stallions in the United States; weight, 5,080 pounds; winners of first prizes and SWEEPSTAKES prizes (over all) at Nebraska State Fair, 1906. A pair of "NUT CRACKERS"—"IAMS' KIND," the "PEOPLE AND PRESS." His 2,500-pound Percheron, "TRALLALA," defeated the "CHAMPION WINNER," "BIBI," of France at Iowa State Fair. Iams stirred up "THE ANIMALS HERE," "THEY SAT UP AND TOOK NOTICE" of his WINNERS and SONS OF WINNERS. He HYPNOTIZES buyers with "TOP NOTCHERS" at "LET-LIVE PRICES." "Whoa! SHY ANN." Buy a stallion today, save \$300, and get choice of IAMS' BARN, filled to the roof with

## 150 Percherons, Belgians and Coachers 150

2 to 6 years old; weight, 1,700 to 2,560 pounds; 90 per cent "BLACK BOYS," 50 per cent "TON STALLIONS." All REGISTERED and APPROVED. Mamma, Iams is a HOT ADVERTISER, but he has "THE GOODS." He sells "TOPPERS" at \$1,000 and \$1,500 so good that they need NOT be "PEDDLED" or put on "AUCTION BLOCK" to be sold. He has on his "SELLING CLOTHES," they fit all buyers. No man with MONEY or BANKABLE NOTES gets away from Iams. He buys, owns and sells more stallions than any man in United States; saves THOUSANDS OF DOLLARS to STALLION BUYERS. He is not in the stallion trust. Iams places \$1,000 or \$1,500 insurance.

## \$1,000 SAVED AT IAMS \$1,000

IKKY! What a rich graft these "SLICK STALLION SALESMEN" are working on the honest farmer, selling fourth-rate stallions at \$2,000 and \$5,000. Iams sells "TOP NOTCHERS" so good, big and cheap THAT THEY DO NOT NEED TO BE PEDDLED TO BE SOLD. Mr. Buyer, see Iams' stallions yourself. Take no "GOLD BRICK STALLION SALESMAN'S WORD." Iams has "THE GOODS" you read about. His establishment is worth going 2,000 miles to see. Iams makes competitors "holler." He is knocking "high prices" out of the Christmas tree. Iams saws wood, "butts in," sells more stallions each year. He makes every statement good. Georgie, dear! Buy a stallion of Iams. His \$1,200 stallions are MUCH BETTER than our neighbors paid those Ohio men \$4,000 for. Then I can wear diamonds. Iams speaks the languages, buys direct from BREEDERS, pays no BUYERS, SALESMEN or interpreters, has no two to ten men as partners to divide profits with. Iams guarantees to sell a BETTER stallion at \$1,000 to \$1,500 than are sold to stock companies for \$2,500 to \$5,000 by SLICK SALESMEN, or pay you \$100 for your trouble, you the judge. Iams pays horses' freight and buyer's fare; gives 60 per cent breeding guarantee. Write for eye-opener and greatest horse catalog on earth. # NOTED OHIO DUROC SALE

## WILL BE HELD ON FEBRUARY 12-13-14-15, 1907

The greatest collection of Duroc Jersey brood sows that have ever been sold in Ohio. Daughters of World's Fair and State Fair winners, and bred to winners at leading shows.

The get of Top Notcher, Kruger, Ohio Chief, Orion Chief, Kant Be Beat, C. E.'s Col., S. S.'s Col., Puckett's Chief by Ohio Chief, Model Chief Again, Ira Wonder, King to Be, Advancer II, King of Cols., The Chief, Beat Him if You Can, and other noted sires of equal merit.

**TUESDAY, FEB. 12, 1907.**

### 55 HEAD OF ROYAL BREEDING 55

SALE IN DAYTON, OHIO.

**WATT & FOUST,**  
CEDARVILLE & XENIA, OHIO.

**MAHAN BROS.,**  
OSBORN, OHIO.

Show sows by Kan't Be Beat, Top Notcher, King to Be, Golden Rule, Veribest, Top Notcher's Last, and other famous sires. Show sows that have been winners at leading state fairs are bred to boars that have won at noted fairs. Our offering is made up of the tops of our herds, all of which have a national reputation. Parties from a distance will find free accommodations at Phillip's Hotel, Dayton. Write for catalog at once, kindly mentioning The Homestead. Bids should be sent to Mr. Dante M. Pierce, Phillip's Hotel, Dayton, Ohio, representing this paper, and same will be properly handled. Cols. C. C. Keil, Ladora, Ia., H. L. Igelhart, Uniontown, Ky., Tom Vennedg, Hope, Ind.; E. W. Foster, New Carlisle, Ohio, Auctions.

**THURSDAY, FEB. 14, 1907.**

### 60 Whitehall Combination 60 BRED SOW SALE At Yellow Springs, Ohio.

Consigned by Fred Bauer, Eastwood, Ohio; S. E. Morton, Camden, Ohio; C. E. Speaks, Yellow Springs, Ohio; Geo. D. Black, Yellow Springs, Ohio; E. S. Kelley, proprietor Whitehall Farm, Yellow Springs, Ohio; G. H. Fogg, Yellow Springs, Ohio. The blood of Ohio Chief, C. E.'s Col., King of Cols., Whitehall King, Whitehall Model, Fogg's Col., Chic's Chief, Ira Wonder, The Chief, Advancer II., Model Chief Again, Morton's King, Beat Him if You Can by Kan't Be Beat, and others. No better bred lot or more noted blood lines can be found in any offering than in this one. Write for catalog. Bids should be sent to Mr. Dante M. Pierce, at Yellow Springs, Ohio, in care of Whitehall Farm.

**WEDNESDAY, FEB. 13, 1907.**

### ORION CHIEF & KRUGER BRED SOW SALES

TIPPECANOE CITY, OHIO.

### 50 Head--20 Yearlings--30 Gilts

THE PROPERTY OF IRA JACKSON.

Twenty yearling and thirty gilts, many sired by Orion Chief, bred to Kruger. A number sired by Kruger, bred to Orion Chief. My winners at Iowa State Fair, 1906, and Illinois State Fair, 1906, were bred this way. At these two fairs I won more first prizes than any other breeder or exhibitor in 1906. My herd won more first prizes at the World's Fair in 1904, than any other breeder's. This is strictly a show-yard collection of useful sows, representing the blood lines of the noted prize winners of leading state fairs. Free hotel accommodations at Phillip's House, Dayton. Send for a catalog, mentioning The Homestead. Send bids to Mr. Dante M. Pierce, in care of Mr. Ira Jackson, Tippecanoe City, Ohio. Col. C. C. Keil and others, auctioneers.

**FRIDAY, FEB. 15, 1907.**

### 50 TOPS OF TWO HERDS 50 AT AUCTION At Yellow Springs, Ohio.

S. S. PUCKETT AND M. R. GRINNELL.

By such sires as S. S.'s Col., S. S. Success, Puckett's Chief of Ohio, C. E.'s Col., Beat Him if You Can, and others, bred to a grand collection of boars, the best breeding, including S. S. Success, S. S.'s Col., Puckett's Chief, The Model, Ideal Success and others. For catalogs address M. R. Grinnell, Yellow Springs, or S. S. Puckett, Lynchburg, Ohio. Sale follows Whitehall Combination Sale. Bids should be sent to Mr. Dante M. Pierce, care M. R. Grinnell. Cols. Igelhart, Isenhower and Vinnedg, auctioneers.

## EVERYONE WANTING THE BLOOD WHICH HAS PRODUCED

the winners at the World's Fair and leading State Fairs should get catalogs of the noted sales. All of them can be reached from Dayton at a very small expense. Ample accommodations for all. Send bids to Mr. D. M. Pierce, representing this paper, who will carefully handle all bids entrusted to his care.

**DAMAGE DONE BY CHEAP STALLIONS.**

The day of the cheap stallion has not entirely passed. We mean cheap in the sense of being inferior in quality and therefore ill-adapted to the uses to which he is put. At the present prices of draft horses, together with the excellent prospects for their continuance, it would seem unnecessary to denounce the practice of using ill-bred, ill-formed stallions, no matter how low the service fee may be made.

Dr. Alexander in his recent bulletin on horse breeding touches this subject, and among other things says:

Nothing, probably, has done or is doing more damage to the horse breeding business than the fact that horses of low breeding are offered for service at low fees. If the stallion owner is popular in his community he finds remunerative patronage for his horse, even when the fee he charges is a small one, but the fee really is high considering the low cost price and value of the stallion. No worse policy possibly could be practiced. The cost of raising a high-grade as compared with a scrub colt is the same, but when the time comes to sell both, the colt from the pure-bred stallion, endowed with many of the fine attributes of his sire, commands a price in the market that at once repays the service fee, the cost of feed and care and returns a handsome profit as well. On the contrary there is no appreciative market for the scrub colt. He has to find some local buyer who wants a cheap "worker," and when the cost is counted his selling price rarely, if ever, more than covers the service fee and cost of raising. There is in reality little difference between the service fee charged for the average grade horse and the pure-bred stallion. It only is a matter of two or ten dollars at time of service, but at selling time the horse sired by the pure-bred stallion, if properly fed and cared for, may bring fifty to some hundreds of dollars more than the offspring from the scrub or grade. These are not theoretical statements, for there is abundant proof in every great market of the country. The cheap stallion is dear at any price, just as is a counterfeit of any kind. The best is none too good and it is only by using the best obtainable breeding material that the highest quality of horses can be produced. The farmer does not buy seed corn or oats or barley or wheat just because it is cheap, nor does he go from seller to seller looking for the seed he can buy the cheapest. On the contrary, he seeks everywhere for that seed which will return him the most bushels of the best-filled and heaviest marketable grain. Nor is he content to buy mixed seed for his grain crops. He tries to find the cleanest "pedigree" seed to be had, for he knows, by experience, that such seed will produce grain true to type and far more uniform and excellent in quality than that from ordinary "scrub," mixed, number "two" or "three" seed grain. When it comes to selecting a stallion, however, all of this sensible business policy seems to be forgotten, for the mare owner too often neglects the offered opportunity to patronize the pure-bred stallion and, for the sake of saving a few paltry dollars at the time of breeding, uses a stallion of impure blood and nondescript type and character no better by comparison than the poor seed we have alluded to.

In speaking about the cheap stallion we have in mind not only the inferior grade, but the inferior pure bred, because the day has not arrived when all registered animals approach a standard sufficiently high to justify their promiscuous use. In these times a mature draft stallion should, in fair flesh, be very close to the ton mark. This seems necessary in order to keep up the scale of our draft work horses. He should have feet of good size and his limbs should be clean—that is, free from blemish, and especially side bones and defects around the hock joints. These are some of the weaknesses that are reproduced if

they are in the sire, and no company or no individual should accept a horse, whether imported or home bred, that is not sound; sound in the sense of being free from the blemishes that are transmissible.

Of course the state of Wisconsin has taken this matter up in earnest and through a law enacted some time ago makes it necessary to procure a certificate of soundness for all horses standing or traveling for gain. This must be signed by a duly qualified veterinarian or the owner may make affidavit before a notary public that his horse is free from hereditary, contagious or transmissible unsoundness or disease. Since the enactment of this law upwards of 100 unsound or unsuitable stallions have been retired from public service in the state. This leaven should be allowed to permeate the whole mass until the unsound pedigreed horse and the scrub of

every description are driven outside the boundaries of the corn-belt.

**THE VALUE OF CLOVER HAY FOR FATTENING STEERS.**

Eleven steers weighing an average of 893 pounds were started on feed by the Indiana station on December 20, 1905, and were fed for six months. Their ration consisted of ear corn and clover hay. For the entire period these steers consumed a daily average of 19.7 pounds of corn and 8.3 pounds of clover hay. The gain from this ration was 2.08 pounds daily per steer for the entire period.

In an adjoining lot were fed eleven steers of the same weight and of similar breeding, these being fed for the six months' period on ear corn, shredded fodder and oat straw. The comparison, therefore, is made between the use of clover hay as roughage and shredded fodder and oat straw. These steers con-

sumed 17.6 pounds of corn daily each, 5.1 pounds of shredded fodder and 2.5 pounds of oat straw. The gain made from this ration was 1.3 pounds per day—this compared with a daily gain of 2.08 in the case of the clover fed steers makes a very striking comparison.

In another lot of steers oil meal was added to the corn ration, the roughage in this case being shredded fodder and oat straw. In this case one and one-half pounds of oil meal were fed daily per steer and 18.9 pounds of ear corn. In addition, 5.08 pounds of shredded fodder and 1.9 pounds of oat straw were consumed. From this ration the steers made a daily gain each of 1.8 pounds.

It required in the clover lot 946 pounds of ear corn and 399 pounds of clover hay to make 100 pounds of gain; in the case of the steers fed linseed meal it required 1,148 pounds of corn and meal and 393 pounds of roughage to make 100 pounds of gain; while in the lot fed straight corn alone with fodder and oat straw it required 1,345 pounds of ear corn and 486 pounds of roughage to make 100 pounds of gain. At current prices for feed stuffs the gains on the clover lot were made at a cost of \$6.59 per hundred pounds, on the oil meal lot \$7.79 per hundred, and on the corn and fodder lot \$8.56 per hundred. Here is a reduction in the cost of making 100 pounds of increase of nearly \$2 between the steers fed clover and those fed the shredded fodder and oat straw. Account was taken of the number of pounds of pork made in each lot of steers. It was found that the hogs following the steers fed clover hay made a gain of 2.1 pounds for every bushel of corn fed to the steers; the corn and oil meal lot 1.8 pounds and the straight corn and fodder lot 1.78 pounds. The clover-fed steers and those fed oil meal sold at the same price on the Chicago market—namely, \$5.35 per hundred—while the corn and fodder lot sold for thirty-five cents less per hundred. The conclusions drawn from this experiment by Professors Skinner and Cochel are as follows:

1. Ear corn and clover hay proved to be the most efficient ration used in this test, in economy of gain, rate of gain and profit per steer.
2. Ear corn, shredded stover and oat straw, supplemented with linseed meal, proved to be more efficient than ear corn, shredded stover and oat straw in economy of gain, rate of gain and profit per steer.
3. A ration of ear corn, shredded stover and oat straw was not efficient, economical or profitable.
4. The addition of some nitrogenous food stuff either in the form of concentrate or roughage added to the efficiency of the ration and to the profit of the feeder.
5. The value and importance of clover hay for fattening cattle was clearly demonstrated.
6. Linseed meal proved to be an efficient and profitable supplement when fed with ear corn, shredded stover and oat straw.
7. The steers receiving a ration of ear corn, shredded stover and oat straw, supplemented with linseed meal, were as well finished as those receiving ear corn and clover hay, although they made smaller gains.
8. The steers receiving ear corn shredded stover and oat straw without the linseed meal were not comparable with the other two lots in finish, rate of gain or profit.

Don't stroke the cow's nose and say, "poor Bossy," at feeding time and lam her on the back with the milk stool and yell like an Indian at her at milking time if you expect stock to pay cash dividends.

Percheron stallion Lamy 53952, owned by Frank Iams, St. Paul, Neb. See write-up on page 2.

## ROUGHAGE TO TAKE THE PLACE OF CLOVER.

The following communication has been received from a subscriber at Manning, Iowa:

Through a combination of circumstances I will not have any clover or timothy to use as roughage next year, and I am now laying plans to grow a satisfactory substitute. We can raise millet, kafir corn or common corn. Now, what would you advise me to do in order to obtain a supply to feed to fat cattle next winter? Millet is the most convenient and cheapest crop to handle, although kafir corn and Indian corn do well and yield enormously. What is the feeding value of millet hay as compared with good clover hay when fed to fattening steers? How about cane and kafir corn for this purpose?

None of the crops mentioned are as rich as clover hay, and from the list of crops enumerated it is almost impossible to select any one that can be used as a substitute for clover hay with the expectation of getting as good results from its use.

Clover hay contains 12 per cent or a fraction over of protein, while millet contains about 7½ per cent. Millet, however, can always be counted on to give good results if it is properly cured.

It is doubtful, under circumstances such as those described here, if one can do better than to make use of corn fodder, though it must be remembered that corn fodder is not as rich in flesh-forming constituents as clover hay. When one considers, however, that it is possible to grow forty, fifty or sixty bushels of corn and almost mature it, and at the same time get a crop of three or four tons of fodder per acre, it should be a temptation to use corn to the greatest possible extent. The crop can be cut just when the ears are nicely dented and shocked and afterwards fed out of the shock, or it may be shredded late in the fall and fed in that form. Where corn fodder is used for fattening steers one will have to use a little more oil meal or cottonseed meal than would be the case if they were given clover for roughage.

Sorghum and kafir corn are both satisfactory fodder crops, and it might be entirely practicable under certain circumstances to put in a few acres of one or the other. Sorghum is a little more palatable than kafir corn, and throughout a large part of the corn-belt is to be preferred. If it is seeded at the rate of eighty or 100 pounds per acre it will produce a fine fodder and if the soil is rich one may get a yield all the way from five to ten tons per acre. It must be remembered, however, that it is heavy work to handle the fodder.

Now, there is one other plan that might be considered practicable under certain circumstances. By sowing together peas and oats in the proportion of three bushels per acre, half peas and half oats, a crop will be obtained that will to a large extent supply the same feeding ingredients as clover hay. The pea crop is a legume, and if this mixture is cut just before the oats begin to ripen an exceedingly palatable and nutritious form of roughage will be obtained. Generally speaking, it may be cut with the binder if the sheaves are made reasonably small, so that the fodder will not spoil under the bands.

Peas in the corn-belt are not altogether a success as a grain crop, but for fodder purposes when sown along with oats, so that the vines are kept from trailing, there is a place for this legume.

We acknowledge that it was necessary to cover rather a large field in answering this inquiry, but we have done this so that this subscriber and others similarly situated might, from what has been said, select the method that seems most applicable to their conditions.

## SOME STEER FEEDING EXPERIENCES

The following communication has been received from one of our subscribers, Mr. L. C. Windland, of Madison county, Iowa:

My experience as a steer feeder dates back to 1896. In that year I bought two carloads of cattle and borrowed the purchase price of \$1,440 at 8 per cent. I paid \$3.50 per hundred for cattle weighing 1,160 pounds. I fed them 110 days and sold them at \$4.25 per hundred. They weighed at that time 1,380 pounds. This is a gain of 220 pounds in 110 days, or exactly two pounds per day per steer.

I raised all the corn they consumed, but bought two tons of oil meal to finish them out with. After paying the money I had borrowed with interest and also paying for the oil meal, I had a profit of \$506 for my corn and roughness. I also fed out with this bunch of cattle 106 hogs and these more than paid the \$800 rent that year.

That was my last winter feeding, as I have always been able to do a little better on grass. Recently I have been buying my cattle in February, picking up steers that will weigh 900 or 1,000 pounds. I give them a little corn through March and April and then put them on grass until the corn crop

is in the hard roasting ear. I then commence cutting corn fodder for them. Last year I did not buy my cattle until the middle of May. I have been watching the market in the past two or three years and find that most feeders buy about the first of the year, thus making the feeder market strong through January and February. In buying in May I did not have to pay any more per 100 pounds than they were selling for in February, and thereby saved the corn that is required to carry them from the first of the year until grass is good. Those cattle purchased in May were kept on good grass, but were started on new corn the third day of September. They sold the 12th of November with a clean profit of \$710 after paying for the use of the money in them. That I think is a very good showing for two loads of steers.

Where one has plenty of good grass, it is undoubtedly a better proposition to finish steers on pasture than it is to feed them out on grain and dry fodder alone during the winter months. However, under certain circumstances it is by no means an impracticable proposition to feed out a bunch of steers in winter. We have in mind a few carloads that are on feed this winter and are making a gain of two and a half pounds daily on a reasonable grain ration. There is one hog to the steer, following these cattle and getting very little grain beside what is picked up around the yards. The steers are consuming twenty-four pounds of ground corn daily and also some clover and corn-stalk roughage. There is now every reasonable prospect of getting a two-cent margin on the original weight of these steers, and when one considers the present selling price of hogs it is apparent that men who are making these gains and are handling in this way are going to make a good profit this year.

We strongly endorse the idea of feeding cattle rather than to market grain directly. If one succeeds in getting a good market price for his corn out of his cattle, and in addition gets a reasonable price for his roughage, he is much better off than if he undertook to raise the same amount of money that his profit will amount to by hauling grain. The farm on which two carloads of cattle are fed out annually and 100 head of hogs will grow richer each year, and where this practice has been carried on for sometime you will find corn on such farms running from sixty, seventy to eighty bushels per acre over the entire acreage that is in corn.

## THE CHARCOAL PIT.

One of our Nebraska subscribers, Mr. Henry Wulf, sends the following communication:

I have recently purchased a farm with considerable timber on it and would like if you would give me some information on how to make a charcoal pit and how to operate the same. This has been published in your paper once or twice, but now that I have to understand the subject in a practical way I wish you would give it again because I believe other subscribers will also be interested in it.

The manufacture of charcoal, either from cobs or wood, is a comparatively simple matter and yet it is not without its difficulties. A few years ago we dug a pit six feet long and about four feet deep and about three feet wide. At the bottom it was about four feet long and two feet wide, that is the sides were sloping. The base of an old smoke-stack was procured at a factory and this was flattened out so as to make a cover. Any kind of cheap metal will answer this purpose, though it must be thick enough so the heat will not warp it out of shape in order that it will wedge down into the hole.

In making charcoal the best plan is to start a fire in the bottom with a few shavings, add to this a little kindling and keep piling on your material, seeing to it that the fire is not smothered out until you have the pit full. When all the material in the pit is well charred with fire, put on your cover and if necessary throw a little soil around the edge of the cover in order to exclude the air. When this is done the material in the pit, instead of burning to ash, will burn to a charcoal.

Now, the only objection to this simple style of pit is that eventually the sides will cave in, and for that reason we believe that it will almost pay to brick up the bottom and the sides. There is no reason why the pit cannot be made circular as well as rectangular, providing one can obtain a circular metal top.

In this connection we will give one more suggestion applicable to the making of charcoal. Unfortunately, it is not so well adapted to the making of charcoal from wood as it is from cobs. We refer to the plan of starting a fire on the surface, using shavings and building it up gradually by piling on your cobs, being careful not to smother the

## FARMERS, IT WILL PAY YOU

to use our FARMER'S FORGE OUTFIT on your farm in doing blacksmithing and repairing. We have high endorsements for the thousands of Farmer's Forges sold direct to farmers within the past ten years in every state and Canada. Our Forges have hearths 24x26 inches, 11½ inch blowers, run easy, and have all the first class qualities of high-priced forges.

**WE POSITIVELY GUARANTEE** our Farmer's Forges to be as large, as durable, do as much work and equal in every way any \$10.00 forge on the market, and as represented or money refunded.

**SPECIAL WINTER OFFER** until March 31, 1907. We offer 1 Farmer's Forge complete \$3.50 or one Farmer's Forge, one anvil and vice combined, and one pair of tongs, all for \$5.25. Ten carloads on hand. Orders shipped promptly. This offer may not appear again. Write to-day. Send stamp for catalogue No. 23 and testimonials.

**G. A. S. FORGE WORKS, Saranac, Mich.**

fire, and when you have the pile sufficiently large then put it out quickly with water. If to a barrel of water you add two or three pounds of copper sulphate and half a gallon or a gallon of salt and dissolve these, you then have a valuable mixture, especially if it is used for hogs. This can be done without going to the labor of building a pit, and, indeed, if it is the aim to cut the labor element out one can build his fire in the hog lot so that when the charcoal is made the hogs will have access to it at once.

## WHY CORN IS MOLDY.

A subscriber at Delavan, Wis., sends the following communication:

There is much complaint among farmers in this locality about their corn being moldy. Some quite good fields of corn have a very large proportion of the ears completely covered with mold, and they are therefore worthless. Some ears that look apparently sound on the outside are moldy around the cob when broken in two. Corn that was picked early in the season for seed and properly handled seems to have escaped, but all the corn that has been left in the field in this locality is practically unfit for feeding. Some say the trouble to heavy rains in the fall, while others say it was the early October freeze. I shall consider it a favor if you will, for the benefit of your readers, throw a little light on this subject.

Generally speaking, mold goes hand in hand with an attempt on the part of farmers to introduce varieties of corn that are too late for their locality, and while under any circumstances late fall rains may contribute something by way of increasing the percentage of mold on corn, yet we have seen instances where plenty of mold was found when the weather was ideal.

So far as we know there is no remedy this year, but the fact that corn in a locality should be in this condition suggests the advisability of attempting to grow varieties that mature a little earlier. Sometimes corn produces a very large cob, and this, of course, is characteristic of certain varieties. When such is the case it frequently happens that it contributes something to mold, especially at the point or germinating part of the kernel. For that reason the score cards used in our educational institutions make allowance for corn shelling a certain percentage of grain. By emphasizing this, a cob of medium size is obtained, and this under average conditions insures a more perfect drying out than where the large-cobbed varieties are grown. Corn that is properly acclimated and planted at the proper time seldom molds, no matter what the weather is. It is a mistake also to attempt to grow varieties that are extremely deep in the kernel.

## EFFECT OF BARLEY GROWING ON SOILS.

One of our subscribers from Fredericksburg, Iowa, sends the following communication:

I am told that barley is an exceedingly hard crop on a soil. It is said that you can hardly grow any other crop after barley without manuring the land. I would like if you would discuss this subject for the benefit of those who think this crop can be profitably grown.

The statement that barley is especially hard on a soil is absolutely without foundation. A forty-bushel crop of barley will take from the soil 146 pounds of ash material and forty-seven pounds of nitrogen, while forty-five bushels of oats per acre will remove 194 pounds of ash and fifty-two pounds of nitrogen. A thirty-bushel crop of wheat will remove 189 pounds of ash and forty-five pounds of nitrogen. It will be seen from these figures that a forty-bushel crop of barley takes considerable less plant food from the soil than either wheat or oats.

Compared with other cereals, barley is somewhat more shallow rooted and the fact that it does not grow so rank in the straw makes it an almost ideal crop with which to seed down clover and timothy.

It has an important place in the rotation of the corn-belt, inasmuch as it produces under ordinary circumstances a large weight of grain per acre and this, if properly mixed with other foods, may be used for all classes of animals. It may also be seeded mixed with early oats, in which case the yield of the mixture will be considerably larger than either grains seeded alone.

## RAISING SOY BEANS FOR HOGS.

The following communication has been received from one of our subscribers, Mr. A. H. Jeffrey, of Warren county, Iowa:

One of our field men while visiting my herd seemed much interested in the success I have had in raising soy beans and its use as a hog food. He suggested that I give my experience for the benefit of others. I have been raising soy beans for two years. This year I had four acres and I am more than pleased with the result. If planted as soon as possible after corn planting they are ready to commence feeding about the last of August, and then the hogs will eat leaves, pods and branches. They can be cut with a mower and raked if cut while the pods are yet yellow and soft. Stack like hay and give the hogs a few forkfuls every morning, and they will do the rest and show you by their eagerness and by their glossy coats that it is what they want. I drill the beans thick in the row with corn planter and cultivate as I do corn.

I have tried cow peas, but like the soy beans much better; they are bushy and stiff and do not fall down like peas do. Mill feed and digester tankage are all right, but are so high in price that they make a hole in the profits. I think much can be saved and as good results obtained with soy beans and alfalfa. I sowed three acres of alfalfa the 20th of last August and got a splendid stand, and expect to sow more next fall. Mine are the early yellow kind and I would advise all good hog raisers to try a few of them. Two quarts will raise enough to try, and plenty to plant the next year.

We believe that the acreage of soy beans grown in the corn-belt will greatly increase during the next few years.

The department of agriculture some time ago published a special bulletin on methods employed in handling hogs by a Mr. Rowe in Illinois—methods that involved the use of soy beans fed in connection with corn.

Soy beans are exceedingly rich in flesh-forming constituents and experiments conducted in feeding the beans to hogs indicate that they are not only palatable, but that they make an ideal feed for balancing corn.

## FRANK IAMS' FOUR-YEAR-OLD PERCHERON STALLION, LAMY (53952).

WEIGHT 2,040 POUNDS—SWEEP-STAKES WINNER.

Mr. Frank Iams writes: "Mr. Stallion Buyer:—'Good things come to those who bustle.' That's why 'Iams is the horseman of the hour.' He is saving 'stallion buyers' thousands of dollars on first-class stallions. He has 'lifted the lid' on high-priced stallions. Everybody gets in on the 'ground floor' and saves \$1,000 or \$1,500 on a stallion that is so good that Iams is not forced to place him on the auction block or have him peddled by a 'bunco stallion salesman' to sell him. Iams' twenty-five years of successful horse business makes him sell 'Peaches and Cream' stallion prize winners at \$1,000 to \$1,500 (few little higher). Guaranteed better than any \$3,000 to \$5,000 'company stallion.' If you don't find it so and every statement in the greatest 1907 horse catalog on earth, you get the \$500 Iams hangs up. Iams can place \$1,000 or \$1,500 insurance on any of his stallions sold. You say, 'Why can Iams sell better stallions at half the price of others?' Iams buys and sells every stallion himself at his home barns. He buys stallions by 'special train load,' eighty to 150 at a time. He speaks the languages, saving you 20 per cent. He is not in the 'stallion trust,' saving you \$300. He pays no 'slick salesman' \$1,000 to sell you a fourth-rate stallion. He has no 'two to ten men' as partners to share 'profits.' He pays spot cash for his stallions, owns his farms, houses, barns, stocks and stallions. He sells stallions by 'hot advertising.' Our illustration on page one is Iams' Lamy (53952), four-year-old Percheron, weight 2,040 pounds, a 'Peaches and Cream' boy. A model drafter with 'two good ends and a middle' and a big, clean bone under each corner. A smooth-finished, swell 'black boy' that will put all 'your hair in a curl' with his big style and whirlwind action. He is only one of 150 'top notchers' that must be sold by Iams at bargain prices. Write for Iams' 1907 horse catalog. It has reading in it that will make you wear diamonds. It's worth its weight in gold."

## \*\*\*\*\* Farm Furrows \*\*\*\*\* Turned by a Practical Farmer.

When nature made the mule she forgot beauty points, but she made up on the utility points.

It was a city boy, I think, who defined water as that which got dirty when you put your hands in it.

A well patronized farmers' co-operative creamery is better than a gold mine to the village and the surrounding territory.

You will get more enjoyment in life if you compare your present success with your past instead of with your neighbor's.

"Am well pleased with the animal you sent me" is a phrase that I like to see in a letter after sending out a pure-bred animal.

If only the world could judge us and size us up by our best efforts and not our feeblest, we would come more nearly passing muster with our fellows.

I am thinking of painting a barn, but can hardly make up my mind whether to use the spray pump or not. It would save an immense amount of labor. If any reader has tried it, please help the Furrows man out of his fix.

I don't dabble much in household matters, but this experience amazed me: A friend of ours borrowed some linen to help out on a pinch and brought it back unlaundered. To me that practice has a tinge of coarseness about it.

The draft horse is the one that brings the money, but for all-round farm work give me a closely-knit 1,400-pounder. Indeed, I have a 1,200-pound standard horse that will make any drafter see stars before the crop is in and the corn all cultivated.

If we give anyone \$25 and get only \$22 in value in return we speak out immediately and in unmistakable terms. Yet in a year we sometimes give a cow \$25 worth of feed and get \$22 worth of produce without even knowing that we are cheated.

I cannot recall a time when freight was as much congested as it is at the present time. It seems to be an impossibility for the railroads to move it as fast as the people want it moved. If there were less water in railroad stocks there might be more locomotives available to haul with.

The morbid element in man's make-up seems to be exceedingly well developed these days. I am led to this conclusion by the amount of space that is given in our daily papers to such incidents as the Thaw trial in New York. Papers wouldn't print this kind of news if their readers did not demand it.

I am not saying that congressmen don't earn the \$7,500, because they say that their wives need a terrible lot of dresses if they live in Washington. Many congressmen are rich, of course, although a magazine writer recently recalled the fact that he had never known a case where one failed to draw his monthly stipend. We in the corn belt are not kicking so much on salaries so long as

# Big Saving to You On the Best Manure Spreader Made

**FIGURED** from any point of the compass—taking the question of the **first cost**—the question of quality—the question of capacity—the question of finish—the question of strength—the question of correct principles—the question of right working.

We, the makers of this celebrated **American Manure Spreader** will save you money every time on one of our high-grade machines. We not only save you money on the **first cost**—but we save you money per year's wear—because the **American** is made of the highest quality, best material possible to secure—and made on correct principles by skilled workmen.

If every purchaser of a Manure Spreader would first compare the **American** with all other makes, we would sell all the Manure Spreaders that are sold.

We know that's pretty strong talk—but the **American** will make good every claim we make for it. It is positively **BEST BY COMPARISON**—and we want to prove to you all the claims we make. We will sell you

## Direct from the factory and pay all the freight to you

at our low factory price, which leaves out all the jobbers' and dealers' dividends.

Set it up and use it, in your own way, on your own farm, for a full month—to prove every claim we make for it. If the machine *isn't* exactly as we claim it is—and *doesn't* do the work exactly as we say it will, and isn't perfectly satisfactory to you all you have to do is to send it back to us—and the month's trial won't cost you a penny. In this way you may have

**Free Use of an American Manure Spreader for a Month**

**AMERICAN HARROW COMPANY, 150 Hastings Street, DETROIT, MICH.**

Now we are the only manufacturers of a complete line of Manure Spreaders selling direct from factory to user. We are the only manufacturers of Manure Spreaders selling on **30 Days' Free Trial**—and the **American** is

## Sold on Time or For Cash

The **American** is made in 10 styles and 5 sizes—a size for every purpose, and it's the greatest money making implement you can have on your farm. It's a time-saver, a labor-saver, a profit-maker. Take care of your land—and your land will take care of you.

The question of fertilization has too long been overlooked by many farmers. Are you guilty? Our Big Spreader Book tells the rest of our story—it fully describes and gives pictures of our full line of American Spreaders. We want to send you this Book, **FREE**—the handsomest Spreader Book ever issued by anybody.

We keep a full stock of **American Spreaders** in all leading trade centers, and also carry a full line of repairs at these points, thus insuring quick delivery of parts in case of breakage.

Now why not get your order in, at once for an **American Spreader**? We are now giving Spring dating on early orders, and you might just as well have your Spreader at once. It doesn't cost you any more to buy now instead of later.

Write for our Big Book of full particulars and let us quote you a price direct to you—delivered at your station—all freight allowed. No matter what Spreader you have been thinking of buying—no matter what Spreader you have been looking at—send for our Book and Special-Delivered-to-You-Price—before you finally decide. Better write to-day—NOW.

we get good service, and none of us would have our great statesmen making laws in shabby attire.

Generally speaking, a specialist becomes more or less of a crank. A friend of mine has made a special study of corn and I don't believe that he could talk five minutes to anybody without getting on that subject. It takes a crank to move things, of course.

It would cost you about twenty-five cents a word to have a good painter make you a sign to hang on your gate post, where possibly a hundred, or, at the outside, not more than 200 people would read it. For five cents a word you can advertise in the classified columns of this paper and reach a circulation of 190,000.

When a man pays taxes on the full valuation of his land and at the same time it is mortgaged for half its value and if the holder of the mortgage pays taxes on his credits, is not that double taxation? To one out on the farm it looks as though the owner should only pay taxes on the equity he has in the land and let the man who holds the mortgage pay on the value of that mortgage.

I sometimes get very weary in trying to reproduce accurately an exact shading of feathers in fowls. One engaged in the pure-bred business has to do it, but I could never see the utility of this feather-marking business. While at a poultry show recently I saw some exceedingly well-marked Barred Rocks, but the fine feathers were not, in my

## PILES, FISTULA AND OTHER RECTAL, BOWEL AND STOMACH TROUBLES ARE DANGEROUS IF NEGLECTED

opinion, on the right birds. Certain birds of far superior individuality from my standpoint scored much lower than these fancy fellows.

I wonder if the day will ever come in the history of our children or our great grandchildren when we can elect a congress that has sand enough to cut off the free distribution of seeds? I have never had the face to ask my congressman for a package of these seeds and he has never been thoughtful enough to send me one without asking, so I don't owe the national government anything for seeds.

A game law passed in Illinois a few years ago brought about some surprising results. By the terms of this law every citizen who desired to hunt had to pay a \$1 license. It was thought that this license would bring to the state treasury the sum of \$20,000 or \$25,000, but it ran over \$100,000 the first year.

The citizens of Monroe county, Iowa, are circulating a petition for signatures

## JOIN THE UNITED STATES NAVY

**GOOD PAY**, with board, lodging, medical attendance free. Every recruit is given a \$45 outfit of clothing. \$5 increase pay for re-enlistment. Opportunity to learn trade. Ages 17 to 25 for apprentice seamen, 21 to 35 for mechanics. Address, Navy Recruiting Stations, Des Moines, Cedar Rapids, or Davenport, Iowa; Omaha, Lincoln, Neb.; Sioux City, Ia.

which will afterwards be presented to the thirty-second General Assembly, the purpose of which is to bring about the enactment of a law prohibiting the shooting of prairie chickens in the state of Iowa for a period of five years. When this bill is introduced we believe that it should receive strong support from farmers generally.

A marvelous degree of prosperity is flooding the land. It is due to several causes. One is that during the last ten years important discoveries have been made in gold mining so that ore that could not formerly be worked at all is now yielding scores of millions of dollars annually. This has led to an increase in the supply of the world's money and no doubt that helps to make the wheels go round.

There is one thing that is badly needed in all small towns and cities, and that is a comfortable rest room for farmers' wives and daughters. I have seen women sitting around feed yard offices for hours, waiting for the men folks. It don't look right, gentlemen, and you shouldn't ask your good ladies to do it. The parlors of a comfortable hotel make much better waiting rooms than feed yard offices.

Our congressmen are not without the courage of their convictions, however, because they recently boosted their salary from \$5,000 to \$7,500 a year. This increase takes effect in 1909, so that many of those who are now in the harness will get their paw on some of the benefits.

**TO CURE A COLD IN ONE DAY**  
Take **LAXATIVE BROMO Quinine Tablets**. Drug gists refund money if it fails to cure. **E. W. GROVE'S** signature is on each box. 25c.

Do not fail to read the last argument of the Litchfield Mfg. Co. which they are offering our readers this week for the Litchfield Manure Spreader. This is on page 5 and attempts to explain clearly the difference between freak changes and durable improvements.

## WHAT DO YOU SAY?

Low wheels, wide tires; easy work, light draft. We'll sell you a set of the best steel wheels made for your old wagon. Spoke united with hub, guaranteed not to break nor work loose. Send for our catalogue and save money.

**ELECTRIC WHEEL CO., Box 43, Quincy, Ill.**

## Musgrave Wire Stretcher

Stretches fence post end post; turns with a crank; pulls 10,000 lbs., \$6.00. Also ask for cut. lawn, poultry and hog fences and gates.

**MUSGRAVE FENCE CO., Des Moines, Iowa**

We present to the readers of The Homestead the above likeness of What You Say 36591, one of the boars in use in the herds of Messrs. E. H. Deal & Son, of Elwood, Ill., and Fred Schweizer, of Elwood, Ill. This boar is, in the opinion of the writer, the best son of Proud Advance to be found. The dam of this boar was Amy M. by Orion, so that the blood lines cannot be improved. What You Say is a two-year-old, of show-yard merit. A number of sows in the forthcoming sale of Messrs. Deal, Schweizer and J. G. Norton, which will be held on Tuesday, February 19th, are bred to this noted boar. See field notes.

# THE HOMESTEAD

A Practical Journal for the Farmer,  
Stockman, Fruit Grower, Poultryman,  
Gardener and Housekeeper.

BY JAMES M. PIERCE.

JAMES ATKINSON, Editor in Chief.

ESTABLISHED IN 1855.

Entered at Des Moines Postoffice as second class matter

PUBLISHED EVERY THURSDAY.

**SUBSCRIPTION RATES**—Single subscriptions, \$1 a year; ten copies one year, \$10, and an extra copy to get up of club. In clubs of one hundred or more, 25 cents a year. Single subscription three years in advance, \$2; five years in advance \$3; ten years in advance, \$5. Remit by draft, registered letter, postoffice or express money order. In renewing subscription, use same name and initials as address on paper, or explain why you change. In changing your postoffice address, send the old address as well as the new. Errors in address or failure to receive paper within two weeks should be promptly reported to the publisher.

Address all communications and business letters to

THE HOMESTEAD COMPANY,  
Des Moines, Iowa.

## CENTRAL SHORT-HORN BREEDERS' MEETING.

The annual meeting of the Central Short-horn Breeders' association was held at Kansas City on Tuesday and Wednesday of last week. It was not largely attended, which, no doubt, was due to the severity of the weather at that time. However, an interesting program was carried out and, all things considered, the meeting was a successful one. Following the address of W. A. Harris on "Showyard Etiquette," a resolution was offered by N. H. Gentry which will be presented to the management of the various shows of the United States. The resolution is as follows:

Resolved—that it is the sense of this meeting that at all live stock shows the management should strictly enforce the rules, that only attendants of stock, superintendents and judges be allowed in the arena while the decisions are being made.

An excellent paper had been prepared by John R. Tomson of Dover, Kan., on the subject "Straight, Crooked or Cross-wise, but Always the Best." This paper was read by James Tomson in the absence of his brother. The main thought in Mr. Tomson's paper was that there is at present too much attention being paid to pedigree and not enough to the individual merit of animals, and especially to the character of the animals that are mated. Men in a general way buy promiscuously, in most cases making their purchases on the basis of blood lines without taking into account sufficiently the conformation of the male, and especially his adaptation to the herd of females.

Mr. Tomson's paper brought forth an interesting discussion, and men on every hand seemed ambitious to denounce the practice of laying so much stress on imported sires as compared with American-bred animals. It was shown that animals are brought to this country from Great Britain that are decidedly mixed in their pedigree and yet they are considered, in the main, to be straight Scotch. If an animal bred on this side, however, is at all mixed it is discounted at once. Mr. B. O. Cowan brought out the thought that some of the greatest bulls that have been used in this country, that is bulls that have produced the best calves, have had less than 75 per cent of Scotch blood in their veins. This pedigree craze, in Mr. Cowan's opinion, is gnawing at the very vitals of the Short-horn business.

Mr. W. L. Miller, of Peru, Ind., who is an exporter of Short-horn cattle, gave a talk on the "Possibilities of a Foreign Market." He called attention to the fact that breeders of this country make the mistake when they advertise Scotch Short-horns instead of American-bred Short-horns. This gives breeders abroad the idea that because we are importing largely from Scotland our cattle therefore cannot be as good as they are in their native land. Rather than come here for Scotch cattle, it is natural that

they should go directly to the heather hills. Mr. Miller urged that breeders should test their herds for tuberculosis, because no animal that will not stand the tuberculin test is allowed to enter South America. He expressed the opinion that it would pay handsomely to have the herd tested and advertise that fact before the world. If it could be demonstrated that American herds are kept free from this disease this fact alone would do much to assist export trade. Prof. R. J. Kinzer, of the Kansas Agricultural College, gave an interesting talk on foods for economic beef production. He pointed out the great possibilities of accomplishing good results by the use of foods grown on the farm.

A banquet was enjoyed at the Coates House at the close of the meeting. The ceremonies were presided over by B. O. Cowan, who, in a happy manner, discharged the duties of this important office. Among the speakers were President Robinson, of the live stock exchange; President Swift, of the national live stock exchange; General Manager Rust, of the stock yards company; Ex-Senator W. A. Harris and the Rev. F. V. Loos, of Liberty, Mo.

As said before, this meeting was a success in every way, the only regret expressed by those present being over the small attendance. The program was entirely too good to be carried out before empty seats. It is our intention to publish the papers read from time to time, so that in this way a larger circle of breeders will be reached than simply those who were present last week.

## The Week in Kansas.

To the Editor of The Homestead:

This week has been winter. It has been a little colder than Kansas winter, too. It has been real winter. The man who, a few weeks ago, was afraid we would not get cold weather enough to freeze the ground as much as it should be, is satisfied on that score now, but is afraid it has been so cold that the peach crop has been killed.

It did not get as cold as it felt. Everyone outside the knowledge of a thermometer felt that he was moving around in about 10 below zero weather. In reality, according to a reliable thermometer we go by, it barely reached the zero mark. It was just as cold as it could get at that point, though.

Of course the newspapers have hailed it as "intense cold; stock suffering," and such like phrases. They never lose a chance to make each storm a little worse than it is, or a prolonged drouth just a little more prolonged and a little more injurious than it is.

Here there is barely a skiff of snow on the ground, all that fell here. From the newspapers, we learn that some sections of the state received as many as six inches of the whiteness, enough to make some showing for good on the wheat that is now locked up in the soil, along with all the moisture it can hold. More snow than we have had would have benefited the wheat of eastern Kansas.

Yesterday the price of hogs passed the seven cent mark in Kansas City, reaching the imposing mark of \$7.02½ a hundredweight. Thoughts are now turned on eight-cent hogs. Before seven-cent hogs became a reality, that was the coveted mark, but now the goal has been placed one long notch further off.

The work of the week has been the chores and grumbling at the weather. The roads were frozen when about as rough as it is possible for roads to become, and the roughness is being slowly worn off by the necessary traffic. There is enough moisture locked up to make every road muddy when the thaw does come, so traveling is being done by many now, taking roughness in preference to mud.

This evening there is a sign of a return of another spring, though of course there is still more winter to come, even if spring-like weather should come to stay for awhile. It is only a matter of about three weeks, however, when we of Kansas look for the kind of weather when we expect to start spring grain sowing. A gentle breeze is blowing from the south; the sky is almost cloudless, and off to the west, as the sun went down, there was promise of a good day tomorrow.

Henry Hatch.

Coffey Co., Kansas, Feb. 6, 1907.

## The Manley Sale.

As usual, a good crowd attended the Durro Jersey sow sale of Messrs. E. H. Manley & Co., at Lyons, Neb., on February 5th.

## Get Your Order In Early

For a Detroit Tongueless Disc Harrow  
Sold On Time—or For Cash

## ON 30 DAYS' FREE TRIAL

Last year 1463 people waited too long before ordering. We were all sold out—factory couldn't keep up and we had to disappoint these 1463 people by returning their orders. Just couldn't make Disc Harrows enough to go round—that's all. Why?

Well, if you are at all familiar with Disc Harrows, and will look at the picture in this advertisement, you will see some of the reasons why we could not make enough to meet our demands. There is no tongue to pound up horses—whipping back and forth. No pushing or crowding of the team on corners. No tongue weight to gall up the horses' necks. No one horse pushing—and one pulling, on turns—just straight, even pulling ahead all the time. Perfect balance of frame makes Disc roll smoothly. Lightest draft Disc made.

These are a few of the reasons why we sold so many Detroit Tongueless Disc Harrows last year. There are other reasons explained in our book—too many of them to give here.

Now here's a big patent feature for 1907—an additional feature over last year.

## OUR TRANSPORT TRUCK ATTACHMENT

Notice the truck wheels just back of the Disc blades? You can attach them in a minute's time to the Detroit Tongueless Disc Harrow—and Discs are raised from the ground—elevated on light running front and back trucks.

This puts your Disc on wheels and you can drive anywhere—over rough roads—sand—gravel—stones—or bridges—without dulling the Discs or cutting up the surface. Strong brake makes driving down the steepest hill perfectly safe.

It's a great convenience—that patent TRANSPORT TRUCK of ours! And it's found on no other Harrow on the market.

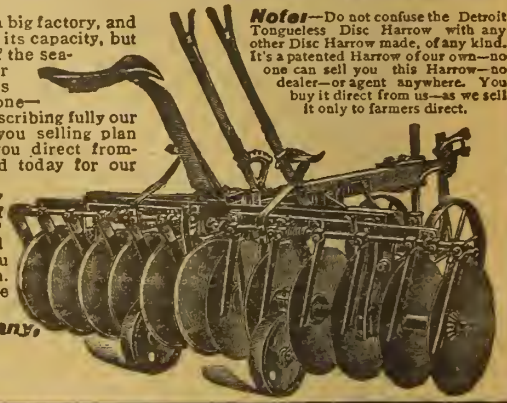

**Important.** Now we have a big factory, and are running it to the very limit of its capacity, but

Right now—way in advance of the season—half of our factory output for

Spring is sold—and a flood of orders are coming every day. If you want one—and you will if you get our Book describing fully our various sizes and our direct-to-you selling plan (time or cash) and prices quoted you direct from factory-to-station—you should send today for our Book, Plan and Price.

Just write us on a postal—say "Send me full particulars of Detroit Tongueless Disc Harrows"—and we'll send you our Book and other printed matter and quote you a direct price, at your station. Freight guaranteed—on our Free Trial Plan.

American Harrow Company,  
W. W. Collier, Gen'l. Mgr.,  
147 Hastings St.,  
Detroit, Mich.

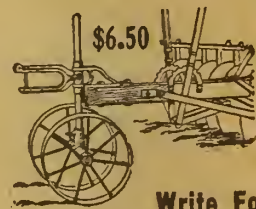

**Notes**—Do not confuse the Detroit Tongueless Disc Harrow made, of any kind. It's a patented Harrow of our own—no one can sell you this Harrow—no dealer—or agent anywhere. You buy it direct from us—as we sell it only to farmers direct.

## New Tongue Truck

### FOR DISK HARROWS AND OTHER MACHINES

No need of buying a new Harrow, Mower or Seeder to have the new tongueless implements. Your old implements can be made modern and up to date by buying one of our inexpensive Famous Tongue Trucks. Can be attached as shown in picture to any implement, old or new, and is the simplest and most practical truck made. Takes the weight from the horses' necks, prevents bruises and galls. Only truck made which permits raising or lowering of tongue and hitch at the same time, thereby causing direct draft and even cut of disks. Write postal for particulars.

**Write For FREE** Circular describing different style Trucks and our proposition to send Truck on 10 days approval. Send your name and address today.

Crescent Furnace and Foundry Co., 600 Madison St., Des Moines, Iowa.

## THE OLD RELIABLE ..Anti-Friction Four Burr Mills..

Double the Capacity of other Mills.  
TWO-HORSE mill has 24 ft. grinding burrs all grinding at once and grinds from 25 to 50 bu. per hour. Four-horse mill has 30 ft. of grinding burrs and grinds from 60 to 80 bushels per hour.

30,000 Bu. With One Set of Burrs.  
I have used a Mogul No. 1 mill for 7 years and it has ground with one set of burrs more than 30,000 bu. of corn and the burrs are still in good condition. F. F. Craig, Mt. Carroll, Ill.  
Absolutely no friction or gearing. Will earn cost price in three days. The largest ears of corn to these mills are like pop corn to other mills. We manufacture the most durable and fastest grinding line of mills sold, including our Famous Iowa No. 2 for \$12.50. Send for free catalog. Bovee Grinder & Furnace Works, Waterloo, Ia.

## HORSE OWNERS! USE

## CAUSTIC BALSAM.

A safe, speedy and positive cure. The safest, Best BLISTER ever used. Removes all blemishes from horses. Impossible to produce scar or blemish. Send for circular. Special advice free.

THE LAWRENCE-WILLIAMS CO., Cleveland, Ohio.

The offering was in good condition and an average of \$100 was made on forty-six head. No. 1 topped the sale at \$450 and went to Messrs. Tryon & Son and Will Stone at Lyons, Neb. Advance Lady, a daughter of Proud Advance bred to Junior Jim was the second highest and was purchased by Mr. C. H. Riser, Sanborn, Iowa, at \$260. It was a more even sale than they have ever made before. Colonel Luther cried the sale. Below is a list of buyers and prices paid:

Lot.	Buyer	Price.
1	Tryon & Son and Will Stone, Lyons, Neb.	\$450.00
2	Peterson Bros., Lyons, Neb.	180.00
3	John Tryon & Son	75.00

## DEAR EDITOR:

You no doubt know that nearly all last season our company sold the best 600-pound per hour capacity hand cream separator made for about one-third the price generally asked, and gave everyone a free trial.

As you are interested in the welfare of your readers, I wish you would say to them, one and all, through the columns of your paper, that for this season our separators have been improved to a point of perfection, still further outclassing any other separator made, still easier to operate, still larger capacity, and impossible to get out of order or give trouble, and any reader who will write to Sears, Roebuck & Co., Chicago, and ask for their 1907 Cream Separator Catalog, will receive the big book by return mail, postpaid, free, together with the lowest prices and the most astonishingly liberal offers and inducements we have ever made.

Yours very truly,  
R. W. SEARS, President Sears, Roebuck & Co.

## Interstate and Swine Breeders' Meeting

One of the most important meetings of the year was held at the stock yards, Sioux City, Iowa, on Tuesday and Wednesday of last week. This was the annual meeting of the Interstate Breeders' Association held in conjunction with the Iowa Swine Breeders' Association. Unfortunately, the dates of this meeting came at a period when the weather greatly interfered with the attendance. Stockmen, as a rule, are not prone to leave their herds when the weather is below zero. There were from 100 to 150 present when the program was being carried out.

### Prof. H. R. Smith, on Feeding.

Prof. H. R. Smith, of the University of Nebraska, gave a decidedly interesting and instructive talk, using for his subject "Cattle Feeding in the Corn Belt." He based his remarks on experiments that have been conducted at the Nebraska station and presented such facts and figures as to indicate that it is a decidedly better policy to feed cattle, even though only market price is obtained for the grain and roughage consumed than it is to haul grain to the elevators. Indeed, the experiments cited by Professor Smith indicated that under ordinary conditions one can do much better than merely to market his grain through the medium of beef and pork at prevailing elevator prices. One important matter touched on by Professor Smith was the fact that as a general rule men feed grain too heavily and do not use enough good fodder. Where alfalfa is available, a ration composed

of equal parts corn fodder and alfalfa fed along with corn meal gives excellent results. He showed that even a half grain ration fed with good alfalfa hay and corn fodder will make as much as two and one-half pounds of gain daily per steer throughout a given feeding period. By doubling the grain ration and cutting down the roughage, slightly larger gains are made, but these are put on at a greater cost than the feeding of a ration composed of fourteen or fifteen pounds of grain daily, together with all the good roughage that the steers will eat.

### Prof. Andrew Boss on Stock Judging.

The second item on the program was a stock judging demonstration given by Prof. Andrew Boss, of the University of Minnesota. Both horses and cattle were used in the ring for this purpose. He gave briefly the aim and purpose of the score card as applied to judging animals, expressing himself as believing that it was strictly a means to an end, emphasizing as it does to the mind of the young breeder the relative importance of every part of the animal. The importance of breed type was emphasized by Professor Boss, and in the case of beef animals he called special attention to the emphasis that should be placed on the merit of animals in their most valuable parts—that is, parts that are of greatest value on the block. He pointed out where there might be some conflict between the ideal packer's animal and the ideal breeding animal, inasmuch as the lower part of the body is largely made up of cheap meat, though the breeder must have these parts developed in order to give balance to his animal and to insure strong constitutional powers.

### H. G. McMillan on the Draft Horse.

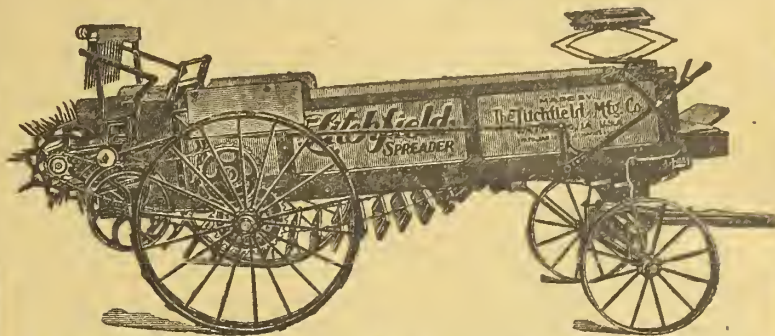

The subject of draft horses was discussed by H. G. McMillan, of Rock Rapids, Iowa, on the evening of the first day of the meeting. Mr. McMillan expressed it as his opinion that already the territory adjacent to Sioux City had established a national reputation for good horses, his claim being that every market in the United States was on the outlook for drafters from that locality. This is due to the fact that climatic conditions are ideal for raising the draft horse, the right kind of feed stuffs are raised in great abundance, while, lastly, farmers have been wise enough for many years to use good sires.

Mr. McMillan deplored the fact that at the present time most of our purebreds were raised on large farms. He gave it as his opinion that instead of this being the case it would be much better for farmers and for the horse industry generally if on every farm could be found two or more good draft mares, and so much the better if they were recorded mares. Attention was called to the fact that prices of horses were high on account of the mammoth proportions of trade generally. Practically every pound of freight shipped over the railway has to be hauled by the draft horse before it is loaded and also after it reaches its destination. There has been no other agent yet discovered that could take the place of the horse where materials have to be hauled over the natural soil or on any kind of highway but those that are paved. In the future the growth of commercial enterprises can only affect the draft horse industry favorably, in the opinion of Mr. McMillan, and that therefore farmers generally are justified in going into the business and raising good ones. Nothing can hurt the horse industry but a general demoralization of trade, brought on by commercial disturbances, failure of crops or through other agencies.

### Mr. John Thompson on Farm Management.

The editor of The Farmer's Tribune at Sioux City, Iowa, Mr. John Thompson, gave an address on the subject of farm management. He pointed out that the great weakness in the agriculture of the corn and wheat belt is that farmers do not keep records, and, in the second place, they do not employ sensible methods of rotation on their land. One reason for lack of rotation is that the farm is not judiciously fenced. Mr. Thompson strongly advised dividing up the farm into fields of uniform size in order that a definite plan might be in-

## THE DIFFERENCE

### BETWEEN IMPROVEMENTS AND CHANGES

IMPROVEMENTS, like our good American citizens, are a necessity. They are the best that is, representing life and progress. "Changes" are like the gypsy, better if they never happen. The greatest injustice that has ever been perpetrated on the buyer of American machinery is the substitution of "changes" for improvements.

"In the beginning" it was fully determined that such changes as occurred in connection with the Litchfield Spreader should be improvements and a class of improvements that would exercise a mellowing influence on the ragged repair edges and the expensive break downs and the aggravating delays, which are the usual mile posts along the "Rocky road to Dublin," over which all Manure Spreaders must travel before their swaddling clothes and nursing bottles are permanently discarded.

If our readers will take pains to compare the changes that have occurred from time to time on the Litchfield Spreader, it will be noted that these are absolute and bona fide improvements that have a practical value and not value in theory only. Take pains to search out the quality of these improvements. Compare them with the lack of improvements on other machines or the changes on other Spreaders that have been made and labeled "improvements."

When the Litchfield Spreader came out with its swinging section conveyor, this was an improvement; pure, simple and unadulterated and nothing but solid, substantial facts all "hinged together" for working results.

Later when the shell built steel wheels were offered in place of the old-fashioned kind and when the single lever in place of the half dozen similar appendages found on other machines, were introduced, these were not simply "changes," but were genuine improvements. Still later when actual improvements were offered on the business end of this modern machine, they proved to be as represented and the proof is growing stronger every day. We might go on and enumerate one improvement after another that has been applied in a business-like, tried-out and substantial way to the Litchfield Spreader, but this space will not permit it.

Allow us simply to say that the ideas that later become improvements on the Litchfield Spreader, usually hatch out a few years ahead of the "other fellows," and this Spreader now stands as a monument of results, obtained by persistent, systematic and determined efforts to improve (not "change") this deservedly popular Manure Spreader.

THE LITCHFIELD MFG. CO., P. O. Box A388, WATERLOO, IOWA

**\$5.95**  
Freight  
Prepaid

is all I ask for the

**Galloway  
Bike  
Harrow  
Cart**

Orders  
From  
Farmers  
Only  
Accepted

That's less than your dealer pays for the cart he handles. I was about to say "the cart he sells" but I'm not sure he sells any. He won't sell you one if you read this advertisement through to the end.

And I'll tell you why.

In the first place he can't sell you as good a cart, for I do not sell my cart to dealers. Dealers can't get them. I know all about this dealer business and how every farmer has to pay from 30% to 70% more for his goods, as I was a dealer myself once. But before I was a dealer I was a farmer and so I stick to the farmers. Many's the day I've walked behind a harrow with tired legs and my mouth full of dust.

I guess that's the reason I'm so enthusiastic about my harrow cart.

Another reason is that I can save you money. I am going to save you from \$2.00 to \$4.00 on the best harrow cart made. That means that 30% to 70%. I can't help feeling that you will appreciate my doing this.

Wait a minute now. Don't take my word for anything but send for my book, "The Proof of the Pudding." In that book farmers who have used my harrow cart answer these questions.

—Is it good value?  
—Does it save time and labor?  
—Can you do more and better work?  
—Is the draft light?  
—Is it strong?  
—Does it work properly on hillsides?  
—Does it follow the harrow all right in turning?

All these questions are answered, not by me, but by men I never saw, and who never saw me,—men who have used my Bike Harrow cart, and know just how good it is.

Now about my price. \$5.95—that's it, five ninety-five, freight paid. I have to laugh.

When I hear this talk about the implement trust and the dealers,—and those fellows selling harrow carts for \$8.00 and \$10.00 I just chuckle to myself.

Talk about forcing me to do this or that—they can't force me to do anything. I am dealing direct with the farmers and they are the fellows who have the money.

But to get back to the harrow cart. Send me \$5.95 and I'll send you the cart, freight prepaid. Try it—at my expense. If you don't want to keep it send it back at my expense and I'll refund you \$6.00—that's what you paid me and fee for postage.

Write today, send an order. If you're not quite sure send for my booklet. A postal will bring it. Don't go through another summer's work without one of my New Galloway Bike Harrow Carts.

*Wm. Galloway*  
President of William Galloway Company,  
105 Commercial St., Waterloo, Iowa.

stalled whereby each field would from year to year receive the same treatment as every other field. Where the farm is unequally divided it is almost impossible to carry out any kind of a scientific system of crop rotation.

### Mr. A. J. Lovejoy on Breeding and Feeding Swine.

Mr. A. J. Lovejoy, of Roscoe, Ill., the well-known breeder of Berkshire hogs, read a most interesting paper on breeding and feeding of swine and building up trade from a breeder's standpoint. To be successful in the swine industry a man should be of unimpeachable character, said Mr. Lovejoy, and be sufficiently broadminded to see beyond the present horizon. He must not get discouraged, but ever keep his eye on the bright star of hope. Clouds will appear in the business, but to succeed a man must stick to it to the very end. Pluck is the word that describes it. Start in a small way and let your knowledge increase by experience. It does not follow that because one litter of pigs will bring so much that twenty will bring twenty times that amount. Three or four sows may be enough to start with, but try to get good ones, and the male, especially, should be as good as you can afford to buy. Feed the breeding herd sensibly and make your balanced ration out of foods largely grown on the farm. For brood sows during the gestation period, equal parts, by measure, of corn and oats, ground fine, and an equal measure of good middlings will give good results. Alfalfa is also extra good where one has access to it. A mixture composed of equal parts of ground alfalfa, ground corn and ground oats makes an excellent ration. For finishing hogs, a ration composed of 80 per cent corn and 20 per cent tankage gives excellent results. Never feed brood sows heavily on corn, as it makes them feverish and in no way fits them for parturition. A dry bed is essential in the winter and spring, and do not forget to do a little spraying occasionally with disinfectants, such as the coal tar products and crude petroleum.

Work up your trade by exhibiting at county fairs, by advertising in agricultural papers, and when you are ready for it, exhibiting at state fairs. Keep your advertisement constantly before the public, as there is little profit in advertising spasmodically. Use all your mail order buyers just as well as if they could see your herd. Keep copies

of all letters and please your customer at any cost. Never over-describe a hog. Remember that a satisfied customer is a living advertisement for you. When you are selling sows supposed to be in pig, keep them until they show signs of pregnancy, and this will save you lots of trouble. The public sale is a good place to dispose of one's surplus stock, though the seller should take special pains to catalog nothing but what is first class. Every individual in the offering should be in good condition, but not specially loaded with fat.

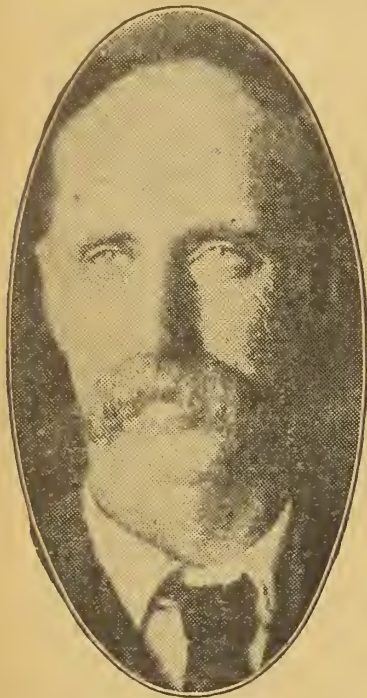

### Paper by Mr. L. H. Roberts.

The well-known Duroc Jersey breeder, Mr. L. H. Roberts, of Paton, Iowa, took for his topic the opportunity for increasing returns from swine on the average farm. Mr. Roberts stated in the first place that swine on the average farm are far from being as good as they should be. Any increase in returns from swine on the farm must have its foundation in better blood. Select the breed that you like best and choose your males every year from good pure-bred herds. Do not cross breed. The man who has grade herds cannot afford to use an inferior male any more than can the pure-bred swine breeder, and the poorer your sows are, the great-

er is your need for using a good boar. Hold onto the same breed year after year and build up. When a sow has proven herself a good breeder, stand by her. Mr. Roberts gave an instance of one sow in their herd, Ohio Annie, that was kept as a breeder long after she ceased to be able to raise her own litters.

Sanitary conditions and surroundings are highly important. Give the hogs natural conditions as far as possible by fencing the farm hog-tight and letting the hogs have access to large pas-

L. H. ROBERTS.

tures. Disease is much less common on farms that are fenced hog-tight than on those where the penning up system is employed. Cultivate your feed lots and crop them. Grow rye, oats, corn, rape, or anything else, rather than allow your feed lots to be bare.

When the pig is growing, feed so as to cultivate the development of muscle and bone. It is a mistake to fatten young pigs. The fattening or finishing period should be short, ninety days being about the length of time that the average hog can stand heavy feeding with corn. The packer, the breeder and the farmer, according to Mr. Roberts, have a community of interests that should be fostered, and that should not be endangered by any petty jealousies or false ideas. The type demanded by the packer and that produced by the breeder is practically identical at the present time, though there is a good deal of talk about differences. Most of the fellows who do the talking, however, are only acquainted with one side of the case.

#### Mr. Harry G. Krum on the Bacon Hog.

Mr. Harry G. Krum, secretary of the American Yorkshire Club, discussed "The Bacon Industry in the Northwest." He stated, in the first place, that there was no conflict between the fat and the bacon type of hog. However, as there was a growing demand among the American people for lighter meat, and especially for bacon, there is an important place in the great Northwest for rearing this type of hog. The ideal bacon weight is from 175 to 225 pounds—a weight that should be attained by good bacon hogs by the time they are from six to eight months old.

The character of the feed used has much to do with the quality of the bacon, and nothing is better than the small grain and pasture for making high-class products along this line. Too much corn makes a soft bacon. Mr. Krum showed by statistics that there is but little

# More Thrift—More Profit.

**WE guarantee that Standard Stock Food will put and keep every animal on your place in a vigorous, healthy, thrifty condition at less cost to you than will any other means you could possibly employ.**

**We sell Standard Stock Food to you on that square-deal guaranty.**

The modern domestic animal kept on high feed needs a little help from day to day—not medicine or dope or physic, but something to give variety to the ration and to make it taste better.

The animal needs something of this kind, a condiment, a flavoring, a seasoning, just as you need salt and pepper, mustard and horse radish and various kinds of flavors and seasonings to help you digest your food.

Standard Stock Food makes the ration taste better so that the animal eats it with a greater relish.

The very smell of it makes the animal's "mouth water"—that is, it stimulates the flow of saliva and other fluids which perform the work of digestion so that the animal digests its feed more quickly, more easily and more thoroughly.

Hence it makes the feed you feed go farther because less of it passes through the animal undigested.

\* \* \*

Its tonic properties quicken the circulation, aid assimilation and put the entire system in that prime condition which makes for finer finish and bigger profits.

We say Standard Stock Food does this better than any other stock food because it is made of purer, better ingredients, more scientifically compounded.

**STANDARD STOCK FOOD**  
**"IT MAKES STOCK THRIVE"**

As to its quality, you don't even have to try it to be convinced. If your dealer will open packages of various stock foods and let you compare them, you will find that the Standard looks better, smells better, tastes better and is better than any of them. It is stronger, richer and more concentrated.

That's why you need feed so little

**STANDARD STOCK FOOD CO.,**  
**1516 HOWARD ST.**

of it and that's why it costs you less per animal per month than any other stock food made.

Do not be misled by a low price per pound. Examine the directions for feeding on various packages and you can see for yourself that a dollar's worth of Standard Stock Food will last longer and go farther than any other. It is the most economical stock food made.

## Our Square-Deal, Money-Back Guaranty.

You buy Standard Stock Food on a money-back guarantee. If it does not do exactly what we say it will do, you get your money back. You know the editor of this paper would not print this advertisement if he did not know that we will do exactly what we agree to do.

## Go to Your Dealer

and ask him to supply you; if he cannot, do not take a substitute but send to us direct. We will ship immediately and protect you with our square-deal, money-back guaranty.

## Free to You.

Our big stock book, "The Standard Feeder," 160 pages, 200 illustrations, 12 chapters on feeding, care and handling of all kinds of live stock. Regular price 50 cents, and you could not buy its equal at several times the price. But free to you if you give us the name of your dealer and tell us how much stock you keep.

**STANDARD STOCK FOOD CO.,**  
**OMAHA, NEBRASKA.**

difference in the cost of making a 100-pound increase in the various breeds of hogs. If there is any advantage, the bulk of available statistics shows this advantage to be in favor of the bacon type rather than the lard type. This is probably due, said Mr. Krum, to the fact that the bacon hog has strong constitutional powers and consequently a good digestive and assimilative system.

American bacon used for export trade has always been surpassed in quality by that furnished by Canada, Denmark and Ireland. By giving more attention to the right type of hog and to the plan of feeding, Mr. Krum expressed the belief that American bacon could get to the very top.

#### Demonstrations by Mr. J. J. Ferguson.

One of the interesting events of the two days' session was a demonstration given by Mr. J. J. Ferguson, of Swift

& Co., first on live hogs and afterwards on their carcasses when slaughtered. Mr. Ferguson pointed out, in the first place, that the packer had no preference either in breed or type of hog, because a market had been developed for all classes that were offered for sale. There are something like seventeen different classes into which hogs can be divided on the market; consequently everything can be used so that farmers are able to obtain profitable prices for all healthy hogs sent to market.

Mr. Ferguson called attention to one matter that should be of special interest to men who are raising hogs in the corn belt. He stated that while vegetable oils were to a considerable extent encroaching on the lard market, yet it has been found out that these vegetable fats are not so desirable for many purposes as is the hog fat. The market on lard at the present time is strong; hence

the demand for fat-backs and well-finished heavy-weights.

Another point touched on by Mr. Ferguson was that relating to the type of bacon hog. He demonstrated that an under-done hog of the fat breeds by no means makes a good bacon type. This is a matter of breed combined with certain methods of feeding.

#### Dr. G. A. Johnson on Tuberculosis.

Dr. G. A. Johnson, chief of the bureau of animal industry at the Sioux City Stock Yards, gave a demonstration on the morning of the last day on hog cholera and hog tuberculosis. It was pointed out by Mr. Johnson that at the present time from 2 to 3 per cent of the hogs marketed are found on post mortem examination to be affected with tuberculosis. In most instances these hogs are apparently healthy and are purchased without being subject to the post mortem test. The loss, therefore, comes at the present time on the buyer, though the day may come when the seller will have to bear this burden. It is highly important that farmers in the future should pay more attention to the matter of pasteurizing all milk products used, because this is the principal source of contamination.

#### Entertainment and Banquet.

The sessions were ended with a splendid banquet given by the Sioux City Stock Yards, and it goes without saying that no feature of the meetings was more popular than this event. That things ran so smoothly during the entire two days' meeting was in a measure largely due to the efforts of the secretary of the Sioux City Stock Yards, Mr. McGivney. Every equipment needed was supplied, and supplied on time, and in addition, nothing was left undone to add to the comfort of visitors and to increase the educational value of the sessions. Sioux City is unquestionably a most excellent center for meetings of this character, and with a little more zeal employed by way of bringing a meeting like this before the public, Sioux City will in the future be one of the most important, if not the most important, point in the corn belt map for stockmen's meetings.

#### A Successful Combination.

The Combination Oil Cure for Cancer and Tumor is a recognized success. Beware of imitators. Write today to the Originator for his free books. Dr. D. M. Bye, 316 N. Illinois St., Indianapolis, Ind.

We present to our readers this week a very good likeness of the noted breeding and show boar, Proud Advance. This boar was first in class and sweepstakes boar bred by exhibitor, at the Iowa State Fair, 1903. He was the sire of more high-priced sows than any other Duroc boar. On Saturday, February 2d, he died and the Proud Advance Stock Company, composed of Messrs. Sheldon Bros., of Shannon City, Iowa, and White & Dewey, of Afton, Iowa, have suffered a great loss. There are few breeders of Duroc & Jerseys who are not acquainted with the records made by the get of this boar, and appreciate the kind of stock he produced. In the forthcoming sales of the members of this firm there will be a liberal offering of the get of this great sire and it is important that every breeder who is in the market for good stock should be present on these days. Further particulars regarding this noted sire will be found on page 39 of this issue.

A low wagon at a low price. Handy for the farmer. Will carry a load anywhere a horse can travel.

## Low Down Wagons

soon earn their cost on any farm.

## Steel Wheels

for farm wagons. Straight or staggered spokes. Any size wanted, any width of tire. Hubs to fit any axle. For catalogue and prices, write to Empire Mfg. Co., Box 103 H Quincy, Ill.

# CLASSIFIED ADVERTISEMENTS

ADVERTISEMENTS are inserted in this department of The Homestead (and, by special arrangement, also published in The Wisconsin Farmer, of Madison, Wis., and The Farmer and Stockman, of Kaukauna City, Mo., without additional charge) for the low price of five cents a word for each insertion, no insertion being accepted for less than \$1.20; and cash must invariably accompany the order, as we keep no books for this class of business. No display type or illustrations are admitted. Each number and initial letter or abbreviation, including the address, counts one word. Form for printing this page closes on Saturday of the week preceding publication, hence copy must be mailed so as to reach The Homestead on or before Saturday morning. Guaranteed combined circulation of the three papers over 190,000, reaching a farm population of at least 950,000 in the states of Iowa, Illinois, Nebraska, North and South Dakota, Minnesota, Wisconsin, Missouri, Kansas and Oklahoma.

## Stoner & Remley's Duroc Sale.

The breeders who were present at the Stoner & Remley sale on Friday, February 8th, were rewarded for their trouble in securing some of the best-bred stock, combined with excellent individuality that has gone under the hammer this year, at bargain prices. Messrs. May & Porter, of Remington, Ind., topped the offering, paying \$155 for an April gilt, bred to Advance Col. one of the best sons of Proud Advance found anywhere. They also secured a daughter of this noted boar, bred to Stoner's Improver, \$126. Col. Judd McGowan opened the sale and was assisted in the selling by Col-

onels Reppert & Kell. A list of sales follows:

48 Same	37.00
49 Chas. Willey	33.00
Substitute, F. S. Taylor	31.00

## HINTS, SUGGESTIONS, DEVICES AND CONDENSED LETTERS FROM CORRESPONDENTS.

One of our readers, who signs himself Uncle Ed., writes as follows regarding a poultry colony house: "For years I have used a drygoods box as a colony house for the chickens raised simply to sell for early fry or broilers. Clothiers or dry goods merchants can sell you a box, say three feet high, three feet wide and four feet long, for a dollar. From this take one side and make a door as

shown in the accompanying drawing. The rest of the space should be left open and covered with a close-mesh rabbit netting, the meshes being so small that not even a mouse could crawl through. This is ample to house twenty to twenty-five till they are large enough to fry.

"With this kind of shelter, it is needless to even go to the expense of having the yards fenced. I give each colony an allowance of ground, usually two rods wide and three rods long. From the shelter to the opposite end of this allowance I stretch a small-sized smooth wire and on this I have an empty thread spool so it will slip freely on the wire. To this spool I tie the hen giving her about five or six feet of string. She can pass up and down the wire with perfect freedom and her chickens will stay with her. While they will mix with other chickens near with them during the day, they will return to their respective shelters to roost.

"On the bottom of the box I have a pair of hinges, shown at AA, so that the top of the box can be raised and the bottom left. In this way the droppings can easily be cleaned from the box.

"As the chicks grow older, roosts can be placed in the box and the opening in the side admits enough air so there is no danger of suffocation."

While there are a great many cattle that lose their horns by dehorning fluids and preparations of this kind in calf-hood, there are a great many that come to maturity with an ugly pair of horns that create a great deal of trouble in the feed yard. We have received quite a number of inquiries of late requesting a plan for a good dehorning chute. Accordingly we have here reproduced a most convenient and satisfactory chute.

One of the good points about this

You never saw a  
saw which saws  
like this saw saws

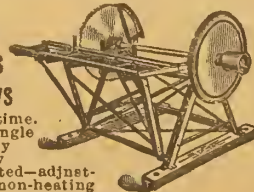

and last so long a time.  
Frame of heavy angle  
steel set on a  
braced—absolutely  
no shake. Patented—adjust-  
able, dust-proof, non-heating  
oil boxes, etc. We make these

### Appleton Wood Saws

in 6 styles—strong, simple, safe and successful  
—and we make a 4-wheel mounting for wood  
saws and gasoline engines which is unequalled
